## FOTTLER, FISKE, RAWSON CO., BOSTON

$W^{\text {E }}$E want you to know more about the "Boston Quality" "Highest Grade Seeds," has been our motto for years. It requires more land each year for us to make our trials of seeds, both vegetable and flower, that we may maintain the "Boston Quality" "Highest Grade Seeds." These seeds are not only tested, but grown to maturity during the Summer, that we may know just what the seeds we sell will produce. We know they will grow, for they have all been tested as to germination before being placed on sale; we can give you the 1 ercentage of germination if you wish.

Free Delivery Direct to the Planter. We deliver free to any post office in the United States all flower and vegetable seeds quoted in this catalogue by the packet, ounce, half pound and pound. Also builbs at single and dozen rates, except where noted.

If Beans, Peas and Corn are wanted by the pint or quart, please refer to pages on which they appear in this catalogue for delivery price.
Fertilizers, Insecticides, Potatoes, Grass and Faru Seeds, Plants, Shrubs and Suntiries are not included in the free delivery.

Non-Warranty. We give no warranty, express or implied, as to description, quality, productiveness or any other matter of any seeds, bulbs or plants we send out and we will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms they are at once to be returned.
Remittances should be made in the form of Express Moner Order, I. O. Money Order, Bank Draft, or Liegistered Letter.

Customers can also shop by express, as all express companies have purchasing departments in all their offices. They make no charge other than the regular rates for returning the goods.

When Orders are not accompanied by cash, parties who have no account. With us must furnish satisfactory references, Boston preferred, on account of a saving of time. Charge orders from unknown

A view of South Market Street taken about $8 o^{\prime}$ ciock in the morning-just an ordinary busy morning. On the extreme right, just beyond the Quincy Market building, is the "Old Faneuil Hall", and directly opposite is Fottler, Fiske, Rawson Co.'s store just at the head of the market district
parties not accompanied with references will be delayed, pending the usual investigation.

We make no charge for packing cases, baskets or barrels. Oloth bags only we charge for and these at cost. $1 \mathrm{pk} .10 \mathrm{c} ., 1 / 2$ bus. $12 \mathrm{c} ., 1$ bus. 15 c ., 2 bus. 20 c.
Be sure to sign your name and give your address.

## Bureau of Employment

We constantly receive applications from reliable. experienced men who desire to make a change in their employment. We should be pleased to furnish their names to anyone wishing to engage a Superintendent, Head Grower or Assistant. No charge for this service.

## Special Department

We take pleasure in giving suggestions as to the use of shrubs and plants necessary to further beautify your grounds; the laying out and building new lawns or renovating old ones; where necessary we will draw plans of your grounds and designate where shrubs are to be set. If you wish we can furnish experienced men to perform the work.

We give prompt and personal attention to all inquiries through the mail.

## VEGETABLE SEEDS

This department offers a complete line of the latest and standard sorts with many of our specialties. Pages 2 to 43.

## FLOWER SEEDS

Extraordinary care is taken to secure only the best strains, of "Highest Grade Seed." \% Pages न̈: to 99.
GRASS SEEDS Only the hest "IIighest
Grade Seeds" are used. Our
formulas are this grade only. Pages 44 to -2.

## SUNDRIES

A very complete list will be found on pages 149 to 16 S .

# FRANKLIN PARKLAWNSEED 

TRADE MARK REGISTERED

## Superior Mixture for Lawns, Terraces, Croquet Grounds, Etc.

The mixture of grass seed that we sell under this name is made by the identical formula used by the Park Commissioners of the City of Boston in their work in laying out the beautiful lawns and terraces, which add so much charm to our new parks. For many years the grass seed used on these parks has been supplied by us, which fact should be a strong guarantee of quality. The Franklin Park mixture gives a fine, velvety sward within a few weeks after sowing. Weight per bushel, 32 lbs . The very large demand for this lawn seed has necessitated our having the name "Franklin Park" registered as a trade mark, in order to protect ourselves from imitators.

Our Franklin Park Lawn Seed is made up of all recleaned seeds of the different varieties that will make a good lawn quickly, so that when the seed is sown, if the ground is in proper shape, it will start at once and in a short time show a beautiful, deep green lawn and attain the same during the season with slight attention.

You will find no chaff in our Franklin Park Lawn Seed; it starts at once, and it requires less seed to sow a lawn.
$1 / 2 \mathrm{lb}$., sufficient for $\mathbf{3 0 0}$ sq. ft. $\mathbf{\$ 0 . 2 0}$ 1 lb ., sufficient for 600 sq . ft. . 30 2 lbs ., sufficient for 1200 sq.ft. . 55 4 lbs., sufficient for 2500 sq. ft. 1.00 8 lbs., sufficient for $1 / 8$ acre . . 2.00 16 lbs., sufficient for $1 / 4$ acre . . . 4.00 32 lbs., suff icient for $1 / 2 / 2$ acre ... 7.50 64 lbs., sufficient for 1 acre

This price at our
store
Boston

Note the weight of our lawn seed compared with other brands. The reason our price may seem high is that the seeds used have all been recleaned and are absolutely free from weed seeds. We do not hesitate to say that Franklin Park Lawn Seed is the purest, cleanest and heaviest Lawn Grass Seed offered.

Delivered to any Railroad station, Express office or Post-office in the United States.
$1 / 2 \mathrm{lb} .30 \mathrm{c} ., 1 \mathrm{lb} .40 \mathrm{c} ., 4 \mathrm{lbs} . \$ 1.25,8 \mathrm{lbs}$. $\$ 2.35$, bus. of $32 \mathrm{lbs} . \$ 8.00$. This price delivered in your town or city.

[^0]> FRANKLIN PARK LAWN SEED
> Is from recleaned seeds-is quick to germinate-is free from weeds-no chaff seeds-it starts at onceThe cheapest to use

In many lawns there are trees which shade parts and sometimes nearly all the lawn, leaving unsightly places at times. Ordinary lawn seed does not give satisfactory results under these conditions. For sowing in such places we recommend the use of Special Mixture for Shady Places. In preparing such places for the reception of grass seeds we recommend the use of slaked lime quite liberally (at least 50 lbs. to 1,000 ft.). The lime sweetens the soil and aids wonderfully in the growth of the grass. l quart ....................... $\$ 0.25$, postage paid $\$ 0.35$ | 1 peck
.$\$ 1.50$, express paid $\$ 1.85$

The grasses used in making this special mixture are only those which are well adapted for growing in the shade, which in their natural and wild state grow and mature under these conditions.

## BOSTON QUALITY LAWN SEED

What is more attractive than a well designed house surrounded by artistically treated grounds and a beautiful lawn, the rich, green, velvety turf being always the most attractive?

You can make your lawn by using sod or sowing seed. If sods are used you may have your lawn quicker, but it is not to be compared to the one sown by seed, as the dry weather causes creases to form, about which the grass dies out, and the grasses in the sod usually found in the pastures or on the roadsides, which is usually the kind used, are not the kind to make a smooth turf on a lawn.

Use the "Boston Quality Lawn Seed." It is not the work of a novice to select varieties of grasses that will produce a lawn for all situations, but he must be a person of long experience and thorough knowledge of the growth of grasses that will make a good turf. You will find the "Boston Quality Iawn Seed" one that meets the requirements. It is composed of such grasses that make a good turf, carefully blended together in such proportions as will produce a good lawn when properly prepared and will grow under varied conditions, soils and climates and at different seasons of the year. Here is the advantage of the
"Boston Quality Lawn Seed.
For making new lawns use 4 bushels to acre; 1 qt. will sow 300 square feet or a plot 15 x 20 feet .

Pint Quart 2 quarts 4 quarts

## Golf Links Mixture

## Special Mixtures of Grasses for

Pleasure Grounds, Golf Links, Putting Greens, Etc.
We have given much attention to the grasses used in Putting Greens, Golf Links, etc., as there is no purpose for which turf is grown that is so exacting. No other grass is required to stand so much rough usage, and it is therefore very necessary that the proper varieties be used to produce a thick and lasting sod. Foreign grasses are largely used in our mixtures, selecting those that thrive well here, with the addition of some American varieties that are equally fine and that have proved satisfactory in our experiments as well as in practical results obtained on the various golf courses. By using these mixtures, which are prepared specially for each use and with proper care, the finest Putting Greens and Fair Greens can be had.
$1 / 4$ bushel .................... $\$ 1.50$, express paid $\$ 1.85$ $1 / 2$ bushel ................... 2.75, express paid 3.20

## Putting Green Grass Mixture

 1 bush. ( 20 ibs.) ............... 5.00, express paid 5.50 Sow at the rate of 5 bush. to the acre.

## Fair Green Grass Mixture

25 c . per lb.; 100 lbs . at 23c. per lb.; 1000 lbs . at 20 c . per lb. 50 lbs. should be sown per acre.

## Special Mixtures for Special Customers

We have many inquiries from customers who have made experiments of their own, and have found that certain varieties of grass will do better than others on their land. We are well aware that we cannot make one mixture that will do for all lands and are pleased to have our customers consult with us regarding varieties suitable for their particular land, or if they have certain varieties to include in their mixture we are only too pleased to serve them in this way, for we have, on page 51, a very complete list of fancy varieties that we always carry a large stock of and will put up any mixture desired. We have facilities for executing all such orders promptly.

## Sure Crop Stringless-WAX BEANS—Golden Prince

## 

## A Stringless Wax Bean of Great Merit

It is Early, Hardy, Stringless, Rust Proof, Finest Quality; Exceedingly Prolific. About all you can combine in one Bean.
The Sure Crop Stringless Wax is a dwarf-growing variety; strong, vigorous vines, producing early, rich yellow pods of extra size, measuring seven to seven and one half inches long, more than one half inch wide and nearly one half inch thick, and of excellent quality. But this is not all. It is one of the most prolific bush beans known to the trade, producing beautiful, rich yellow pods which sell at sight and taste like more

Pkt. 10c., pt. 25c., qt. 40 c ., 4 qts. $\$ 1.25,1 / 4$ bus. $\$ 2.00$., bus. $\$ 7.00$.

## GOLDEN PRINCE

A Stringless Wax Pod Pole Bean
This new Bean is a medium early, of robust growth and extremely prolific; its vines are simply covered with an overwhelming number of pods, which, when ready for table use, are of a pure golden yellow color and from ten to twelve inches long. Pods are flat and nearly straight, very fleshy and absolutely stringless. Sold in packages only. Per pkt. 25c.

Golden Prince Wax Pod Pole Bean

## BEET

## Crosby Improved Egyptian

SPECIAL MARKET GARDENERS' STRAIN

For forcing, nothing better. For extra early outdoor growing, for bunching, it excels all. The small top makes it profitable for greenhouse growing, its shape profitable for market.

This is the best extra early varicty grown for this market. Has a small top and excellent form and a small tap root; almost every Beet uniform in size; is in every way a great improvement over the old variety of Egyptian Beet. It was improved by the late Josiah Crosby, and is now the most perfect extra early Beet grown. Our stock is all grown with great care as to trueness of shape and color. We have only a limited amount of seed of this particular selection.

Pkt. 5 c., oz. 15 c., $1 / 4$ 1b. 50c., 1b. $\$ 1.50$.

## CABBAGE <br> First Crop

While this Cabbage is not entirely new, we personally have never grown it until two years ago, and we have found it to be an exceptionally early variety. It has been grown in England several years and has a Reward of Merit from the Royal Horticultural So-

Crosby Improved Egyptian Beet

Cucumber, "Market Champion"
 ciety. It is the earliest Cabbage grown; the heads are pointed and it is entirely distinct from any other variety on the market at the present time. As it takes up bu¿ very little room and produces solid heads earlier than any other sort we know of, we believe for the private garden it is an excellent variety, also for market gardeners where earliness counts. We believe it is one of the best.
Pkt. $15 \mathrm{c} ., 1 / 2$ oz. 30c., oz. 50c., $1 / 4$ 1b. $\$ 1.50$.

# CUCUMBER "Market Champion" 

## (A New Disease-resisting Variety)

Many of the Cucumbers recently introduced have been remarkable more for their extraordinary size than for their cropping qualities, or freedom from disease, but we are convinced that this new variety will become as popular with the grower who grows for market as with the private grower. It has been bred chiefly with a view to obtaining a variety that shall be as proof against disease as it is possible for a Cu cumber to be, and at the same time possess all the qualities that a first-class market variety must have. The trials that it has so far been possible to give it have shown that it possesses these qualities in the highest degree. In one house, with several other varieties, it was the only one to show itself diseaseproof, nor has it in any case so far been attacked. The raiser used Butcher's Disease Resister as one of the parents, and has succeeded in obtaining a variety as robust in withstanding disease as this, but witll far finer fruit, and a very much heavier cropper.

The best description of the fruit is to compare it with a very fine Telegraph, but it has qualities whic'l make it a great improvement on this variety in every way. It sets its fruit with remarkable freedom and evenness: seconds are practically absent. The vine is small-leaved and vigorous, and the fruit equal in every respect to those of the finest strain of Telegraph.

With these qualities. and all the natural vigor of a new cross, Market Champion is undoubtedly destine 1 to prove the most largely grown Cucumber of this class for some time to come.

Pkt. 25c.

## Rawson's Hot-House Cucumber

## RAWSON'S HOTHOUSE

The finest strain of Cucumber for forcing and outdoor planting in existence. It is an improvement on Rawson's White Spine, the fruit being two inches longer and darker green in color. We have attained this result by years of selection, and feel confident that this strain cannot be equaled in this country. The Cucumbers are very regular in outline, uniform in size, a veraging eight to nine inches in length and of a rich dark green color, slightly spined at blossom end. Flesh white, crisp and remarkably solid, with a small amount of seeds. Vines of vigorous growth and exceedingly productive. The great number of complimentary letters we have received warrant us in making the above claim, and we cannot recommend it too highly.

It is grown from the Atlantic to the Pac̣ific by prominent growers. It is an extra heavy cropper.

It is net the longest Cucumber grown
It is the most profitable.

It is a good shipper.
It is a money maker.

Pkt. 25c., $1 / 2$ oz. 50c., oz. 90c., 2 oz. $\$ 1.50 .4$ oz. $\$ 2.50$.

## BIG BOSTON

 SPECIALIf grown in the open ground for Summer or Fall use it always gives satisfaction.

In France we found this particular strain of Big Boston Lettuce and as we have seen it growing we are led to believe it the best strain in existence for either Midsummer or Fall use. Very large, (uniform headscompact, tender, crisp, creamy white. This season we could only obtain a limited supply. It makes a handsome plant with but few outside leaves and stands long before bolting to seed.

Order BIG BOSTON SPECIAL. Pkt. 10c., oz. 25c., $1 / 4 \mathrm{lb}$. 75c., 1b. $\$ 2.50$.

# CARROT $=$ Arlington Special Strain 

For a general crop the best; the largest yield; the most profit-
 able for the market gardeners. Roots medium length, deep orange, tapering uniformly to a blunt point; smooth and handsome. Flesh sweet, crisp and tender. The Hanvers Half-Long originated in Danvers, Mass., where the raising of Carrots is a specialty. It is now grown largely everywhere on account of its great productiveness and great adaptability to all classes of soil.

We have grown for us a special selection of this Carrot by a market gardener in Danvers. After years of careful attention to shape, color and productiveness for his own private use, he has produced a variety as nearly perfect as possible. Our supply is limited. Pkt. 15 c. , oz. $50 \mathrm{c} ., 1 / 4$ 1b. $\$ 1.50,1 \mathrm{lb} . \$ 5.00$,

## Melons for Forcing

The following varieties are grown extensively in England and are becoming more popular each year in this country. The seed we offer has been selected with great care from specially selected fruits grown in this country, and personally knowing the grower we can recommend this seed.
ROYAL JUBILEE. A splendid oval, green-fleshed Melon raised at the Royal Gardens, Windsor. Skin almost white, elegantly netted. The flavor of the deep green flesh is much appreciated by connoisseurs. In constitution the plant is robust and sets freely. Pkt. 25c.
WINDSOR CASTLE. A green-fleshed Melon combining qualities of the highest order. Fruit oval in form, of extraordinary size, and handsomely netted on a dark green ground. Flesh very deep, of a pale green color all through; remarkably rich in flavor. Pkt. 25 c .
BLENHEIM ORANGE. This Melon is remarkably prolific, has a grand constitution, is a very fine setter, and may be described as a perpetual bearer, ripening in a short space of time. The fruit is superbly netted, the flesh deep and solid, and a special and distinctive feature is the evenly-defined and thin rind. Thirty-five First Prizes reported by customers. Pkt. 25c.
ROYAL SOVEREIGN. A singularly beautiful Melon, raised in the Royal Gardens. Spherical in form, with an elegantly netted surface. Flesh white, exceedingly thick, possessing a full and exquisite flavor. The plant sets fruit with great freedom and has a vigorous constitution. Pkt. 25 c .

Melons Growing in Greenhouse

## PEAS-Quite Content

From our trials of this Pea, we believe it to be the largest Pea grown, exceeding the Cradus. It is ready for picking at about the same time as the well-known Telephone, and resembles the Alderman, but with considerably larger pods. Under favorable conditions the height is about $5 \frac{1}{2}$ feet. The foliage is large, heavy and of a deep green color. The pods are exceedingly large in size, produced usually in pairs and of deep green color; they grow straight with only a slight curve as shown in the illustration. The pods measure from 6 inches to 7 inches in length, and each pod contains an average of from 9 to 11 large peas of delicious flavor. Under good crop conditions they bear during a long period.

During the past few seasons this grand exhibition Pea has taken 125 first prizes.

Below is what some of our customers have to say:
"I have tried the Quite Content Pea, which is without doubt the largest podded pea now on the market."
"The Pea, Quite Content, is truly a magnifieent Pea for exhibition and for excellent table quality."
"Fully maintained its high position during the past dry season. It was much in evidence in the exhibition."
"Quite Content Pea is a marvel and large cropper. The admiration of all who saw it."

Pkt. 15 c ., pt. $35 \mathrm{c} .$, qt. 60 c ., 4 qts. $\$ 2.25$, pk. $\$ 4.00$, bus. $\$ 12.00$.

## Morse's Golden Cream Sweet Corn

This new Corn is of California origin, resulting from a cross made some five years ago with Country Gentleman and Golden Bantam. Morse's Golden Cream is very early, yellow, Country Gentleman Sweet Corn. Kernels are long and pointed; the cob is very slender and the whole ear about the size of the Golden Bantam, and is its equal in flavor. The stalks are brownish red, and of rather dwarf growth, and bear two to four ears; the silk is brown at the tips. In appearance it is quite identical with the Country Gentleman. It is, however, among our earliest varieties, and the color at eating stage is a rich cream, cooking to a light golden yellow.
Pkt. 15c., pt. 25c., qt. 40c., 4 qts. $\$ 1.50,1 / 4$ bus. $\$ 2.50$

Morse's Golden Cream Sweet Corn

One of the earliest yellow Sugar Corns

## Tomato Millionaire

It is one of the newer varieties which we believe is destined to take the place of many of the earlier sorts, as the fruit is exceptionally large, very fleshy and almost without seeds, also, as the illustration shows, nearly smooth. It is of a deep scarlet color, and produced in bunches of three or four. The extra large size of its fruit, its quality and extreme earlincss should make this Tomato one worthy the trial for a market sort.

Pkt. 15c., oz. 60c.

Sunrise Tomato

## SunRISE TOMATO

It is one of the finest Tomatoes for indoor and outdoor culture. It grows in clusters. The Sunrise sets freely and is an immense cropper, yielding heavy bunches at short intervals all over the plant. Fruits smooth, of good form and size, very solid and produces almost no seed. We question if any other variety would in a given space carry so heavy a crop. For this reason it is valuable for market purposes, especially for indoor growing. The chief points in the "Sunrise" are:

Its Earliness. It ripens several days earlier than most varieties.

Its Prolific Character. See illustration.
Its Healthy and Robust Constitution. No trace of disease.
Its Solid and Delicate Flesh. Contains very few seeds and practically no eye.

Its Evenness in Size as a dessert fruit.
Its Fine Scarlet Color and rich acid flavor.
Its Equal Value for Indoor and Outdoor Cultivation.
Plit. 15c., $1 / 2$ oz. 30c., oz. 50c., $1 / 4$ 1b. $\$ 1.75$.
What some of those who have grown the Sunrise Tomato say:
"I may say that I gave Sunrise Tomato a try last season and was highly pleased with it. Sets very early and produces enormous clusters of highly colored fruits of good quality."
"I have grown your Sunrise Tomato and consider it the best Tomato ever sent out; a very heavy cropper. The fruit is produced in abundance when the plants are quite small; when ripe, they are even in size, good quality and smooth skin.'
"Your Sunrise Tomato is absolutely distinct in its habits; a vigorous grower. I have had plants with from eight to ten sets of fruit, averaging from ten to twelve good fruits on each truss."

# Selected List of Highhest Grade Vegefatale Seeds 

## Artichoke (3rtriid dofe)

Culture. In February or March sow in hotbed, transplant to the open in May in rows three or four feet apart, and two feet apart in the rows. should give globes the same year. Seed sown in May and transplanted in June has to be wintered. Tie up leaves, then bank with dirt; will mature the second year. Giant Green Globe. Produces large, globular heads. thick, succulent scales, the bottom of which is the edible part. Boiled till tender, it makes a delicious dish. I'kt. 10c., oz. 30c., $1 / 4 \mathrm{lb} . \$ 1.00$.
Jerusalem Artichoke. Sometimes used as a table vegetable when pickled, but their greatest value is for feeding stock. 'Tubers, lb. 3:)c., 3 lbs. \$1.00, postpaid.
Freight or express, pk. $\$ 1.00$, bus. $\$ 3.00$.

## Asparagus (Epargel)

One ounce will sow about 50 feet of drill.
Culture.-Asparagus roots may be purchased in the Spring, or may be grown from seed sown in April or May, in good soil, in drills 12 to 14 inches apart. The permanent bed should be made very rich with wellrotted manure, and thoroughly worked over to a depth of nearly 2 feet. The Asparagus roots (either one or two years old) are to be transplanted into this bed, setting them in rows 3 or 4 feet apart, leaving about 18 inches between the plants in the row. Lay the roots flat in trenches, spreading them well, and using care to have all the crowns placed in the same direction, to keep the roots from running together. Cover lightly at first gradually filling the trenches as the plants begin to start: the crowns of the roots should be about 6 inches below the level of the bed. Avoid location near trees, particularly large trees, or their roots will soon take possession of the ground. All difference in varieties of Asparagus is probably the result of care in selection and natural adaptation of soils.

GIANT GREEN GLOBE ARTICIIOKE

ASPARAGUS

Barr's Mammoth. It comes early and grows a large stock; is very productive. I'kt. 5c., oz. 10c., 1/4 1b. 25c., lb. 75c.
Columbian White. They are clear white, and remain so in favorable weather, until three or four inches above the surface. P'kt. 5c., oz. 10c., $1 / 4 \mathrm{lb} .25 \mathrm{c} ., \mathrm{lb} .75 \mathrm{c}$.
Conover's Colossal. A well-known variety of large size; tender and of good quality. Pkt. 5c., oz. 10c., $1 / \pm 1 \mathrm{~b}$. 20c., lb. 50 c .
Early Giant Argenteuil. This variety has thus far been absolutely free from rust; valuable on account of earliness : produces an even growth and a large yield. Pkt. 5c., oz. 10c., $1 / 4 \mathrm{lb} .30 \mathrm{c} ., \mathrm{lb} . \$ 1.00$.
Moore's Giant. The best for growing in New England. Retains the head close until the stocks are quite long. It is of uniform color, while for tenderness and quality it is unparalleled. Pkt. 5c., oz. 10c., 1/t lb. 30c., 1b. \$1.00.
Palmetto. A good yielder of recent introduction and thus far it has proved to be a great success in both the North and South. Pkt. Јॅс., oz. 10c., 1/4 lb. 25c., lb. 75c.

## Asparagus Roots

For ordinary garden culture a bed 12 x 35 would require about 150 roots. Columbian White, 2 yrs. old. 100 $\$ 1.00,1000 \quad \$ 6.00$.
Giant Argenteuil, 2 yrs. old. 100 $\$ 1.00,1000 \$ 6.00$.
Palmetto, 2 yrs. old. $100 \$ 1.00,1000$ $\$ 6.00$.
Conover's Colossal. 2 yrs. old. 100 $\$ 1.00,1000 \$ 5.00$.

## BEANS <br> ( $\mathfrak{B u l f}$ ) $\mathfrak{B o g n e n t ) ~}$

## Dwarf or, Bush

Beans if wanted by mail, add for postage 8c. per pint, 15 c . per quart.
Black Wax, Currie's Rust Proof. A superior variety for market; excellent flavor. Pods large, yellow, rust-proof. Dry bean black. I'kt. 10c., pt. $20 c .$, qt. $3 \overline{\mathrm{~J}} \mathrm{c} ., 4$ qts. $\$ 1.10$, pk. $\$ 1.75$.
Black Wax, Prolific One of the best for a stringless, and of excellent home garden, perfectly size, round and of a celent flavor. Pods medium 10 c ., pt. 20 c ., qt. 35 c ., 4 qts. $\$ 1.10$, pk. $\$ 1.75$.
Black Wax, Yosemite Mammoth. Iods frequent ly attain the length of ten inches with the thickness of a man's finger. Solid pulp. Dry bean black. Pkt. $10 \mathrm{c} ., \mathrm{pt} .20 \mathrm{c}$., qt. $35 \mathrm{c} ., 4$ qts. $\$ 1.00$, pk. $\$ 1.75$.
Golden Wax The most tender of all marlet broad, flat, golden sorts. Pods long, nearly straight. highest quality snap Bean. Dry bean oval, white, more or less colored with shades of purplish red. I'kt. 10c., pt. 20c., qt. $35 \mathrm{c} ., 4$ qts. $\$ 1.10$, pk. $\$ 2.00$.
Golden Wax Improved $\begin{gathered}\text { It } \\ \text { It } \\ \text { market } \\ \text { Bean exellent }\end{gathered}$ does not rust Ory beans more white than it Golden Wax, but mottled dark. Pkt. 10c., pt. 20c., qt. 35 c ., 4 qts. $\$ 1.10$, pk. $\$ 2.00$.
Golden Wax, Keeney's Rustless ${ }_{\text {market }}^{A} \begin{gathered}\text { superior } \\ \text { gur- }\end{gathered}$ den wax Bean. Large, Hat, golden yellow and very fleshy pod. It has an excellent flavor and is less liable to be stringy than any other rustproof Beans. Pkt. 10c., pt. 20c., qt. 30c., 4 qts. $\$ 1.00$, pk. $\$ 1.50$.
Golden-Eyed Wax. Clear golden wax pods of good size, free from rust and an excellent keeper. Beans white, with golden eye. Pkt. 10c., pt. 20c., qt. 30c., 2 qts. 55 c ., 4 qts. $\$ 1.00$, pk. $\$ 1.60$.
Hodson Wax One of the most prolifie of all straight and average about seven inches in length; color, clear light yellow. Vines are very vigorous and well filled with pods that are entirely free from rust and blight. Matures about ten days later than the Wardwell's Kidney Wax. Pkt. 10c., pt. 20c., qt. $30 \mathrm{c} ., 4 \mathrm{qts}$. $\$ 1.00$, pk. $\$ 1.75$.
Horticultural Wax. One of the best for market gardencrs; it does not rust; pods are always clear, waxy yellow. Must be picked quite young as pods become somewhat stringy as they mature. Dry bean is large, oval and not very thick. Nearly covered with splashes of bright red. Vines strong, robust and bear pods well up from the ground. Pkt. 10c.. pt. 20c., qt. 30c., 4 qts. $\$ 1.00$, pk. $\$ 1.50$.
Kidney Wax, Wardwell's one of the Beans in this vicinity, especially for the market gardener, owing to the large size of the pod and excellent quality. Vines are very large, strong and vigorons, bearing long, straight, wax-like pods. Dry beans are large, kidney-shaped, white, dark-marked about the eye. Pkt. 10c., pt. 20c., qt. 35c., 4 qts. $\$ 1.10$, pk. \$1.75.
Kidney Wax Round Pod. This is one of the most popular, both for home use and as a market Bean, of all the round-podded wax varieties. Vines are very large. Strong and vigorous, bearing long, straight, wax-like pods of large size and excellent quality. Dry beans are large, kidney-shaped, white, dark marked about the eye. Pkt. 10c., pt. 20c., qt. $35 \mathrm{c} ., \mathrm{pk}$. $\$ 1.75$.

## ONION SEED, New England Grown

We make a specialty of home grown Onion Seed. See page 30-31. Our YELLOW DANVERS GLOBE is grown in large quantities and is specially selected

WAX BEAN, YELLOW POD
Sure Crop Stringless Wax is a dwarf-growing variety; strong, vigorous vines producing early, rich yellow pods of extra size, measuring seven to seven and one-half inches long, more than one-half inch wide and nearly one-half inch thick, and of excellent quality. But this is not all. It is one of the most prolific bush Beans, producing beautiful, rich yellow pods which sell at sight and taste like more. It is early, hardy, stringless, rust-proof, finest quality ; exceedingly prolific. Pkt. 10c., pt. 2 ̄c., qt. $40 \mathrm{c} ., 4$ qts. $\$ 1.2 \overline{5}, \mathrm{pk} . \$ 2.00$.
Kidney Wax, Davis An ezeellent Bean for market gardeners. Its superiority over others is its extreme hardiness and excellent keeping qualities. It is considered one of the rust-proof Beans with large, well-shaped, flat waxy pods. Dry bean is kidney shaped and white. Pkt. 10c., pt. 20c., qt. 35c., 4 qts. $\$ 1.00$, pk. $\$ 1.75$.
Refugee Wax A superior Bean for home use. are thick meated, perfectly stringless and of excellent flavor. Dry beans are mottled dark drab. Pkt. 10c., pt. 20c., qt. 35̄c., 4 qts. $\$ 1.00$, pk. $\$ 1.75$. Valentine Wax. Extra early and is usually ready for harvesting from thirty-five to forty days after planting. Vines strong and vigorous; pods medium length, clear waxy yellow, curved, with creases in the back; very fleshy, crisp and tender. Dry beans medium size, long irregular pink marbled with red. Pkt. 10c., pt. 20c., qt. $30 \mathrm{c} ., 4$ qts. $\$ 1.00$, pk. $\$ 1.50$.
White-Seeded Wax Stringless. An improvement over the old standard sort as it is perfectly stringless. Pods clear waxy white, of medium size and flat. Dry beans are white. Pkt. 10c., pt. 20c., qt. $35 \mathrm{c} ., 4$ qts. $\$ 1.15$, pk. $\$ 2.00$.
Blue Pod Butter An excellent snap Bean and table the pods are green. Vines grow about one and one-half feet in height and bear indigo blue pods well up from the ground and in good quantity. Dry beans brownish color. Pkt. 10c., pt. 25c., qt. 40c., 4 qts. $\$ 1.25$, pk. $\$ 2.25$.

## Beans, Green Podded

Boston Favorite, or Goddard. Pods and beans larger and longer than the I warf Hortieultural. Vines are large and pods green when young, but when beans mature fit for use are beautifully striped with crimson. Dry beans are long, nearly clear, with splashes of bright red. I'ki. 10c., pt. 20c., qt. $30 \mathrm{c},, 4$ qts. SJ̄c., pk. $\$ 1 . \overline{5} 0$.
Bountiful For the marlict gardener this is one of the popular ruricties. I'orls are medium size, green, flat and an excellent snap Bean. Dry beans are yellowish brown eolor. I'kt. 10c., pt. 2Oc.. qt. BOc., 4 qts. $\$ 1.00$, pk. $\$ 1.75$.
China Red Eye. Pods flat and green. I)ry beans medium size, oblong, white with reddish blotches about the eve. I'kt. 10c., pt. 1̄̄c., qt. こ̄.e., 4 qts. SUc., pk. \$1.2.5.
Hodson Green Pod
Similar in every respecet to the Ilodson Wax described on page 10 , with the exception of the pod, which is green instead of yellow wax. Ikt.

bOUNTIFUL GREEN-POD BEAN

Horticultural Dwarf, or Speckled Cranberry. It is undoubtedly the best variety for use as a shell Bean. Vines compact, upright, with large leaves and very productive. Iods are green when young but when beans become fit for use are beautifully striped with splashes of bright red on a yellowish ground. Iry beans large, oval, nearly covered with splashes of bright red. Vkt. 10c., pt. 20c., qt. :OOc., 4 qts. $\$ 1.00$, pk. $\$ 1.75$
Longfellow Remarkally carly and has excelalmost interet whats pods are about six and one-half inches long. pale green in color, straight and round; very productive and crop matures very regularly. Ibeans are small, mottled dark red. I'kt. 10c., pt. :20c., qt. BUc., 4 qts. S.̃e., pk. \$1.50.

Low's Champion, or Dwarf Red Cranberry. One of our best green pod Beans for market gardeners. An excellent shell or string Bean. It is aboudantly productive, being a vigorous grower, and keeps the pods well off the ground, preventing them from molding or blighting. Iry bean beautiful bright red color. I'kt. $10 \mathrm{c} ., \mathrm{pt} .20 \mathrm{c} ., \mathrm{qt} .30 \mathrm{c} ., 4 \mathrm{qts} . \$ 1.00$, pk. \$1.50.
Large White Kidney, or Royal Dwarf. A very good shell Bean when green or dry. Dry beans are white, pods are good size, flat and green. I'kt. 10c., pt. 15c., qt. $2 \overline{5} c ., 4$ qts. $7 \bar{\jmath} \mathrm{c} ., \mathrm{pk} . \$ 1.2 \overline{\mathrm{y}}$.
Full Measure early; long, straight and handsome; are meaty and good quality; very thick, flat or almost a semi-round. Quality, stringlessness and productiveness should be sufficient to recommend this to every planter. I'kt. 10c., pt. 20c., qt. $35 c ., 4$ qts. $\$ 1.15$, pk. $\$ 1.75$.
French Horticultural Dwarf This is the
Horticultural or Speckled Cranberry type which has been grown for a number of years in certain localities in the vicinity of Boston. The vines are compact and of upright growth; is sometimes inclined to send out runners but does not climb a pole; the runners are not sufficient to affect the Bean in any way. When fit to use are beautifully striped with splashes of bright crimson on a somewhat yellowish ground. Its extremely bright color makes it very attractive in the market and it sells usually for 25 c . or 50 c . more than the ordinary Dwarf IIorticultural. The dry beans are large, oval and nearly covered with splashes of bright red. I'kt. 15 c ., pt. $2 \overline{\mathrm{c}} ., \mathrm{qt} .4 \overline{\mathrm{~J}} \mathrm{c},, 4 \mathrm{qts} \$$.1.50 , pk. $\$ 2.50$.
Long Yellow Six Weeks. Extra early. Pods long. green in color, straight and quite thick; very productive and good quality. Vines are large, vigorous and branching; beans long, kidney shaped and yellowish brown. Ikt. 10c., pt. 15c., qt. 25e., 4 qts. S0c., pk. \$1.25.
Mohawk Early. Hardiest of any early Bean; will stand a slight frost and for this reason excellent for the market gardener. Vines are large with coarse leaves; pods long, straight, flat and green. Dry beans long, kidney shape, variegated drab, purple and brown. 1'kt. 10c., pt. 15c., qt. 25c., 4 qts. 75 c ., pk. $\$ 1.2 . \overline{\text {. }}$.
Red Kidney. The old-fashioned baking Bean. Pt. $10 c .$, qt. $20 c$., pk. $\$ 1.00$.
Refugee, or 1,000 to $1 \begin{gathered}\text { An ex.ecelent carly } \\ \text { snap } \\ \text { Dean } \\ \text { and } \\ \text { and }\end{gathered}$ used especially for late planting for use as pickles. Pods are of medium length, round and light green. Dry beans long, light drab and splashed with purple. I'kt. 10c., pt. 15c., qt. 2כ̃c., 4 qts. T5c., pk. \$1.25.
Refugee, Extra Early. A solection from the Refugee with all its good qualities and about ten days earlier. 1)ry beans long and dark drab; pods splashed with purple. Pkt. 10c., pt. 15c., qt. 25c., 4 qts. 7 ธ̄c., pk. $\$ 1.25$.

stringless green-Pod bean

## BEANS, GREEN PODDED-Continued

Stringless Green Pod It is valuable for and being absolutely stringless which makes it one of our best extra early Beans, and wonderfully productive; pods of handsome appearance and finest quality. Extra early plantings will produce the earliest crops; the later plantings will always produce pods the quickest. I'kt. $10 \mathrm{c} ., \mathrm{pt} .20 \mathrm{c} ., \mathrm{qt}$.35 c ., 4 qts. $\$ 1.10$, pk. $\$ 2.00$.

## Stringless Green Pod

(Giant Strain). The same description will answer for the Giant Strain only the bean and pod are larger and lighter in color; it is also very early. Pkt. 10 c ., pt. 20 c ., qt. 35 c., 4 qts. $\$ 1.10$, pk. $\$ 2.00$.
Round Six Weeks Similar in every way to pods are round Pkt. 10 , the long six Weeks only pods are round.
$80 \mathrm{c} ., \mathrm{pk}$.
$\$ 1.25$.

Valentine, Improved Early Red | Extra |
| :---: |
| early, | and is usually ready for harvesting from thirty-five to forty days after planting. Vines strong and vigorous; pods green, medium length, curved, with creases in the back, very fleshy, crisp and tender. Dry beans medium size, long, irregular, pink, marbled with red. Pkt. 10c., pt. 20c., qt. 30c., 4 qts. $\$ 1.00, \mathrm{pk} . \$ 1.50$.

Valentine-Black A great improvement over alentine-Black the Red Valentine, as the pods are nearly one-third larger; perfectly round, although not quite as early ; very prolific. Pkt. 10c., pt. 20c., qt. $30 \mathrm{c}, \mathrm{H}^{4} \mathrm{qts} . \$ 1.00$, pk. $\$ 1.60$.
Warren. Very similar to Low's Champion, only a darker red bean. Pkt. 10c., pt. 15 c ., qt. $25 \mathrm{c} ., 4 \mathrm{qts}$. S0c., pk. \$1.40,

Yellow Cranberry One of the early varieties used by market gardeners as a string Bean. Vines large, vigorous and very productive. Pods are long, green, very thick and slightly curved. Dry bean yellowish drab and almost round. Pkt. 10c., pt. 15̌c., qt. 2כ̃c., 4 qts. 80c., pk. \$1.40.
White Pea. The popular baking Bean of New England. Pt. 10c., qt. 20 c ., pk. $\$ 1.00$.
Yellow Eye Improved. An excellent baking Bean. Pt. 10c., qt. 20c., pk. $\$ 1.00$.

## Forcing Beans

The two best varieties for forcing, Triumph of the Frames and Wonder of France.
Triumph of the Frames. (Seed Imported from France.) This is one of the very best forcing varieties used in France. Very tender and stringless. Pkt. 25.., pt. 50c., qt. 75c., 4 qts. $\$ 2.50$.
Wonder of France. (Seed Imported from France.) One of the best French Beans, with long, tender pods, and when cooked retain their bright green color. Dry beans long and bright green in color. Pkt. 25 c ., pt. 50 c ., qt. 75 c ., 4 qts. $\$ 2.50$.

## English Broad Bean

Broad Windsor. As this Bean is very hardy it should be planted as early as the ground will permit, five or six inches deep in rows three feet apart, and plants four feet apart in row. Dry beans very large and yellowish green. Pkt. 20c., pt. 30c., qt. $50 \mathrm{c} ., 4 \mathrm{qts}$. $\$ 1.75$.

early red valentine green-pod bean

## Dwarf Lima Beans

Fordhook Bush Lima This new Bush Lima bush habit, branching freely, but with all the branches held upright. It bears tremendous crops and sets pods freely even in a cool, wet season. The plump, well-filled pods are twice as large as those of the Dreer Bush Lima, and beans are also twice as large. Pkt. $15 \mathrm{c} ., \mathrm{pt} .25 \mathrm{c} ., \mathrm{qt} .40 \mathrm{c} ., 4 \mathrm{qts} . \$ 1.50$, pk. \$2.50.

## Burpee's Improved Bush Lima

Earliest, largest and the best of all large Limas. The sturdy bushes ure loaded with pods that are truly enormous in size. The luscious, green beans are larger than any Limas ever known before. It is fully eight to ten days earlier than any other large Limas; will outyield Burpee's Bush Lima by fully one-third as the pods are very much larger, while the beans either green or dry are nearly twice as thick; even when of full size are of most luscious flavor. I'kt. $15 \mathrm{c} .$, pt. $2 \overline{5} \mathrm{c} ., \mathrm{qt} .40 \mathrm{c} ., 4$ qts. $\$ 1.50$, pk. $\$ 2.50$.
Dreer's Bush Lima It has a bush havit and een to twenty-four inches high. The beans are very thick and grow close together, three, four and sometimes five in a pod. Pkt. 10c., pt. 20 c ., qt. $3 \overline{\mathrm{~J}} \mathrm{c}$., 4 qts. $\$ 1.10$, pk. $\$ 2.00$.
Henderson's Bush Lima. Exceedingly productive, bearing continuously through the Summer until killed by the frost. Its greatest merit lies in its extreme earliness as it comes two or three weeks earlier than any other Lima Bean. Pkt. 10c., pt. $20 \mathrm{c} ., \mathrm{qt} .30 \mathrm{c} ., 4 \mathrm{qts} . \$ 1.00$, pk. $\$ 1.75$.

## Pole Lima Beans

Carpinteria Pole Lima $\begin{gathered}\text { Lil } \\ \text { pole } \\ \text { most } \\ \text { Lima }\end{gathered}$ existence. The beans have a greenish tint, an indication of good quality. The vines are vigorous and make a strong growth, producing a large quantity of beans in a fairly large pod, which are thicker than the ordinary Lima and retain their color. Pkt. 10c., pt. 20c., qt. $35 \mathrm{c} ., 4$ qts. $\$ 1.10$, pk. $\$ 2.00$.
Dreer's Improved Lima An abundance of and produced on vigorous vines, Beans medium size, very much thicker than the large Limas; formed closely in the pod and of excellent flavor. I'kt. 10c. pt. $20 \mathrm{c} ., \mathrm{qt} .30 \mathrm{c} ., 4$ qts. $\$ 1.00$, pk. $\$ 2.00$.
Extra Early Jersey $\begin{gathered}\text { Very productive and of } \\ \text { fine quality }\end{gathered}$ pecially valuable to those residing in districts where the season is too short to produce later ones as it is from 10 to 15 dars earlier than any other pole Limas. I'kt.10c., pt. $20 \mathrm{c} ., \mathrm{qt} .30 \mathrm{c} ., 4 \mathrm{qts} . \$ 1.10$, pk. $\$ 2$.
King of the Garden Stronger and more proother large white Limas and is a favorite with the market gardeners on account of its large pods. If two vines are left growing on a pole it will come into bearing sooner and make large pods. Pkt. 10c., pt. 20 c ., qt. 35 c ., $4 \mathrm{qts} . \$ 1.10$, pk. $\$ 2.00$.
Large White. The old-fashioned Lima. Pkt. 10c., pt. 20c., qt. 30c., 4 qts. $\$ 1.10$, pk. $\$ 2.00$.
Siebert's Early Lima. The earliest large Lima. Pkt. 10c., pt. 20c., qt. 30c., 4 qts. $\$ 1.10$, pk. $\$ 2.00$.
Sieva, or Small Lima. Popular small-seeded variety. Pkt. 10c., pt. 20c., qt. 30c., 4 qts. 90 c., pk. $\$ 1.75$.

## BEANS, Pole (Etangen Bofiren)

## Arlington Red Cranberry

 Always tender and crisp; the market gardencr's favorite. The pods are green and it is one of the best snap Beans. Dry beans are a beautiful bright red, large and of the finest flavor, green or dry. Pkt. 10c., pt. 15c., qt. 30c., 4 qts. $\$ 1.00, \mathrm{pk}$. $\$ 1.75$.Brockton Pods are broad and somewhat curved, and when matured splashed with bright crimson, making a very attractive appearance. Dry beans are large and kidney shaped. color chocolate splashed with dark purple. Pkt. 10c., pt. 20c., qt. 35 c ., 4 qts. $\$ 1.00$, pk. $\$ 1.75$.
Golden Carmine. Pods are -large, bright golden color when very young; as they mature they are mottled and streaked with an unusually bright carmine color, which on the bright golden gives the pod a beautiful and attractive appearance. Pkt. 10c., pt. 20c., qt. 35 c ., 4 qts. $\$ 1.00$, pk. $\$ 1.75$.
Golden Cluster One of the pole Beans. Vines large, strong, vigorous; pods 6 to 8 inches long in clusters, thick and fleshy; bright golden yellow. Dry beans white and nearly round. Pkt. 10c., pt. 20c., qt. 35c., 4 qts. $\$ 1.25$, pk. \$2.25.
Horticultural, or Speckled Cranberry. Of the highest quality as a shell Bean. Pods of medium size, pale green streaked with bright red. Dry beans nearly round, splashed with bright red. Pkt. 10 c ., pt. 15c., qt. 30 c., 4 qts. $\$ 1.00$, pk. $\$ 1.75$.
Indian Chief, or Tall Black Wax. Superior quality with golden yellow pods which are short, broad, flat and fleshy. Pkt. 10c., pt. 20c., qt. 3亏̄c., 4 qts. $\$ 1.15$, pk. $\$ 1.75$.
Dutch Case-Knife. Productive and good quality either green or dry. Pkt. 10 c . pt. ${ }^{15} \mathrm{c}$., qt . 25 c ., 4 qts. 80 c ., pk. $\$ 1.50$.
Lazy Wife. Stringless and excellent flavor. One of the largest green pod pole Beans. Pkt. $10 \mathrm{c} ., \mathrm{pt}$. 15c., qt. $30 \mathrm{c} ., 4$ qts. $\$ 1.00$, pk. \$1.75.
Kentucky Wonder Wax (Pods are yellow.) The vine and pods are similar to those of the Kentucky Wonder, but the quality is far superior in every way. A very prolific sort; begins to bear when no higher than the average bush Bean and continues to bear until killed by frost. The beans are so fleshy that the pods are even thicker than they are wide. They have a delicious rich flavor. In comparing when dry with other wax Beans we found them far superior. Pkt. 10 c ., pt. 20 c ., qt. $\$ \overline{\mathrm{c}} \mathrm{c}$., 4 qts. $\$ 1.20$, pk. $\$ 2.00$.

Old Homestead, $\underset{\text { Wonder. }}{\text { Or }} \underset{\text { Excellent }}{\text { Improved }}$ favor and enormously productive; entirely stringless and of a silvery green color. About ten days earlier than any other green pod sort. Beans are rather small, oblong and of a yellowish brown color. Pods are. green. P'kt. 10c., pt. 20c., qt. 30c., 4 qts. \$1.10, pk. $\$ 2.00$.

## Worcester Pole For the market gardener

 vation. Pods are very large, exceedingly bright and hang in clusters. As a shell Bean it is unequaled for tenderness. Dry beans splashed bright red. Pkt. 15 c ., pt. 25 c ., qt. 50 c ., 4 qts. $\$ 1.50$, pk. $\$ 2.50$.Scarlet Runners. Usually cultivated for the beauty of its scarlet flowers. In England one of the very best string Beans. Dry beans mottled with drab. Pkt. 10c., pt. 20c., qt. 35 c ., 4 qts. $\$ 1.15$, pk. $\$ 2.00$.
White Runner. Similar to above but white flowers. 1'kt. 10c., pt. 20c., qt. 35ॅ., 4 qts. $\$ 1.15$, pk. $\$ 2.00$.
Mont d'Or Wax, or Golden Butter. The earliest of the pole Beans. A strong, vigorous grower, with pods 6 to 8 inches long, in clusters very thick and fleshy. Pt. 15c., qt. 30c., 4 qts. $\$ 1.00$, pk. $\$ 1.75$.

old homestead beans

## BEETS <br> (Fothe Miïbe)

One ounce will sow 50 fect of drill; six to cight pounds to an aere.
Culture.-Sow in rows twelve to fifteen inches apart, thin out to four inches in row; plant seed about one-half inch deep as early as ground can be worked. For late crop plant up to end of July. Beets like a deep, rich, sandy loam.
Arlington Favorite $A$ fa vorite with the a second early; small foliage; flesh deep red color. An improved sort, turnip shape, excellent flavor. Ready for use almost as quickly as the early sorts and are of better quality, retaining the same until roots have reached full size. For the market gardener one of the most popular varictics. Pkt. 5c., oz. 15c., $1 / \pm \mathrm{lb} .50 \mathrm{c} ., 1 \mathrm{~b}$. $\$ 1.50$.
Bastian's Early Turnip. One of the largest turnip Beets. Tender, sugary and flesh lighter color than early varieties. Pkt. 5c., oz. 10c., $1 / 4 \mathrm{lb}$. 2Ј̄c., lb. 75.c.
Bassano. I very early, flat variety, especially adapted for the home table; excellent flavor. Almost white with rose-colored flesh arranged alternately in rings. Pkt. 5c., oz. 10c., $1 / 4 \mathrm{lb}$. $25 \mathrm{c} ., 1 \mathrm{~b} .60 \mathrm{c}$.
Boston Market. The largest cxtra early blood turnip Beet. Runs uniform in shape with a small tap root. Excellent quality and valuable for both the market and private gardener. I'kt. 5c., oz. $1 \overline{\mathrm{j}} \mathrm{c} ., 1 / 4 \mathrm{lb} .40 \mathrm{c} ., \mathrm{lb} . \$ 1.2 \overline{ }$

Crosby's Improved Egyptian This is the best extra early varicty grown for this market. Has a small top and excellent form and a small tap root; it is in every way a great improvement over the old variety of E.gyptian Beet. It was improved by the late Josiah Crosby of Arlington, Mass. Our stock is all grown with great care as to truencss of shape and color. Pkt. 5 c., oz. 15 c., $1 / 4 \mathrm{lb} .50 \mathrm{c} ., \mathrm{lb} . \$ 1.50$.
Crosby's Improved Egyptian (Special MarStrain.) Selected with the great Gardener's as to color, shape and earliness Wreatest of care limited amount of seed of this particular selection. Pkt. 10c., oz. 25.c., $1 / 4 \mathrm{lb}$. 75 c ., $1 \mathrm{lb} . \$ 2.50$.

EDMAND'S BEET

Dark Red Egyptian. Very early, deep red, almost flat variety. Pkt. 5c., oz. 15c., $1 / \pm \mathrm{lb}$. 3Ј̃c., lb. \$1.25.
Detroit Dark Red Color of skin very dark mature very evenly in size and shape, also color. One of the best of all varieties for market. Pkt. 5c., oz. $15 \mathrm{c} ., 1 / 4 \mathrm{lb} .50 \mathrm{c} ., \mathrm{lb} . \$ 1.50$.
Dewing's Improved Turnip. A fine form and flavor; a good color and desirable variety. Pkt. 5c., oz. 15c., 1/4 lb. 35.., lb. \$1.25.
Eclipse. Extremely early variety; recommended to market gardeners on account of its small, fine tops. Pkt. 5c., oz. 15̄c., 1/4 lb. 50c., lb. \$1.50.
Edmand's For late planting the best dark blood Bect. It is a thoroughly fixed, uniform type; flesh deep red in color, exceedingly sweet and tender. Has a small top and single tap root which fact recommends itself to the market gardencr's attention. We have had special care taken regarding the selection of the beet roots saved for seed. We are confident no better strain can be grown. Pkt. 5 c., oz. 15 c ., $1 / 4 \mathrm{lb} .40 \mathrm{c} ., 1 \mathrm{~b}$. $\$ 1.25$.
Long Smooth Dark Blood. Grows half out of the ground with few or no side roots. Pkt. Jc., oz. 10c., $1 / 4 \mathrm{lb}$. 25c., lb. 75c.
Yellow Turnip Beet. Early; flesh yellow, very tender and sweet. I'kt. 5c., oz. 10c., $1 / \pm 1 \mathrm{~b} .25 \mathrm{c}$., lb. 7 c c.

## Grown for the Leaves Only

Swiss Chard. Sometimes called Sea Kale Beet. After once having used Swiss Chard for greens we believe your garden will always have at least a row of $S$ wiss Chard; it is delicious. Is cultivated for its leaf stock which is served up like Asparagus or Spinach, by using the outer leaves. Always first, will continue to produce leaves all Summer; does not make edible roots like the regular garden Beets. Pkt. 10c., oz. $20 \mathrm{c} ., 1 / 4 \mathrm{lb} .50 \mathrm{c} ., \mathrm{lb} . \$ 1.50$.
Swiss Chard Lucullus. A new, moss curled sort. Very large leaves and the middle ribs are very broad, forming a good substitute for Asparagus during the Summer months. The leaves are used in the same manner as Spinach. Pkt. $10 \mathrm{c} .$, oz. 20 c ., $1 / 4 \mathrm{lb} .50 \mathrm{c}$., lb. $\$ 1.50$.
Beets for Greens Only. Lb. 40 c ., 100 lbs .35 c . per lb.

## CABBAGE (Extrasat)

## Early Varieties, Pointed Heads

One ounce will produce about 2,000 plants. Onequarter pound of seed in beds will produce plants for one acre.
Culture.-Start your early crop in hotbed middle of February, covering seed about one-half inch; transplant to cold frames soon as plants are large enough, three or four inches each way. Remove glass part of each day to harden plants and plant out in open ground middle of April. For general crop sow in open ground in June in hills three feet apart.

## Charleston Wakefield $A$ favorite with the

 market gardeners. Resembles the Early Jersey Wakefield in form but it is much larger. Matures equally as early. Very uniform in shape and very desirable for the market gardener. Pkt. 5 c., $1 / 2 \mathrm{oz} .20 \mathrm{c}$., oz. 35 c ., $1 / 4 \mathrm{lb}$. $\$ 1.00$, lb. \$2.75.Etampes, Early. Heads are oblong, round at top, and very solid and firm; medium size. Extremely early. Pkt. 5c., oz. $15 \mathrm{c} ., 1 / 4 \mathrm{lb} .45 \mathrm{c} ., \mathrm{lb} . \$ 1.60$.
Express, Extra Early. This variety is ready for market or table use in about 75 or 80 days after sowing the seed. It is the earliest variety grown, but does not have as hard a head as the later varieties. Leaves grow compactly together and it may be planted very closely. Pkt. 5c., oz. 20c., $1 / 4 \mathrm{lb}$. 65 c ., lb. $\$ 2.00$.

## Jersey Wakefield, Early

Although this variety is not as early as the two preceding ones, it will be found the very best conical heading sort to come in immediately after. It is very compact, medium size, conical and a sure header. Extra selected stock. Pkt. 5c., $1 / 2$ oz. 20 c ., oz. 35 c ., $1 / 4 \mathrm{lb} . \$ 1.00$, lb. $\$ 3.00$.
Winnigstadt, Early. Heads are very regular, conical, solid and a good keeper. Excellent for general use, being a sure header. Pkt. 5 c ., oz. 25 c ., $1 / 4 \mathrm{lb}$. $75 \mathrm{c} ., \mathrm{lb}$. $\$ 2.75$.

## Round Deep Heading

All-Head. One of the largest second early sorts; excellent quality. It is remarkably solid, deep, flat and very uniform. Pkt. 5c., $1 / 2 \mathrm{oz} .15 \mathrm{c}$., oz. 25 c ., $1 / 4 \mathrm{lb} . \$ 1.00$, lb. $\$ 3.00$.
All Seasons. A very early variety with large, deep heads and excellent quality. Equally good as early or Fall Cabbage. Pkt. 5c., oz. 30c., $1 / 4 \mathrm{lb} .75 \mathrm{c}$., lb. $\$ 2.50$.
Autumn King, or World Beater. Outer leaves are few and owing to this fact it will produce a greater weight per acre. Heads are very solid and exceedingly large. Pkt. 5c., $1 / 2 \mathrm{oz}$. 15 c ., oz. 25 c ., $1 / 4 \mathrm{lb}$. 75 c ., lb. $\$ 2.50$.

EARLY SPRING CABBAGE

EARLY JERSEY WAKEFIELD CABBAGE
Brunswick, Fottler's $\begin{aligned} & \text { The best for early } \\ & \text { Fall } \\ & \text { and }\end{aligned}$ inity the Brunswick is列 by the market gardeners. Plants are very short stemmed; large leaves and very compact. Heads are large, flat, solid and of fine quality. Pkt. 5c., $1 / 2$ oz. 20 c ., oz. 30 c ., $1 / 4 \mathrm{lb}$. $\$ 1.00$, lb. $\$ 3.00$.
Cape Elizabeth (Portland). A valuable late Drumhead variety; excellent keeper. Pkt. 10c., $1 / 2 \mathrm{oz}$. 25 c ., oz. $40 \mathrm{c} ., 1 / 4 \mathrm{lb}$. $\$ 1.00$.
Copenhagen Market. The heads are very solid with a small core and of fine quality; the average weight about ten pounds. It matures as early as the Charleston Wakefield, and will give a much heavier yield than that popular variety; the plant is short stemmed. Leaves are light green and very tightly folded. Crop almost a failure this year. Pkt. $15 \mathrm{c} ., 1 / 2$ oz. 50 c ., oz. 75 c ., $1 / 4 \mathrm{lb}$. $\$ 2.50$.

## Danish Round Head

 Produces round or ball-shaped heads of great solidity and intensely deep rich color. The growth of plant is strong and very compact; the heads are perfectly round, from six to eight inches in diameter. The extra dark coloring, remarkable hardness and large size of heads make it an excellent market type as well as most desirable for the home in slicing for slaw, salads, etc. Pkt. 10c., $1 / 2$ oz. 30 c ., oz. $50 \mathrm{c} ., 1 / 4 \mathrm{lb}$. $\$ 1.50$.Early Spring The best extra early round head variety. It matures with the Wakefield, yielding one-third more than the other extra early varieties. Heads are uniform and remarkably solid, even when small, and have few outside leaves. The popular market garden variety. Pkt. 10c., $1 / 2$ oz. 20c., oz. 35c., $1 / 4$ lb. $\$ 1.00$, lb. $\$ 3.00$. Early Summer, Henderson's One of the early large heading varieties, coming about ten days after the early Jersey Wakefield. Heads medium size, solid, flat and good quality. Pkt. 5c., oz. 25 c., $1 / 4 \mathrm{lb} .75 \mathrm{c}$., lb. $\$ 2.50$.
Emperor or Danish Bail-Head. It is reties; one of the best for shipping. Heads when ready for market are fully one-quarter heavier than any other variety of similar size. The weight recommends this variety to the market gardeners as a money maker. Pkt. 10c., 1/2 oz. 25c., oz. 40 c ., $1 / 4 \mathrm{lb}$. $\$ 1.25$, lb. $\$ 4.00$.

## CABBAGE，ROUND DEEP HEADING－Continued

Glory of Enkhuizen．Earlier than the All Sea－ sons；of medium size，globe shaped and handsome dark green color，just right for the market．Leaves fine ribbed；outer leaves set close to permit close planting．Where this variety has been tried in market growing districts the growers have been very enthmsiastic．Pkt．10c．．1／2 oz．20（oc．，oz．3̄）c．， 2 oz． 6 （t）．， $1 / 4 \mathrm{lb}$ ．$\$ 1.15 .1 \mathrm{lb}, \$ 4.00$ ．
Marblehead Mammoth．Should be set from $31 / 2$ to 4 feet each way．The heads often grow to weigh sixty pounds each．The largest variety of the Drum－ heads．Pkt．．$火$ ．，oz．20c．， $1 / 1 \mathrm{ll}$ ．（illc．，lb．$\$ 2.00$ ．
Premium Flat Dutch．Heads large solid，broad． and flat on top．An excellent Winter variety． Pkt．̈́c．，oz． $20 c \cdot, 1 / 4 \mathrm{lb}$ ．60c．，lb．※゙2． 00 ．
Stone－Mason，Warren＇s Strain the most ricty for market gardeners in this vicinity．For the main（rop）for storing in Winter it is unequaled． Grows medinm size with only a moderate number of leaves．Heads are large，round or slightly flat－ tened；very solid and crisp；exceedingly fine flavor． The best for the main Winter erop．All of the above stock is expecially selected and grown for us from a marlict gardener＇s private stock of the true David Warren strain．Pkt．10c．， $1 / 2$ oz．2．̄．c．，oz． 40 c ．， $1 / 4 \mathrm{lb} . \$ 1.2 .5, \mathrm{lb} . \$ 4.00$ ．

BRUSSELS SPROUTS

## Brussels Sprouts (ভprovien $\Omega$ off)

Culture.-A species of the Cabbage family which produces miniature heads from the sides of the stalk. These heads are a great delicacy, boiled in the same way as Cauliflower. The seeds should be sown about the middle of May, in a seed-bed, and the plants afterward set in rows 2 feet or more apart, and cultivated like Cabbage. This vegetable does not require extremely high cultivation, however. It is ready for use late in Autumn, after the early frosts.
Aigburth. Very large sprouts; hardy and productive. Pkt. 5c., oz. 20c., $1 / 4 \mathrm{lb} .60 \mathrm{c}$.
Paris Market. A choice variety. Pkt. 5c., oz. 20c., $1 / 4$ lb. 60c.
Sutton's Exhibition. Produces an abundant crop of large, solid Sprouts, delicious in flavor, which come early to maturity. Pkt. 25c.
Improved Long Island. A very large variety, extremely popular, excellent quality. All this seed is New England grown. Pkt. 10c., oz. 35c., 1/4 lb. $\$ 1.00$, lb. $\$ 3.00$.

## Broccoli (Epargee Rogn)

One ounce will produce about 2,000 plants. CULTURE. Sow in hotbed in April c. May for early crop; transplant in May or June in rows three or four feet apart and two feet apart in row. Sow in June for late crop in hills or beds; cover seed about one-half inch. When heads are formed tie leaves up over head to blanch; deep soil is wanted for success.
White Cape. Very white, sure to head. Pkt. 10c., oz. 40 c ., $1 / 4 \mathrm{lb} . \$ 1.25$.

## Chicory (Čjidruien)

One ounce will sow a bed of four square yards
Culture.-Sow in Spring, in drills onehalf inch deep, in good mellow soil.
Large-Rooted, or Coffee. Leaves, blanched, are esteemed as an excellent salad. Pkt. 5c., oz. 10c., $1 / 4 \mathrm{lb} .25 \mathrm{c}$.
Witloof. Known in restaurants as French Fndive. Sow in May and June in drills. Transplant or thin to 6 inches; treat as Endive, except that late in Summer or Fall it should be gradually banked up like Celery. Stalks when blanched make a delicious salad. Used by the French as a boiled vegetable. Pkt. 5c., oz. 15c., CHICORF, WITLOOF $1 / 4 \mathrm{lb} .40 \mathrm{c} ., \mathrm{lb} . \$ 1.25$.

## Chives

Are used wherever the flavor of oninos is required; grown entirely for tops and is perfectly hardy. No garden is complete without a few bunches.
Seed. Pkt. 1 cc., $1 / 2$ oz. 40 c ., oz. $75 \mathrm{c} ., 1 / 4 \mathrm{lb} . \$ 2.00$.
Roots. Per bunch 15c., 6 bunches 75 c ., doz. $\$ 1.25$.

## Chervil (Rerber)

One ounce will sow about 100 feet of drill. CULTURE. Sow in drills one foot apart in early Spring or Fall; covering seed about one-half inch. in six to eight weeks. Curled variety used like Parsley. Can also be sown in August or September; thin out to six inches in row and rows fifteen inches apart.
Curled. Iargely used in
soups and salads. P'kt. 5c.,
oz. $15 \mathrm{c} ., 1 / 4 \mathrm{lb} .40 \mathrm{c}$.

## Cardoon

Culture.-Sow in April in drills one inch deep; when one year old transplant in trenches of wellmanured ground three feet apart and one foot in row. The roots remain from year to year.
Large Smooth. The best variety. Pkt. 10c., $1 / \overline{2}$ oz. $15 \mathrm{c} ., \mathrm{oz}$. $20 \mathrm{c} ., 1 / 4 \mathrm{lb} .60 \mathrm{c}$.

## Collards

Used as a substitute for Cabbage, more especially in the South. A form of Cabbage bearing new leaves as the old ones are pulled off and used for greens. Pkt. $5 c .$, oz. $10 \mathrm{c} ., 1 / 4 \mathrm{lb} .30 \mathrm{c}$., lb. 90 c .

## Cress, or Peppergrass ( $\AA$ refic)

One ounce uill sow sixteen square feet.
Culture.-Can be sown at any time in hotbed, coldframe or outside, according to the season. Cover seed about one-quarter inch and sow thickly. Sowing can be made every few days, as it has to be used young, as it runs to seed quickly. Watercress sow in shallow water beside running stream.
Extra Curled. The most popular variety for market; excellent flavor. Pkt. 5c., oz. 10c., $1 / 4 \mathrm{lb}$. 20c., lb. 65 c .
Upland Cress. It is a hardy perennial, thriving on any soil. In early Spring it is the first to make its appearance and grows rapidly. Ready for use weeks ahead of any other plant. The young and tender leaves can be eaten raw or in a salad. Pkt. $10 \mathrm{c} .$, oz. $50 \mathrm{c} ., 1 / 4$ lb. $\$ 1.50$.
Watercress. Cultivated by sowing the seed by running water or near a spring which is not severely frozen through the Winter. Pkt. $10 \mathrm{c} ., 1 / 2 \mathrm{oz} .20 \mathrm{c}$., oz. 35 c., $1 / 4$ lb. $\$ 1.00$.

WATERCRESS

## CAULIFLOWER

 (Bhumen $\Omega$ ohl)One ounce of seed produces about 2,000 plants.
Culture.-Cauliflowers require very high cultivation, even more so than Cabbage, and plenty of moisture. There is no more delicious vegetable grown. Coldframe plants are probably the best and hardiest for early crops; the frames, however, need rather more protection during cold nights than is required for Cabbage plants. Seed sown in hotbeds in February will produce plants that are not inferior to coldframe plants. They should be transplanted once before setting in the open ground, and also should be gradually hardened by exposure; in this way they may be in condition to set out as early in April as the ground will permit. Set the early sorts about 2 feet by 15 inches, and cultivate the same as Cabbage. Where ir-
 rigation is practicable, great advantage is thus obtained during a drought. For late Cauliflower, sow seed in open ground, from the middle of May to the middle of June, in hills the same as directed for late Cabbages. When the heads are forming, tie the leaves together at the top, thus avoiding the discoloration by exposure to the sun.

Algiers. A large and popular late variety. Largely grown for the New York markets. Pkt. 10c., oz. $75 \bar{c}, 1 / 4 \mathrm{lb} . \$ 2.25$.
Danish Giant. (Dry Weather). The growth Dwarf Erfurt, but with heavier foliage, and is less liable to blight in hot weather. It has been grown with excellent results where other varieties fail to form heads, especially in locations subjected to long droughts. Pkt. 25 c ., $1 / 4 \mathrm{oz} . \$ 1.00,1 / 2 \mathrm{oz}$. $\$ 1.75$, oz. $\$ 3.00$.
Early Paris. Early sort, rather large heads and quite compact. Pkt. 10 c ., oz. 7⿹\zh26c.
Early Dwarf Erfurt, Extra Selected. One of the popular varieties used in this section for the market garden. Plants are compact with few narrow, upright leaves, making it especially valuable for close planting and large yields. Heads are extra large size, pure white and averaging eight to nine inches in diameter. Market gardeners will find this variety runs very even in size. Pkt. $2 \overline{5} \mathrm{c}$., $1 / 4$ oz. 75 c ., $1 / 2$ oz. $\$ 1.25$, oz. $\$ 2.25$.

## Early Snowball, Henderson's

Its dwarf habit and short outside leaves allow it being planted very close together. An extremely early varicty producing magnificent white heads of finest quality. For market gardeners' use it is one of the most profitable. Excellent for family use. Pkt. $2 \overline{5} \mathrm{c} ., 1 / 4 \mathrm{oz} . \$ 1.00,1 / 2 \mathrm{oz}$. $\$ 1.50$, oz. \$2.50.

## Fottler's Champion Erfurt.

We have sold this strain of Cauliflower for many years, and it has invariably proved satisfactory. The heads are uniformly large, compact, white and well formed. We know of no variety that is its superior, and our largely increased sales from year to year are evidence that it is found to be reliable by our customers, many of whom use it in large quantities. Pkt. 25c., $1 / 4 \mathrm{oz} . \$ 1.00,1 / 2 \mathrm{oz} . \$ 1.50$, oz. $\$ 2.50$.

## Sea Foam

It is of a dwarf and compact habit ; medium-sized heads; firm and attractive in appearance. Unsurpassed in quality, almost a sure header; nearest to a snow-white head in Cauliflower. For forcing we do not think it is equaled. Pkt. 25 c ., $1 / 4 \mathrm{oz} . \$ 1.00$, $1 / 2 \mathrm{oz}$. $\$ 1.50$, oz. \$2..50.

EARLY SNOWBALL CAULIFLOWER

NEW ORANGE IMPROVED CARROT

## CARROTS

One ounce will sow 100 feet of drill; three to four pounds required for acre.
Culture.-April is the time to sow for early use. Sow seed in drills twelve to fifteen inches apart, and thin out from three to four inches in drill, covering seed about one-half inch. For general crop sow in May same distance apart as above but cover seed a little deeper as sun is stronger. Perfect specimens require a fine, pulverized, deep soil.
Chantenay, Half-Long. Medium early, roots smooth, bright orange and of fine quality. An excellent market sort. Pkt. 10c., oz. 25 c., $1 / 4 \mathrm{lb}$. $75 \mathrm{c} ., \mathrm{lb}$. $\$ 2.50$.

## Danvers Half-Long Improved

(Stump Root.) For a general crop the best; the largest yield; the most profitable for the market gardeners. Roots medium length, deep orange, tapering uniformly to a blunt point; smooth and handsome. Flesh sweet, crisp and tender. The Danevrs Half-Long originated in Danvers, Mass., where the raising of Carrots is a specialty. It is now grown largely everywhere on account of its great productiveness and great adaptability to all classes of soil. Great care has been taken in the selection of roots for seeds. Pkt. 10c., oz. 25 c., $1 / 4 \mathrm{lb}$. 75 c ., lb. $\$ 2.50$.
Danvers Half-Long (Special Strain). We have grown for us a special selection of this Carrot by a market gardener in Danvers. After years of careful attention to shape, color and productiveness for his own private use he has produced a variety as nearly perfect as possible. Our supply is limited. Pkt. $15 \mathrm{c} .$, oz. $50 \mathrm{c} ., 1 / 4 \mathrm{lb} . \$ 1 . \overline{0} 0$, lb. $\$ 5.00$.
Early Scarlet Horn (Stump Root). One of the best early forcing varieties, this being used mostly for forcing and extra early planting. It is very fine, green and excellent flavor as a table Carrot. Grows well in shallow soil, being a short variety with small top. The market gardener's favorite for extra early. Pkt. 10c., oz. 20c., $1 / 4 \mathrm{lb} .60 \mathrm{c}$., lb. $\$ 2.00$.
French Forcing. This is a small variety for forcing; used largely in France. Pkt. 10c., oz. $20 \mathrm{c} ., 1 / \pm \mathrm{lb} .60 \mathrm{c} ., \mathrm{lb} . \$ 2.00$.
 Guerande, or Oxheart. Roots are broad at the top, terminating abruptly in a small tap root. On account of their shape they are easily dug. Flesh is a bright orange, fine grain and very sweet. Tops are small for the size root. Grows well in soil too hard for the longer growing sorts. It is not over five or six inches long; usually they are three or four inches across. Fkt. 10c., oz. 20c., $1 / 4 \mathrm{lb}$. $60 \mathrm{c} ., \mathrm{lb} . \$ 2.00$.

## Large White Belgian.

 Root is pure white with green above ground. Small top, flesh rather coarse; roots grow to a large size on light, rich ground, usually about one-third above the ground. Pkt. $5 \mathrm{c} .$, oz. $15 \mathrm{c} ., 1 / 4 \mathrm{lb}$. 50 c ., lb. $\$ 1.50$.Long Orange Improved. Roots long, thickest near the crown, tapering regularly to a point ; color deep orange. Pkt. 10c., oz. 20c., $1 / 4$ lb. 60c., lb. $\$ 2.00$.

early scarlet horn carrots

## Use Order Sheets.

 The use of order sheets enclosed in this catalogue is a great help to us in facilitating filling and shipping of orders. More will be sent on receipt of a postal asking for same.Keep a Copy of Your Order. Check goods received with this copy.

## CELERY (Eelferie)

One ounce will produce about 3,000 plants. One-half pound of seed sufficieni to sow one acre.
Culture. - The proper time to sow is early in April, transplanting about the first of June. Set in rows 3 feet apart, and about 12 inches between plants in the row. Some gardeners trim off the tops a little, while the plants are small, to make them more stocky. Keep down all weeds, and, as Fall approaches, draw earth up to the plants, keeping the stalks well together. This eartring-up is continued at intervals, until only the leaves appear above the soil. When well blanched is ready for use. For Winter use it is usually placed in frames and covered with earth and litter or stored in cool cellars. Comparatively few soils are suited to Celery culture. Rich, mellow soils of a sandy nature are best, while soils that settle and become hard after rain are unsuitable. The seed, being very small, should be covered very lightly, and the earth firmly pressed down upon it.
Boston Market it is superior in quality to all other rarieties, and is very popular with the market gardeners. It is unexcelled for its tender, crisp and succulent stems and its peculiarly mild flavor. It forms a cluster of heads instead of a single large one. It must be blanched by earthing up at least four or six weeks. Pkt. 15c., $1 / 2$ oz. $50 \mathrm{c} .$, oz. $75 \mathrm{c} ., 1 / \pm \mathrm{lb} . \$ 2.00$.
Giant Pascal For the market gardener this is the most profitable Celery for Fall or Winter use. This is a green-leaved variety, developed from the Paris Golden; it is somewhat larger and taller and its fine nutty flavor is free from any bitter taste. It grows about two feet high, and the stocks are broad, thick and crisp; blanching with but slight earthing-up very quickly. I'kt. 10c., $1 / 2 \mathrm{oz} .15 \mathrm{c}$., oz. $20 \mathrm{c} ., 1 / 4 \mathrm{lb}$. $60 \mathrm{c} ., 1 \mathrm{lb} . \$ 2.00$.
Golden Dwarf, or Golden Heart. A distinct variety, dwarf habit, very solid and an excellent keeper. Pkt. 5 c. . $1 / 4$ oz. 15 c ., oz. 20 c ., $1 / 4 \mathrm{lb}$. 50 c .
WINTER QUEEN. It is one of the very best late varieties. A strong grower. thick ribbed, blanches a beautiful cream white. Ribs are solid, crisp and have a delicious nutty flavor. Pkt. $10 \mathrm{c}, 1 / 2 \mathrm{oz} .15 \mathrm{c}$., oz. $25 \mathrm{c} ., 2 \mathrm{oz} .40 \mathrm{c} ., 4 \mathrm{oz} .60 \mathrm{c} ., 1 \mathrm{l} . \$ 2.2 \overline{5}$.
Rose Ribbed. Medium early, compact growing, and light shade of pink. l'kt. ड̄c., $1 / 2 \mathrm{oz}$. 15c., oz. $20 \mathrm{c} ., 1 / 4 \mathrm{lb}$. 60 c .

celeriac

## Paris Golden

(Self-Blanching). For beantiful apparance and extreme earliness this variety is unexcelled. Its compact growth and straight, vigorous, rich, golden yellow stocks are what make this Celery in sach demand. It is self-blanching to a remarkable degree. In the vicinity of Boston it is the main early Celery raised by market gardeners, also for home use. 1'kt. 20c., $1 / 2$ oz. $75 \mathrm{c} .$, oz. $\$ 1.50,1 / 4 \mathrm{lb}$. $\$ 5.00$.
White Plume. In some sections of the country this variety is produced in large quantities. Is very attractive when ready for use. I'lants are light yellowish green, tips of leaves almost white which adds to its appearance. I'kt. $5 \mathrm{c} ., 1 / 2 \mathrm{oz} .15 \mathrm{c}$., oz. $25 \mathrm{c} ., 1 / 4 \mathrm{lb} .75 \mathrm{c}$.
Soup Celery. For flavoring. $1 / 4 \mathrm{lb} .20 \mathrm{c} ., \mathrm{lb} .50 \mathrm{c}$.
Celery Plants.
June and July delivery
Boston Market Trans- $\left\{\begin{array}{rrr}\$ 1.00 & \$ 6.00 \\ 1.00 & 6.00 & \text { Field- }\end{array} \begin{array}{rl}\$ 0.50 & \$ 4.00 \\ .50 & 4.00\end{array}\right.$

## Celeraic (תubll ভelfrie) or Turnip-Rooted Celery

One ounce will sow a bed of nine square yards.
Culture.-Sow in light rich soil early in Spring; transplant in May in beds and water freely. When plants are full grown earth up the bulbs to a height of four or five inches. In a month they will be blanched. Ti:o roots will be ready in October and are used in soups.
Apple Shaped. Of a very regular, almost spherical shape, with a fine neck and small leaves. Pkt. 5c., oz. 20c., $1 / 4 \mathrm{lb} .50 \mathrm{c}$.
Large Smooth Prague. An improved form of turnip-rooted Ceiery, producing large. smooth roots, which are almost round. Pkt. $5 c .$, oz. $20 \mathrm{c} ., 1 / \pm \mathrm{lb} .50 \mathrm{c}$.

## CORN

## (马utfer Maiる)

## Sweet, or Sugar

One quart will plant 200 hills, one peck sufficient for one acre in hills.
We supply packets of all varieties at 10 cts. each, postpaid. If larger quantities are wanted by mail, add 5 cts. per pint and 10 cts . per quart extra for postage.
Prices on all Varieties of Corn, also Pop Corn: Pkt. 10c., pt. 15.c., qt. 25c., 4 qts. 80 c ., pk. $\$ 1.25$, unless otherwise mentioned.

## Extra Early Varieties

Aristocrat.
One of the largest extra early varieties. Ripens with the Cory; very large ears and excellent flavor.
Burbank Early Maine. Medium size ear, with white cob and kernel. An excellent variety for the market gardener.
Champion Early. Large, handsome, twelve-rowed ears of excellent flavor, ripens directly after the Larly Crosby.
Cory, Red Cob. One of the earliest and best extra early varieties. Ears are eight rowed, medium size, with red cob. The popular extra early variety for the market.
Cory, White Cob. Similar to the above, with white kernels.
Cory, Mammoth White Cob. A larger ear than the preceding variety.

golden dawn

Crosby Extra Early, or Boston Market. (Josiah Crosby Strain.) Excels in quality the extra early varieties. Ears are rather short, averaging from twelve to sixteen rows of rich sugary flavor; very productive. One of the best for canning, and we believe without a rival in the extra early varieties.
Metropolitan. Largest variety in the extra earlics. This, combined with the excellent flavor, makes it one of the most profitable in the list. Large kernels, ten to twelve rows, ears from eight to ten inches long.
Quincy Market. Nearly as early as Cory, but larger and much sweeter; twelve-rowed. Of excellent quality; valuable for the family garden as well as for market. It is ready for the table a little in advance of Early Crosby, and is often sold in the markets as Crosby, a variety which in a green state it strongly resembles. A strictly reliable variety and one which it is a pleasure to recommend.
Peep-O'-Day. This is said to be ten days earlier than any other variety. Small stalks, very prolific, medium size ear. Pt. 15 c ., qt. $25 \mathrm{c} ., 4$ qts. 80 c ., pk. $\$ 1.25$.

## Medium Earlies

Black Mexican. Although the ripe corn is black, when in a condition for the table is white. Exceedingly sweet flavored; one of the best for home use.
Concord Bearsfoot. Of the medium early of the most popular for the market. Has a large ear, rather flattened at the end, of excellent quality. Pt. 20c., qt. 30c., 4 qts. $\$ 1.00$, pk. $\$ 1.60$.
Crosby Early. Ears are larger than the Josiah Crosby strain, the stock growing taller, ears long and larger. Best for all early markets.
Golden Dawn. Ripens •with the Early Crosby, grows about $51 / 2$ feet high; very productive, having two or three good ears on a stock. Usually eight to twelve rows golden yellow kernels even to the extreme end; quality is unequaled.
Golden Bantam. Ears not quite as large as Golden Dawn. Eight rows, kernels good size and golden yellow. Quality is excellent.
Moore's Concord. Large, handsome, fourteen-rowed ears, produced very low on the stock; is of good quality, large yield and excellent keeper.

COUNTRY GENTLEMAN

CORN, SWEET OR SUGAR, MEDIUM EARLIES-Continued Potter's Excelsior, or Squantum. The richest flarored of all the medinm early white Corns. Ears good size, twelve rowed. deep kernels, remarkably sweet, sugary and tender. A farorite with the market gardeners.

## This belongs to the extra early varieties

 Pocahontas Is one of varicties similar to White Cob Cory ; very muiform as to type and productiveness ; ears, are large, evenly and compactly filled with tender white kernels of very fine quality for a first early variety. I'kt. 10c., pt. 20c., qt. シ̈Јc., pk. \&ٌ2.00.Gramite State. We found this to be early, maturing just after the Extra Larly Crosby and before the Early Crosby. The ears are very large for early Sweet Corn and set well down on the stalk, which is rather small; grows about five feet high and prodnces always two and nsually three ears to stalk. These ears are well filled out at the end. Kernels medinm size, pure white. and exrellent quality. It is a real Sweet Corn, one you will remember after having once had the pleasure of eating an ear of Granite State Sugar Corn. Pkt. 15c., pt. 20c., qt. シЈJc., 4 qts. $\$ 1.2 \overline{5}, ~ p k . ~ \$ 2.00$.

## Late Varieties Country Gentleman

Of all the late varicties this is the richest flavored, has the deepest grain and smallest cob. Exceedingly large size ear and very productive.
Mammoth Sweet. I'roduces mammoth ears which are very thick through with rows of large, broad grains of excellent quality ; follows Stowell's in maturing.
Early Evergreen. This carly strain of Evergreen rescmbles the Stowell's in every particulur, only about ten days carlier.
Stowell's Evergreen Now recognized everywhere as the ket and home use. Lars are large size, grains deep and especially tender and shgary. Remains longer in the green state than any other variety.
Washington Market. A large variety, delicious flavor; exceedingly popular in this market.

## Corn Salad, or Fetticus

One ounce will sor 20 feet square.
Culture.-Is generally sown in August or September. Sow quite thick about one-quarter inch deep, thin out and keep clear of weeds. Protect in Winter by thin covering of straw or meadow hay. Ready early in Spring; use same as Lettuce. For Summer use sow early in Spring.
Corn Salad (Lamb's Lettuce). The well-known common variety. Pkt. 5c., oz. 10c., $1 / 4 \mathrm{lb} .20 \mathrm{c}$.

POTTER'S EXCELSIOR

## Pop Corn

Queen's Golden. Medinm-sized ears. Kernel yellow and pops perfectly white; quality excellent.
White Rice. Lars short, kernels long pointed white.
Red Beauty. |Ears medium. Kernels round and red.

CORN SALAD

## CUCUMBER

 ( Farfl e)One ounce will plant about 50 hills; one to two pounds to the acre.

Culture.-To obtain early Cucumbers, and at the same time avoid most of the annoyance of the striped bug, it is a good plan to plant the seeds about the first of May in frames, without much bottom heat. Small sods turned over may be placed close together in the frames, and upon these the seeds may be planted; or small pots may be plunged into the soil in the frames, and a few seeds placed in each. In three or four weeks these may be transplanted into open ground. Set, without disturbing the plants, each piece of sod into hills made 3 or 4 feet apart each way. When the plants have become well started, thin out, leaving four of the strongest in each hill. Pick all Cucumbers when large enough for use, whether needed or not, for if left on the vine to ripen they will cease to be productive. The seeds may be planted in the hills late in May, making the crop somewhat later. Use dry plaster or an infusion of powdered white hellebore in water to destroy the striped bug. For pickles, plant during the last two weeks in June.

Rawson's Hothouse. The finest strain of Cucumber for forcing and outdoor planting in existence. It is an improvement on Rawson's White Spine, the fruit being two inches longer and darker green in color. We have attained this result by years of selection, and feel confident that this strain cannot be equaled in this country. The great number of complimentary letters we have received warrant us in making the above claim, and we cannot recommend it too highly. Pkt. $25 \mathrm{c} ., 1 / 2 \mathrm{oz} .50 \mathrm{c}$., oz. $90 \mathrm{c} ., 2 \mathrm{ozs} . \$ 1.50,4 \mathrm{ozs} . \$ 2.50$.
Arlington White Spine (For forcing). one of superior quality for forcing. Color is dark green, with very little of the white spine showing; it is extra long. Fruit grows very even in size and regular in form. Pkt. $10 \mathrm{c} ., 1 / 2 \mathrm{oz} .15 \mathrm{c}$., oz. 25 c ., $2 \mathrm{oz} .40 \mathrm{c} ., 1 / 4 \mathrm{lb}$. 75 c ., lb. $\$ 2.50$.
Davis Perfect Forcing (For forcing). It dark green; shows the white spine only at the blossom end; grows remarkably uniform and is a very shy seeder. The average length is from ten to twelve inches. It is equally desirable for outdoor growing. Pkt. 10c., $1 / 2$ oz. $15 \mathrm{c} .$, oz. $25 \mathrm{c} ., 1 / 4 \mathrm{lb} .65 \mathrm{c} ., \mathrm{lb} . \$ 2.00$.
Boston Pickling. For pickling this variety is fruit is short, pointed at each end, bright green, uniform in size, very productive and of superior quality. Pkt. $5 \mathrm{c} .$, oz. $15 \mathrm{c} ., 1 / 4 \mathrm{lb} .40 \mathrm{c}$., lb. $\$ 1.25$.
Cumberland. One of the newer rarieties and a very rapid, vigorous grower and very prolific. Thickly set with very fine spines over the entire surface, except the extreme end. Firm, crisp and tender in all stages. Pkt. $5 \mathrm{c} .$, oz. $15 \mathrm{c} ., 1 / 4 \mathrm{lb} .40 \mathrm{c} ., \mathrm{lb} . \$ 1.25$.
Early Frame. Medium size, very early, excellent for pickles. Pkt. 5c., oz. 10c., $1 / 4 \mathrm{lb} .30 \mathrm{c}$., lb. $\$ 1.00$.
Early Green Cluster. Very early, short pickling variety; bearing fruit in clusters near the root. Pkt. 5c., oz. $15 \mathrm{c} ., 1 / 4 \mathrm{lb} .40 \mathrm{c} ., \mathrm{lb} . \$ 1.25$.
Early Russian. The earliest cucumber that we know of. Fruit usually set in pairs, and first blossoms usually produce fruit. Small, oval, pointed at each end and good qua'ity. Pkt. 5c., oz. 10c., $1 / 4 \mathrm{lb} .30 \mathrm{c}$., lb. $\$ 1.00$.

Green Prolific. Medium early; fruit is short, pointed at each end, bright green, uniform in size, very productive and of superior quality. Pkt. 5 c., oz. 15 c ., $1 / 4 \mathrm{lb} .40 \mathrm{c} ., \mathrm{lb} . \$ 1.25$.
Giant Pera. Frequently grows twelve to eighteen inches long. Fruit very smooth, straight, dark green with very few seeds, excellent flavor. Pkt. $5 \mathrm{c} .$, oz. $20 \mathrm{c} ., 1 / 4 \mathrm{lb} .50 \mathrm{c} ., \mathrm{lb} . \$ 1.50$.
Improved White Spine. The market gardener's favorite for field culture. It is one of the best sorts for the table, on account of its color, which seldom changes to a yellow, although kept long after being picked. Pkt. $5 \mathrm{c} .$, oz. $15 \mathrm{c} ., 1 / 4 \mathrm{lb} .40 \mathrm{c}$., lb. $\$ 1.2 \overline{5}$.
Improved Long Green, or Jersey Pickling. The standard variety for pickling; dark green, productive, tender, crisp and of fine flavor: uniform in size. Pkt. 5c., oz. 15c., $1 / 4 \mathrm{lb} .40 \mathrm{c}$., lb. $\$ 1.25$.
Japanese Climbing. Cucumbers are thick, exceedingly tender and of delicious flavor; flesh pure white, skin dark green, turning brown, and netted when ripened. Vines are vigorous and throw out strong, grasping tendrils, which enable it to climb a trellis or any suitable support. Pkt. 10c., oz. $20 \mathrm{c} ., 1 / 4 \mathrm{lb} .50 \mathrm{c} ., \mathrm{lb} . \$ 1.50$.
West Indian Gherkin, or Burr. Used exclusively for pickling. The fruits are two to three inches in length; thick, rounded form, closely covered with spines. Vines rather slender with small foliage. It has no value for slicing. Seeds germinate very slowly. Pkt. 10c., oz. 2ëc., 1/4-lb. 60c.

## English Frame Varieties

For growing in hotbeds; fruit about twenty to twenty-five inches in length.
Lockie's Perfection. Very popular for private use, medium length, smooth and of deep color. Pkt. 25c. Rochford's Market. A grand cucumber for market, its color being in its favor. Pkt. 25e.
Telegraph. Of the many strains of this cucumber, we have not seen the equal of this ; the best for market. Pkt: 25c.

## Dandelion (2üversăfur)

One ounce will sow 100 feet of drill. One and onehalf to two pounds will sow one acre. Culture.-Sow as early as the season will allow, in good, well-manured ground in rows twelve inches apart. Cover seed quarter-inch deep and press down soil after sowing. Thin plants to three inches in row; by so doing the roots will be larger and time saved next Spring in gathering the crop.
French Thick-Leaved. While there are several varieties of Dandelion used for market purposes the French Thick-Leated is the most popular in this vicinity. It is a large leaved variety of upright growth. Our stock has been carefully selected by growers who make a specialty of the Boston market. Pkt. 10c., $1 / 2$ oz. $2 \mathrm{Zc} .$, oz. 50c., $1 / 1 \mathrm{lb} . \$ 1.25$, lb. \$5.00.

## Egg Plant (Eierpfiantis)

One ounce will produce about 1,000 plants. Culture.-Sow early in March in hotbed, transplant to four or six inches apart. Plant out in open ground about May 20 , two feet apart in row and three feet between rows. Egg plants are very tender and will not stand frost.
Black Beauty. Is from ten to twelve days earlier than the New York fruits; broad, thick. Pkt. $10 \mathrm{c}, 1 / 2 \mathrm{oz} .20 \mathrm{c} ., 1 \mathrm{oz} .3 \overline{\mathrm{~J}} \mathrm{c} ., 1 / 4 \mathrm{lb}$. \$1.25.
Early Long Purple. A very popular variety for market, especially in the northern section. I'kt. 5c., oz. $20 \mathrm{c} .{ }^{1 / 4} \mathrm{lb} .60 \mathrm{c}$.
New York Improved. More largely grown for market than all other. varicties. Its color is deep purple, very large in size, fine quality and excellent

Egg Plants. Pot grown. doz. 60c., $100 \$ 4.75$; box grown, doz. 50c., $100 \$ 3.50$.

## Horse Radish

Plant the sets in May, small end down, with top one inch below the surface, in rich, well-cultivated soil. Before planting set should be cut off slanting so as to prevent decay from water resting on top. Roots ready to pull in October. Small roots, ready for planting, purchaser paying transit, doz. $15 \bar{c} ., 100 \$ 1.00$, 1000 \$s.01. Delivered price, doz. 25 c., 50 75c., 100 $\$ 1.5(\mathrm{C}, 1000 \$ 9.00$.

LROAD-LEAVED BATAVIAN ENDIVE

## Endive (Enbivier)

One ounce will sow 150 fect of drill.
CULTURE.-Sow in May for early use about onequarter inch deep in rows ten to twelve inches apart; thin out plants to eight inches in row. Before using plants require to be blanched, which is done by gathering the outer leaves to a point and tying with soft twine or raffia. For late use sow up to last of June.
Broad-Leaved Batavian, or Escarolle. The most popular varicty for the market. This is the Chicoree Escarolle used chiefly in salads.
Green-Leaved. Pkt. 5c., oz. 15c., $1 / 4 \mathrm{lb} .40 \mathrm{c} ., 1 \mathrm{lb} . \$ 1.50$.
Giant Fringed. Broad leaves with a large, white heart and is an exceedingly strong grower. Pkt. 5c., oz. $15 \mathrm{c} ., 1 / 4 \mathrm{lb}$. $50 \mathrm{c} ., \mathrm{lb}$. $\$ 1.50$.
Green Curled. Beautiful growth of dark green leaves, tender and crisp. Hardiest of all. Pkt. 5c., oz. $15 \mathrm{c} . .1 / 1 / 4 \mathrm{lb} .50 \mathrm{c} . .1 \mathrm{lb} . \$ 1.50$.
White Curled. Resembles the green except the color. Pkt. 5c., oz. 15c., $1 / 4$ lb. 50c., lb. $\$ 1.50$.

Highest Grade Seeds bring positive results Franklin Park Lawn Seed grows and produces a green lawn

NEW YORK IMPROVED EGG PLANT

## Kohl-Rabi

(תohtrabi)
One ounce will sow $a$ drill 200 ft . long.

Clllture. - For early use sow in March or April in hotbed or in open ground in May. Lover seed one!uarter inch deep; transplant into rows two feet apart and plants from ten to twelve inches apart in rows.
Early Purple Vienna. Above ground, fine early sort, excellent table varicty.
Pkt. ప̄c.. oz. 20c.,
$1 / 4 \mathrm{lb}$. 00 c .
Early White
Vienna. Above
ground, similar to preceding, except in color. Pkt. 5c.. oz. 20c., $1 / 8 \mathrm{lb}$. 50 c .

DWARF CURLED SCOTCH KALE

## Kale (BBItter Sojil)

Sow four pounds to the acre; one ounce will sow 150 feet of drill.
Culture.-For Spring use sow in September and protect during Winter with covering of straw. For Fall use sow in May or June, cover seed one-half inch deep. Transplant in rows three feet apart and two feet apart in row. Kale is improved by a little frost, giving it a more delicate flavor.

## Dwarf Curled Scotch. Extra fine curled,

 tender and fine flavor. Is very hardy and, like Savoy, is improved by moderate frost. Pkt. 5c., oz. 10c., $1 / \neq 1 \mathrm{lb}$. 25e., lb. 75.c.Siberian, or German Greens (Sprouts). A very hardy variety. Popular with the marliet gardeners, very fine curled. Should be sown in September in rows one foot apart for Spring greens. I'kt. j̄c., oz. 10c., $1 / 4 \mathrm{lb} .2 \overline{\mathrm{~J}} ., \mathrm{lb} .75 \mathrm{c}$.
Spring, or Large Seeded. Curled dark green leaves. Should be sown as early as the ground can be worked in the Spring. Rows eighteen inches apart. Pkt. 5c., oz. 10c., 1/4 lb. 15c., 1b. 30c.
Tall Curled Scotch. Leaves are bring green, exceedingly fine curled, tender and a fine flavor. Very hardy. Pkt. डc., oz. 10c., $1 / 4 \mathrm{lb} .25 \mathrm{c} ., \mathrm{lb} .75 \mathrm{c}$.

## Leek ( (aurf)

One ounce will sow 100 fect of drill. Culture.-For best results sow as early as the ground can be worked in Spring, in rows one foot apart. Cover seed about one inch deep, transplant when plants are about six inches high in rows six inches apart; plant as deep as possible that the neck being covered may be blanched. Ground should be made reery rich.
American Flag. Strong, vigorous growth, excellent for the market gardener. Pkt. 5c., oz. 15c., 1/4 lb. 50c., lb. \$1.50.

## Monstrous Carentan.

Is of fine quality and much larger than any other variety. I'kt. 5c., oz. $2 \overline{2} c ., 1 / 4 \mathrm{lb} .60 \mathrm{c} ., \mathrm{lb}$. $\$ 2.00$.
Large Rouen. One of the best for forcing. Leaves are dark green, very broad and thick; remains a long time in good condition. Pkt. 5c., oz. $15 \mathrm{c} ., 1 / 4 \mathrm{lb}$. 50 c ., 1 lb . $\$ 1.50$.

## LETTUCE (eminis gate)

One ounce will sow 100 square feet or 120 feet of drill.
Culture.-For Winter use sow in greenhouse or hotbed and cover seed very lightly. Transplant first to three inches apart and then to eight inches. For outside use sow in rows, covering seed onequarter inch, the rows eighteen inches apart, then thin out plants to eight inches in row.

## Forcing Varieties

Arlington, White Seed. For sowing in ing with sash off in the Spring, also for early transplanting in the field. I'kt. 10 e., $1 / 2 \mathrm{oz}$. 50 c ., oz. T.5c., $1 / \pm \mathrm{lb} . \$ 2.25,1 \mathrm{~L} . \$ 8.00$.
Big Boston. Large heading varicty, plain leaf, very hardy. Edges of leaves have brownish tinge. I'kt. Јс., oz. 20c., $1 / 4 \mathrm{lb}$. 60c., 1b. \$1.75.
Rawson's Crumpled Leaf. One of the ties grown for forcing Leaves a dark ly crumpled and very tender. Does not head as solid as other varieties. Pkt. 10c., $1 / 2$ oz. $2 \overline{\mathrm{~J}}$., oz. 40 c ., $1 / 4 \mathrm{lb}$. $\$ 1.00$, lb. $\$ 4.00$.
Hothouse Lettuce This is especially adaptgreenhouse or hotbed. Has a very large liead and not liable to rot in the heart, making it a most valuable sort for the market gardener. A favorite in the Boston and New York markets. The largest plain leaf lettuce. Pkt. 10c., $1 / 2 \mathrm{oz}$. 2 c c ., oz. $40 \mathrm{c} ., 1 / 4 \mathrm{lb}$. $\$ 1.00$, lb. $\$ 4.00$.
Hittenger's Belmont. An excellent forcing leaves and variety, dark green leaves and almost a sure header. One of the largest plain leaf heading varieties. I'kt. $10 \mathrm{c} ., 1 / 2 \mathrm{oz} .25 \mathrm{c}$., oz. $40 \mathrm{c} ., 1 / 4 \mathrm{lb} . \$ 1.25$, lb. $\$ 4.00$.
Hittenger's Belmont (Special Private Strain). Grown by one of the leading market gardeners in this vicinity from his private stock; we have only a limited supply. $1 / 2$ oz. 50 c. , oz. $75 \mathrm{c} ., 1 / 4 \mathrm{lb} . \$ 2.00$, lb. $\$ 7.00$.
Grand Rapids. Leaves are crumpled, does not make a solid head. Is an excellent forcing variety as well as a good shipper. Pkt. 5c., oz. 15c., $1 / 4 \mathrm{lb} .40 \mathrm{c}$., lb. $\$ 1.25$.
Tennisball White Seeded. This old variety is today one of our best forcing Lettuces. Pkt. 10c., oz. $25 \mathrm{c} ., 1 / 4 \mathrm{lb} .75 \mathrm{c} ., \mathrm{lb} . \$ 2.50$.

hothouse lettuce

Tennis Ball, Black Seed. $\underset{\text { with }}{\text { A }}$ favorite market gardener: Heads are well formed, hardy and crisp. Excellent flavor and one of the earliest heading varicties; almost unexcelled; used by market gardeners in this vieinity. Pkt. 5c., $1 / 2 \mathrm{oz} .1 \overline{\mathrm{c}} .$, oz. $2 \overline{\mathrm{~J}} \mathrm{c} ., 1 / 1 \mathrm{lb}$. T.jc., lb. $\$ 2.00$.

Tomhannock. The upright growing leaves with edges tinged brown make it very attractive. Is crisp and tender.
Wonderful. One of the large varieties, very crisp and tender.

## Romaine or Cos Lettuce

Bath Cos. Very large; tall growing and fine flavor. Blanches easily.
Paris White Cos. Similar to the Bath Cos, only light colored leaves.
Trianon. A self-bleaching Cos Lettuce of excellent flavor. Very tender and crisp.

## LETTUCE-Continued

## Outdoor Growing for General Crop

Uniform price except where noted: Pkt. 5c., oz. 15 c., $1 / 4 \mathrm{lb} .40 \mathrm{c} ., \mathrm{lb} . \$ 1.50$.
American Gathering. Excellent flavor, tip of leaves marked with red.
Boston Curled. $\underset{\text { great beauty and fine qual- }}{\text { A superior strain. }}$ ity. The handsome, frilled leaves make it a decidedly ornamental variety. The best of the Curled Lettuces. Pkt. 10c., oz. 30c., $1 / 4 \mathrm{lb} . \$ 1.00$, lb. $\$ 3.00$.
Brown Head. More generally sown in Autumn and very hardy.
California Cream Butter. Heads are round, solid and good sized.
Deacon. Leares light green with large, solid heads, very tender and crisp.
Golden Gate. The green-colored heads make this attractive for home use. Is a very sure header and fine flavor.
Golden Queen. Golden yellow, solid heads, fine for forcing. Of medium size. Pkt. 5c., oz. 15c., $1 / \pm \mathrm{lb}$. $50 \mathrm{c} ., \mathrm{lb} . \$ 1.50$.
Hanson. An excellent plain leaf with large, solid heads; fine flavor, tender and crisp.

## Mammoth Black-Seeded Butter.

The largest and by many considered the best variety for the late crop. Sown from middle of July to middle of August, and produces enormous, finely formed heads of the finest quality. Pkt. 5c., oz. $15 \mathrm{c} ., 1 / 4 \mathrm{lb} .40 \mathrm{c}$., lb. $\$ 1.25$.
Mignonette. A very small-headed Lettuce, perfectly hardy and solid. One of the finest for the home garden. Pkt. 5c., oz. 15c., $1 / 4 \mathrm{lb} .40 \mathrm{c} ., \mathrm{lb} . \$ 1.2 \overline{5}$.
May King. A recent variety of great value on ay . account of its extreme earliness, large size and tenderness. Will head with heat as well as out-of-doors, though attains a better size with open air culture. Has a globular-shaped head of enormous size, hard and well closed. A decided acquisition. Pkt. 5c., oz. 15c., $1 / 4 \mathrm{lb} .40 \mathrm{c} ., \mathrm{lb} . \$ 1.50$.
Salamander. For a Summer variety this is nd one of the best, good-sized heads, and stands drought and heat with little injury.
Simpson, Black Seed. Heads are large, plain leaves light in color.
Simpson, Early Curled. One of our earliest curled varieties. Loose heads and very tender.

## Plants, Lettuce.

Hothouse grown. Delivery from September to April. $100 \$ 1.00,1000 \$ 9.00$.
Black-seeded Tennis Ball. Delivery from May to September. 100 75c., $1000 \$ 6.00$.

## Martynia

One ounce will plant about 150 hills.
CUlture.-Sow in hotbed in March for early use; for outside use sow in April or May, cover seed about three quarters inch; plants require a space of three feet each way as they are of a branching nature. Pods used for pickling.
Martynia Proboscidea. martynia proboscidea Pkt. 10 c ., oz. $30 \mathrm{c} ., 1 / 4 \mathrm{lb} .85 \mathrm{c}$.

## Fennel

Florence, or Naples. Resembles celery in flavor but has a sweet taste and delicate odor. Should be sown in Spring in drills 18 inches apart and the plants should be thinned to 5 or 6 inches apart. Pkt. 5c., ก\%. $20 \mathrm{c} ., 1 / 4 \mathrm{lb} .50 \mathrm{c}$.

## Musk Melon (Melonen)

Plant two or thrce pounds for one acre. One ounce jor 50 hills.
Culture.-Do not plant until all danger from frost is over, in hills six feet apart each way. Put a dozen seeds in a hill, and when danger from bugs is over thin to three or four plants. Pinch main stems, which will strengthen the vine, and the fruit will come earlier. Use Slug Shot or Bug Death to kill the bugs.

## Green-Fleshed Varieties

Hackensack, Extra Early. Very early. Fruit is large and flattened. Ribs large and of irregular width, densely covered with coarse netting. Green flesh, thick and excellent flavor. Always in demand in this marlet. Pkt. 5c., oz. 15c., $1 / 4 \mathrm{lb}$. 40c., lb. \$1.25.
Jenny Lind. Green flesh, extra early and one of the sweetest in cultivation. Medium size. Pkt. 5c., oz. $15 \mathrm{c} ., 1 / 4 \mathrm{lb} .40 \mathrm{c} ., \mathrm{lb} . \$ 1.25$.
Long Island Beauty. Very similar to the Hackensack. Ripens early; fruits are large, heavily ribbed and netted. Excellent quality. P'kt. 5c., oz. 15c., $1 / 4 \mathrm{lb} .50 \mathrm{c} ., \mathrm{lb} . \$ 1.50$.
Montreal Market Improved. One of the largest Melons grown. Fruit is nearly round, deeply and very irregularly ribbed. Skin green and densely netted; flesh remarkably thick and light green and of delicious flavor. The best Melon for exhibition purposes and home use. Pkt. 10c., oz. 20c., $1 / 4 \mathrm{lb}$. $50 c ., 1 \mathrm{lb} . \$ 1.50$.
Netted Gem. Nearly round, skin green, ribbed and netted. Flesh light green. Excellent flavor, early and prolific. Pkt. 5c., oz. 15c., $1 / 4 \mathrm{lb} .30 \mathrm{c} ., 1 \mathrm{lb} . \$ 1.00$.
Rocky Ford. The most popular market variety. An improvement on the netted gem varieties; more oblong, skin is light green and netted. Flesh is green, excellent flavor; unsurpassed for shipping. Pkt. 5c., oz. 15c., 1/4 lb. 30c., 1b. \$1.00.
Mango, or Vegetable Orange. While this fruit belongs to the Melon family, it has a flavor entirely its own. Used for pickling. Shape is oblong and very dark green. Pkt. 5c., oz. 15c., $1 / 4 \mathrm{lb} .45 \mathrm{c}$., lb. $\$ 1.50$.

## Red or Salmon-Fleshed

Banana. So called on account of its shape; salmon colored flesh. Pkt. 10c., oz. 25c., 1/4 lb. 75c., lb. $\$ 2.00$.
Burrell's Gem. Grows uniform in size and weight; flesh golden and very thick, fine grained, excellent quality. Pkt. 5 c., oz. 15 c ., $1 / 4 \mathrm{lb}$. $40 \mathrm{c} ., \mathrm{lb}$. $\$ 1.25$.

Christiana Improved. Flesh is very thick, dark, rich yellow and fine flavor. Pkt. 5c., oz. 15c., $1 / 4 \mathrm{lb}$. $50 \mathrm{c} ., \mathrm{lb} . \$ 1.25$.
Emerald Gem. It is of a rich, delicious flavor and fine quality. Very early and prolific; skin is striped deep emerald green with a few light colored stripes. Flesh is very thick and salmon color. Lxceedingly popular cariety for market gardener or home use. I'kt. Јc., oz. 15c., $1 / 4 \mathrm{lb} .40 \mathrm{c} ., \mathrm{lb} . \$ 1.25$.
Fordhook (Burpee). Small; very early, of vigorous growth and surpassingly sweet. P'kt. 10c., oz. $30 \mathrm{c} ., 1 / 4 \mathrm{lb}$. 85.
Long' Yellow. Flesh salmon color, good sized, netted and slightly ribbed. Pkt. 5c., oz. 10c., 1/t lb. $30 \mathrm{c} ., \mathrm{lb} . \$ 1.00$.
Miller's Cream. Skin dark green color, slightly netted. Flesh salmon color, sweet and delicious flavor. A remarkable keeper. One of the best salmon fleshed Melons for shipping. Pkt. 5c., oz. $15 \mathrm{c} ., 1 / 4 \mathrm{lb} .40 \mathrm{c} ., \mathrm{lb} . \$ 1.25$.
Petoskey, or Paul Rose. Nearly oval, slightly ribbed, netted; flesh thick and orange color. P'kt. 5c., oz. $15 \mathrm{c} ., 1 / 4 \mathrm{lb} .40 \mathrm{c}$.
Surprise. Very early, oblong, cream color skin, flesh salmon color. Pkt. 5c., oz. 15c., $1 / \pm \mathrm{lb} .30 \mathrm{c}$., lb. $\$ 1.00$.

## Water Melon (Rsaificmelonen)

One ounce will plant about 30 hills; four pounds to the aere. Culture same as Musk Melon.
A uniform price: Pkt. 5c., oz. 10c., $1 / 4$ 1b. 25c., 1b. 75 c.

Cole's Early. An extra early variety ; almost sure to ripen in this vicinity. Oval in shape and flesh excellent in flavor.
Cuban Queen. Vigorous in growth, striped dark and light; flesh is very solid, bright red, crisp and delicious flavor.
Dixie. Fruit medium size, skin dark green striped with a lighter shade. Flesh bright scarlet; ripens closely to the rind. Excellent keeping qualities.
Early Fordhook. One of the earliest large-fruited Melons. Skin dark green; flesh bright red; crisp, sweet; excellent quality.
Florida Favorite. A large, oblong, dark green skin striped with a deeper green. Flesh deep red, of excellent flavor.
Hungarian Honey. Early; nearly round; very dark green skin, with brilliant red flesh, which is very sweet. Vines healthy and productive.
Gray Monarch. A large oblong, mottled very light green. Specimens have been raised to weigh fifty to sixty pounds; quality excellent.
Ice Cream. Pale green, medium size, nearly round; flesh solid, scarlet, good flavor.
Kentucky Wonder. Oblong, skin striped, flesh scarlet. Crisp, rich sugary flavor.
Kleckley's Sweet. This "sweetest of all" Melons has now become exceedingly popular; luscious flavor, very fine grained, tender meat. Fruit of large size, rind very thin.
Kolb's Gem, or American Champion. Is of oval shape, with dark green stripes and large size; excellent flavor.
Mountain Sweet. For general use one of the best. Color, dark green; thin rind; flesh scarlet, solid and of excellent flavor.
Phinney's Early. This is one of the earliest varieties. Vines vigorous and productive. Melons medium size, oblong, smooth and marbled with two shades of green. Foliage is thick. Very sweet and tender.
Triumph. Handsome, large, dark green; excellent shipper; fine quality.
Citron. For preserving. Striped with light green; flesh white, red seeds.
Colorado Preserving. Very productive; flesh firm, solid and white; seeds pale green.

## Mushroom Spawn (Efyempignon:Bzitu)

Ten brickis will spawn ten feet square.

CULTURE. Mushrooms may be grown in any place where the conditions of temperature and moisture are favorable. The most essential factor, perhaps, is that of temperature. The proper temperature ranges from 53 degrees to 60 degrees $F$., with the best from 55 to 58 degrees $F$. It is unsafe to attempt to grow mushrooms at a temperature much less than 50 degrees or greater than 63 degrees $F$. Any severe changes of temperature retard growth or else act injuriously.

Fresh manure should be obtained and this should include the litter used for bedding the animals. It is a great mistake to use manure free from straw. Again stable manure which has been well trampled is nearly always well preserved, and is frequently much richer than any other kind.

After the beds are prepared the temperature should be and usually will be, too high for spawning. After a sudden rise the temperature should gradually fall during the course of a week or more to about 70 degrees or 75 degrees $F$. At this temperature spawning may take place, but under absolutely no circumstances should a bed be spawned at a temperature greater than 80 degrees $F$. The bricks are broken into pieces about two inches square, or into from ten to twelve pieces per brick. These pieces are inserted from one to two inches below the surface, about ten inches to one foot apart, and the bed is then compressed into final shape. Under the most favorable circumstances it is unnecessary and undesirable to water the beds for several weeks after spawning. If they dry out rapidly and some water is necessary, it should be given as a surface spraying, for water in quantity applied to young spawn will almost invariably cause the latter to damp off.
Lambert's Pure Culture Spawn. Produced under the new, selective method, is received absolutely fresh at frequent intervals from the manufacturer. This spawn will produce mushrooms of a specific variety, selected with special reference to their size, color and prolificness, to the exclusion of other and inferior fungi. It absolutely eliminates all danger of raising poisonous mushrooms. We keep on hand the cream white, brown and pure white varieties. Each brick weighs from $11 / 4$ to $11-3$ lbs., and will spawn ten square feet of beds. Bricks are of two kinds, Standard and Direct. Standard bricks are inoculated from a pure culture transfer; Direct bricks are inoculated directly from the original laborators culture. Sold by the brick. Per Standard brick 25 c., postpaid 35 c . ; 5 bricks by express $\$ 1.00$, 10 bricks $\$ 2.00,25$ bricks $\$ 4.25$, 50 bricks $\$ 8.00$, 100 bricks $\$ 15.00$. For Direct bricks add 3c. per brick to the above prices.

## Mustard (ङenf)

Sow one ounce to SO feet of drill.
Culture.-For early use sow in hotbed in March, and for general use at intervals, during the Summer, in rows six inches apart and thick in row. Cut when not over two inches high.
Chinese. Leaves twice the size of the ordinary white mustard, of a deeper green. Flavor pleasantly sweet and pungent, and preferable as a salad. Oz. 15c., $1 / 4 \mathrm{lb}$. 30 c .
Black, or Brown. For culinary use. Pkt. 5c., oz. $10 \mathrm{c} ., 1 / \pm \mathrm{lb} .15 \mathrm{c}$.
White, or Yellow. For salads or medicinal purposes. Pkt. 5 c ., oz. $10 \mathrm{c} ., 1 / 4 \mathrm{lb} .15 \mathrm{c}$.

## Okra one ounce wil plant 100 hills.

Culture.-Sow about the middle of May when the ground is warm, in hills about three feet apart; cover seed one-half inch and thin plants to three in a hill. Keep ground well hoed and earth up around the plants to support them. Gather pods while young and tender. Excellent for soups and stews, etc., to which they impart a rich flavor.

## Improved Long

 Green. Long, slender pods, very productive, and only 14 inches high. Pkt. ढ̄c., oz. 10c., $1 / 4 \mathrm{lb}$. $25 \mathrm{c} ., \mathrm{lb} .60 \mathrm{c}$.White Velvet. Smooth and of a velvety appearance. Tender and of good flavor. Pkt. 5c., oz. 10 c . $1 / 4 \mathrm{lb}$.
Perkin's
Mammoth. The pods shoot out from the stalk within three inches from the ground and the entire plant seems to be covered with pods of intense green color and unusual length and does not get hard quickly. Pkt. 5c., oz.

$10 \mathrm{c} ., 1 / 4 \mathrm{lb} .25 \mathrm{c} ., \mathrm{lb} .60 \mathrm{c}$.

A FIELD OF NEW ENGLAND GROWN DANVERS YELLOW GLOBE ONION

## ONION <br> (3miebeln)

An ounce will sow 100 feet of drill. Four to five pounds to the acre.
Culture.-Select a clean, rich piece of land, upon which Onions were grown the previous year, if possible. Scatter broadcast a heavy dressing of well rotted manure, and plough 6 or 7 inches deep as early in the Spring as the ground can be worked; harrow and rake down to a fine even surface. Sow about four pounds of seed per acre, in drills a foot apart, and a quarter of an inch deep. If a seeddrill is used, it should be provided with a good roller to press the earth firmly upon the seed, particularly if the soil is very dry. Sow as early as possible. A few days' delay often makes a marked difference in the crop. Unless the plants stand very thick together, they need not be thinned out much, if any, as Onions will crowd each other, and find room to grow. Never allow the weeds to get ahead of the young plants. The weeds must receive early attention. Use a scuffle or wheel-hoe between the rows and pull out the weeds not reached by the hoe. When the tops are all down, and the Onions well formed, they may be pulled, and left on the ground for a fortnight or longer to dry (unless the weather be unfavorable), turning them occasionally with a wooden rake.

## New England Grown Onion Seed

Red Flat, Extra Early. Usually comes about two weeks earlier than the Large Red Wethersfield; of medium size and an abundant producer. Uniform in shape. Pkt. 5 c., oz. $15 \mathrm{c} ., 1 / 4 \mathrm{lb} .40 \mathrm{c} ., \mathrm{lb} . \$ 1.60$.
Red Globe, Southport. Flesh fine grain, mild and tender; matures quite early; good size; skin deep red. Pkt. 5c., oz. 20c., 1/4 lb. 50c., lb. \$1.75.
Red Italian Tripoli. Large, flat Onion, mild flavor, producing very large bulbs. Pkt. 5c., oz. 25c., $1 / 4 \mathrm{lb} .60 \mathrm{c} ., \mathrm{lb} . \$ 2.00$.

## Red Wethersfield

Large. The largest, heaviest yielder and best keeper of all Red Onions. This is the standard red variety, large size. Skin deep purplish red. Smooth and glossy flesh, white lightly tinged with pinkish rose. The large solid onions keep well for late Winter markets. Pkt. 5c., oz. 20c., $1 / 4 \mathrm{lb} .50 \mathrm{c}$., lb. $\$ 1.75$.

## White Portugal or Silver Skin. $\begin{gathered}\text { Largely } \\ \text { groun by market gardeners }\end{gathered}$

 Very desirable for family use. Mild flavor, skin sil. very white, of handsome appearance. Pkt. 10c., or. $25 \mathrm{c} ., 1 / 4 \mathrm{lb} .75 \mathrm{c} ., 1 \mathrm{lb} . \$ 2.50$.White Globe, Southport. A large globe-shaped Onion. A popular market variety, an enormous yielder and good keeper. Its clear white skin and uniform shape demand highest market prices. Pkt. 10c., oz. 25 c ., $1 / 4 \mathrm{lb} .75 \mathrm{c} ., \mathrm{lb}$. $\$ 2.50$.
White Queen. A silver skin variety of quick growth, very early. If sown thickly, valuable for pickles. Pkt. 5c., oz. 25c., 1/4 lb. 60c., lb. \$2.00.
White Italian Tripoli. A large, pure white, flat Onion of mild flavor. I'kt. 5c., oz. 25c., $1 / 4 \mathrm{lb} .60 \mathrm{c}$., lb. $\$ 2.00$.
White Adriatic Barletta. Of the small Onions this is the earliest, especially adapted for pickling and table use ; of rapid growth. Pkt. 5c., oz. $2 \overline{\mathrm{c}}$ c., $1 / 4 \mathrm{lb}$. 60c., lb. \$2.00.

YELIOW PRIZETAKER ONION ONION-Continued
Yellow Cracker, Early. A very popular variety in Rliode Island markets. Is extra early. Pkt. 5c., oz. $2 \overline{\mathrm{y}} \mathrm{c} ., 1 / 4 \mathrm{lb} .60 \mathrm{c} ., \mathrm{lb} . \$ 1.75$.
Yellow Danvers Globe
This is the most popular of all the yellow Onions for market and home use. Uniforms in shape, heaviest cropper and best keeper. This strain of seed has been grown nany years in this vicinity, and is practically the only yellow Onion for the market gardeners here. It is the true Buxton type; is large in size, early, an abundant cropper, very thick bulb, flat or slightly convex bottom, full, oval top, small neck, rich brownish yellow skin. Special. This seed offered is the very highest quality, groun by a market gardener of long experience. I'kt. $10 \mathrm{c} .$, oz. $30 \mathrm{c} ., 1 / 4 \mathrm{lb} .90 \mathrm{c} ., \mathrm{lb} . \$ 3.00$.
Yellow Danvers Globe. Seed sown in California by an experienced gardener. Pkt. 5c., oz. 15c., $1 / 4$ lb. 50 c.. lb. $\$ 1.50$; by express, 10 lbs. $\$ 13.00$.
Yellow Globe, Southport. An excellent Onion for market; largely grown in Connecticut by market gardeners, and is increasing in favor in this vicinity. I'kt. 10c., oz. 20c., $1 / 4$ lb. 50c., lb. $\$ 1.75$.
Yellow Prizetaker Excellent keeper, enorrich straw color, averaging from twelve to fourteen inches in circumference. It is the large yellow Onion that is offered for sale at our fruit stores and large stores in the Fall. They ripen up hard and fine; flesh is pure white, fine grained, mild, delicate flavor; excellent for Fall or early Winter use. Pkt. Г̄c., oz. 20c., $1 / t$ lb. 50c., lb. $\$ 1.65$; by express, $10 \mathrm{lbs} . \$ 15.00$.
Ailsa Craig. The largest Onion grown. This is an English variaty and is quite popular with the English gardeners. It resembles the American variety of Prizetaker but will grow much larger and more globular in form. The skin is an attractive straw color; flesh is mild; will keep remarkably well for such a large bulb. In order to produce the largest and best Onion the seed should be sown in a hotbed early in the Spring, and transplanted when of sufficient size. They will prove valuable for those who grow them for exhibition purposes, as they are most attractive and showy. Pkt. 15c., $1 / 2 \mathrm{oz} .20 \mathrm{c}$., oz. $3 \overline{\mathrm{c}} \mathrm{c} ., 1 / 4$ lb. $\$ 1.00$, lb. $\$ 3.50$.

DANVERS YELLOW GLOBE ONION

## Onion Sets

Special quotations in bushel lots. Market price.
White Onion Sets. For setting in early Spring to produce the first early white Onions; largely used by market gardeners for bunehing. Qt. 25c., $1 / 2 \mathrm{pk}$. 70c., pk. $\$ 1.2 \overline{5}$, bus. ( 32 lbs.) $\$ 4.00$.
Yellow Onion Sets. These, like the white and red, are for early setting in Spring in place of sowing the seed, producing a large Onion much earlier than can be done by the seed. Qt. $25 \mathrm{c} ., 1 / 2 \mathrm{pk}$. 50 c ., pk. $\$ 1.00$, bus. ( 32 lbs ) $\$ 3.50$.
Egyptian, or Perennial Tree Onion. The young sets grow on the top of the stocks like tree Onions. Should be planted in August or September for early Spring use. They are prefectly hardy. Qt. 25c., $1 / 2 \mathrm{pk} .75 \mathrm{c} ., \mathrm{pk} . \$ 1.00$, bus. ( 28 lbs .) $\$ 3.50$.
Potato Onions, Yellow. From the parent halb many small bulbs are produced in clusters. Used for early Onions. Qt. $25 \mathrm{c} ., 1 / 2$ pk. 75 c ., pk. $\$ 1.25$.
Potato Onion, White, or Multiplier. Very similar to the yellow only the color is pure silverv white; quality is excellent; good size for bunching green. Qt. 2כe., $1 / 2 \mathrm{pk}$. 7 (5c., pk. \$1.25.
Shallots. For early planting. Qt. 25c., 1/2 pk. 75 c .

SMALL ONION SETS

## Parsley (Fpetersiiie)

One ounce will sow 100 feet of drill.
Culture.-Parsley seed germinates very slowly, taking two to four weeks to come up; hence, if wanted early, no time should be lost by delaying the sowing. Make the rows 12 to 14 inches apart. Thin to 3 or 4 inches apart, or transplant at this distance. Can be sown in hotbeds in February, or later in open ground. Late in Autumn place frames over some of the plants to lengthen out the season of cutting. For garnishing purposes nothing equals Parsley; it is also used in salads, soups, etc. Any good soil will suit for growing this plant.
Champion Moss Curled. Leaves are of exceedingly dark green color, very finely curled, making it most attractive for garnishing, while the plant is very attractive as a border. Pkt. 5c., oz. 15c., $1 / 4$ lb. $40 \mathrm{c} ., \mathrm{lb} . \$ 1.25$.
Double Curled. Very robust, free growth. Leaves are large, very dark green and beautifully curled; exceedingly large yielder. Stands heat and cold better than most varieties. Pkt. 10c., oz. 20c., $1 / 4$ lb. 60c., lb. $\$ 2.00$.
Hamburg, or Rooted. A rooted variety, of which the roots are the portion used; good in flavoring soups and stews. Pkt. 5c., oz. $10 \mathrm{c} ., 1 / 4 \mathrm{lb} .30 \mathrm{c}$.
Fern Leaf. This is most exquisite in form and color. Unsurpassed as a garnishing plant. Pkt. 5c., oz. 10c., $1 / 4 \mathrm{lb} .2 \overline{\mathrm{c}} ., \mathrm{lb} .75 \mathrm{c}$.
Plain Leaf. Leaves are longer and darker green than the curled varieties; very hardy. Excellent for seasoning. I'kt. 5c., oz. 10c., $1 / 4$ lb. 20c., lb. 60c.

DOUBLE CURLED PARSLEY

## Parsnip (Barfitinate)

One ounce will sow 100 feet of drill. Culturf.-Sow in Spring as soon as the weather will permit in rows eighteen inches apart. Cover seed one-half inch deep; thin out to five inches apart in row when plants are large enough. A little frost improves the flavor. Take up what is wanted for Winter, leaving the rest in the ground for Spring. Arlington Long Smooth. (Private Stock.) For deep soil and keeping in ground over Winter this is the best variety'; large yielder. Roots are very long, exceptionally smooth with a full crown, so that it keeps in the ground over Winter if necessary. Unsurpassed for marlet and exhibition purposes. This is especially selected for the full round crown and runs absolutely true from the seed of this private stock. Pkt. $10 \mathrm{c} .$, oz. $15 \mathrm{c} ., 1 / 4 \mathrm{lb} .50 \mathrm{c} .$, lb. $\$ 1.50$.
Improved Guernsey. An improved curled variety, hollow crown type. It is a very heavy cropper, roots smooth, flesh fine grain and excellent quality. Pkt. 5c., oz. 15c.. 1/4 lb. 30c., lb. 75 c.
Improved Hollow Crown. Roots medium length with a small tap root Very smooth, clear skin. Pkt. 5c., oz. 15c., $1 / 4$ lb. 30c., lb. 75c.
Short Round French. A round, early variety. Pkt. 5c., oz. 15c., $1 / 4$ lb. 30c., lb. 75c.

NANTUCKET SUGAR PUMPKIN

## Pumpkin (马irritif)

One pound will plant 200 to 300 hills. Onc ounce will plant 20 hills.
Culture.-Sow when all danger from frost is over in hills eight feet apart; thin out to four plants in a hill. The common practice is to drop two or three seeds in every third or fourth hill in the corn field.
Cushaw, or Crookneck. Large, light cream color, fine grain. Pkt. 5c., oz. 10c., $1 / 4 \mathrm{lb} .20 \mathrm{c} ., 1 \mathrm{lb} .75 \mathrm{c}$.
Connecticut Field. The best for field culture. Fkt. 5c., oz. 10c., 1/4 lb. 15c., lb. 50c.
King of the Mammoths. The largest of all Pumpkins. Pkt. 5c., oz. 15c., $1 / 4$ lb. 45 c., lb. $\$ 1.50$.
Large Cheese. Large, round flattened, with creamy buff skin. Pkt. 5c., oz. 10c., $1 / 4$ lb. 20c., lb. 65 c.
Nantucket Sugar, or Negro. Skin very dark green, almost black; flesh thick, and rich orange yellow. Excellent keeper. Pkt. 5c., oz. 10c., $1 / 4 \mathrm{lb}$.20 c ., lb. 60c.
Small Sugar. Fine grain, sweet, excellent keeper. Skin deep, orange yellow. Pkt. 5c., oz. 10c., $1 / 4 \mathrm{lb}$. 20c., lb. 60c.
Winter Luxury. Medium size, productive and an excellent keeper. Color of skin russet; finely netted. Pkt. 5c., oz. 10c., $1 / 4$ lb. 25c., lb. 75 c.

IMPROVED GUERNSEY PARSNIPS

## PEAS (닫ur)

Peas if wanted by mail, add for postage 8c. per pint, 15 c . per quart.
One quart will plant 100 feet of drill; from one to two bushels per acre.
Alaska. Vines grow from twenty to I'kt. $\$ 0.15$ thirty inches in height, bearing Pint .20 well-filled, medium-sized pods. Dry Quart .3.) seed is of a bluish color. Matures one of the extreme earlies.

4 quarts $1.1 \%$ American Wonder. On the points of flator and quality this Pea Pkt. \$0.15 stands at the head of the list. I'int .20 Very dwarf and robust habit and Quart . 40 grows ten to fifteen inches high. 4quarts 1.40 Iods well filled; dry peas medium $1 / \pm$ bus. 2.25 size and wrinkled.
Clipper. One of the earliest va- Pkt. \$0.15 usually about groum. Vines Pint 20 and well covered with pods. Peas 4 quarts 1.15 medium size, excellent flavor, $1 / \pm$ bus. 2.00 smooth and bluish color.

Pedigree, Extra Early. Of the strains of extra earlies we have tried, this is the purest ever offered to the trade. The vines are strong and vigorous, bearing pods of good length and well filled; exceptionally uniform.
Gradus, or Prosperity. The most popular of the long, large podded, wrinkled Peas. Of the finest quality, and matures pods only a few days later than the extra early smooth Peas. Vines grow about $21 / 2$ feet high; very large. Are of superior quality in size and flavor. Nlways salable as a market variety.
Laxtonian. One of the earliest dwarf Peas. Vines are vigorous, growing about eighteen inches high, well covered with large, even-sized pods averaging $S$ or 9 to a vine and 9 to 10 peas in a pod. Quality of the best.
Nott's Excelsior. This is one of the most popular extra carly wrinkled varieties, especially with the market gardener. Tines are dwarf and vigorous. Pods contain from six to eight large peas, packed very closely together in the pod, making them more square than round. Pods average about 3 inches in length. Peas of superior quality.
Premium Gem. Grows about fifteen inches high. Peas are medium sized and wrinkled. Of excellent quality. Excellent for home use.
Little Marvel. As there are so hesitated adding another to our list, but this is of extra value ; grows about fifteen inches high; pods average two and one-half inches in length, well filled with six to seven large, deep green peas of excellent flavor.
Claudit. An extra early of great dark green; peas also large and slightly wrinkled; excellent quality.

LAXATONIAN
PEAS-Continued
Sutton's Excelsior. This variety improvement on the Nott's Excelsior. It is earlier, pods and peas larger and vines growing about the same height, and has a much larger yield. This variety has stood the test for the last five years as a profitable Pea for the market gardener.

## Thomas Laxton.

radus Extremely of the famous Pea, long pod. In some respects we consider it better than the Gradus; pods are of a deep rich green. Peas very sweet; deep green.

Surprise, or Eclipse. The earliest wrinkled Pea grown. Pods are medium size, well filled with peas and of excellent flavor.
Velocity. The earliest Pea grown, maturing about five days ahead of any other variety; grows about two feet high. Pods of good size for an extremely early Pea, although not as large as other early varieties. Peas equal to any of the extra early varieties.

## Second Early and Late Varieties

Abundance. Vines grow from three to three and one-half feet. Pods are of good size and well filled with large, wrinkled peas. Quality is excellent.
Alderman. A large-podded, late, wrinkled variety of vigorous growth, $31 / 2$ to 4 feet high; very productive; pods 4 to 5 inches long, well filled with large peas of excellent flavor.
Black-Eye Marrowfat. The old standard variety for market and field culture. Smooth pea, black eye.
Boston Unrivaled. An improved strain of the Telephone type. Vines grow 4 to 5 feet high and are covered with fine large pods about 5 inches long, $3 / 4$ inch broad, and containing 7 to 8 extra large peas of $1 / 4$ bus. 2.50 the finest flavor.
Champion of England. Of the late varieties this is one of the very best and exceedingly productive. Grows four to five feet. Seed is green and wrinkled. Universally admitted to be one of the richest, best flavored peas grown.
Dwarf Champion. Very similar to the Champion of England except in growth of vine, which is only about two and one-half feet in height. Pods are dark green, good size, and very prolific. Quality excellent.
Dwarf Telephone, or Daisy. Grows one and one-half or two feet in height, very stocky, heavy, vigorous vine; productive. Pods are long and remarkably well filled. Peas are large and wrinkled.
Dwarf Defiance (Sutton). Pods straight and well filled with large peas of excellent flavor. Very productive.
Duke of Albany (American Champion). Immense pods, with peas of superior flavor. 4 quarts $\$ 1.75$
Everbearing. Very prolific vine, growing two and one-half feet high. Pods two to three inches long, well filled with large peas of excellent quality. For the private gardeners this is one of the best.
French Canner, or Petit. Vines grow about three or four feet high and are very productive; extensively used for canning. Pods and peas are very small.

## PEAS-Continued

Golden King. This new golden-podded Pea grôws about four feet high ; very vigorous, with bright green vines and foliage, bearing pots of a uniform shining deep golden-yellow color with eight to nine large green wrinkled peas of excellent quality.
Heroine. A late, wrinkled Pea, strong growth. Vines branching freely and grow about two and one-half feet high. l'ods are large and well filled.
Horsford's Market Garden. A wrinkled variety maturing with the Mclean's Advancer. Vines are two feet high, prolific bearer. Peas, quality excellent.
Juno. Grows about two feet ligh and is a vigorous, strong grower. Pods very little curved, dark green and usually growing in pairs. Retain their attractive dark green color.
Large White Marrowfat. Grows about five feet highi. Large pods well filled with large, white peas.
McLean's Advancer. For a secl'ea this excels all others, especially for ripening about July 4 th; very productive and excellent flavor. Grows about $21 / 2$ feet in height. IRipens immediately after the extra earlies; can be picked clean at two pickings.

## Stratagem Improved It is a fav-

 the market gardeners for orite with crop on account of the strong vines and large peas and pods. A heavy cropper. Vines are strong, vigorous and covered with large pods measuring nearly five and one-half inches in length. Peas wrinkled, vines very branching, often twenty pods to a vine; quality is excellent. Our stock has been carefully selected and will run remarkably true.

telephone. large pods. Vines large, Pint .25 coarse leaves, height $41 / 2$ feet. Pods Quart 40 are large, filled with enormous peas of 4 quarts 1.50 tender, sweet and excellent flavor. $1 / 4$ bus. 2.50

## EDIBLE-PODDED PEAS

Dwarf Gray Sugar. Vines grow Pkt. \$0.15 about fifteen inches high with pur- Pint ${ }^{2} .25$ plish blossoms; sugar peas are not Quart .40 shelled, but pods are broken and 4 quarts 1.50 cooked the same as string Beans.
Mammoth Melting Sugar. Vines Plat. $\$ 0.15$ grow about four feet high; very pro- Pint 25 ductive. Pods average 5 to 6 inches in Quart 40 length, and $11 / 2$ inches in width, brok- 4 quarts 1.35 en and cooked same as string Beans. $1 / 4$ bus. 2.50 For Field and Cow Peas for Fodder, see Farm Seeds, page 49 .

## Peppers (FPeffer)

One ounce will produce about 2,000 plant. Culture.-Sow in hotbed in March or April; transplant in open ground when all danger from frost is over, in rows three feet apart and two feet apart in a row. Seed can be sown outside late in May. Cover seed one-half inch and thin as above.
Cazenne (true). Pods are small, con-shaped and red. Used for pickling. Pkt. 5c., 1/2 oz. 15c., oz. 25c., 2 oz. $45 \mathrm{c} ., 1 / 4 \mathrm{lb} .75 \mathrm{c}$.
Cherry Red. Small, smooth, round variety. Deep, glossy, scarlet color. Pkt. $5 \mathrm{c} ., 1 / 2 \mathrm{oz} .15 \mathrm{c} .$, oz. 25 c ., $2 \mathrm{oz} .45 \mathrm{c} ., 1 / 4 \mathrm{lb} .75 \mathrm{c}$.
Coral Gem. Small pods, shiny red color. Appear in clusters. Excellent for seasoning. Pkt. 5c., $1 / 2 \mathrm{oz} .20 \mathrm{c}$., oz. $35 \mathrm{c} ., 2 \mathrm{oz} .60 \mathrm{c} ., 1 / 4 \mathrm{lb} . \$ 1.00$.
Celestial. Creamy white and scarlet when matured; prolific. Pkt. 5c., $1 / 2$ oz. 15c., oz. 25c., 2 oz. 45 c ., $1 / 4 \mathrm{lb}$. 75 c.
Chinese Giant. Grows from four to five inches broad at the top and of about equal length, divided into four or more large ridges. Produces uniformly monstrous Peppers of thick, blocky form and a most brilliant, glossy color. Flesh is extremely smooth and unusually thick, making an excellent salad sliced like the Tomato. Pkt. 10 c ., $1 / 2 \mathrm{oz} .30 \mathrm{c}$., oz. 50 c ., $1 / 4 \mathrm{lb}$. $\$ 1.50$.
Golden Dawn. Bright golden yellow color. Mild and sweet. Pkt. 5 c ., $1 / 2$ oz. 15 c ., oz. $25 \mathrm{c} ., 2$ oz. $45 \mathrm{c} ., 1 / 4 \mathrm{lb} .75 \mathrm{c}$.
Italian, Sweet. Exceedingly mild flavor, in great demand in this vicinity. Grows six to seven inches in length, diameter about two or three inches at the base. Light green before turning red. Principal variety used in green state. Pkt. 10c., $1 / 2 \mathrm{oz} .15 \mathrm{c}$., oz. $30 \mathrm{c} ., 2 \mathrm{oz} .60 \mathrm{c} ., 1 / 4 \mathrm{lb} . \$ 1.00$.
Large Bell. Very large sort. Flesh thick, hard and Fruit sometimes three or four inches in length. Pkt. 5̌c., $1 / 2 \mathrm{oz} .15 \mathrm{c} .$, oz. $25 \mathrm{c} ., 1 / 4 \mathrm{lb} .75 \mathrm{c}$.
Neapolitan. An excellent market variety on account of its earliness and productiveness; usually ripens two weeks earlier than the Bull-Nose. Fruit of large size, growing on a thick, stocky plant; flesh is quite thick and exceedingly smooth ; color is light green changing to bright red when ripe. Pkt. 10 c ., $1 / 2 \mathrm{oz}$. $20 \mathrm{c} .$, oz. $35 \mathrm{c} ., 1 / 4 \mathrm{lb}$. $\$ 1.00$.
Procopp's Giant. Very large; flesh thick, crisp and sharp. Pkt. 5 c., $1 / 2$ oz. 15c., oz. 25c., $1 / 4 \mathrm{lb} .75 \mathrm{c}$.
Ruby King. Large, scarlet fruit; flesh is thick, white and rather mild flavor. Especially fine for pickles. Pkt. 5c., $1 / 2$ oz. 15 c ., oz. 25c., 1/4 1b. 75 c .

SQUASH, OR TOMATO-SHAPED PEPPER

Sweet Mountain. Exceedingly large, very prolific and popular market variety. Plants vigorous and productive; fruit is large and smooth; flesh very thick. Pkt. 5c., $1 / 2 \mathrm{oz}$. 15 c ., oz. 25 c ., $1 / 4 \mathrm{lb}$. 75 c .

## Squash,

or Pickling. Extensively used in Boston markets; the most popular variety with the market gardener; very productive. Flesh very thick and fruit quite smooth and nearly round. Plants are quite dwarf and mature fruit ready for market earlier than most other varieties. We have table especial care in the selection of the fruit for seed of this variety. Pkt. $10 \mathrm{c} ., 1 / 2$ oz. 20 c ., oz. $30 \mathrm{c} ., 1 / 4 \mathrm{lb} . \$ 1.00$, lb. $\$ 3.50$.
Sweet Upright. Flesh bright scarlet, thick and sweet; of upright growth, as early as Bull-Nose and heavier. Pkt. 10c., $1 / 2$ oz. 20 c ., oz. 35 c ., $1 / 4 \mathrm{lb}$. $\$ 1.00$.
Tabasco. Is of tall, bushy-like growth three or four feet in height; produces an enormous number of small, slender and very hot fruit one inch in length. Vivid scarlet in color. Plants should be started early in hotbeds in order for them to ripen in this latitude. Pkt. 10c., 1/2 oz. 25 c ., oz. 45 c ., $1 / 4 \mathrm{lb}$. $\$ 1.25$.
PEPPER PLANTS, ready in May and June. Doz. 25c.

## HIGHEST GRADE SEEDS

All our Vegetable and Flower Seeds are tested before we place them in the packages, and each year most of the vegetable seeds are grown to maturity in our trial grounds during the Summer that we may know just what the seeds we sell will produce. We know they will grow for they have all been tested as to germination before being placed on sale. We can give you the percentages of germination if you wish

IRISII COBBLER POTATO

## Potatoes (§artoffel)

Eight to ten bushels, or three to four barrels sufficient for one acre. One peck will plant 75 hills Potatoes sent by express or freight, purchaser paying transit.
Our Potatoes are strictly Maine grown, and especially for seed we make a tiniform price of $1 / 2 \mathrm{pk}$. $3 \mathrm{Bc} ., \mathrm{pk}$. 60 c ., bus. \$1.75. bbl. \$4. Special price on large quantities.

Culture.- Any good soil will produce potatoes, but quality is much improved when produced on good sandy loam. Make furrows of good depth, three feet apart, scatter a liberal dressing of fertilizer in the drill. Cover slightly with earth and upon this set the seed potatoes in hills one and onehalf feet apart. If a very early crop is desired, it will be necessary to sprout the potatoes before planting. Cut the potatoes in pieces of the size desired and place in a warm light room for four days before required for planting in the open ground.

Use Bordeaux mixture for blight and arsenate of lead for the Colorado bettle, or if, as is often the case both these conditions prevail, use the two in combination. We recommend Pyrox (Bowker's) for this purpose knowing it to be effective, and we believe it will also increase the crop and improve the quality.
Early Norwood. Excellent yielder, cooks perfectly white, dry and floury. The vines are of medium size, bushy and compact. Tubers are oval, white, with a pinkish tinge around the eye, which is not very large. Tubers running very uniform as to size, and practically all marketable. Its handsome appearance, perfect form and superb cooking qualities will readily recommend it to every grower. $1 / 2 \mathrm{pk}$. $3 \overline{\mathrm{c}} \mathrm{c} ., \mathrm{pk}$. G0c., bus. $\$ 2.00$. bbl. $\$ 4.50$.

Norcross. Originated in Maine: introducer says: "Seed-Boll grown on the Early Rose, pollenized by Beauty of Hebron; is white, smooth, good size, excellent quality and abundant yiclder. A prize winner." I'k. 75c., bus. \$2. $\overline{5} 0$, bbl. $\$ \overline{5} .00$.
Beauty of Hebron. Pure white with flesh-colored skin; a general favorite.
Bovee. Early and productive. Flesh is white; good size and fine quality.
Carmine No. 3. Vines strong and vigorous. Eyes shallow and few in number. Skin flesh white.
Delaware. Vines are strong and vigorous; tubers are large, smooth, white and excellent quality.
Early Fortune. One of the earliest. 'Tubers oblong and flesh white.
Early Norther. An excellent early variety resembling the Early Rose in shape and color.
Early Norwood. One of the extra earlies. A good yielder, resembling the Larly Rose in color, but a little broader in shape.
Early Rose. The standard variety for general use.

EARLY NORTIIER
Early Ohio. One of the extra early varieties, round and smooth. Skin flesh color.
Green Mountain. Vines are strong and vigorous Both skin and flesh extremely white; good yielder.
Irish Cobbler. Very similar to the Green Mountain, except more round.
New Queen. Resembles the Beauty of Hebron. Flesh white; very productive.
Uncle Sam. Is a medium late. Large yielder; good size, and cooks white and dry.

## Radish (Ћabies und Æettig)

One ounce will sow about 100 feet of drill.
Culture.-Snow in the open ground as soon as it can be worked, at intervals of ten days for a succession as long as wanted. Sow in hotbed or greenhouse in Winter. The Winter varieties should be sown in August and lifted before severe frost. As their tender and mild qualities depend on rapid growth, the soil should be rich, light and mellow. Arlington Long Scarlet. This is unexcelled for a long Radish. A favorite on the market on account of its beautiful appearance and fine flavor. Pkt. 5c., oz. 10c., $1 / 4 \mathrm{lb} .25 \mathrm{c}$., 1b. 75 c .
Crimson Giant Forcing. This variety will grow a medium size as quickly as any; it also remains crisp, firm and solid until double the size of others. Pkt. 5c., oz. 10c., $1 / 41$ lb. 25c., lb. 75c.
Early Scarlet Globe. For a forcing Radish head the list has been at the head of the list, being the best shape, brightest scarlet, most uniform and short top. Tender and crisp. I'kt. 5c., oz. 10c., $1 / 4 \mathrm{lb} .25 \mathrm{c} ., 1 \mathrm{lb} .75 \mathrm{c}$.
Early Scarlet Turnip. Small top, quick growth, mild and crisp. Excellent for forcing. Pkt. 5c., oz. $10 \mathrm{c} ., 1 / 4 \mathrm{lb}$. 25 c ., lb. 75 c .

## Early Scarlet Turnip,

White Tip. Very deep scarlet with white tip. Its excellent appearance makes it a favorite in the market. Pkt. 5c., oz. 10c., $1 / 4 \mathrm{lb}$. $25 \mathrm{c} ., \mathrm{lb} .75 \mathrm{c}$.
Early White Turnip. Like the scarlet in shape but color is white. Pkt. 5c., oz. 10c., $1 / 4 \mathrm{lb} .25 \mathrm{c}$., lb. 75 c .
French Breakfast. A popular, quick growing variety, excellent for forcing. Oval form, scarlet tipped with white. Pkt. $5 \mathrm{c} ., \mathrm{oz} .10 \mathrm{c} ., 1 / 4 \mathrm{lb} .25 \mathrm{c} ., 1 \mathrm{lb} .75 \mathrm{c}$.
Giant White Strasburg. Roots pure white, oblong and mild flavor. Pkt. 5c., oz. 10c., $1 / 4 \mathrm{lb} .25 \mathrm{c}$., lb. 75 c .

## Giant White Stuttgart, Summer.

Early, quick growing. In five to eight weeks after being sown will produce extra large roots. Pkt. 5c., oz. 15 c ., $1 / 4 \mathrm{lb}$. 30 c ., lb. $\$ 1.00$.

SCARLET GLOBE RADISH
Icicle. Grows three to four inches long; matures in twenty-five days after sowing. Is the most transparent of any Radish. Pkt. 5c., oz. $10 \mathrm{c} ., 1 / 4 \mathrm{lb} .30 \mathrm{c}$., lb. $\$ 1.00$.
Long Brightest Scarlet. Very bright scarlet, medium long with white tip. Pkt. 5c., oz. 10c., $1 / 4 \mathrm{lb}$. $25 \mathrm{c} ., 1 \mathrm{l} .75 \mathrm{c}$.
Ne Plus Ultra, or Twenty Day Forcing. Earliest of all Radishes for forcing, being ready for the table in three weeks. Roots are round and bright scarlet. Pkt. 5c., oz. 10c., 1/4 lb. 30c., lb. $\$ 1.00$.
Sakurajima, Mammoth Japan. A variety of large size grown in Japan. Pure white, tender and crisp; the largest grown. Pkt. 10c., oz. $25 \mathrm{c} ., 1 / 4 \mathrm{lb}$. 75 c ., lib. $\$ 2.50$.
Scarlet, Twenty Day Forcing. Short leaves, very early and brilliant red. Excellent for frames. Pkt. Ј̄c., oz. 10c., $1 / 4 \mathrm{lb} .25 \mathrm{c} ., \mathrm{lb} .75 \mathrm{c}$.
Wood's Early Frame. Similar to the Long Scarlet only not as long and a more brilliant color. Excellent for forcing. Pkt. 5c., oz. 10c., $1 / 4 \mathrm{lb} .25 \mathrm{c}$., lb. 75 c .

## Winter Varieties

California, Mammoth White. Grows a large size, flesh is white, firm and good flavor. Pkt. 5. ., oz. $10 \mathrm{c} ., 1 / 4 \mathrm{lb} .25 \mathrm{c} ., \mathrm{lb} .75 \mathrm{c}$.
Long Black Spanish. Very large size, firm texture, and should be stored in sand for Winter use. Pkt. ̄̄c., oz. $10 \mathrm{c} ., 1 / 4 \mathrm{lb} .25 \mathrm{c} ., 1 \mathrm{lb} .75 \mathrm{c}$.
Round Black Spanish. Similar to above only round. Pkt. 5c., oz. 10c., 1/4 1b. 25c., 1b. 75 c .
Rose-Colored China. Of rose color, flesh firm. Rather conical in shape, very smooth.: Pkt. 5c., oz. 10c., $1 / 4 \mathrm{lb}$. 25 c ., lb. 75 c.

GIANT STUTTGART

## Rhubarb (Mifobartere)

Culture.-This plant is mostly propagated by division of the roots. The best time to set out the plants is early in the Spring, although it is sometimes done in Autumn. Make furrows of good depth, 3 to 4 feet apart, according to the variety planted; across these furrows, at right angles, maie others the same distance apart; at each intersection put three or four shovelfuls of good manure, and upon this set the plants. Any good soil will suit Rhubarb; but to obtain heavy crops, good soil well manured is indispensable. A piece of root with a single bud, or eye, is enough for each hill. Cultivate during Summer, but do not pull any stalks the first year. Late in Autumn cover each plant with a good shovelful of manure, and plough a furrow against each side of the rows; this protection will assist the earliness of the crop. In early Spring level the ground, working in the manure with a fork. Plants can be obtained from seed, which may be sown in a hotbed in March, and the plants set out about the middle of May. It takes longer, however, to obtain a crop from seedling plants than from roots.
Linnæus. The earliest and best for garden use; not so coarse and fibrous as the larger sorts. Pkt. 5c., oz. 30c., 1/4 lb. テ̄̄.
Victoria. The variety in general use for the market; yields immense crops. Pkt. 5c., oz. 30c., $1 / 4 \mathrm{lb}$. 75 c .
Rhubarb Roots. Each 1 J̌., doz. $\$ 1.50$ (buyer paying transit).

SALSIFY

## Salsify, or Oyster Plant

One ounce will sow 50 feet of drill.

CUlTURE.-Sow the seed early in Spring in rows twelve inches apart and one deep: thin plants to four inches apart in row. For Winter use dig and place in cellar in boxes; cover roots with sand or soil. If left in ground till Spring, dig as early as possible. A deep, sandy soil is the best for good results.

## Sandwich Island

Mammoth. An ex-
cellent variety.
Very smooth, fine quality, white, and grows double the size of the Iong White. Pkt. 10c., oz. 20c., 2 oz. 25c., 1/4 lb. $50 \mathrm{c} ., \mathrm{lb}, \$ 1.50{ }^{1 / 4}$

## Scorzonera, Black Salsify

Cultivate similar to Salsify ; it is cooked in the same manner. It is not as easily raised, and for this reason is not seen as often in the market. Considered by many superior to Salsify. It is also called Black Salsify. Pkt. 10c., oz. $20 \mathrm{c} ., 1 / 4 \mathrm{lb} .60 \mathrm{c} ., \mathrm{lb}$. $\$ 2.00$.

## Spinach (؟piuat)

One ounce will sow 50 feet of drill. Twelve to sixteen pounds will sow an acre.
CULTURE.-Spinach may be grown on any ordinary soil, and its cultivation is a very simple matter. It is grown both as a Spring and Summer crop. For early use, sow in August or September, in drills 12 to 14 inches apart. At the approach of cold weather cover lightly with straw, or any handy litter. Uncover when the plants begin to make a new growth in Spring. For Summer use, sow early in Spring, in the same way as above, using rather less seed. If the plants stand too thick, thin to 3 or 4 inches apart. A liberal dressing of good manure should be used. The land can hardly be made too rich.
Arlington Pointed Leaf. A very hardy, variety : extensively used for Fall use. Pkt. 5c., oz. $10 \mathrm{c} ., 1 / 4 \mathrm{lb} .20 \mathrm{c} ., 1 \mathrm{~b} .50 \mathrm{c}$.
Long Standing. Desirable on account of not running to seed as some varieties do. Excellent for Spring use. I'kt. Ј̄., oz. 10c., 1/4 lb. 15c., lb. 40 c .
New Zealand. Grows large and luxuriant in warm, rich soil, and produces a large quantity of leaves during the Summer. Pkt. 5c., oz. 1Ј̄., $1 / 4 \mathrm{lb} .30 \mathrm{c}$., lb. $\$ 1.00$.
Prickly, or Fall. Seed is prickly and triangular; oblong, arrow-shaped leaves. Especially useful for Fall sowing. Pkt. 5c., oz. 10c., 1/4 lb. 15c., lb. 40 c.
Round Crumpled Leaf. It is the market vorite for either Fall or Spring sowing. Produces large, thick, dark green leaves, somewhat crumpled, and has the quality of standing a long time. Pkt. 5c., oz. 10c., $1 / 4 \mathrm{lb} .15 \mathrm{c} ., \mathrm{lb}$. 3Ј.
Savoy Leaf, Bloomsdale. Very hardy. popular. Productive, tender and excellent quality. Pkt. 5c., oz. 10c., $1 / 4 \mathrm{lb} .15 \mathrm{c} ., \mathrm{lb} .40 \mathrm{c}$.
Triumph. Yery hardy, large, thick, fleshy dark green leaves; excellent for Summer use. Pkt. 10c., oz. 15c., $1 / 4 \mathrm{lb} .40 \mathrm{c} ., \mathrm{lb} .60 \mathrm{c}$.
Victoria. Later than other varieties; remarkably fine texture. Dark green, heavy, crimped, fleshy leaves. Pkt. 5c., oz. 10c., $1 / 4 \mathrm{lb}$. 15́c., lb. 35́c.

## Sweet Corn for the Market Gardener

 CONCORD BEARSEOOT.
## See page 22.

 ARISTOCRAT. An extra early variety. market. See page 22.
## SQUASH

Early varieties, one ounce suff cient for 50 hills. Late varieties, ounce for 20 hills; four to six pounds to acre
Culture.-Before you plant squash the ground must be warm and settled, the soil light and highly manured. Summer varieties should be planted from four to six feet apart each way in the hills, pressing the seed down firmly one inch deep. Late varieties in hills eight feet apart, covering the seed about one and one-half inch deep. Slug Shot or plaster will keep the bugs off.

## Early Summer Varieties

ArlingtonSummer Crookneck. Is early, size and rather straight neck, and much larger than the ordinary Crookneck. Grows from fifteen to eighteen inches long and of the finest quality. Their handsome appearance commands an extra price in the market and is a favorite Summer Crookneck with the market gardeners. I'kt. 10c., oz. 15 c ., $1 / 4 \mathrm{lb}$. 35 c ., lb. $\$ 1.00$.
Cocozell Bush. Fine quality. Oblong, with smooth skin; mottled dark green and yellow. Pkt. 5c., oz. $10 \mathrm{c} ., 1 / 4 \mathrm{lb} .30 \mathrm{c} ., \mathrm{lb} . \$ 1.00$.
Early Summer Crookneck. Small, crooknecked Summer squash. Skin bright yellow, somewhat warted. Very early and quite productive. Pkt. 5c., oz. $10 \mathrm{c} ., 1 / 4 \mathrm{lb} .25 \mathrm{c} ., \mathrm{lb} .75 \mathrm{c}$.
Early White Crookneck. Similar in shape to above, only much larger and skin is a creamy white. Pkt. 5c., oz. 10c., $1 / 4 \mathrm{lb} .25 \mathrm{c} ., \mathrm{lb} .75 \mathrm{c}$.
Early White Bush Scallop, or Pattypan. Matures the earliest of any; very productive, light creamy color and scallop shaped. Pkt. 5c., oz. 10c., $1 / 4 \mathrm{lb} .25 \mathrm{c} ., \mathrm{lb} .75 \mathrm{c}$.
Mammoth Bush Scallop. A selection from the ordinary variety, which it resembles with the exception of being larger; equally early. Pkt. 5c., oz. $10 \mathrm{c} ., 1 / 4 \mathrm{lb} .30 \mathrm{c} ., \mathrm{lb} . \$ 1.00$.
Yellow Bush Scallop. The only difference between this and the other varieties is that it is colored a deep yellow. Pkt. 5c., oz. 10c., $1 / 4 \mathrm{lb} .25 \mathrm{c} ., \mathrm{lb}$. 7 د̄c.

## Fall and Winter Varieties

Bay State. Its chief points of merit are its sweetness of flavor. Its hard shell gives the assurance of being a good keeper. Is green; flesh bright golden yellow and finely flavored. A large yielder. Pkt. 5 c., oz. 10c.,. $1 / 4 \mathrm{llb} .30 \mathrm{c} ., \mathrm{lb} . \$ 1.00$.
Boston Marrow. An early Fall sort of oval form; Skin thin, and when ripe a light orange color. Good size, excellent keeper. Pkt. 5c., oz. 10c., $1 / 4 \mathrm{lb} .25 \mathrm{c}$., lb. 75 c .
Delicious. For table use no squash compares with fin in its remarkable combination of fineness, compactness of grain, dryness, sweetness and exceeding rich flavor. Its color is almost uniformly green in shade. Weighs from five to ten pounds. Pkt. $5 \mathrm{c} .$, oz. 15 c ., $1 / 4 \mathrm{lb} .40 \mathrm{c} ., \mathrm{lb} . \$ 1.25$.
Delicata. Early, very prolific; orange colored splashed and striped with rery dark green. Pkt. 5c., oz. 10c., $1 / 4 \mathrm{lb}$. 30c., lb. $\$ 1.00$.
Essex Mybrid. Its shape is very distinct from other a small cap-shaped enlargenent. Flesh is dry, sweet and thick, bright orange color. One of the best for keeping. Pkt. 5c., oz. $10 \mathrm{c} ., 1 / 4 \mathrm{lb} .30 \mathrm{c} ., \mathrm{lb} . \$ 1.00$.
Faxon. Squashes vary in color, some being pale green mottled and faintly striped. Excellent flavor. Pkt. 5c., oz. $10 \mathrm{c} ., 1 / 4 \mathrm{lb} .30 \mathrm{c}$., lb. $\$ 1.00$.
Fordhook. Squashes are small and cream color, flesh is dry, sweet and one of the best in quality. Keeps throughout the Winter. Pkt. 5c., oz. 15 c ., $1 / 4 \mathrm{lb} .40 \mathrm{c}$., lb. $\$ 1.25$.

## ARLINGTON SUMMER CROOKNECE SQUASH

Golden Bronze. Very similar in form to the Prolific Marrow. Color is dark grayish green; flesh bright yellow. Fine grain, sweet, delicious flavor. Pkt. 5c., oz. 10c., $1 / 4 \mathrm{lb}$. 30c., lb. $\$ 1.00$.
Golden Hubbard. Similar to the old variety of Hubbard except in color, which is reddish yellow. Pkt. 5c., oz. 10c., $1 / 4 \mathrm{lb} .30 \mathrm{c} ., \mathrm{lb} . \$ 1.00$.
Hubbard. The most popular of all Winter variesize, often weighing from nine to twenty pounds. Color bluish green occasionally marked with a brownish orapge. Flesh is fine grain, dry and excellent flavor. Pkt. 5c., oz. 10c., $1 / 4 \mathrm{lb} .30 \mathrm{c} ., \mathrm{lb} . \$ 1.00$.
Hubbard, Warted. It grows larger than the old variety; dark green and covered with warts. Pkt. Ј̆c., oz. $10 \mathrm{c} ., 1 / 4 \mathrm{lb} .30 \mathrm{c} ., \mathrm{lb} . \$ 1.00$.
Mammoth Chili. Is round, flattened at both the stem and blossom ends. Outer color is rich golden yellow. It is the largest of the squash family. Pkt. 10 c ., oz. 20 c ., $1 / 4 \mathrm{lb}$. 50 c ., lb. $\$ 1.75$.
Marblehead. Skin is very light bluish green. Flesh is of light color and very dry. Pkt. 5c., oz. 10c., $1 / 4 \mathrm{lb} .25 \mathrm{c}$., lb. 75 c .
Prolific, or Orange Marrow. For an early Fall squash there is no squash that can compare with this in earliness and productiveness, which are important features with the market gardener. Brilliant orange red color, which makes it attractive in the market. Pkt. 5c., oz. 10c., $1 / 4 \mathrm{lb}$. $30 \mathrm{c} ., \mathrm{lb} . \$ 1.00$.
Victor. Rich orange yellow. Fall and Winter variety. Hard shell, thickly covered with warts ; very thick, solid flesh. Fine yielder. Pkt. 5c., oz. 10c., $1 / 4 \mathrm{lb}$. 30c., lb. $\$ 1.00$.
Warren. A fine Turban Squash similar to Essex Hybrid, but much deeper in color. Pkt. 5c., oz. 10c., $1 / 4 \mathrm{lb} .30 \mathrm{c} ., \mathrm{lb} . \$ 1.00$.
Winter Crookneck. An old, well-known variety; one of the longest keepers; often will keep until the crop is gathered the following year. Pkt. 5c., oz. 10 c ., $1 / 4 \mathrm{lb}$. 25 c ., 1b. 75 c .
Vegetable Marrow. A favorite English sort. Is early and skin greenish yellow; flesh white and rich flavor. Pkt. 5 c ., oz. 10 c ., $1 / 4 \mathrm{lb}$. 30 c ., lb. $\$ 1.00$.

## TOMATO <br> ( 2 iebes= 2 (pjel)

One ounce will produce about 2,000 plants.
Culture.- Of Tomatoes the varieties are numerous, some of them being very distinctive. However, there are many sorts of the large red varieties annually introduced and represented as being superior to all others, which, as a rule, do not show variation enough to be classed as distinct varieties. The seed may be sown in hotbeds. with good bottom heat, in February or March; and, when the plants are 2 or 3 inches high, transplant into other frames about 4 or 5 inches apart each way, or boxes or single pots which are to remain in the frames. Set the plants out in open ground, not earlier than the last week in May or first week in June. Being very tender, they will not bear the least frost. Choose a light, sandy, or gravelly loam, in a well-sheltered situation, and with a southern exposure if possible, as early fruit is desirable. In such a location the plants may be set about 4 feet apart each way, using a large shovelful of well-rotted manure in each hill. On rich soils but little, if any, manure is necessary; and the plants will need to stand about 6 feet apart each way.
Price on all varieties of Tomato: Pkt. 5c., $1 / 2$ oz. 20c., oz. 30c., $1 / \pm$ 1b. 85c., unless otherwise stated.

## Extra Early Varieties

Atlantic Prize. One of the favorite extra early varieties. Fruit is red. Very solid, fine quality.
Bonny Best. Early Tomato. It has been tested and found ten days earlier than the Chalk's Early Jewel and ripens with the Earliana. Strong grower, very productive, ripens evenly all orer, excellent shipper. Pkt. 10c., $1 / 2 \mathrm{oz}$. 25 c ., 1 o7. 40 c ., $1 / 4 \mathrm{lb} . \$ 1.2 \overline{5}$, lb. $\$ 4.00$.
Belmont. An extra early variety, quite popular in the Boston markets. Good size, smooth, bright red color. Pkt. 10 c ., $1 / 2 \mathrm{oz} .20 \mathrm{c}$., oz. 30 c ., $1 / 4 \mathrm{lb} . \$ 1.00$.
Chalk's Early Jewel. The earliest of the bright scarlet colored. Deep fruited and very hardy and solid. Pkt. 10c., $1 / 2$ oz. 25 c ., oz. 40 c ., $1 / 4 \mathrm{lb} . \$ 1.10$.
Earliana. It is remarkable for its size and its earliness. Good form and wonderfully productive. red color which is in demand in some markets.

CORELESS TOMATO

## Forcing Varieties

Best of All. Fruit is produced in bunches and very solid. Is a strong grower; a superior forcing variety. Pkt. 10c., $1 / 2$ oz. 25 c ., oz. $40 \mathrm{c} ., 1 / 4 \mathrm{lb} . \$ 1.10$.
Comet. This variety is a favorite for forcing; just the size wanted (round); color rich scarlet red, very smooth, fruit set in bunches and in great abundance. Everything is in its favor for a forcing tomato. Pkt. 15 c ., $1 / 2 \mathrm{oz} .40 \mathrm{c}$., oz. $75 \mathrm{c} ., 1 / 4 \mathrm{lb} . \$ 2.00$.
Stirling Castle. A superior forcing variety. Is an exceedingly heavy cropper, medium size, smooth, round and red color. This variety is one of the best European sorts and our seed is all imported. Pkt. 25c., 1/2 oz. $\$ 1.00$, oz. $\$ 1.50$.
Lorillard. One of the standard sorts for forcing under glass. Its red color, flavor, solidity and prolific bearing are its chief merits. Pkt. 10c., $1 / 2$ oz. 20 c., oz. 30c., $1 / \pm$ lb. $\$ 1.00$.

## General Crop

Acme. Dark red color tinged purple. Good flavor. Aristocrat. Growth and foliage resemble the Dwarf Champion, being very dwarf and stocky. Fruit rich, glossy red.
Beauty. Very solid, with tough skin, making it very desirable for shipping. Color is pink. Is one of the most popular where the market demands this color.
Coreless. This is such an excellent variety we feel we should make special mention of The Coreless as the most perfect shaped canning variety. Large size, globe-shaped, full at stem end, bright red, a strong grower and big cropper; always free from green core; ripens all over and through; excellent for slicing. Pkt. $10 \mathrm{c} ., 1 / 2 \mathrm{oz} .35 \mathrm{c} ., 1 \mathrm{oz} .60 \mathrm{c} ., 1 / 4 \mathrm{lb}$. $\$ 2.00$.

STONE TOMATO

## TOMATOES-Continued

Dwarf Champion. It is peculiar in its manright, quite dwarf, with firm, short stem joints, which make it self-supporting. Fruit is red with a pinkish tinge, medium size, good quality. On account of its compact habit, plants may be grown closer together than other varieties.
Dwarf Stone. Excellent for home use. Its habit resembles the Dwarf Champion; fruit is color and shape of the Stone. Smooth, solid, bright red and very prolific; excellent quality.
Essex Early Hybrid. Fruit early, large size; solid, very smooth, bright purplish crimson color.
Favorite. Early variety, large size fruit; is of variety.
Golden Queen. Fruit is yellow. Its handsome yellow slices make a beautiful contrast in a dish with the red tomatoes.
Honor Bright. Entirely different from other varieties. In ripening first color is light green, then waxy white changing to red. One of the longest keepers; excellent quality.
Ignotum. Is large, smooth, very solid, deep red.
Imperial. A strong grower, very prolific. Bright red color, changing to a pinkish purple when ripe.
Magnus. Large, smooth, pinkish. Very strong grower.
New Globe. Good size, smooth, firm flesh, very few seeds. Dark red color tinged with purple. Paragon. Large, bright crimson, excellent flavor.
Perfection. Excellent for general crop. Smooth, round, blood red in color, very solid, good yielder.
Red Cross. A superior variety of our own inerly bright troduction. Of medium size, quite early, bright scarlet color, very solid, excellent flavor and very productive. One of the most reliable varieties in cultivation either for the family garden or for market. Pkt. 10c., oz. 40 c ., $1 / 4 \mathrm{lb} . \$ 1.00$.
Ponderosa. Largest of all Tomatoes. Single specimens often growing to weigh from one and one-half to two pounds. Good flavor. Pkt. 10c., $1 / 2$ oz. 25 c ., oz. 40 c ., $1 / 4 \mathrm{lb}$. $\$ 1.25$.
Puritan. Excellent for general crop. Large, smooth, bright red, very prolific. It cracks, is very firm and the color makes it attractive for the market gardener. Pkt. 10c., $1 / 2 \mathrm{oz} .20 \mathrm{c}$., oz. 35 c ., $1 / 4 \mathrm{lb}$. $\$ 1.00$.
Royal Red. Skin and flesh intense red. Excellent for market purposes.

Stone. A great favorite with the market gardeners for the main crop. Is very large, bright scarlet, color smooth, and excellent shipper. Always in demand.
Trophy. Fruit is very large, smooth and solid.

## Small Fruited Varieties for Preserving and Decoration

Pkt. 5c., $1 / 2$ oz. 15c., oz. 25c., $1 / 4 \mathrm{lb}$. 75c.

Pear Shape, or Fig. Fruit is yellow.
Red Cherry. Small, red, borne in clusters.
Strawberry, or Ground Cherry. Fruit is yellow; grows in husks; excellent for preserves.
Yellow Peach. Fruit is yellow, peach shape.
Yellow Plum. Lemon color, oval, smooth.
Red Plum. Similar to above only red.
Red Currant. Quite small.

## Tomato Plants

We make a specialty of growing Tomato plants at our Arlington greenhouses, and can furnish the following varieties after May 10 in fine, strong, stocky plants.

Plants sent by express only, purchaser paying transit.

## POT-GROWN

50 c. per doz., $\$ 3.00$ per 100 .
Comet, Chalk's Early Jewel, Golden Queen, Earliana. Perfection, Rawson's Puritan, Dwarf Stone, Stone, Ponderosa and Coreiess.

## SMALL FRUITED VARIETIES

Yellow Plum, Red Cherry, Strawberry, Pear Shaped.

## BOX-GROWN, or FROM BEDS

25 c., per doz., $\$ 2.00$ per $100, \$ 18.00$ per 1000.
Belmont, Dwarf Stone, Dwarf Champion, Earliana, Perfection, Rawson's Puritan and The Stone.

YELLOW PLUM

## Turnips (siubu)

One ounce will sow 100 feet of drill; one pound will sow an acre.

Turnip, Purple Top Strap Leaf
Culture.-A light soil is the best upon which to grow Turnips. The flat or English varieties are exlensively used as a late crop, and may be made to follow almost any other early crop. Fall Turnips may be sown from July 1 till about September 10, or, in favorable seasons, even later. These varieties are also used for early crops, the seed being sown in April.

Prices on all varieties of Turnips: Pkt. 5c., oz. $10 c ., 1 / t$ 1b. 25c., 1b. 60c., unless otherwise stated.

## White Flesh Varieties

Cowhorn. Rapid grower, long and Carrot shaped. Largely cultivated for feeding stock.
Budlong's Improved, or Breadstone. Half-long in shape; white, mild flavor. An excellent keeper. Pkt. $5 \mathrm{c} .$, oz. $10 \mathrm{c} ., 1 / 4 \mathrm{lb} .2 \overline{\mathrm{c}} ., \mathrm{lb} .70 \mathrm{c}$.
Extra Early Milan. Purple Top. This is the flat, strapped leaf variety with white flesh white under ground; purplish red above. Two weeks earlier than other varieties. Pkt. 5c., oz. $10 \mathrm{c} ., 1 / \pm \mathrm{lb} .30 \mathrm{c} ., \mathrm{lb} . \$ 1.00$.
Extra Early White Milan. The earliest white top Turnip. Same shape and size and equally as early as above. Has white top. Pkt. 5c., oz. 10c., $1 / 4 \mathrm{lb} .30 \mathrm{c} ., 1 \mathrm{~b} . \$ 1.00$.
Early Snowball. Of medium size, round, pure white. Excellent flavor.
Purple Top White Globe. $\begin{gathered}\text { An early vari- } \\ \text { ety very } \\ \text { vuch }\end{gathered}$ in favor with the market gardeners. Of globe shape, heavy cropper; skin white with purplish top.
Purple Top Strap Leaf, $\quad \begin{gathered}\text { or } \\ \text { Top. } \\ \text { Early } \\ \text { Quick }\end{gathered} \underset{\text { Red }}{\text { Rew- }}$ er, flesh is very fine grain, sweet flavor; white with purple top. More generally used than any other variety, both for market and for stock. $1 / 4 \mathrm{lb} .20 \mathrm{c}$., lb. 50 c .
Sweet German. This variety should be sown at least a month earlier than the early flat Turnips. Flesh is white, firm, sweet and keeps well into the Winter. Pkt. 5c., oz. 10c., 1/t lb. 25c., lb. 75c.
White Egg. Is of egg shape and very rapid firm, fine grain flesh. Grows white skin. Solid, for earls or late kee. Grows good size. Excellent $10 \mathrm{c} ., 1 / 4 \mathrm{lb} .25 \mathrm{c} ., \mathrm{lb} .75 \mathrm{c}$.

White Strap Leaf. top strap leaf only in color which is white.

## Yellow Flesh Varieties

Large Yellow Globe, or Yellow Stone. Color is pale yellow with greenish top. Globular shape. Excellent for general crop and table use.
Robertson's Golden Ball. Round, deep yellow color, medium size, very firm, hard and excellent flavor. A superior table variety.
Yellow Aberdeen, Purple Top. Bulbs globular form; deep yellow below ground, reddish purple above. Has a small tap root. Very solid and good quality.

SWEET GERMAN TURNIP

## Rutabaga ${ }^{\text {SWEDISH }{ }^{\text {TURNIT RUSLIAN }}}$

Culture.-The Swedish or Rutabaga varieties should be sown in drills 15 to 18 inches apart, at any time from June 1 to the middle of July, using about one pound of seed per acre. The plants should be thinned to about 6 or 8 inches apart.

## American Purple Top. <br> Improved. Mar ket gardener's fa-

 vorite. More largely grown than any other variety. Yellow flesh, solid and fine quality. One of the very best keepers.Large White French. Flesh is white, solid, mild and sweet. Excellent Winter variety.

## Shamrock Yellow Swede.

 Largely grown for market and home use. Yellow flesh, solid, good keeper.St. Andrew's. A popular variety in Boston markets. Flesh yellow with purple top.
Tennoji. Japanese variety. This is a large Turnip grown in Japan. Our seed is all imported. Pkt. 10c., oz.
 $15 \mathrm{c} ., 1 / 4 \mathrm{lb} .50 \mathrm{c}$., lb. $\$ 1.50$.

## Tobacco

Culture. - Sow in hotbed for early planting or sow in the open ground as soon as the ground is warm. Sow broadcast in rich, dry soil, pressing down firmly and cover lightly; water frequently. Set plants out first of June three feet apart each way in land heavily manured.

Connecticut Seed Leaf. Saved from selected plants. Pkt. 10 c ., oz. $30 \mathrm{c} ., 1 / 4 \mathrm{lb} . \$ 1.00$, lb. $\$ 3.00$.
Havana. Imported seed. Pkt. 10c., oz. 40 c ., $1 / 4 \mathrm{lb}$. \$1.25.

## Sweet, Medicinal and Pot Herbs

Culture.-For early use sow seed in hotbed in March, or open ground in May, in rows one foot apart. Cover very lightly and thin out when large enough to six or eight inches in row. They should be cut on a dry day, before they come into full blossom. Tie in bunches and keep where they will dry quickly.
Anise (Pimpinella anisum). Hardy annual, used for garnishing and seasoning. Pkt. 5c., oz. 10 c.
Balm (Melissa officinalis). Used as a drink for the sick and for culinary purposes. Pkt. 5c., oz. 20c.
Basil, Sweet (Ocymum basilicum). Seeds sown in April, indoors, in rich, light soil, and in beds in June. Pkt. 5c., oz. 20c.
Bene (Sesamum orientale). Extensively grown for the oil contained in its seeds. Pkt. 5c., oz. 15c.
Borage (Borago officinalis). Used for flavoring, and flowers furnish bee pasture. Pkt. 5c., oz. 15c.
Caraway (Carum carui). Grown for the seeds, which are used in flavoring. Pkt. 5c., oz. 10c.
Catnip, or Catmint (Nepeta cataria). Used for medicinal purposes. Pkt. 10c., oz. 30c.
Coriander (Coriandum sativum). Young leaves used in soups and salads. Seeds in confectionery and for flavoring. Pkt. 5c., oz. 10c.
Dill (Anethum graveolens)., Leaves used for flavoring. Pkt. 5c., oz. 10c., $1 / 4 \mathrm{lb} .25 \mathrm{c} ., \mathrm{lb} .60 \mathrm{c}$.
Fennel, Sweet (Anethum foniculum). Leaves used in fish sauces and for garnishing. Pkt. 5c., oz. 10c.
Henbane (Hyoscyamus niger). Contains medicinal properties. Pkt. 5c., oz. 20c.
Horehound (Marrabium vulgare). The leaves and tops are popular as a medicine for subduing irritating coughs. Pkt. 5c., oz. 25c.

Hyssop (Hyssopus officinalis). Aromatic evergreen bushy herb. Flowers and tops used for medicinal purposes. Pkt. 5c., oz. 25c.
Lavender (Lavandula vcra). Flower spikes are dried for their peculiar lasting fragrance. Pkt. 5c., oz. 15c.
Marjoram, Sweet (Origanum marjorana). Hardy perennial, cultivated for use of its leaves for flavoring. Pkt. $5 \mathrm{c} .$, oz. $15 \mathrm{c} ., 1 / 4 \mathrm{lb}$. 40 c .
Opium Poppy (Papaver somniferum). Opium; a milky juice is obtained by making incisions in the capsule. Seeds are used for bird food, under name of Maw Seed. Pkt. 5c., oz. 20c., $1 / 4$ lb. 40 c.
Pennyroyal (Mentha pulegium). ${ }^{\text {Leaves }}$ and tops used in culinary preparations and for medicinal purposes. Pkt. 10c., oz. 60c.
Rosemary (Rosemarinus officinalis). Foliage used for medicinal purposes. Pkt. 5c., oz. 30c.
Rue (Ruta graveolens). Hardy; leaves emit a powerful odor, and have an exceedingly acrid taste. Pkt. 5c., oz. 15c.
Saffron (Carthamus tinctorius). Used in medicine and also in dye. Pkt. 5 c ., oz. 10c.
Sage (Salvia officinalis). Used for seasoning. Pkt. $5 \mathrm{c} .$, oz. $20 \mathrm{c} ., 1 / 4 \mathrm{lb} .50 \mathrm{c} ., \mathrm{lb}$. $\$ 1.50$.
Summer Savory ( Satureja hortensis). Hardy annual. Aromatic tops are used for culinary purposes. Pkt. 5c., oz. 15c., 1/4 lb. 40c.
Tansy (Tanacetum vulgaris). Curled-leaved variety, used for garnishing. Pkt. 5c., oz. 30c.
Thyme (Thymus vulgaris). Leaves and tops are used for culinary purposes. Pkt. 5 c ., oz. 30 c .
Wormwood (Artemisia absinthium). Leaves and tops are grown for medicinal use. Pkt. 5c., oz. 25 c . Orders by mail have prompt attention.

## Vegetable Plants and Roots

We use all care possible in the packing of plants to go by express. As unavoidable delays will sometimes occur after leaving our store, we cannot be responsible for the condition in which they reach the purchaser. Positively no plants sent C. O. D.
Asparagus Roots.
Lettuce.
100
Hothouse grown, delivery Sept. to April. $\$ 100 \quad \$ 900$

Bird Gravel, Pkt. 8c.; doz. 75c.

MANGEL-WURZEL, MAMMOTH LONG RED

## FARM SEEDS

## Mangel-Wurzel and Sugar Beet Beets Grown for Feeding Stock

Six pounds of seed will sow one acre.
Culture.-Sow in drills about two feet apart, thin out to nine to twelve inches in row. The long varieties are best suited to a deep soil, and the globe sorts succeed better than the long sorts on sandy soll.
MANGELS, Sugar Beets. At a uniform price of : Oz. 10c., $1 / \pm \mathrm{lb} .2 \overline{\mathrm{~s}} \mathrm{c}, \mathrm{lb}$. 75c. By express, not prepaid, 10 lbs . at 60 c . per lb .
Gate Post Originated in England. Is one of the largest and most useful of the Mangels, roots often weighing forty pounds and over. Our seed is all grown by the originator.
Golden Tankard. Flesh deep yellow; very productive; one of the best nutritious varieties.
Kniver's Yellow Globe. Skin is tinted bright orange. Superb quality, enormous crop.
Mammoth Long Red $\underset{\text { sizes }}{\text { Rof }}$ of mammoth small top. The most productive.
Red Globe. Different from the Yellow Globe only in color.
Beet, Sugar Varieties. Sow 6 to 8 lbs . per acre. Yaluable both for producing sugar and stock feeding.
Vilmorin's Improved White. Contains the highest percentage of sugar; also valuable for stock.
Lane's Imperial. An improved variety; very hardy and productive.
Klein Wanzleben This variety is cultivated ther Sugar保 large at top and rapidly tapering.
Turnip, Purple Top Strap Leaf,
or Early Red Top. Quick grower, flesh is very fine grain, sweet flavor; white with purple top. More generally used than any other variety, both for market and for stock.

## Turnip, Sweet German

This variety should be sown at least a month earlier than the early flat Turnips. Flesh is white, firm, sweet and keeps well into the Winter. Pkt. $5 c .$, oz. $10 \mathrm{c} ., 1 / 4 \mathrm{lb} .25 \mathrm{c} ., \mathrm{lb} .75 \mathrm{c}$. Postage paid.
Ruta-Baga, American Purple Top Improved. More largely grown for stock than any other variety. Yellow flesh, solid and fine quality. One of the very best keepers.
Large White French. Flesh is white, solid, mild and sweet. Excellent Winter variety.
Shamrock Yellow Swede. Largely grown for market and stock. Yellow flesh solid, good keeper.
St. Andrew's. A popular variety in Boston markets. Flesh yellow with purple top.

Turnip and Ruta Baga uniform price of $1 / 4 \mathrm{lb}$. $20 \mathrm{c} . .1 \mathrm{l}$. 50 c ., postpaid ; by express, $5 \mathrm{lbs} . \$ 2.25,10 \mathrm{lbs}$. $\$ 4.00$, except where noted.
Beans, Soja (Soja hispida; Glycine hispida). Thrives well in hot and dry weather, very desirable in the South. Should be planted at the rate of one-half bushel to the acre, in drills two and one-half to three feet apart. Does not make very good hay but is excellent as ensilage and green fodder. Medium Early Green. Express or freight, $1 / 4$ bus. $\$ 1.50$, bus. ( 60 lbs .) $\$ 5.00,10$ bus. at $\$ 4.80$ per bus.
Beans, Velvet (Dolichos multiflorus). Used in the South as a forage plant, also as a fertilizer plant for turning under, the same as the Cow Peas. Vines and leaves readily eaten by stock. Should be plan'ted in rows four feet apart and one foot in the row. Two or three beans in a place. Qt. 25.c., $1 / 4$ bus, $\$ 2.00$, bus. ( 60 lbs ) $\$ 6.00$,

# FARM SEEDS Corn for Field Ensilage or Fodder 

In many localities in New England the Dent varieties have been grown very successfully. It is a fact that the yield is practically double that of the Flint varieties. We would recommend a part of your plantings of Field Corn to be of the Dent varieties.

## FLINT VARIETIES

Early Canada. Very early, ears medium size, usually ripens in August. Ripens well in the Northern States; a popular New England variety. Qt. 25 c ., pk. 75 c., bus. $\$ 2.25$.
Longfellow. Very largely grown in New England; is eight-rowed, yellow kernel and good size. Cob is quite small and ears are from ten to fifteen inches long. Ripens excellently in Massachusetts. Qt. 20 c ., pk. 60c., bus. $\$ 2.25$.
Sanford. It is early, ears large with a small cob, kernel white. Very prolific and excellent quality. In some sections grown largely for ensilage Corn on account of its foliage. Qt. 20c., pk.•60c., bus. \$2.25.
Stickney's. The Prize Winner Strain. This Corn won at the National Corn Show, 1909, the first prize for the best ten ears of Flint Corn grown east of the Ohio. At the New England Corn Exposition, 1910, it was awarded sweepstakes for the best single ear of Flint Corn, and for the best ten stalks exhibited, also several other first prizes in the different classes. On a measured field of nine acres the harvest was $8193 / 4$ bushels, an average of over ninety-one bushels per acre. The ear is much thicker than the Longfellow, cob is small, usually eight rows of kernels, although sometimes it has twelve rows. The stalks grow about as high as the Longfellow, but the crop matures earlier. We believe it to be one of the largest yielding varieties of Flint Corn. Qt. 20c., by mail 35c.; by express, $1 / 2$ pk. 50 c., pk. 90 c., bus. $\$ 3.00$.

## DENT VARIETIES

Brewer's Yellow Dent. As this Corn is strictly a New England variety, all the seed having been grown and ripened in New England, we have no hesitancy in recommending the Brewer's Dent, for it has overcome all of the difficulties of ripening this Corn here in New England. This Corn was awarded First Grand Champion Prize at the Corn exhibit in Omaha; the yield from a measured acre was 1331-3 bushels of shelled corn and a large amount of fodder. One can readily see that this would be a most desirable crop for ensilage as well as for the corn. Pk. 25c., bus. $\$ 2.75$.

Early Mastodon. It grows strong, rank, quick and makes the finest appearance of shelled Corn of all the varieties of Dent. It is purely a Dent Corn, of two shades, white and yellow; it has the largest ears and the largest corn of any of the early Dent Corns. It will ripen its seed in Massachusetts. I'k. 60 c ., bus. $\$ 2.00$.
Eureka. For ensilage this is one of the best. White kernel, grows 12 to 15 feet in height. Makes a great amount of foliage. Qt. 25c., pk. 75 c ., bus. $\$ 2.50$.
Leaming Improved. One of the most popular and productive varieties, as the stalks grow very tall and produce, as a rule, two good ears on each stalk. The ears are long, with small, red cobs, well filled with corn of medium size and rich golden color. It will ripen in from one hundred to one hundred and ten days and makes a good crop even in a dry season. On account of its being very strong and vigorous the stalks are very leafy, making an excellent fodder; the kernels are so deep that it makes an extra large yielder. In this vicinity we recommend this Corn more than any other variety for ensilage. Pk. 60c., bus. $\$ 1.75$.
Red Cob Ensilage. A very strong grower, highly recommended for ensilage; yields enormous crops. Pk. 50 c ., bus. $\$ 1.75$.
Virginia Mammoth White. There is a great variety of white Corns from the South sold under various names. Our stock is produced in Virginia and we have had excellent satisfaction with this variety. It grows large, plenty of foliage ; excellent for either fodder or ensilage. Pk. 50c., bus. $\$ 1.50$.

## SWEET CORN FOR FODDER

Stowell's Evergreen. (For fodder.) A Sweet Corn, too well known to need any description. Qt. 20 c ., pk. 75 c ., bus. $\$ 2.50$.
Sugar Corn for Green Fodder. We find many of our farmers favor this for ensilage purposes owing to the large percentage of saccharine matter in the stalks. To cut up and use for Corn fodder in the Fall there is nothing better. This is especially grown for fodder purposes, being of thick growth and early maturity. Usually sown in drills for early Summer and Fall Corn at the rate of two bushels per acre in drills four feet apart. Pk. 50c., bus. $\$ 1.75$, sack ( 2 bus.) $\$ 3.00$.

Hungarian Millet

## FARM SEEDS

Barley, Chevalier. A light colored kernel; seed is grown in Minnesota. It is generally recognized as the most reliable variety sold under all conditions. It is early, has a stiff straw bearing up under plump heads of large grain. I'k. 50 c ., bus. $\$ 1.75$.
Barley, Beardless. May be sown as early as possible in the Spring without danger of frosts, as it is one of the hardiest of all the Barleys; straw is heary, standing up under a heavy crop, and the grain is beardless, so that it can be handled and threshed as easily as Oats and for stock feeding it is much more valuable, as it can be few without danger of injury to the animals. Pk. 50 c ., bus. $\$ 1.75$.
Buckwheat, Japanese. The most desirable variety. If sown at the same time as the Silver Hull it will ripen earlier and yields nearly double the amount. It is of much stronger growth than the common Buckwheat, and the kernels are fully twice the size. Per lb. 25.., postage paid; by express or freight, pk. 50 c ., bus. $\$ 1.75,2$ bus. $\$ 3.40$.
Buckwheat, Silver Hull. The seed is light gray color, varying slightly in shape. Pk. 50 c ., bus. $\$ 1.65$.
Beans, Green Soja. See page 46.
Beans, Velvet. See page 46.
Broom Corn, Improved Evergreen. The most popular variety of Broom Corn grown for market. The brush is of good length and retains the light green color when properly cured; shows almost no red color. Per lb. 25.c., postpaid; by freight or express, $10 \mathrm{lbs} .90 \mathrm{c} ., 50 \mathrm{lbs} . \$ 3.50$, 100 lbs. $\$ 6.50$.
Kaffir Corn. Has fine crop of foliage and if cut in early bloom the shoots that then follow will mature a full crop of seed and foliage. Both corn and fodder are excellent and the whole stock tender to full maturity of seed. Per lb. $25 \mathrm{c} ., 3 \mathrm{lbs}$. 60c., by mail ; by express or freight, qt. $15 \mathrm{c} .$, pk. $60 \mathrm{c} .$, bus. or $60 \mathrm{lbs} . \$ 2.00$.
Millets Golden, or German. We have found the Southern grown or German Millet far superior in quality and yield to the Northern grown seed and when grown makes an enormous yield of nutritious food; succeeds in almost any soil. Sow in May or June, one bushel to the acre. Qt. 10 c ., bus. of about $50 \mathrm{lbs} . \$ 2.50$.
Hungarian (Panicum Germanicum). Probably used more than any other Millet for fodder during the Summer months. Remains green when almost all other vegetation has dried up. It is one of the very best plants for green fodder or for ensilage; makes hay of the best quality. Sow broadcast about one and one-half bushels to the acre. By express, qt. $10 \mathrm{c} .$, pk. 50 c ., bus. of about 48 lbs. $\$ 1.75$.
Japanese Barnyard Grass (Panicum Crus-galli). Succeeds in almost any ordinary soil, and may be sown from the middle of May to the first of July. Is distinct from other varieties. Enormous crop, grows from six to eight feet high. Excellent either green or cured for hay. Exceedingly popular as a forage plant. Twenty-five pounds will sow an acre. Lb. 15c., postpaid; by express or freight, 10 lbs. 75 c ., 50 lbs. $\$ 3.25,100 \mathrm{lbs} . \$ 6.00$.
Pearl, or Cat-Tail. Has broad leaf, foliage somewhat resembles Corn leaves. Valuable forage plant; enormously productive; should be fed green. If sown in drills four or five pounds to the acre; if broadcast ten to fifteen pounds. By mail, 25c. per lb., postpaid; by express or freight, lb. 15 c ., 10 lbs. 85 c ., 50 lbs. $\$ 4.00$, $100 \mathrm{lbs} . \$ 7.50$.
Oats Lincoln. Grown largely in Wisconsin and Minnesota and has an exceedingly heavy yield. Of strong growth and ripens comparatively early, seldom troubled with rust. Grain has thin hull and heavy meat, making it especially valuable for milling into oatmeal as well as feed. Pk. 40 c ., bus. $\$ 1.25$.
Oats, White Wonder. This variety has been thoroughly tested in this vicinity, as all of this seed is New England grown; produces especially plump and heavy white grains. Pk. 40 c., bus. $\$ 1.35,2$ bus. at $\$ 1.30$.
Oats, Silver Mine. Straw is very strong, stands up well and produces a beautiful white, clean, plump berry. This is one of the most widely known white Oats. From a test of fourteen varieties of Oats this ranked next heaviest in yield. Pk. 35 c ., bus. $\$ 1.30,2$ bus. $\$ 1.20$ per bus.

Prices on this page are liable to fluctuate.

## FARM SEEDS-Continued

Peas, Canada Field. Valuable in Northern climates for cattle feeding, especially for milch cows. Also makes ensilage of fine quality. Usually sown broadcast and harrowed in. Prices variable. Pk. 75.c., bus. $\$ 2.50$.

Peas, Cow. Each year we find that the demand for Cow Peas increases, as the farmers find that there is great value as a soil enricher also when cut green. It makes excellent hay when cut and cured the same as Clover, then the stubble with the new growth may be turned under as fertilizer. If Kaffir Corn is sown with the Cow Peas it holds the vines off the ground causing a better growth. The plant is a legume and through the agency of nitrogen produces bacteria on its roots, adding to the growth and full plants.

Southern Black. Pk. $\$ 1.00$, bus. $\$ 3.50$.
Whip-Poor-Will. Light brown, speckled dark brown. Pk. $\$ 1.00$, bus. $\$ 3.50$.
Dwarf Essex Rape. As this is very easily grown it is ideal for sheep; perfectly hardy and possesses remarkable fattening properties. Sheep, pigs and cattle are very fond of it. As it is a rank grower it should have heavy manuring in order to produce an excellent crop. Seed should be sown at the end of June or during July. It does well sown with Oats and after the Oats are cut the Rape will grow rapidly. All of our Rape is imported direct. Pkt. $10 \mathrm{c} ., 1 / 4 \mathrm{lb}$. 15 c ., 1 lb . 25 c ., postpaid; by express or freight, 1 lb . 10 c ., 10 lbs .75 c ., $25 \mathrm{lbs} . \$ 1.50,50 \mathrm{lbs}$. $\$ 3.00$, 100 lbs. $\$ 5.50$.
Rye, Spring. For a catch crop this is best for sowing in the Spring as you can obtain a crop by later sowing than any other grain, although it does not yield as large a crop of grain as the Winter Rye. Pk. 50 c ., bus. $\$ 1.50$.
Rye, Winter. This should be sown in the Fall early enough to get a start and will stand out New England Winters. Pk. 50 c., bus. $\$ 1.75$.
Sugar Cane, or Sorghum, Early Amber. Valuable for the large amount of foliage, green fodder that it produces and for its grain. Ripens wherever Indian Corn matures. Lb. 12c., 100 lbs. $\$ 6.00$.
Sunflower, Mammoth Russian. This is the best variety for a farmer to grow; it reaches double the size of other sorts and yields twice as large a crop of seed, which is used largely for poultry as it has high feeding value. Per lb. 20c., postage paid; by express or freight, 1 lb .10 c ., 10 lbs . 75 c ., 25 lbs. $\$ 1.50,100$ lbs. $\$ 5.50$.
Spurry (Spergula arvensis). Makes excellent fodder for cattle and sheep. Grows well on poor, dry, sandy soil; an excellent fertilizer for light soil; valuable for forage. Sow twelve to fifteen pounds to the acre. Lb. 30c., 3 lbs . 75 c ., postpaid; by freight or express, lb. 20 c., 6 lbs. $\$ 1.00$, 10 lbs. $\$ 1.50$.

Teosinte (Reana luxurians). Largely grown as a £orage plant in the South and southwestern States as it is a continuous cutting plant and furnishes the most nutritious food, when dried, for horses and cattle. Resembles Indian Corn; sow in May or June in drills, three to four feet apart and about three pounds to the acre. $1 \mathrm{oz} .15 \mathrm{c} ., 1 / 4 \mathrm{lb} .40 \mathrm{c}$., 1 lb . $\$ 1.25$, postpaid.
Vetch, or Spring Tares (Vivia sativa). In New England the Spring Vetch is not hardy except in the southern part. It is excellent for Spring sowing and has a large yield of nutritious hay as well as being especially adapted as a soil improver and nitrogen gatherer. As the seed of the Spring vetch is larger than the Winter it will not go as far in seeding and is sold at a lower price. If sown broadcast sixty to one hundred pounds to the acre. Lb. 10 c ., 10 lbs .80 c ., $25 \mathrm{lbs} . \$ 1.80,50 \mathrm{lbs} . \$ 3.50,100$ lbs. $\$ 6.50$.
Winter, or Hairy Vetch (Vicia villosa). Each year we find our sales increasing on the Sand or Hairy Vetch, as it is evidently getting more popular with those who wish to grow more forage; it is especially adapted as a soil fertilizer. It succeeds and produces a good crop on poor, sandy soil as well as on good land; it is perfectly hardy throughout the United States. The root growth is very extensive and makes a quantity of nitrogen tubercles. The Vetches can be sown from July to November and should be sown broadcast at the rate of from twenty to thirty pounds to the acre, and one bushel of Oats or Rye, as the Rye assists in holding the Vetches off the ground, makes a better growth and can be harvested earlier. If sown alone thirty to forty pounds per acre should be used. Lb. $15 \mathrm{c} ., 10-\mathrm{lb}$. lots $14 \mathrm{c} ., 50-\mathrm{lb}$. lots 13 c ., $100-\mathrm{lb}$. lots 12.
Wheat, Spring, Saskatchewan. In the West where Wheat is grown largely this is pronounced by all the milling kings to be the largest yielder. Fifty bushels to the acre is not an uncommon yield. Pk. 65 c ., bus. $\$ 2.50,5$ bus. or over at $\$ 2.25$.
Wheat Maccaroni. This Wheat recently put out by the Department of Agriculture has taken a strong hold in the West where Spring Wheats are largely used. It is of excellent quality and practically immune from rust. An extra large yielder. Pk. 85c., bus. $\$ 2.75$.
Wheat, Winter. Klondyke White and Red Clauson. Pk. 65c., bus. $\$ 2.50$.
Wild Rice (Zizania aquatica). Valuable as a forage plant for swamps but chiefly as an attraction for water fowl. Before sowing soak in water twenty-four hours, sowing in water from six inches to five feet deep. This can be supplied only in the Fall, September or October. Lb. $3 \overline{3} \mathrm{c}$., 100 lbs . $\$ 30$.

Nitrate sacks on the roots of the Cow Pea-fertili-
zer value equal to one-half ton of nitrate of soda

## TO INCREASE THE YIELD AND FERTILIZER VALUE OF CLOVERS-ALFALFA --PEAS-BEANS-VETCH-SOY BEANS

These legumes can be made to yield their maximum amount oniy when they are properly inoculated and when so treated they will enrich the sorl to such an extent that high priced fertilizers are absolutely unnecessary.

## SEED INOCULATION

Comes to you put up in bottles ready to be sprinkled upon the seed just before planting. You can perfectly inoculate the seed for 10 acres in 10 minutes. The results are certain and we recommend our customers to use this preparation on every planting of Iegume seed they make. Specify the particular seed you will plant or ask for further particulars.

## ENDORSED BY AGRICULTURAL EXPERIMENT STATIONS AND FARMERS EVERYWHERE

5-Acre Size, $\$ 9.00$
1-Acre Size, $\$ 2.00$
Garden Size, 50c

## Clover

(Prices on this page variable during the season.) Clover. Alsike. (Trifolium hybridum.) A peremial growing from one to three feet in height. Succeeds best in rather cold soil and in marsly lands which are too wet for other varieties. Is it can withstand severe cold it grows well in the North and high latitudes. Excellent for bees. Fifteen pounds to an acre. Lb. 30c., $100 \mathrm{lbs} . \$ 2.00$.
Alfalfa, or Lucerne Clover (Mcdicago sativa) This increases in demand each year, as it is found to be very valuable for forage. It requires deep, rich, well turned soil as it roots very deep$l y$, the tap root often to a depth of ten to fifteen feet in loose soil ; consequently it is able to resist great droughts; in the West grown for hay. The seeds should be sown at about the same time as oats in thoroughly prepared deep plowed soil. Twenty to twenty-five pounds per acre. It is a perennial and if the soil is suitable several crops may be cut every year. Lb. 25c., 100 lbs. $\$ 20.00$.
Crimson (Trifolium incarnatum). It makes a rery valuable crop for pasture or green manure. For hay it should be cut when in full bloom. Flowers are bright scarlet. Largely grown in all Southern States. Will not stand severe frosts and cannot be depended upon to stand Winters north of New Jersey, although in some sections of Connecticut and Massachusetts is grown successfully. Sow twenty pounds per acre. Lb. 20c., 100 lbs. $\$ 18.00$.

Eed Clover (Trifolium pratense). Medium. One of the most valuable farm crops for New England or in the West, for soiling, hay or turning under as green manure. Requires deep, rich soil and yields two crops in a season. Sow fifteen pounds to the acre. Lb. $25 \mathrm{c} ., 100 \mathrm{lbs} . \$ 23.00$.
Red Clover, Mammoth, or Pea Vine. Grows larger and lasts longer than the common Red Clover. Very valuable for plowing under. Lb. 2Sc., 100 lbs. $\$ 25.00$.

White Clover (Trifolium repens). Especially adapted for use in lawn grass mixtures. It is of dwarf habit, stems creep and root at the joints; is very hardy, also valuable for permanent pasture. Sow early in the Spring eight to ten pounds per acre. Lb. 50 c., 100 lbs. $\$ 40.00$.

## LAWN SEED See page 1 FRANKLIN PARK SHADY LAWN SEED See page 2

## Farm Seeds and Grass Seeds

Awnless Brome Grass (Bromus inermis). Its habit is to make strong tufts and to hold its color till after hard frost. Its vigorous character makes it a good grass for embankments. 35 to 40 lbs . to the acre. Lb. 25c., 100 lbs. \$18.00.
Beach Grass (Ammophila arundinacea). Valuable on the sandy seashore, canal and railway banks, etc. Its strong, creeping, matting roots bind the drifting sand into natural embankments against the action of wind and waves. Height, 2 to 3 ft . Lb. 50 c ., 100 lbs. $\$ 40.00$.
Creeping Bent Grass (Agrostis stolonifera). Long, prostrate, creeping stems, well adapted for sandy pastures near the coast, and useful for binding shifting sands or river banks subject to wash or overflow. 15 lbs. to bushel. Lb. 25 c ., $100 \mathrm{lbs} . \$ 20.00$.
Crested Dog's Tail (Cynosurus cristatus) slightly tufted perennial grass, 1 to 2 feet high, with fine leaves. Is rarely sown alone; mostly used in mixture for seed of lawns. It forms a low and compact sward when thickly sown. It is said to thrive well in the shade. Lb. 30 c., 100 lbs. $\$ 25.00$.
English Rye Grass (Lolium perenne). Produces a strong growth in four or five weeks after sowing. It cures into a hay that is rather hard, but having a sweet flavor and much relished by cattle and horses. Height, $11 / 2$ to 2 feet. Sow 60 lbs . to the acre. Lb. 15 c., 100 lbs. $\$ 10.00$.
Hard Fescue (Festuca duriuscula). A slender, densely tufted perennial grass, 1 to 2 feet high. Thrives on dry, sandy soils. Sow 30 lbs . to the acre. Lb. 25 c ., 100 lbs. $\$ 20.00$.
Italian Rye Grass (Lolium Italicum). It is a very rapid grower, forms a dense turf, and is regarded as an excellent hay grass. Weighs 22 lbs. to bushel. Sow 50 lbs. to an acre. Lb. 15 c ., $100 \mathrm{lbs} . ~ \$ 12.00$.
Lime Grass (Elymus Arenarius). Valuable on sandy seashore and railroad banks, etc. It tends with its tough, wide-spreading and thickly matting roots to prevent the drifting of the sand. Lb. 75 c ., 10 lbs . $\$ 7.00$.

Kentucky Blue Grass (Poa pratensis). It varies very much in size and appearance according to the soil. Is recommended highly for lawns. Grows well in a rather dry soil, but will grow on a variety of soils. Weighs 14 lbs. to bushel, and when sown alone use 3 bushels to an acre. Lb. 20c., 100 lbs . $\$ 15.00$.
Meadow Fescue (Festuca pratensis). It is a valuable grass for either mowing or pasture. Does not attain to its full productive power till second or third year. 40 lbs to acre. Lb. 30c., 100 lbs . $\$ 25.00$.
Meadow Foxtail (Alopecurus pratensis). It is a valuable pasture grass, on account of its early and rapid growth and of its being greatly relished by stock of all kinds. 3 or 4 lbs. to the acre. Height, 2 to 3 feet. Weighs 7 lbs . to bushel. Lb. 35 c ., 100 lbs. \$33.00.
Orchard Grass (Dactylis glomerata). This is one of the most valuable and widely known of all the pasture grasses. Weighs 14 lbs. to bushel. Sow 3 to 4 bushels to the acre. Lb. 25c., 100 lbs. $\$ 20.00$.
Red Top (Agrostis vulgaris). This valuable grass is common in all our cultivated fields. A good, permanent grass for our climate. The seed usually sold weighs 14 lbs . to the bushel; a good part of this is chaff, and it requires 4 bushels to sow an acre. Market price about, lb. 15c., 100 lbs. $\$ 10.00$.
Red Top, Fancy Cleaned. It is absolutely free from chaff, weighs 32 lbs . to the bushel, and 1 bushel is sufficient for an acre. Lb. 25c., 100 lbs . $\$ 15.00$, or market price.
Red Fescue (Festuca rubra). It resists extreme drought and thrives on very inferior soils, gravelly banks and exposed hills. 25 lbs. to the acre. Lb. 30c., 100 lbs. \$25.00.
Rhode Island Bent Grass (Agrostis canina). Its hardy creeping habit renders it desirable for close sward, also for lawns. Lb. 30c., 100 lbs. $\$ 25.00$.
Rough-Stalked Meadow Grass (Poa trivialis). Highly esteemed in mixtures for permanent pastures. It is perennial ; grows from 1 to 3 feet high. Succeeds best in soil rather moist and cool. 20 lbs. to acre. Lb. 45 c ., $100 \mathrm{lbs} . \$ 35.00$.
Sheep Fescue (Festuca ovina). Is well adapted for cultivation on light, dry soils, especially those which are shallow. Sow 35 lbs . to the acre. Lb. 30c., 100 lbs. $\$ 25.00$
Sweet Vernal Annual (Anthoxanthum odoratum puelli). Much smaller than the perennial, and of much less value, lasting one year only. 20 to $2 \overline{3}$ lbs. to acre. Lb. 25c., 100 lbs. $\$ 20.00$.
Sweet Vernal, True Perennial (Anthoxanthum odoratum). Valuable on account of its vernal growth; continues to throw up root foliage until late in Autumn. 2 to 5 lbs. to the acre when mixed with other sorts. Lb. 60 c ., 10 lbs. $\$ 5.50$.
Tall Meadow Fescue (Festuca elatior). Very productive and of long duration, and is especially valuable for permanent pasture. Height, 3 to 4 feet. 40 lbs . to the acre. Lb. 30c., $100 \mathrm{lbs} . \$ 25.00$.
Tall Meadow Oat Grass (Avena elatior). Most valuable for pastures on account of its early and luxuriant growth. Withstands extreme drought and heat and cold. Height, 2 to 4 feet. 50 lbs. to the acre. Lb. 30c., 100 lbs. $\$ 25.00$.
Timothy, or Herd's Grass (Phleum pratense). As a crop to cut for hay, it is probably unsurpassed by any other grass now cultivated. If sown alone, use $1 / 2$ to 1 bushel to an acre. Market price.
Various Leaved Fescue (Festuca heterophylla). Grows naturally in open woodlands or along their borders. It makes its best growth on low lying lands not too dry. Excellent for woodland parks. Sow 40 lbs . to the acre. Lb. 30c., $10 \mathrm{lbs} . \$ 2.75$.
Water Meadow Grass (Poa aquatica). For wet situations this is very useful, growing well in marshes or on margins of lakes, streams, etc. Has long creeping roots. Lb. 60c., 10 lbs. $\$ 5.50$.
Wood Meadow Grass (Poa nemoralis). Excellent for shaded positions in lawns and woodland parks. Very hardy, resisting extremes of heat and cold. - 30 lbs. to the acre. Lb. 40 c., 10 lbs. $\$ 3,50$.

# FRANKLIN PARK LAWN SEED 

TRADE MARK REGISTERED

## Superior Mixture for Lawns, Terraces, Croquet Grounds, Etc.

The mixture of grass seed that we sell under this name is made by the identical formula used by the Park Commissioners of the City of Boston in their work in laying out the beautiful lawns and terraces, which add so much charm to our new parks. For many years the grass seed used on these parks has been supplied by us, which fact should be a strong guarantee of quality. The Franklin Park mixture gives a fine, velvety sward within a few weeks after sowing. Weight per bushel, 32 lbs. The very large demand for this lawn seed has necessitated our having the name "Franklin Park" registered as a trade mark, in order to protect ourselves from imitators.

Our Franklin Park Lawn Seed is made up of all recleaned seeds of the different varieties that will make a good lawn quickly, so that when the seed is sown, if the ground is in proper shape, it will start at once and in a short time show a beautiful, deep green lawn and attain the same during the season with slight attention.

You will find no chaff in our Franklin Park Lawn Seed; it starts at once, and it requires less seed to sow a lawn.
$1 / 2 \mathrm{lb}$., sufficient for $\mathbf{3 0 0}$ sq. ft. $\$ 0.20$ $1 \mathrm{lb} .$, sufficient for 600 sq. ft. . 30
2 lbs., sufficient for 1200 sq.ft . . 55

4 lbs., sufficient for 2500 sq. ft. 1.00
8 lbs ., sufficient for $1 / 8$ acre ... 2.00
price at our 16 lbs ., sufficient for $1 / 4$ acre . . 4.00 32 lbs., sufficient for $1 / 2$ acre ... 7.50 64 lbs., sufficient for 1 acre

Note the weight of our lawn seed compared with other brands. The reason our price may seem high is that the seeds used have all been recleaned and are absolutely free from weed seeds. We do not hesitate to say that Franklin Park Lawn Seed is the purest, cleanest and heaviest Lawn Grass Seed offered.

Delivered to any Railroad station, Express office or Post-office in the United States.
$1 / 2 \mathrm{lb} .30 \mathrm{c} ., 1 \mathrm{lb} .40 \mathrm{c} ., 4 \mathrm{lbs} . \$ 1.25,8 \mathrm{lbs} . \$ 2.35$, bus. of $32 \mathrm{lbs} . \$ 8.00$. This price delivered in your town or city.

## FRANKLIN PARK LAWN SEED Is from recleaned seeds-is quick to germinate-is free from weeds-no chaff seeds-it starts at onceThe cheapest to use

## GRASS MIXTURES FOR PERMANENT MOWING OR PASTURE LANDS

The object to be attained is a continual growth of rich pasturage from Spring to Fall. The fact that soil sown with a variety of different grasses that are adapted to the soil, and which attain perfection at alternate months from April to October, has been proven by continued experiments. It will produce much larger and more satisfactory crops, both for hay and pasturage, than when only one or two kinds of grasses are sown. If seed is sown in Spring it should be done early, while the land is cool.

Clover seed is much heavier than grass seed and settles at the bottom when they are mixed together, with the result that the sowing is uneven. We recommend sowing in the Spring 10 lbs . mixed clover seed per acre.

## MIXTURES FOR PERMANENT MOWING FOR ONE ACRE

## Use on medium soil

2 lbs . Hard Fescue.
6 lbs. Kentucky Blue.
1 lb. Meadow Foxtail.
4 lbs . Orchard Grass.
$41 / \mathrm{lbs}$. Perennial Rye.
5 lbs Red Top Fancy.

10 lbs . Timothy.
40 lbs. will sow 1 acre.

## FLOWER SEED <br> NOVELTIES AND SPECIALTIES

## FOR 1913

The Novelties herein offered come to us with exceptionally fine recommendations from the introducers and originators, and we are equally well pleased to offer them to our customers as they have been represented to us.

In some instances on the following novelty pages we continue to list some of the best of last season's introductions, and also some of our Special Varieties and Strains of seed for which we are noted. Reports and information regarding the value of Novelties and Specialties from our customers are always gratifying to receive, that we may still continue to recommend them to others.

Fottler, Fiske, Rawson Co.

## ASTER, BRANCHING

## Pale Yellow

While the Branching Aster is not uncommon to flower loving people, this new color should prove a very pleasing addition to our already complete list now offered.

This new variety has the same general habits of its family, the lateness of its flowering and great length of stem rendering it particularly valuable in the Autumn.

The color is a distinct delicate yellow and a shade that has not appeared in this type of Aster before.

Pkt. 25c.

Petunia, Dwarf Large-Flowering Fringed

Aster, Branching, Pale Yellow

## PETUNIA

## Dwarf Large-

 Flowering FringedThis new introduction is one that will fill a long felt want, especially so in a fringed dwarf Petunia which cannot but make an excellent plant for bedding, borders, piazza and window boxes. These plants only grow about eight to ten inches high, freely branching from the base, thereby making a very compact plant which does not require tying.

The flowers are borne well above the foliage, appear in all the colors well known to Petunias, and are beautifully fringed.

The increasing demand for a compact fringed Petunia will no doubt make this a welcome addition to the florist's list; will make a very desirable pot plant.

Pkt. 25c.

©Aster, White King

## ASTER Pink Enchantress

The flower of this new variety is always full double, the petals being very broad and of medium length, the ones toward the center folding in while those toward the outer edge gradually stand out more and more, the outside petals straightening out almost flat, thus making the bloom develop its exceedingly large size; it is, without doubt, as large as may be expected from the best Asters.

As the plants are not of the branching but more of the upright habit, their growth is very vigorous and they produce long, graceful stems to support their enormous flowers.

Pkt. 25c., two pkts. 40c.

## PAPAVER SOMNIFERUM Single Poppy, "Black Prince"

This new Poppy, which is most effectual for vases, is very odd in appearance, Its flowers are of a brilliant, blackish brown color with a violet hue which contrasts very beautifully with the almost white stamina and yellowish green seed germ.

The flowers, if cut when the buds are just bursting and showing their first flower leaf, are very valuable for cutting purposes, lasting a great length of time.

Seed should be sown out of doors about the middle of May, flowering along in Julv and continuing until frost.

Pkt. 15 c .

## ASTER White King

This new Aster is similar to the Rose King in type of flower, but differing in growth, the White King assuming the upright form and acquiring the strength and vigor of the branching class, also blooming about the same time.

The stems are long, varying in length from fourteen to twenty inches and producing very few side shoots, thereby enabling the full strength of the plants to be given in developing their exquisite flowers.

## Pkt. 25c., two pkts. 40 c .

## ASTER White Perfection

One of the finest white Asters for Midsummer cultivation. The plants are extremely strong growing, producing from ten to twelve large flowers, usually measuring four inches in diameter and of a fine form.
The flower when first opened is strongly whorled, the petals being broad and somewhat folded lengthwise, usually making them appear narrow; the outer rows are straight, while the center still retains the whorled effect.

Pkt. 25c., two pkts. 40c.

Aster, Pink Enchantress

## PETUNIA

## New Double Self-Seed-Producing

An entirely new departure in the growing of Double Petunias. This new strain is quite unique, especially so when the seed pods appear from the flower of a plant which has never borne seed from its double variety. It therefore produces a greater percentage of true double flowers from its own seed, the originator advising us that at least 75 per cent. is attained and this not as high a percentage as this characteristic l'etunia is entitled to.

The flowers are of an enormons size, perfectly double and equally as free flowering as the old original varieties which are raised from the single varieties, artificially pollenized from the double flowers, which has been the only process by which Double Petunias have previously been grown from seed. Most stocks in the past have been increased from cuttings. Most all of the known colors of Double Petunias show in this new variety, while the lighter shades are the predominating feature.

The flowers are of a particularly delicate texture, thereby enhancing their beauty.

We believe this New Double Seed-producing Petunia should have the attention of every lover of this old-fashioned flower. Pkt. 50c.

## A STCHOUNICUM. MALMAISON-ROSE

In this peculiar type of Aster has been brought out this very pleasing color.

The plants in habit are similar to those of the Hohenzollern type, but the long, thread-like appearance of the petals is particularly odd, and quite different from those of previous origin.

Pkt. 20c.

## STOCTK NEWPORT

One of the earliest varieties in existence. The plants attain a height of from 12 to 15 inches, producing their flowers on thick, strong branches, giving them a true pyramidal appearance. The flowers are of a most delightful fragrance, averaging about 90 per cent. double. To secure early results seed should be started in April, thus allowing the plants to flower during latter part of June. For price and colors, see page 94 .

Petunia, Double Seed-Producing

## LOBELIA

## Hybrida Sapphire

The increasing demand for new varieties of plants that will succeed well in window and piazza boxes, and which are useful as trailers for hanging baskets and vases, must naturally attract attention to such useful and ornamental species as the Lobelia.

The accompanying illustration represents a new and novel addition to the interesting family.

The blossoms of the Lobelia Sapphire are of extra size, usually measuring $3 / 4$ inch across, and are very thickly set on the long, graceful sprays of foliage; these sprays often attain a length of two feet. The flower in color is of a deep sapphire blue (from whence it derives its name) and in addition the large and well defined white eye, which occupies about one-third of the corolla, makes a very pleasing contrast and is quite effective.
The seed if sown in September should commence to bloom about April in the greenhouse, and if sown during January the plants should flower during the latter part of May or early June and continue till late Autumn.

Pkt. 25c.

Convolvulus althaeoides floribundus

## ARTEMISIA saccorum viridis

## SUMMER FIR

A new ornamental foliage plant of recent introduction from China, a rapid grower, attaining its full growth during the first season, forming pyramidal bushes from three to five teet high, the individual plants reminding one of small Christmas trees.

It may be grown as a pot plant for groups and borders, and also as an annual hedge in the same manner as the Summer Cypress, Kochia tricophylla; the foliage being a rich dark green and finely pinnated.

Succeeding as it does in a dry location is one of its most remarkable features.

Plants which are cultivated in the open garden may be potted in the Fall and cared for indoors to great advantage; while the branches may be cut and used for decorative purposes, keeping well for quite a long time. Pkt. 20c.

Artemisia saccorum viridis

## Convolvulus Alithatoides Fioribundus Perennial Morning Glory

A very beautiful climbing plant, of which the trailing stems attain a height of five to seven feet. The flowers are produced in great abundance, blooming continually until frost; of a soft, pink color, the blooms being erect and bell-shaped.

Its special value wherever planted is to cover rockwork, banks, tree stumps, arbors and trellises.

This new variety, which succeeds well almost everywhere, prefers a rather light, well-drained soil. Pkt. 20c.

Salvia, Canary Bird

## Salvia Canary Bird

## New Yellow Salvia

This new addition to our family of Salvias should he a very welcome variety and of a color that will contrast very readily with the famous Salvia splendens, or Scarlet Sage. A great many shades of the deep reds, scarlets, pinks, violets and blues have been produced, and this seems to be the variety which has been lacking until now.

The rich yellow flowers are borne on slender stalks with the foliage of a deep green, which, undoubtedly, presents a favorable contrast.

Pkt. 25c.

## SWEET WILLIAM

## Double Salmon

The Sweet William, which is so common to almost everyone, needs but very little introduction, but a new shade of this popular flower must naturally be apprecia ted.
The flowers are of good size, of a rich salmon coloring, producing fine clusters or flower heads, and extremely double.
Plants make a rery sturdy and robust growth, with long flower stems, while the foliage shows a beautiful deep green.
This is a particularly fine variety to add to the long list of Sweet Williams now in existence.

Pkt. 20c.

Carnation, Golden Yellow

## STOCK

## Large Flowering Winter, "WHITE LADY"

This new Winter-flowering Stock is undoubtedly one of the best of recent introductions; the plants attain a height of 20 to 25 inches, producing exceptionally large central spikes, very freely branched and assuming the shape of a pyramidal bouquet. The flowers appear much earlier than other varieties of Stocks and continue flowering for a longer period; the doubleness of the blooms is very striking, producing 60 to 6.5 per cent. true double flowers.

The Stock White Lady will grow in the open garden, as well as indoors, making one of the finest varieties that can be grown for outdoor decoration and cutting.

Pkt. 25 c .

Sweet William, Double Salmon

## CARNATION

## Giant Marguerite, Golden Yellow

A much improved strain is this new Golden Yellow Giant Marguerite Carnation over the original varieties of Marguerite Carnations.
The color is of a more intense yellow, with stems much stronger, holding the flowers more erect, which increases their value as cut flowers.

The doubleness of the blooms is also a marked improvement, greatly enhancing their value.

Pkt. 25c.

Stock, "White Lady"

Giant Zinnia

## NEW GIANT GLADIOLUS

## Mrs. Frank Pendleton, Jr.

The finest Gladiolus of the present time, which has been awarded the First-class Certificate of Merit by the Massachusetts Horticultural Society of Boston, also Certificate of Merit by American Gladiolus So ciety at Baltimore, Aug. 16, 1911. In color it is the most exquisite salmon-pink, with a very conspicuous blood-red blotch in the throat on the lower petals.

During the past Summer we have had the largest stock with which to test its merits, and the results have produced every redeeming feature.

It is without doubt one of the strongest growing varieties in existence, attaining a height from four to six feet.

The foliage is exceptionally broad and of a beautiful deep green color, adding immensely to the characteristics of the plant. The flower stem, which is quite hard-wooded, serves to support the immense spike of flowers through heavy winds.

This season we have particularly noticed that most of tine bulbs, even the smaller ones, have thrown two excellent spikes of flowers, the second not being inferior to the first.

The Gladiolus Mrs. Frank Pendleton, Jr., is the result of hybridizing the choicest of the large-flowering type and is now practically a type of its own.

We have received many highly complimentary remarks this season wherever it has been exhibited.

During the coming Spring of 1913 we shall have the largest supply of bulbs to offer, while during the previous seasons our supply has been extremely limited.

Bulbs: Each 60c., doz. \$6.00, $100 \$ 45.00$.

## GIANT ZINNIA

## Grandiflora Robusta Plenissima

## White-Golden Yellow-Scarlet

This monstrous strain of Giant Zinnias has increased in favor for the past two seasons.

These separate colors we have succeeded in procuring this season will, no doubt, give equally as successful results as the mixture which we have been able to obtain for some years past.
The plants are of exceedingly robust habit.
The flowers which are grown on long, stiff stalks, of a semi-globular form, are mostly very double, and, together with their immense size, produce a very marked effect.

The flowers, as the illustration will indicate, measure from five to six inches across, this being by no means unusual. Zinnias being a very popular flower for bedding and old-fashioned gardens, and also of special value for cutting purposes, these new colors cannot but make a valued addition to our already standard varieties.
White, Scarlet, Golden Yellow. Pkt. 15c. each.

Gladiolus, Mrs. Frank Pendleton, Jr.

## STOCK GIANT OF NICE <br> "la brilliante"

This magnificent variety of Giant of Nice Stocks, which have made such unprecedented development, have placed themselves in the front rank of annual flowers.

With this additional new color, "La Brilliante," which is of a brilliant rich crimson, cannot but help to make the list of colors nearer complete.

The plant is of a dwarf habit, bearing its blooms in great profusion; the central stem, instead of forcing itself upward, divides into a number of branches, forming more even spikes all over the plant.

The colors of this beautiful Stock will be found listed in our standard assortment of Stocks. Pkt. 25c.

## CELOSIA

Thompsoni Magnifica Nana
The interesting Plumed Celosia having come into favor more each year, and especially so since the dwarf variety has been offered and which we have listed for the past two seasons in mixed colors, the addition of these three separate colors cannot but increase the value of this class of beautiful annuals. The plants have the graceful habit of the well-known Celosia plumosa Thompsoni magnifica, but only grow to a height of ten to fifteen inches and cannot be surpassed for bedding or for bordering.
Golden Yellow, Chamois Pink, Blood Red.
Each color, pkt. 20c.

Celosia Thompsoni magnifica nana
Specialattention is given to our SummerFlowering Bulbs, Begonias, Cannas, Dahlias, Gladioli, Hardy Lilies and Tuberoses. See pages 100 to 120.

## SCHIZANTHUS HYBRIDUS GRANDIFLORUS

## Violet Red with White Eye

The originator in selecting this new and novel color from his vast assortment of Schizanthus has succeeded in introducing a most pleasing shade and a very fascinating variety.

The blooms are very large, of a brilliant violet red of lighter or darker shading, each flower showing a large white eye, which is a peculiarity of the Schizanthus, finely veined.

Some of the flowers show a golden yellow margin, the white eye enriching the whole appearance.

The plants possess the general characteristics of the recent introductions, having a dwarf and compact growth, each plant growing very symmetrical and producing a profusion of delicate blooms. Pkt. 25c.

Schizanthus hybridus grandiflorus

## Suburban Wild Garden Mixture

Our mixture of seeds for the Wild Garden has gained great favor, and has proved a marked success with a great many of the amateur and professional gardeners by its particularly pleasing varieties, blooming so continuously throughout the Summer, and is comprised of such varieties as will produce a most brilliant contrast of colors. To those who have usually planned for fancy and decorative flower gardens and carefully planned borders, and who know the volume of time and labor required, to have the best possible effect produced, we feel justified in recommending for use the "Suburban Wild Garden Mixture"; also to those who cannot give the required attention.

The beautiful results obtained from this mixture, and the little amount of time and labor required in the sowing of same, make this Suburban Wild Garden one of the most desirable and at the same time least expensive flower gardens.

This mixture is especially adapted for waste places, or rather corners and extra patches where weeds seem to predominate and nothing of value seems to find a place, and where the soil is moderately rich.

Suburban Wild Garden Mixture is composed of the best flowering annuals which are both for cut flower use and bedding effects and contains at least over two hundred varieties.

One of the pleasing features of this mixture is the fact that as the season advances something different seems to come to bloom; something not looked for, indicating some later variety.

## SUBURBAN WILD GARDEN, Tall Mixture. Pkt. 15c., oz. 25c., $1 / 4 \mathrm{lb} .75 \mathrm{c} ., \mathrm{lb} . \$ 2.50$. <br> SUBURBAN WILD GARDEN, Dwarf Mixture. Pkt., 15 c. , oz. $25 \mathrm{c} ., 1 / 4 \mathrm{lb} .75 \mathrm{c} ., \mathrm{lb} . \$ 2.50$. <br> Suburban Garden Collections

## Annuals

 During the Spring months we have daily many calls for a collection of Flower Seeds that do well in a small suburban garden and produce flowers from early Summer until frost.These collections of annuals have been carefully selected from varieties which are easily grown and well adapted for small or large gardens, and which will give continuous bloom from early Summer till late Autumn.

Such annuals as Sweet Peas, Nasturtiums, Asters, Phlox, Zinnia and other well-known varieties are included in the following collections, and noth ng but our best strains of seed are used.

## Collection of 20 Varieties. <br> $\qquad$ <br> $\$ 1.00$ <br> Collection of 10 Varieties. <br> $\$ 0.50$

Perennials As the demand is steadily increasing for the flowers which do not require planting each season, we to those interest have carefully prepared the following collections which will, without doubt, give excellent satisfaction

We advise planting the secds of perennials as early as June and July, thereby enabling the grower to obtain much stronger plants which will become better established to withstand the Winter.

We include in the following collections such varieties as Hollyhock, Columbine, Larkspur, Foxglove, Canterbury Bells and the Oriental Poppy.

Collection of 20 Varieties

## CLIMBERS AND TRAILERS (Annuals)

During past seasons we have had repeated calls for a complcte list of climbing and trailing plants for varicus purposes, such as trellises, verandas, fences, rockeries, piazza boxes, and a great many other locatations where something is required to cover or trail around for different effects and we have therefore compiled the following list for those who may desire the information without having to hunt for the various assortment listed throughout the catalogue.

Pkt.
ADLUMIA cirrhosa (Mountain Fringe). H. B. Excellent climber with fern-like foliage and bearing rosy-lilac flowers, blooming the first season. 15 feet..................... $1 / 8$ oz. $\$ 1.00 \$ 0.05$

Oz. 50 c .
NASTURTIUM, see page 86.
PHASEOLUS caracalla. A most beautiful climber, with fragrant bluish white orchid-like flowers in clusters; excellent for outside in Summer and conservatory in Winter..

THUNBERGIA. H. A. Pretty trailing plants, mostly used for window boxes, vases and urns; foliage and flowers produce a striking effect
alata. Yellow, with dark eye. 5 feet
alba. White, with dark eye. 5 feet..........
TROP $\mathbb{E} O L \mathbb{C M}$ Canariensis (Canary Bird Vine) Rapid climber, of easy cultivation, flowering continually all Summer; flowers of a bright canary yellow.

# COMPLETE LIST OF CHOICEST FLOWER SEEDS 

## Which Comprise all the Best and Latest Varieties Useful to Florists, Private and Amateur Gardeners

We list, on page 56, collections of Annuals which are easily grown in the home garden for those who are not familiar with the different varieties.

The following abbreviations are used throughout our list:
A. Annuals. Seed sown in Spring will flower and mature seed in one season.
H. H. A. Half-Hardy Annuals. Seed should be sown in greenhouses or hotbeds during March and April and transplanted in open ground latter part of May.
H. A. Hardy Annuals. Seed may be sown in the open during March and April and will endure ordinary weather to October.
B. Biennials. Seed should be sown from June to August, flowering the next season. Seeds of many varieties, if sown in February, will flower same season.
H. B. Hardy Biennials. May be treated same as Hardy Annuals, flowering next season.
H. H. B. Half-Hardy Biennials. Seed should be sown in greenhouses or coldframes, transplanted in the open latter part of May and require protection during Winter.
P. Perennials. Seed should be sown during July and August, flowering the next season and continuing to flower each succeeding year.
H. P. Hardy Perennials. Do not require protection during Winter.
H. H. P. Half-Hardy Perennials. Require slight protection of leaves or boughs during Winter months.
G. P. Greenhouse Perennials. Require the protection of hothouse during Winter.
G. A. Greenhouse Annuals. Require greenhouse temperature at all times and include such plants as Cineraria and Cyclamen.

ABOBRA viridifiora. H. H. P. Climber bearing scarlet fruit and glossy dark green foliage. 10 ft .

Oz. \$1.00 \$0.05
ABUTILON (Chinese Bell Flower, or Flowering Maple). G. P. Greenhouse shrub and profuse bloomer. Valuable in the garden and an excellent house plant.

## SWEET PEAS

## Giant Spencer and Orchid-Flowering Mixture

In offering our Giant Spencer and Orchid-flowering Mixture of Sweet Peas we are, undoubtedly, giving the public the choicest assortment of varieties obtainable. We use particular pains in selecting the best and largest flowering strains, all of the true Spencer and Unwin types, as well as the colors that will blend together, our large assortment of varieties to seiect from allowing us to secure the best results. The varieties included in this Mixture will produce from three to four flowers on a stem, the blooms being far superior to the original Grandiflora type previously used, beautifully waved and fluted, with long stems varying from eight to fifteen inches in length.

## Lily of the Valley Clumps <br> For Outdoor Culture

These are grown from imported pips, and are extra large, only the best quality of pips being used.
Large Clumps. Each containing many flowering pips. By express, each 30 c ., doz, $\$ 3.00$, $100 \$ 20,00$.

## Achimenes

An excellent plant for the pot or hanging-basket. Although termed greenhouse perennial, it can easily be raised in any dwelling apartment. Light, sandy, peaty soil is essential, and during Summer the plants should be placed in a shady but warm location until they begin to bloom, when a cooler spot will prolong the flowering season. Plant six bulbs in a pot.

Apios Tuberosa. A hardy climber which bears beauticlusters of flowers during July and August. Requires a shady location. Each 5 c., doz. 50 c.

Achimenes

## Amaryllis

In order to obtain fine specimens, the following method should be followed: On receipt of the bulbs they should be placed where they will be always slightly moist and warm, under the beuches of a greenhouse, for example; do not pot the bulbs before the flower-bud appears. When just potted give very little water, and promote growth by giving moderate bottom heat; increase the supply of water as the plants progress. Very often the mistake is made of bulbs being potted up too early; the consequence is that leaf-growth only is made. The proper soil for Amaryllis is turfy loam enriched with rotten mamure.

Belladonna major (Belladonna Lily). White, tipped rose; large and handsome. Each 15c., doz. \$1.50.
Belladonna rosea perfecta. New. An exquisite clear pink variety of great substance. This variety was exhibited last Spring at Horticultural Hall, Boston, where it created quite a sensation. Sach 50c., doz. \$5.00.
Formosissima (Jacobæan Lily). Dark crimson, open flower, lower petals recurved. Each 10c., doz. \$1.00.
Hippeastrum. Newest hybrids. These hybrids are raised from seeds of the most famous strains in the world, and should not be compared with the oldfashioned species. Lach 75.c., doz. \$7.50.
Vittata. A variety of Hippeastrum. most intensely colored; very large. Each 7亏̄c., doz. \$7.50.
Defiance. Rich carmine, striped and suffused with white. Each 75c., doz. $\$ 7.50$.
Equestre. A liybrid of Hippeastrum. Scarlet, with broad white stripe extending from the root to half-way up the segments. Each 50 c ., doz. $\$ \overline{5} .00$.
Johnsoni (Barbadoes Spice Lily). Another hybrid. Enormous bright crimson flowers, with white stripe through the center of each segment. Each 40 c., doz. \& 4.00.

CALADIUM

AMARYLLIS HIPPEASTRUM
Lutea (Mount Etna Lily). Bright golden yellow. Each 10c., doz. 75c.
Vallotta purpurea (Scarborough Lily). Vivid scarlet. Popularly grown in pots and placed on steps and piazzas, where they flower during the latter part of Iugust. Each 30c., doz. $\$ 3.00$.
Zephyranthes rosea (Fairy Lily). Pink flowers, 12 inches ligh. Blooms the whole Summer. Each 10c., doz. T5c.
Zephyranthes candida (Wind Lily). Pure white, fragrant. Each 10 c ., doz. Tכ̄c.
Zephyranthes sulphurea. Pure yellow; very attractive. Each 10c., doz. $\$ 1.00$.

FANCY-LEAVED CALADIUM

## Caladium Esculentum

## Elephant's Ear

Most showy, ornamental plant for sub-tropical groups or single blooms on the lawn. Produces enormous, smoothgrowing leaves, often three or four feet in length.

|  | Each | Doz. | 100 |
| :---: | :---: | :---: | :---: |
| First Size Bulbs | \$0.10 | \$0.75 | $\$ 5.00$ |
| Extra Large Bulbs | . 15 | 1.25 | 8.00 |
| Mammoth Bulbs | . 20 | 2.00 | 12.00 |
| Growing Plants in May | . 20 | 2.00 | 10.00 |

These bulbs can be shipped by express only.

## Fancy-Leaved Caladiums

In the past few years these have grown very rapidly in popular favor for the decoration of the conservatory, greenhouse, or window box; excellent for planting out of doors when the ground has become warm and in partially shady borders. Soil should be well enriched. These range in a great variation of colors and beautifully marked leaf which can hardly be described.

We have these in many varieties which we offer in dormant tubers at 20 c . each and $\$ 2.00$ per doz. In May we have growing plants in small pots at 30 c . each and $\$ 3.00$ per doz. When ordered by the dozen we always supply a variety of colors, giving the names at the same time.

## Camassia Esculenta

An attractive hardy Spring flower, resembling Scilla campanulata. Dark blue flowers, Doz. 20c., $100 \$ 1.00$.

SINGLE-FRINGED BEGONIA

## Begonias-Tuberous-Rooted

Begonias are indispensable for shady places, and every garden possesses one or more shady spots. May be planted out of doors latter part of May. Started in the house during March and April, the first flowers will appear in June and increase with the season, the plants attaining their height of perfection just before frost sets in. Keep constantly moist.

We have established a reputation on the quality of our Begonias. The size and quality of the bulbs we ship should be sufficient guarantee of their superiority in quality.

## New Named Begonias

The following two new varieties of tuber-ous-rooted type grow about 10 inches high, flowers very double and measure $11 / 2$ to 2 in. across. Flowering continually till frost. Lafayette. Brilliant crimson scarlet. Duke Zeppelin. Intense vermilion.

Each 20c., doz. $\$ 2.00,100 \$ 14.00$.

## Single-Flowering Begonias

|  | Doz. | 100 | 1000 |
| :---: | :---: | :---: | :---: |
| Rose Pink | \$0.50 | \$3.50 | \$30.00 |

## Double-Flowering Begonias

| Light Rose $\ldots \ldots \ldots \ldots$ |  |  |  |
| :--- | :--- | :--- | :--- |
| Scarlet | $\ldots \ldots \ldots \ldots \ldots$ | 1.00 | $\$ 7.00$ |

## Begonias-Tuberous-Rooted

Culture.-The tubers may be started in February or March. The soil should be light, containing plenty of leaf mould and sand. In planting, care should be taken to set the crown of the tuber, which is usually somewhat depressed, upward. The tubers should be covered half an inch with light soil and watered sparingly until they start, after which more water may be given. The temperature should be 60 to 70 degrees. The started plants, when intended for bedding purposes, may be transferred to the beds in the open ground early in June, by which time they should be in bloom. The plants should be set ten or twelve inches apart.

Although there is much to be gained by starting the tubers early as just described, they may be planted unstarted in the open ground beds in the last week of May or later, with excellent results.

## Single-Fringed Begonias

Beautiful giant blooms, with elegantly-fringed edges, giving the flower a most graceful appearance. There are rather new, and quantity is limited. Each Doz. 100

| Scarlet | \$0.15 | \$1.50 | \$10.00 |
| :---: | :---: | :---: | :---: |
| Rose and Pink | . 15 | 1.50 | 10.00 |

SINGLE TUBEROUST-ROOTED BEGONIA

HYACINTHUS CANDICANS

## Bessera Elegans (Mexican Coral Drops)

Free-blooming bulbs wth long, narrow, grass-like leaves and slender flower stalks, scarlet flowers. Each 10 c ., doz. $\$ 1.00,100 \$ 7.00$.

## Calla Lilies

Nothing is of easier cultivation than the popular Calla. They require good rich loam. Indispensable for edging of ponds or bog-garden.
Pearl of Stuttgart. A comparatively new variety of graceful habit, dwarf, with compact foliage, 15 inches high, and large massive flowers standing well above it. Excellent for pot plant. Lach 2.5.., doz. \$2..50).
Little Gem. A miniature Calla, grows 12 inches high and has flowers onehalf the size of the regular Calla; very interesting. Each 25e., doz. \$2.50.
Golden Yellow (Richardia Elliottiana). Flowers are of medium size, well opened, pure yellow; a vigorous grower, dark green leaves, spotted and blotched with silvery white. Will bloom all Summer. Extra large bulbs. Each 50c. Spotted (Richardia alba maculata). The leaves of this variety are deep green with numerous spots which give the plant a very ornamental appearance. Flowers are pure white; grows very freely either indoors or out of doors. Each 10c., doz. 75 c .

## Crinum Kirkii

A bulbous plant producing usually a two-flowered spike, growing about two feet in height, and surmounted by clusters of Amaryllis-like flowers, pure white striped with purple. Each 50c., doz. $\$ 4.00$. These are extra large bulbs and cannot be mailed.

## Crinum Powellii

When grown in tubs makes a beautiful effect, owing to the prolific growth of offsets. It differs from other varieties in that it blooms all Summer instead of a short period. By express only. Nach Doz.
 Powellii rosea ........................................................... . . . 50 . 4.50 Intermedium .............................................................. . . . . . 50 4.50

## Cinnamon Vine (Chinese Yam)

Splendid hardy climber, rapid grower, with bright, glossy green, heart-shaped leaves. White Cinnamon-scented flowers. Each 10c., 3 for 25c., doz. 50c., $100 \$ 3.00$.

## Hyacinthus Candicans (Summer Hyacinth) <br> A most valuable hardy perennial, showing its

 majestic pure white, bell-shaped flowers during August. Most effective if planted in large clumps between slirubbery. Mammoth bulbs. Doz. J0c., 100 $\$ 3.00,1000 \$ 20.00$.
## Eremurus

## Sent by express <br> only

Himalaicus. A very effective plant, producing fine white flowers about 1 inch in diameter. Each 75c., doz. \$8.00.
Robustus. A very large and beautiful perennial, flowering first of June. The strong stems attain a height of 7 or 8 feet, bearing large soft rose flowers in dense spikes. Each $\$ 1.00$, doz. $\$ 10.00$.

## Gloxinia

For a Summer-flowering plant, both for greenhouse and window, this is the most desirable and can be easily raised from bulbs. We have these in a great variety of colors and all are of the large flowering variety.

|  | Each | Doz. | 10 |
| :---: | :---: | :---: | :---: |
| Dark Violet | \$0.10 | \$1.00 | \$7.00 |

| Pure White | . 10 | 1.00 | 7.00 |
| Spotted | . 10 | 1.00 | 7.00 |
| Scarlet Edged White | . 10 | 1.00 | 7.00 |
| All Colors Mixed | . 10 | 1.00 | 7.00 |

## Trillium (Wood Lily)

Hardy, native flowers, excellent for shady places.
Grandiflorum (American Wood Lily). Flowers pure white, changing to delicate rose.
Erectum. Pure white, compact growth. Height 15 inches. Each 10c., doz. \$1.00, 100 \$6.00.

## Aquatics (Water Lilies)

The cultivation of Aquatics is of the simplest; their requirements are sunshine, water and plenty of rich soil. They are divided into two classes, hardy and tender; the former may be planted in ponds, lakes or sluggish streams, early in the Spring and under the same conditions as our native Water Lily, they will grow luxuriantly and flower profusely the entire season. We have a large list of varieties, prices ranging from $2 \overline{\mathrm{c}}$. to $\$ 5.00$ each.

GLOXINLA

## Hardy Lilies

These Lilies are becoming very popular within late years and are used extensively to produce a second flowering season in beds which usually look bare after June, such as Peonies, Iris, Roses, shrubs, etc. For such purposes care should be taken in selecting varieties that grow quite tall, and bulbs should be planted fully 10 to 15 inches deep. A few suggestions for planting: Lilies should be planted in clumps of six or more in order to be effective. Bulbs that are composed of loose leaflets, such as Candidum, Speciosum, Roseum, etc., should be planted on the side with plenty of sand around each bulb. All Japanese varieties should be planted at least 12 inches, other varieties 6 inches deep. A great quantity of sand should be used in connection with planting all varieties of Lilies.
Auratum (Golden-banded Lily of Japan). The flowers are white, with a broad yellow stripe throngh the center of each petal and freely spotted crimson. Their fragrance is delicious.

|  | Each | Doz. | 100 |
| :---: | :---: | :---: | :---: |
|  |  | \$1.50 | \$10 |
| a-Large Bulbs | 25 | 2.50 | 15.00 |
| Mammoth B | . 40 | 4.00 |  |

Batemanni. A Japanese Lily, producing bright apricot-shaded flowers. July and August. 3 to 4 ft. Each 35c., doz. $\$ 3.50$.
Brownii. Flowers very large, trumpet-shaped, pure white inside, brownish outside; stamens chocolate color. July and August. 3 ft . Each 75c., doz. $\$ 7.50$, $100 \$ 60.00$
Canadense (Native Canadian Bell Lily). Flowers bright yellow, with small, black spots. A most graceful Lily and excellent for naturalizing in shrubs and woods. It is nothing unusual to find this variety growing 8 feet high, with 20 to 30 blossoms, if grown among shrubbery. Each 15 c. . doz. $\$ 1.50$, $100 \$ 10.00$.
Canadense rubrum. A red-flowering sort of above. Each 20c., doz. $\$ 2.00,100 \$ 15.00$.
Carolinianum (Carolina Lily). A beautiful, but little known, native Lily of the recurved type, with fragrant orange flowers. Usually from one to three Lilies on a stem. Each 25 c ., doz. $\$ 2.50,100 \$ 20.00$.
Colchicum. Rich lemon color, spotted black. July. 2 ft . Each 40c., doz. \$4.50.
Croceum. Large flowers of beautiful golden, slightly tinted scarlet. July and August. 4 to 5 ft . Each 25 c ., doz. $\$ 2.50$.
Elegans, Leonard Joerg. Bright orange-scarlet, with brown spots at base of petals. Flowers in July. Each 25c., doz. \$2.50.
Elegans robusta. An immense flower of the true type; three to five flowers in a cluster. Flowers in July. Each 25c., doz. $\$ 2.50$.
Elegans. One of the earliest flowering Lilies. Grows 18 inches high and bears from three to five cupshaped flowers erect on a stout stem. Color bright orange. Flowers beginning of July. Each 15.., doz. \$1.50.
Excelsum (Isabellinum). Flowers recurved and of delicate buff color. Very fragrant. July. Each $\$ 1.00$, doz. $\$ 10.00$.
Humboldtii. Handsome reddish-orange flowers, with purple spots. July. 4 to 5 ft . Each 75 c ., doz. $\$ 7.50$.
Leichtlinii. Flowers pure canary-yellow, with crimson spots. August. 3 to 5 ft . Each 50c., doz. $\$ 5.00$.
Martagon. Purplish-red bell-shaped flowers. July. Each 25c., doz. \$2.50.
Philadelphicum. Perhaps the best-known native Lily of New England. Flowers orange-red, with purple spots. Grows 2 feet high and usually shows two blossoms of erect habit on top of a 2 -foot stem. June, July and August. Each 20c., doz. \$2.00, 100 \$15.00.
Rubellum. Rather new. One of the best pink Lilies; grows $21 / 2$ feet high and usually bears from 6 to 8 fine pink flowers in August. Each 40c., doz. $\$ 4.00$, $100 \$ 30.00$.

LILIUM AURATUM
Speciosum album (White Japanese Lily). This class of Speciosum is undoubtedly the hardiest and most popular Lily for the border or garden. They grow from 3 to 4 feet high and continue to bloom from August until frost. The above variety is pure white; fragrant.
Large Bulbs. Each 20c., doz. $\$ 2.00,100 \$ 16.00$.
Mammoth Bulbs. Each 35c., doz. $\$ 3.50,100 \$ 26$.
Speciosum roseum (Pink Japan Lily). White shaded and spotted dark rose.
Large Bulbs. Each 15c., doz. $\$ 1.50,100 \$ 10.00$.
Mammoth Bulbs. Each 25c., doz. $\$ 2.50,100 \$ 18$.
Speciosum rubrum (Red Japan Lily). White, suffused and spotted crimson.
Large Bulbs. Each 15c., doz. \$1.50, 100 \$10.00. Mammoth Bulbs. Each 25c., doz. $\$ 2.50,100 \$ 18$.
Speciosum Melpomene. Large; deep crimson, heavily spotted. Each 20 c., doz. $\$ 2.00,100 \$ 15.00$.
Mammoth Bulbs. Each 30c., doz. $\$ 3.00,100 \$ 20$.
Speciosum magnificum. New. Most intensely colored of all Speciosum varieties. A large clump of these Lilies will make a wonderful effect. Each 30c., doz. $\$ 3.00,100 \$ 20.00$.
Superbum (Our native Turk's Cap Lily). Rich or-ange-red petals tipped red and dark spotted. 4 to 6 feet high. Blooms July and August. A capital variety for the shrubbery. Each 15c., doz. \$1.50, $100 \$ 10.00$.
Tenuifolium (Coral Lily). A miniature Lily of graceful appearance. Flower fiery scarlet, Turk'sCap shape. August. 1112 ft. Each 25c., doz. $\$ 2.50$, $100 \$ 18.00$.
Tigrinum splendens. An improved variety of Tiger Lily, with larger flowers. Each 10c., doz. $\$ 1.00,100 \$ 6.00$.
Tigrinum fl. pl. Double-flowering variety of above. Each 10c., doz. $\$ 1.00,100 \$ 6.00$.
Umbellatum. A Lily that resembles Elegans variety. Flowers are borne in larger clusters and range in all shades from orange to deep scarlet. June. 2 ft . Each 15c., doz. $\$ 1.50,100 \$ 10.00$.
Wallacei. Orange-scarlet, spotted with maroon. September. 3 ft . Each 15c., doz. $\$ 1.50,100 \$ 10.00$.

## Ismene Calathina Peruvian or Soa Daffodil

These handsome plants are almost wholly unknown to American growers. They are deciduous bulbs of a very ornamental character, producing long, arching leaves of the richest glossy green and quite a yard high. The flowers are produced in glorious umbels and resemble Pancratium, measuring 3 to 4 inches across the petals, the centers of the flowers resembling the trumpets of Narcissi. Half-hardy; easily grown in pots. They enjoy a rich soil. Each $1 \overline{5}$ c., doz. $\$ 1.50,100 \$ 10.00$.

## Montbretia

Hardy border plants with elegant and gracefully branched Gladiolus-like flowers which are now much prized for cutting during Summer. The colors vary from clear yellow to rich scarlet, and the plants grow about 2 fect in height. Plant the bulbs five inches deep and protect them during Winter with liberal mulching.
Crocosmixflora. Orange-scarlet. Doz. 1Јc., 100 SJ̌c., $1000 \$ 6.00$.
Etoile de Feu. Rich scarlet, yellow center. Doz. 30c. 100 \$1.75, $1000 \$ 12.00$.
Germania. A new hybrid, having large, perfect, bright, orange-colored flowers. It is much freer in bloom than any other of this family. Doz. 60c., $100 \$ 4.00$.
Golden Sheaf. Clear yellow, beautiful. Doz. 20c. $100 \$ 1.25,1000 \$ 10.00$.
Rayon d'Or. Deep yellow, very large. Doz. 20c., 100 $\$ 1.00,1000 \$ 8.00$.
Rosea. Bright salmon-rose. Doz. 2̄ॅc., 100 \$1.2̄̄, $1000 \$ 10.00$.
Transcendent. Large golden-yellow flowers, outside bright red. Doz. 30c., $100 \$ 2.00,1000 \$ 15.00$.
Pottsii. Bright yellow, flushed with red. Doz. 15c., 100 Süc., $1000 \$ 6.00$.

## Milla Biflora

One of the loveliest bulbous plants, most desirable on account of its immense pure waxy-white flowers, which are borne in clusters of two to three on a flowerstalk twelve to eighteen inches high. The petals are very thick and firm, and the flowers will keep in water for a week after cutting. A single bulb will produce as many as six flower-stalks. Doz. 60c., $100 \$ 4.50$.

## Madeira Vine

A favorite tuberous-rooted climbing plant with dense and beautiful shining foliage and of very rapid growth, twining on strings to a great height or forming garlands in many fanciful forms. It will grow anywhere, but does best in a warm, sheltered, sunny location. It is also a very pretty plant for training around the windows in the house. Doz. 35.., 100 $\$ 2.50$; by mail, doz. $4 \overline{\mathrm{c}} \mathrm{c}$.

TIGRIDIA

montbretia

## Ranunculus

An exquisite dwarf Spring flower, which can easily be grown in pots or coldframes.
Giant Double French, Mixed. A great assortment of colors. Doz. 10 c ., 100 75c., $1000 \$ 6.00$.
Double Persian, Mixed. A small-flowered variety in various colors. Doz. 10c., 100 75c., $1000 \$ 6.00$.
Double Turban, Mixed. Enormous flowers, resemblng miniature Peonies in shape, and in great variety of colors. Doz. 15c., 100 75c., $1000 \$ 6.00$.

## Sternbergia Lutea

## Autumn Daffodil

Pretty, hardy Autumn-flowering bulbs that deserve to be better known. In appearance they resemble a fine yellow Crocus, and a clump of a dozen or more together with a corresponding clump of Autumn Crocus, offered in bulb catalogue, gives a touch of Spring to the garden in Autumn. This is supposed by some writers to be the Lily of Scripture, as it grows abundantly in the Holy Land from whence our stock was procured. Doz. 35 c., $100 \$ 2.50,1000 \$ 20.00$.

## Tigridia

## Shell Flower

Has gorgeously colored Iris-like flowers and foliage. Grows 3 feet high and blooms from July to October. Excellent for cut flowers.
Pavonia alba grandiflora. Pure white. Doz. 50c., 100 \$3.50.
Pavonia aurea. Golden yellow. Doz. 50c., 100 \$3.50.
Pavonia Canariensis. Light yellow. Doz. 50c., 100 \$3.50.
Pavonia rosea. Pink. Doz. 50c., $100 \$ 3.50$.
Pavonia speciosa. Scarlet-red. Doz. 50 c., $100 \$ 3.50$.
Mixed Varieties. Doz. 50c., $100 \$ 3.50$.

## Tuberose

This popular flower is grown extensively now in New England, as by proper methods it can be had in bloom by July and will continue into Fall. Pot the bulbs in Mareh and start them growing. Albino. Single pearly white, very gracefuī and valuable for cutting. Doz. 50c., $100 \$ 3.50$.
Excelsior, Double Pearl. Large-flowful and valuable for cutting. Doz. 50c., with large and very double flowers. Doz. 40c., $100 \$ 2.00,1000 \$ 15.00$.
Excelsior, Double Pearl. Mammoth bulbs. Doz. 60 c., $100 \$ 3.00,1000 \$ 24.00$.

## Mexican Everblooming Single Tuberose

We find this to be the most beautiful and graceful Tuberose in existence. It throws up its long stalks, with loosely arranged single flowers of the purest white and sweetest fragrance continuously from June till frost. The flowers will last a week after being cut. For good success, select a sunny, warm location, good, rich loam and keep well watered during Summer. Each 10c., doz. $\$ 1.00,100 \$ 7.00$.

ZEPIIYRANTHES ROSEA

MEXICAN EVERBLOOMING SINGLE TUBEROSE

## Watsonia Ardernei

This new white variety was recently introduced from South Africa and is likely to become very popular. The bulbs resemble Gladiol., sending up stems to a height of 3 to 4 feet, each stem bearing about a dozen snow-white flowers. Fine for forcing in the greenohuse or planting outdoors in Spring, like the Gladioli. Each 20c., doz. \$1.75, $100 \$ 12.00$.

## Zephyranthes (Fairy Lily)

A most delicate, beautiful and graceful Lily-like plant which uninterruptedly throws up its large flowers on waving stems 12 inches high from June until frost.
Zephyranthes rosea. Pink. Each 10c., doz. 75c., $100 \$ 5.00$.
Zephyranthes candida. Pure white. Each 10c., doz. $75 \mathrm{c} ., 100 \$ 5$. Zephyranthes sulphurea. Sulphur-yellow. Each 10c., doz. $\$ 1.00$, $100 \$ 8.00$.

## GLADIOLI-OUR SPECIALTY

We devote a large space to the growing of all the varieties of Gladioli we catalogue and in addition those introduced by the leading gro ers of Gladioli in this country and also most of the European novelties, making our collection one of the largest in this country.

The best time to plant Gladioli is in May. Gladioli bloom without interruption from the end of July until frost.
Any fairly rich garden soil will grow this flower to advantage, but it should be thoroughly prepared and manured. If the soil is stiff and hard to work, fill the drill with a sandy loam

Gladioli should have full exposure to the sun. Plant in single or double rows, two inches apart in the drill; two, three or four inches deep, according to size; single rows should be put about twelve inches apart; double rows, about eighteen inches. This method of planting is best when it is intended to grow cut blooms for indoor opening. For general culture, mass planting in square, oblong or round beds will be found highly desirable. When planted in beds the bulbs may be set from four to six inches apart, in each direction. To secure a succession of blooms, make two plantings - the first with the bulbs eight inches apart in each direction, and the second, two or three weeks later, with the bulbs between those first planted.

You cannot make up and forward your orders for Gladioli too soon. The earlier in the season they are received the better attention it will be possible to give them, and you will also be sure of getting just the kinds you most wish.

We shall issue a special list in connection with our Dahlia catalogue of varieties not listed here.

## Gladiolus in Mixture

FISKE'S EXHIBITION MIXTURE. Includes a large proportion of the named varieties offered in our list, in addition to the best selection of Groff's Hybrids. We mix them ourselves and know this Exhibition mixture cannot help but please the most critical buyer. Doz. 50 c., $100 \$ 3.50,1000 \$ 30.00$.
GROFF'S MIXED HYBRIDS. Are known to be a mixture of all the best of the earlier Hybrids grown by Mr. Groff, and are marvelous in their varied markings. Doz. 30c., $100 \$ 2.00,1000$ $\$ 18.00$.
SPECIAL MIXTURE. Of all good varieties, in large size bulbs. Doz. 25c., 100 \$1.50, $1000 \$ 12.00$.

## Gladiolus in Separate Shades

In many situations we find our customers are desirous of planting large beds or borders with special shades. We have had the following selected from named varieties into the following shades and where large quantities are wanted we recommend:

| White and Light Extr | $\begin{aligned} & \text { Doz. } \\ & \$ 0.60 \end{aligned}$ | $\begin{gathered} 100 \\ \$ 5.00 \end{gathered}$ | $\begin{gathered} 1000 \\ \$ 40.00 \end{gathered}$ |
| :---: | :---: | :---: | :---: |
| White and Light | . 40 | 2.50 | 20.00 |
| Rose and Pink Extra | . 50 | 3.50 | 30.00 |
| Scarlet and Red | . 25 | 1.50 | 12.00 |
| Orange and Yellow. | . 75 | 5.00 |  |
| Striped and Variegated | . 40 | 3.00 | 25.00 |

## GENERAL LIST

AMERICA. One of the best Gladioli in existence. The color is a most beautiful soft pink, very much like the "Enchantress" Carnation. Individual flowers are very large and massive, and as a group or in vases there is no other flower which can excel it in effectiveness. Doz. 75 c ., $100 \$ 5.00$.
Andre del Sarto. Handsome spike, very large, well expanded flowers of fine cherry red color. Large creamy white blotch on two sepals; a very effective variety. Each 15 c ., doz. $\$ 1.50$.
Andre LeRoy. Very fine deep cherry red, flamed and striped with a rich dark shade, white blotch and white stripe in the center of each petal. Each 15 c ., doz. $\$ 1.50,100 \$ 10.00$.
Anita. Amaranthine roseself, excepting a small white blotch; tall and well furnished spike. Each 10 c ., doz. $\$ 1.00$.
Arriere-Garde. Grand spike of solmony-rose flowers profusely flushed with slaty violet toward the edges of the petals, blotch and center band creamy yellow. Each 15 c ., doz. $\$ 1.50$.
Attraction. Deep, dark rich crimson, with a very conspicuous large pure white center and throat. At once a most beautiful and attractive sort. Each 10 c ., doz. $\$ 1.00,100 \$ 6.00$.
AUGUSTA. Flowers are of perfect paper white, with a slight pink shade on lower half of the petal. The spike is set solid and perfect with the flowers from top to bottom. Each 6c., doz. 60 c ., $100 \$ 4.50$.
BARON HULOT. Good-sized flower, well arranged on straight spikes; color dark violet bordering on blue. Each 20 c ., doz. $\$ 2.00,100 \$ 15.00$.
Bicolore. Large flowers of bright rosy salmon with the exception of the lower petals, which are ivory white suffused with rose at edges. Each 15 c ., doz. $\$ 1.50$.
Brenchleyensis. This is an old standard sort, and one of the best for bedding where one shade of good scarlet is desired. Large bulbs. Each 5c., doz. 40c., $100 \$ 3.00$.
California. Large flowers of deep lavender pink, with prominent white throat marking; flowers well arranged on a tall, straight spike. Each 15 c ., doz. $\$ 1.50,100 \$ 10.00$.
Canary Bird. Without doubt a fine yellow, a pure canary shade that is pleasing and attractive. Each 15 c ., doz. $\$ 1.50,100 \$ 10.00$. COLUMBIA Light orange-scarlet. Each 10c., doz. $\$ 1.00$.

GLADIOLUS AMERICA

Commandant Deloncle. Splendid spikes with large rounded flowers of violet crimson and marked with a distinct white line. Each 15 c ., doz. $\$ 1.50$.
Contrast. Flowers of great substance and a beautiful compact spike of perfect form; color intense scarlet with a large distinct pure white center which is neither tinted nor mottled. A most striking novelty. Each 25 c ., doz. $\$ 2.50,100 \$ 20.00$.
CURT ENGLEHARDT. Golden rose, crimson red shaded carmine, with a snow white bloth, with great variety of colors; a superb flower. Each 75c.

## GLADIOLI-Continued

Cracker-Jack. Large flowers of rich, velvety dark red, throat spotted with yellow and dark maroon; a most beautiful variety. Each 20c., doz. \$2.00.
DAWN. Strong, straight and vigorous plant over four feet high. Flowers large, of a delicate salmon shading to white inside when
| bloomed, a small claret stain in interior petals. Each 20c., doz. \$2.25.
DORA KRAIS. A much improved yellow; color sulphur yellow with dark carmine spots; flowers very large and open; this was much admired last year when exhibited. Each 20c., doz. \$2.00.
Eugene Scribe. Medium sized, well opened flowers; tender rose, blazed carmine red. Each 15c., doz. \$1.50.
Frau Dr. Ruhle. Soft cream colored, slightly suffused delicate pink, tips showing pink, lower petals a slight stripe of purplish [. crimson; deep at base; every petal is marked alike; very good. Each 25c., doz. \$2.50.
FRAU GUSTAV CLEES Blood red, striped white on lower petals, dark, extra fine. Each 35 c ., doz. $\$ 3.50$.
Fraulein Helene Hermann. Coppery tile red, edged slate bue, ground pure white. Each 50c.
Gallieni. Compact spikes of immense flowers measuring over 4 inches; color intense cinnabar red; a most striking flower. Each 25 c ., doz. $\$ 2.50$.
General de Nansouty. Rich buish purple, with throat and three lower petals marked with strong vivid crimson and flecked slightly with spots of lemon-yellow; flower stalk is long, bearing 18 to 20 buds, half of which are open at the same time. Each 15c., doz. \$1.50.
Geo. B. Remsen. Bright crimson and white, freely intermixed. Each 10c., doz. \$1.00.
GEORGE PAUL. Large flowers, deep crimson, slightly stained yellow, spotted with purple. Each 15c., doz. $\$ 1.50,100 \$ 9.00$.

GIANT PINK. Large flower, dark pink shade with brilliant throat marking of dark red; tall, strong grower; flowers well arranged, with many open at the same time. Each 20c., doz. $\$ 2.00,100 \$ 15.00$.
GIL BLAS. Early flowering; flowers salmon rose with a fire red blotch on primrose ground. Each 10c., doz. \$1.00.
GLORY. (Kunderd.) Color a delicate cream pink, each lower petal having an attractive crimson stripe through the center, each petal being ruffed and fluted. Each 20 c ., doz. $\$ 2.00$.
GOLDEN WEST. One of the best exhibition varieties on account of the variety of markings, the color being a clear orange scarlet, the lower petals striped and blotched with golden yellow faintly suffused with violet shadings. One can hardly imagine the effect until you have seen the Golden West Gladiolus. Each 50 c ., doz. $\$ 5.00$.
HARVARD. The largest and richest colored Gladiolus yet introduced. The color is a rich velvety maroon, slightly flushed dark scarlet; the flowers are truly gigantic; from 8 to 15 gigantic flowers and buds appear on one stem; 6 to 10 open flowers usually appear at thelsame time; flowers are open to their fullest size. Each 15c., doz. \$1.50,' 100 \$10.00.
Hohenstaufen. Pure white suffused soft pink, throat scarlet edged yellow. Each 25 c., doz. $\$ 2.50$.
INDEPENDENCE A brilliant rosy pink, throat richly marked. Long spikes on strong stems. Doz. 75c., $100 \$ 4.00$.
I. S. HENDRICKSON. A gigantic flower on immense spikes; color a beautiful and irregular mottling of white and bright deep pink, in some the pink and in others the white predominating. Each 20c., doz. \$2.00.
Jean Dieulafoy. Flowers creamy white, lower petals stained maroon. Each 20c., doz. $\$ 2.00,100 \$ 15.00$.
John Noble. Gigantic stem and flower of good form; delicate rose striped and flamed amaranth. Each 20c., doz. \$2.00.
KARL SPRANDEL. White with a delicate rose center shading carmine on lower petals. Extra large blooms. Each 50c.
Klondyke. Strong, vigorous plant, blooming early; flowers round, well opened, of a clear primrose yellow, with blotch of vivid crimson on three lower petals. Each 15c., doz. \$1.50, 100 \$10.00.
KONIGIN CHARLOTTE. White flamed rose with conspicuous large throat of blood red. Each 20c., doz. $\$ 2.00$.
Lafayette. Creamy blush, with rosy purple throat; set thickly on the stem; good size, 3 inches. Each 20c., doz. $\$ 2.00$.
La Gigantesque. Soft pink with large red blotch; extra large flowers. Each 10c., doz. \$1.00.
La Lorraine. Immense flowers of a very bright salmony red; blotch dark purplish red, strongly bordered with bright yellow. Each 20c., doz. \$2.00.
LAPAGERIA. Brilliant deep pink, shading to flesh toward center; an original form of flower resembling that of a Lapageria; a splendid novelty. Each 20c., doz. $\$ 2.00$.
La Superbe. Magnificent flower of rosy white. Each 10 c ., doz. $\$ 1.00,100 \$ 7.00$.
Liley. Giant flowers; color a combination of flesh pink intershaded with soft rose. Each 25 c., doz. $\$ 2.50$.
Mary Lemoine. Slender spikes, well expanded flowers; upper division of a pale creamy color, flushed salmon lilac, the lower division spotted violet and yellow; a very dainty sort. Each 5 c ., doz. 50 c ., $100 \$ 3.50$.
MAY. Lovely pure white flowers, finely flaked bright rosy crimson; strong spike; good forcing variety. Each 5c., doz. 50c., 100 \$3.75.
Meadowvale. One of the purest whites, without a shade of other color, except in the throat where there is a touch of vivid crimson; the three lower petals have a slight center marking of faint pink; stalk is strong and vigorous, with 10 to 12 flowers in bloom at once, and continuing in bloom a long time as the flowers open. Each 15 c ., doz. $\$ 1.50,100 \$ 10.00$.
MEPHISTOPHELES. Flowers of large size, dark red, stained with black and yellow; very attractive. Each 20c., doz. $\$ 2.00$ - 100 \$15.00.

MRS. BEECHER. Brilliant deep, rosy crimson. Large, wellopened flower, with white throat freely marked. Each 15c., doz. $\$ 1.50$.
MRS. FRANCIS KING. A new variety which excited great comment and admiration, both for size of flower and beauty; the color of the flower is a light scarlet; the flowers are very large, usually measuring from $31 / 2$ to 4 inches in diameter and are borne on long stems with from 4 to 6 flowers open at a time. Each 10c., doz. \$1.00, $100 \$ 6.00$.
MYRTLE. Delicate rose pink. One of the most beautiful soft pink colors of recent introduction. Flower extra size and fine form. Early flowering.
Negerfurst. Dark blood red, slightly flaked black; an improved Cracker-Jack. Each 50c., doz. $\$ 5.00$.
Nuee d'Orange. Very distinct variety with flowers almost entirely of slate color. A very pleasing color. Each 25 c., doz. $\$ 2.50$.
Octoroon. A beautiful salmon pink; very distinct. Each $10{ }^{\circ} \mathrm{c}$, doz. \$1.00, $100 \$ 6.00$.
Orion. Pinky rose, with dark botch, large flower; a splendid novelty. Each 10 c ., doz. $\$ 1.00,100 \$ 6.00$.

## GLADIOLI-Continued

MRS. FRANK PENDLETON, JR. It is without doubt one of the strongest growing varietics in existence, attaining a height from four to six fect. The foliagc is exceptionally broad and of a beautiful deep green color, adding immenscly to the characteristics of the plant. The flower stem, which is quite hard-wooded, serves to support the immense spike of flowers through heavy winds. This season we have particularly noticed that most of the bulbs, even the smaller ones, have thrown two cxcellent spikes of flowers, the second not being infcrior to the first. The Gladiolus, Mrs. Frank Pendleton, Jr., is the result of hybridizing the choicest of the large-flowering typc and is now practically a type of its own. We have received many highly complimentary remarks this season wherever it has been exhibited. During the coming Spring of 1913 we shall have the largest supply of bulbs to offer, while during the previous scasons our supply has been extremely limited. Each 60c., doz. \$6.00, $100 \$ 45.00$.
Patrie. Splendid spikc, long and strong stcm, with very large well opened flowers of deep rosc, suffused violet; center of petal straw color; white band in middle of upper petals. Each 25 c . doz. \$2.50.
Pacha. Magnificent flower of nasturtium orange shade, the throat of which is spotted red on a sulphur ground. Each 15 c ., doz. $\$ 1.50,100 \$ 10.00$.
PEACE. The flowers are a beautiful white, the infcrior petals feathered pale lilac; it is not an early bloomer, but if planted with other varieties will flower about the time they are finished. Each 50c., doz. \$5.00.
Philadelphia. Flowers of good size, on a spike often 6 feet high, dark pink, ends of petals slightly suffused with white. Each 20c., doz. $\$ 2.00,100 \$ 15.00$.
Pioneer. Long spike with Iarge, well expanded flowers of clear salmon rose; cherry red blotches edged with white. Each 20c., doz. \$2.50
President Roosevelt. Tall spike; Iarge flowers of cherry rose color with a crimson blotch on white ground. Each 25 c., doz. $\$ 2.50$.
Prince of Wales. Dark, fine red shaded wine color. Each 10c., doz. \$1.00, $100 \$ 7.00$.
PRINCESS SANDERSONI. Pure white, slightly penciled purple. Each 15c., doz. \$1.50, $100 \$ 12.00$.
PRINCEPS. Amaryllis-like Gladiolus. Color is a rich crimson, with very deep shading in the throat and broad blotches on the lower petals; the individual flowers are usually $51 / 2$ inches in diameter. Usually three flowers expand fully at one time, while the spike will produce from 12 to 15 flowers. Each 15 c ., doz. $\$ 1.50,100 \$ 12.00$.
Prof. Lemoinier. A grand Gladiolus, most beautiful soft scarlet deep yellow throat and maroon markings; a most pleasing effect; very striking; size of flower $41 / 2$ inches across. Each 20 c ., doz. $\$ 2.00,100 \$ 15.00$.
PROGRESSION. Large, broad expanded flower, fine soft red with dark velyet blotch; a grand new variety; the flower spikes are well set with flowers. Each 10c., doz. $\$ 1.00,100 \$ 7.00$.
PROPHETESSE. Large, round pearly white blooms with a conspicuous crimson throat; healthy grower, good multiplier and early bloomer. Each 15 c ., doz. $\$ 1.50,100 \$ 12.00$.
REINE BLANCHE. With the exception of a very smaII purple stripe at the base of the throat, the flower is of a glistening white color turning into blush toward the end of the flowering stage; no doubt the best white Gladiolus in existence. Each 25 c ., doz. $\$ 2.50$.
Rosamund. Light violet over a pale soft pink, blotch violet, shaded to carmine. Each 35 c ., doz. \$4.50.
ROSELLA. Large, well opened flower, light rose, stained purple and white. Each 20c.. doz. $\$ 2.00,100 \$ 15.00$.
Sans Pareil Most delicate salmon pink with pure white throat and blotches; the flower is of a round form and is attractively fluted; delicate in coloring. Each 25 c ., doz. $\$ 2.50$.
SCARSDALE. Tall grower, with large, pink lavender colored flowers, shaded to dark rose. Each 15 c ., doz. $\$ 1.50,100 \$ 12.00$.
SENATOR VOLLAND. Large flowers; pure blue, dark violet blotch with a yellow stain, striped blue. Each 15 c ., doz. $\$ 1.50$, 100 \$10.00.
SHAKESPEARE. Another standard sort, excellent for cutting, white slightly suffused rose. Each 10 c ., doz. $\$ 1.00,100 \$ 8.00$.
SILVERETTE. It has a rather peculiar or striking color that is very noticeable, growing in the field with other varieties. It is that beautiful blush color marbled or spotted with a slate color. The individual flowers are of large size, open full, making exceedingly attractive flowers for use in house decoration. Each 50c., doz. $\$ 5.00$.
SNOWBANK. Fine spike of well formed flowers, pure white, with the exception of slight stain of red at base of petals. Each 10c., doz. $\$ 1.00,100 \$ 8.00$.
Stromboli. Large, round and well expanded flower of the deepest scarlet; large, pure white blotch. Each 25c., doz, \$2.50,

GLADIOLUS, MRS. FRANCIS KING
Sulphur King. Beautiful clear sulphur yellow; the finest and purest yellow sort. Each 25 c ., doz. $\$ 2.50$.
Taconic. Bright lively pink, flecked and striped with shades of the same color, the petals lightening to the faintest blush in the throat; the markings on the lower petals are deep crimson running into a thin strip of pale lemon yellow; plant vigorous and flowers large. Each 20c., doz. \$2.00.
TITANIA. Very large, soft pink, crimson blotch. Each 25c., doz. $\$ 2.50$.
Torchlight. Large flower of fiery scarlet. Each 10 c ., doz. $\$ 1.00$, $100 \$ 7.00$
Triton. Very Iarge salmony red flowers, illuminated with white in throat and on the Iower petals. Each 25 c ., doz. $\$ 2.50$.
VICTORY. Color delicate sulphur yellow, lower petals shaded a decper yellow. Each 15 c ., doz. $\$ 1.50$.
Wilhelmina. Brilliant wine red, with yellow stripe in center. Each 10c., doz. $\$ 1.00,100 \$ 7.00$.
Wonder. Velvety deep amarath red, one of the darkest red Gladioli, large and wide opened flowers. Each 10c., doz. $\$ 1.00$, 100 \$7.00.

## DAHLIAS

Culture. If the old roots are carried over and it is the desire that they be planted, we would advise placing the clump either in ashes, moss or soil during the middle of April and have same thoroughly moistened; the sprouts will soon appear. Just as soon as they are noticeable it is well to divide the clump. The easiest way to do this is to make first one single division through the center of the main stem and crown. 'Then take the separated parts and divide them again in the same fashion.

Wherever a single tuber can be detached with a sprout attached, this should be done, and this by far makes the best plant for garden use.
Garden Dahlias do not require more than three feet of space between the plants. The roots should be laid horizontally, three inches below the surface. not to put any manure or fertilizer into the soil during the time of planting.

Plants should be treated with "Death to Cutworms" immediately they appear above the surface, to prevent the cutworm from doing any harm.

When the plants have attained a height of 18 to 20 inches a layer of thoroughly rotted stable manure may be placed around them, and this should be thoroughly watered every day.

## Free Delivery

Dahlia roots are delivered free to any post or express office in the United States at prices quoted herein.

CACTUS DAHLIA, ONWARD

CACTUS DAHLIA, DR. ROY APPLETON

## Delivery of Roots

Dry roots, either pot or field grown, are delivered about April 15; green plants, May 15.

In addition to the list that will follow on the next pages we issue a special Dahlia catalogue that contains a large list of varieties; also a more complete list of Gladioli.

## New Cactus Dahlias for 1913

195 America. A beautiful striped variety of Each large size and perfect form, with florets slightly incurved. The ground color is flesh pink or blush, regularly striped and speckled with carmine. The habit is good and the color constant.
$\$ 2.00$
1250 Dr. Roy Appleton. Just as in the variety Onward, we have the most advanced of the incurved section. In this lovely variety we have the finest of the straight petal flowers, the form being perfectly star-like. It is of the largest size, the florets standing out like a circular array of spears or, as one report puts it, as if worked up geometrically, while the center is a picture of perfection. The color is beautiful, a light lemon yellow slowly changing and deepening to light salmon till near the tips, which again assume the basal color. Habit good; stems long and under ordinarily good cultivation every flower fit for exhibition

## CACTUS DAHLIAS-Continued

1260 Duckie. The entire plant is distinct Each the flowers of a rich cream color, each petal suffused delicate pink; foliage is short, thick and very lustrous; flowers possess very great substance, are fairly large and extremely double, and belong to the Cactus Hybrid class.
$\$ 0.75$
2610 Irresistible. A variety which boasts this name should be of great size and possess other good points, and Irresistible can claim all. The plants are exceptionally hard wooded and the flower stems are equally strong, carrying huge flowers of the most incurved and interlaced form; some of the first blooms are enormous. It is advisable to make the plants break low down and carry up as much young growth as possible. The color is yellow suffused rose, a band of rose color running up each side of the floret..
3070 Leonard B. Gifford. A fine Cactus Hybrid shaped flower perfect in form; pure white, each petal most evenly ribbed soft crimson. A splendid fancy Cactus and very effective.
3180 Lucy. A vigorous growing plant; very free flowering. The flowers are immense; color a beautiful amber shading to sulphur yellow.

CACTUS DAHLIA, WHITE ENSIGN

CACTUS DAHLIA, THE EARL
3945 Mrs. Forrester Paton. Each Brilliant crimson-scarlet flowers freely produced well above the foliage. A truly magnificent garden variety.. $\$$
4355 Onward. A variety of absolutely unique formation, the florets being very narrow and so incurved, twisted and interlaced as to form an almost globular flower. The color is pink throughout but of different shades gradually from tips to base. Very few if any introductions have attracted so much attention, both from experts and general public, when exhibited at the National Dahlia shows. The plants should be induced to branch early, and all the buds may be left to flower.
5408 The Earl. Introduced chiefly as an exhibition Dahlia, for which purpose it is one of the best of the year. Color rich ruby crimson throughout; plants of medium height, sturdy and upright in habit.
5720 White Ensign. A typical garden Cactus. The plants when young are of an exceptionally dwarf, sturdy nature and later produce just sufficient side growth to make capital bushes, needing neither thinning nor disbudding. Flowers are of medium size; compact and lasting substance. The name indicates the color; a useful addition..

DAHLIA, CESAR

New Peony-Flowered Dahlias for 1913
20255 Burne-Jones. Pink suffus- Each
ed heliotrope; very fine........ $\$ 0.50$
20601 Cæcilia. Creamy white; very large. Awarded first class certificate

## New Decorative Dahlias for 1913

## Each

6120 Autumn Tints. This is in no sense an exhibition Dahlia, the blooms being of a large size and almost globular form with only slightly twisted florets. As a Decorative variety, however, it is a great success, its dark rich bronze coloring making it doubly attractive. The plants are dwarf, with very swarthy foliage and black, wiry flower stems
6370 Etoile de la Pape. A beautiful chestnut brown; a very odd shade....
6610 Hortulanus Witte. A pure white Decorative Dahlia. Flowers very large
6850 Le Triomphe. Pale yellow, tipped heliotrope; very distinct and pretty..
7340 Mrs. Fleers. A perfection of colors red and rose; exceedingly attractive. Awarded first class certificate..

7572 Princess Juliana. Queen of the Dahlias. Pure white, well formed flowers, long stems. The very best for decorative work. Award of merit.
. $\$ 0.75$

DAHLIA, AUTUMN TINTS

## DAHLIAS

Our list has increased to such an extent that we do not have suflicient room for our entire list in this catalogue and we have selected only the most prominent varieties under each heading, in addition to the new introductions shown on the three previous pages.

Dahlias this season were exceptionally fine and produced an abundance not only of flowers but also of roots well ripened. We have on land this season sufficient supply in first class condition to fill all orders with either field grown or pot grown roots. No plants will be sent out this year unless it be very late in the season and then only in novelties.

We are anxious for all who are interested in Dahlias to send for our special Dahlia catalogue. Here we have nearly our eutire list with descriptions and well illustrated. Also we have Gladioli; these are a specialty with us and we have one of the largest collections in this country. We want you to receive this Special Dalılia and Gladioli Catalogue. Sent on application.

## Cactus Dahlias

We make a special offer of the Fiftytwo varieties, listed here with names, for $\$ 15.00$.
Our selection of 25 varieties for $\$ 8.00$.

MRS. CLINTON

Cactus Dahlias, General Collection Each
90 ALEXANDER. A grand dark crimson flower flushed with maroon petals of the finest quality, perfect center and splendid habit of growth
. 0.20
160 AMAZON. Very large flowers of perfect form; purple violet.
220 Amos Perry. Bright scarlet fiowers on long stems carried away above the foliage; very free.
410 Aurora. One of the best Dahlias for exhibition; colossal in size; elegant in form; perfect in type and of the most exquisite coloring; attractive soft pink, slightly tipped white, the heart of the flower brilliant golden.
610 Blush Queen. The flower has a splendid new combination of colors, clear bright rosy pink with a creamy white center; carried on long upright stems well above the foliage.
620 Blutenregen. The name implies a shower of bloom. This is true; quite early it begins to throw up a multitude of purplish red blooms and simply exhausts itself in blooming, but not before frost appears.
640 Brautjungfer. For a delicate coloring nothing has yet been seen to equal this variety. The entire flower is a delicate blush pink, fairly large and extremely full and double.
655 Brigadier. Rich crimson scarlet, long petals beautifully incurved, early and free.
790 Charters Mathers. A splendid Dahlia of medium dwarf growth but bearing flowers of enormous size and of most refined type; soft yellow, shaded orange. This is a gem and should be in every garden.

MASTER CARL

## CACTUS DAHLIAS-Continued

No.
60 Clincher. Gigantic Cactus of great depth and immense volumes of petals, outer petals heliotrope, gradually lightening to white in the center. A splendid exhibition flower.. $\$ 0.50$
1000 Countess of Lonsdale. For perfection of bloom, size and erectness of stem, abundance of flowers and general use as a garden flower, although quite old, this variety has never been equaled. On several plants we have counted 150 perfect blooms at one time. Is there any other garden flower that can equal it? The color is a rich salmon tinted apricot.
1100 DAS MARCHEN. Exquisite pink with greenish yellow at the center; petals rather broad and thick; makes a splendid cut flower.
1130 DEIICATA. A distinct form of flower, saucer-shaped; the petals run the same width almost to the tip; color a most delicate blush.
1135 Delicatissima. One of the most delicate colored flowers in existence; the blooms are perfect and are borne on extra long stems with but little foliage attached. This will undoubtedly be one of the future Dahlias for cut flowers. Color a dainty apple blossom pink.
1420 EMPRESS OF AUSTRIA. Brilliant rich crimson maroon; very large exhibition flower with elegant fluted petals.
1600 FAIRY. A pure white; very narrow in florets; beautiful form, most refined
1660 F. G. CHAPMAN. A lovely blending of colors, yellow shaded with deep orange; very effective.
1710 FIIEDER A very large perfect flower with an entirely new shade of soft lilac
2070 GOLDEASAN. A beautifully formed Cactus; petals arranged in perfect form; color a beautiful light apricot.
2180 GRENADIER. Extremely free blooming plants; are dwarf and compact and do not require staking; color orange pink with a faint suspicion of bluish shading to the tips of the petals.

No.
2230 HARBOR IIGHT. Color vivid orange red shading off to flame at the points. Very striking, free and distinct.
2245 HARMONIE. Extremely free blooming on stout, long stems; color reddish salmon with lighter tips and yellow center.
2270 HARZERKIND. Height 24 inches; a real gem for effect; plants when fully developed appear like huge balls competely enveloped by the pink flowers which appear incessantly from early until late; a rare surprise..
2480 F. Shoesmith. Crimson scarlet; one of the narrowest petaled flowers; very free and center always good.
2670 J. B. RIDING. A fine exhibition variety the petals are very long, narrow full and beautiful, incurved, forming a flower of the highest quality; color is a rich yellow at base of petals, shading to deep orange tinted apricot.
2750. J. H. JACKSON. The finest dark Cactus Dahlia, brilliant crimson maroon, perfect flowers with long narrow pointed florets; early and free bloomer.........................
3030 IAURETTA. Yellow ground deeply edged rose; quite distinct in color; fine habit.
3040 IAVERSTOCK BEAUTY. Soft Vermilion scarlet.
3050 IAWINE. A rare surprise. The loosely formed flowers of great size completely hide the foliage of the entire plant, giving it the appearance of a pile of snow. Color pure white.
70 IOVELY EYNSFORD. Lovely amber colored; a distinct and striking color, very bright and effective
3570 MASTER CARI. A gigantic Dahlia of perfect form and bright amber color. This is one of the finest Dahlias in our collection, immense petals of graceful curve...........
3605 Mauve Queen. A distinct and beautiful variety; color a lovely clear mauve with lighter center; fine exhibition flower. Each 35 c .

## CACTUS DAHLIAS-Continued

No.
3790 MONT BLANC. A truly magnificent pure white Cactus Dahlia, without even the faintest tinge of green and of most perfect form. The petals are long, narrow and slightly incurved; altogether of exquisite beauty, early and free... $\$ 0.35$
3870 MRS. CLINTON. In certain ways the best Cactus Dahlia. Large perfect blooms appear during the entire season, of ten 25 on one bush at once. Everybody fell in love with it when discovered at our farm. Deep orange yellow at base of petals shading off to pale salmon red at points.
3900 MRS. DE LUCCA. Remarkably free blooming variety; color rich shading of yellow and orange, a lovely blending of tints.
3940 MRS. F. GRINSTED. Deep rich crimson with just a suspicion of purplish shading; form of flower of the best incurved type.
3955 MRS. J. EMBERSON. Pale lemon, speckled rosy pink; the large blooms are incurved and made up of twisted florets.
4050 MRS. J. P. MACE. The most beautiful Dahlia for cutting; the best and finest shaped blush pink variety. Its color is so delicate and pleasing that it must be seen to be appreciated.
4140 MRS. STRANACH GASKILI. Lovely rose pink with white reflex; a large and magnificent flower....ach

4145 Mrs. Walter Baxter. A grand variety; it is large, early and very free blooming, color shaded crimson............................
4385 Othello. Extremely early and free flowering; are borne on straight dark colored stems far above the foliage; color deep blood red, similar to Empress of Austria.
4440 Phineas. Crimson scarlet, the base of the petals shaded orange; a large, bold flower with long brilliant petals; fine habit.
4600 PUCK. Height 20 inches; brilliant orange scarlet.
4760 Rev. Arthur Bridge. A grand exhibition flower producing its flowers on erect stems; coloring very beautiful, being bright yellow, heavily tipped with deep rose pink.
4860 ROSEA SUPERBA. One of the very best Cactus for cutting. The massive flowers are borne in great profusion, a single flower on a stiff erect stem; flowers are quite large, perfect and of a lovely shade of rose color.
5010 SCHONE ELSE. A magnificent variety for cutting or garden decoration, bearing flowers on extremely long stems; blooms are perfect, pure white with a slight tinge of lavender rose.
5030 Schwan. Free blooming, pure white Cactus Dahlia. The giant flowers are of glistening white and by their narrow twisted petals have an elegance which has not been approached by any other variety. Flowers appear quite early and continue in such profusion that the foliage is almost hidden with the blooms. Stems, averaging 15 inches long, carry the blooms far above the foliage.
5100 T. G. Baker. The finest yellow Cactus for the exhibition table; narrow, long incurved petals form a perfect flower which is sublime; flowers often measure 7 inches across; color clear yellow.
5535 Undine. Soft lilac pink, lightening almost to white toward the center; of dwarf growth.
5620 Vivid. Bright orange scarlet; very effective.
5310 WM. MARSHATL. A great exhibition sort; flowers of gigantic dimensions; color rich orange with bright yellow toward the center.
\$0.35

## Decorative Dahlias

Under this heading we class the varieties that do not belong in the Cactus or Show class but have an individuality of their own.

We offer this collection of fifteen varieties for $\$ 4.50$, delivered to your express or post office.

For other varieties send for our special Dahlia catalogue.
perfect pure white flowers are borne in great profusion on most erect stout stems fully 18 inches long all above the foliage. No matter how much you cut it, it is hard to find the plant without flowers. For landscape work or general garden use this variety is especially useful planted into the shrub border or even into lawns by themselves; they succeed splendidly and make an effect which cannot be duplicated with any other flower. . $\$ 0.35$

6800 Ia France. Brilliant rose pink, similar to the Rose of the same name. Flowers are gigantic, loosely built and resemble in shape a large double Peony; excellent for exhibition.
6900 Mme. A. Iumiere. Unique coloring, pure white, violet red points; a fine contrast of colors; very distinct
7020 MME. VAN DEN DABL. True stock. White, flushed lively pink; a loosely formed flower of elegance 7400 MRS ROOSEVELTM. A most beautiful flower. It is of immense size, fine color; graceful form and has excellent stems for cuttings. Blooms are perfectly double; 6 to 8 in. diameter, and of a most delicate pink. 7707 Semiramis. Immense flowers; pink of the Cattleya orchids, suffused with yellow.
7740 SOUVENIR DE GUSTMAV DOAZON. The largest Dahlia up to date, 9 to 10 inches across; a monster. These immense flowers are borne in profusion from the earliest of blooming until frost; it improves with the season and grows more perfect; color a rich shade of scarlet.
7910 Yellow Colosse. Although it bears the name of Colosse it has very little similarity to this flower, but it is the best exhibition yellow now in existence; the flowers come very perfect on long stems.........

## Each

KAISERIN AUGUSTA VICTORIA
6100 AUGUSTE NONIN. Clear scarlet; a large and superb flower, borne abundantly always above the foliage; blooms always perfect.. $\$ 0.20$
6200 CAMEILIA. A dwarf bushy plant attaining a height of $21 / 2$ feet with small but prolific foliage and myriads of medium sized perfect flowers of a coppery orange. The shape of the flower is just like a Camellia and lasts well when cut..
6290 DEIICE. The finest pink colored Dahlia, excellent in form, perfect in type, superb yet delicate in coloring, it must appeal to every lover of flowers. Color bright pink, suffused lavender pink.
6460 Fire King. Fiery scarlet; rather small flowering.
6470 FLORA. One of the most refined fowers. The pure glistening white is not disturbed by the least suggestion of green; the flowers are always perfect, borne on extremely long, erect stems and literally cover the plant over its entire surface...
6540 GIGANTEA. Its name suggests the size; truly gigantic and massive in form; the individual petals are short and it requires many to form such a monstrous flower; color a soft sulphur yellow, distinct and attractive.
6650 JEANNE CHARMET. One of the finest Decorative Dahlias, a seedling of Mme. Van den Dael. The flowers measure 8 inches across and are borne on stiff, wiry stems, of ten 18 inches long. The exquisite flowers are pink at the edges, pure white toward the center and light yellow at the margin..
6750 KAISERIN AUGUSTA VICTORIA. One of the most valuable Dahlias we have. We have thoroughly tried this variety and know what it is. It is particularly valuable for several reasons. It grows about 30 inches high and does not require any support. The immense

## Peony-Flowered Dahlias, General Collection

## Peony-Flowered Dahlias with Cactus Petals

These are quite different in appearance, and for decorative purposes more beautiful and graceful than any of the other Dahlias. The beauty of these flowers can only be appreciated when seen, and may easily be classed with Orchids for their fastastic shapes and colors.

We offer the following collection of Peony-Flowered Dahlias, twenty varieties with names, by express or mail, delivered, for \$7.00.

For other varieties send for our special Dahlia catalogue, mailed on application.

NaCh
20210 BARON G. DE GRANCY. Creamy white; some flowers come single all incurved or cup-shaped. This variety has a slight fragrance.
20230 BERTHA VON SUTTNER. In form similar to H. Hornsveld. An elegant twisted flower; immense flowers always carried erect; color beautiful salmon shaded yellow. Height 4 ft .
0300 COL. J. ST. GEO. WOLSELEY. Rosy lilac with points of petals almost white, a pleasing color
20440 DUKE HENRY. Dark crimson, petals twisted; good long stems.
20710 GEISHA. A veritable sensation among flowers, its form is most original, the petals showing more twists and curls than any other sort; the first flowers come fully double, white only; those that follow show the beautiful golden center which with this flower is most charming. The color combination is remarkable and attracts everybody; orange scarlet with yellow center paling off toward the tips.
2720 GERMANIA. Wine color, dark velvety crimson, shaded with yellow.

20740 GLORY OF BAARN. Delicate soft pink; very free and carried erect......................... 20820 F. HORNSVELD. A beautifully formed flower of immense dimensions, having but one fault, that is, the flower is heavier than the stem can support; plant is dwarf; color clear, soft salmon
20850 HUGO DE VRIES. Orange brown flowers of loose formation
20810 Hollandia. Beautiful soft rose; very large flowers; free blooming. . . . . . . . . . . . . . . . 21000 KING LEOPOLD. Cream yellow shading to white; flowers carried erect on long stems. 21280 Mannheim. Soft orange red; fine form on long, strong stems.
21310 MERVEILLE. Orange yellow of a distinct shade. 370 Miss Gladys Dawson. Sof yellow rose; 21370 Miss Gladys Dawson. Soft yellow rose; very free and erect. ................................. Peony Dahlia of giant size; color a deep carmine toward the outside; gradually but irregularly changing to a soft pink in the center, resembling the Orchid "Cattleya.".
21850 QUEEN AUGUSTA VICTORIA. A whitish yellow, resembling the rose of the same name; a very pretty flower.............. 21860 QUEEN EMMA. Soft lavender pink of refined form and good keeper.
21870 QUEEN WILHELMINA. The most satisfactory pure white flower; the petals are elegantly twisted and are of glistening white. The plant is extremely free blooming and makes a splendid companion for "la Riante" as a hedge plant.
23300 RHEINGAU. A large showy brilliant scarlet.
23050 RIESEN EDELWEISS. Cactus petals of enormous length, curving inward at tins and of the purest white, in combination with the yellow center make this flower appear like a gigantic Edelweiss, hence its name. Splendid for garden decoration or cutting......

## Show and Fancy Dahlias

We offer the entire collection of Show Dahlias, forty-one varieties, for $\$ 9.00$, delivered, express or postpaid.

We have a much extended list in our special Dahlia catalogue. Sent on application.

8600 ACQUISITION. Rich royal deep mauve.
A splendid exhibition flower.
yellow. ARABEXA. Sulphur, tipped pinkish white.
8780 Chas. Ianier. Free blooming sort of a dull yellow; the flowers are borne on stems exceeding 3 feet.
8820 CUBAN GIANT. An immense ball of bright maroon; free and early.
9035 FASCINATION. Lavender pink, striped white
9070 FRANX SMITH. Deep maroon, tips of petals pinkish white
9080 FREDERICK SMITH. Lilac striped purple. 9140 GOLD MEDAI. Bright canary yellow, regularly marked with fine stripes and flashes of deep red.
9200 Governor Guild. The largest and purest white Show Dahlia. The color is the most snowy white without even the least trace of any other shade. The flower is perfect in shape, full and round, built loosely of most exquisitely fluted petals, giving the flower a far more graceful appearance than Show Dahlias usually have. The spread of the flower is 5 inches; they are borne on long, erect stems and appear far above the foliage.
9220 GRACCHUS. Bright orange buff, good outline
9230 GRAND DUKE ATEXIS. A popular Dahlia; color white, fringed soft lavender near the tips, petals quilled.
9490 Iottie Eckford. White striped purple.............................. 9500 IUCY FAWCETT. Pale yellow, striped lilac.
9640 MERLIN. Bright orange scarlet; deep bold flower.
9645 METEOR. Bright red, very large blooms. 9760 Mr. Chamberlain. Rich deep maroon of perfect form.

9850 Mrs. Kendal. White, heavily edged
 crimson Lavalaz. Cream, edged 9940 NORMA: Bright orange buff, very ${ }_{0}$ free. NGGGET.. Orange, tipped scarlet. Fine exhibition flower
9960 ORATOR. Salmon buff.

10030 QUEEN VICTOXIA, Canary yellow; plants grow tall.
ach

10060 ROBTN ADAT… Soft terran
10080 ROBERT BLOOMFIELD. Pure white.

10110 Rose Bright rose; an immense, heavy flower, extra choice............ 10225 STANDARD. Dark chocolate, high center; extra large flowers............. 10230 STRADEI工A. Color deep purple crimson and quite loosely arranged with deep cup shaped petals; the flowers are perfectly round when in full bloom, borne on long stems away above the foliage.
10240 STORM KING. Pure white; very fine. 10245 susan. A beautiful soft shell pink of splendid form; remarkably early and free with long stems; splendid for cutting.
 very fine form
10280 WHITE QUEEN. Is a very strong grower of medium size; very free; of a pure white with often a soft lilac flower on the same plants, making it very pretty.
10282 WHITE SWAN. Pearly white............... 10285 WM. NEATE. Soft reddish fawn very fine. 7900 W. W. Rawson. The popularity which this novelty has acquired in this short time speaks in itself for the superior features of this flower. The massive, perfect and graceful flowers are borne on stiff, erect stems. The petals toward the center are quilled like the "Grand Duke Alexis"; toward the outer part they are more open and flat. The entire fower is absolutely perfect in outline and formation. The color is pure white, overlaid amethyst blue; this wonderful combination gives it the appearance of a delicate lavender
10330 Yellow Duke. A splendid primrose yellow of good form.
10340 Yellow Livoni. The most perfectly quilled Dahlia grown; flowers of medium size but perfect; color a soft lemon yellow.

GOVERNOB GUILD

## Pompon Dahlias

DWARF MIGNON

## Hardy Perpetual Roses

We have growing at the Nursery a very large variety of Roses. There are many, however, that grow in this climate better than others. Our list is a selection from the more satisfactory varieties. If we have not listed the variety you are looking for, write us.

Price: 1st size, selected roots, each 35c., doz. $\$ 4.00,100 \$ 30.00$; pot-grown, each 75 c ., doz. \$8.00.

## Brief Directions for Planting Roses

When to plant. Dormant plants set in the Spring: should be planted early as possible.

Location. Roses should be planted in an open, sunny place.

Soil. Roses grow well in any rich soil. A liberal amount of manure and good cultivation will improve both bloom and fragrance.

Planting. Plant budded Roses three inches below the bud, press earth tightly down on the roots; water well after planting; mulch with coarse strawy manure.

Pruning. All Roses should be more or less pruned when planted. When pruning older plants, which should be done moderately, the operation should be performed during March.

Protection. All Hybrid Roses give better results if protected in Winter. The use of coarse manure, litter or evergreen boughs will accomplish the purpose. It should be removed in early Spring.
ALFRED COLOMB. Rich red, very large and globular, free-blooming and fragrant.
AMERICAN BEAUTY. Deep rose, very large, globular form; bad opener in dull weather.
BARON DE BONSTETTEN. Velvety maroon, shaded with deep crimson.
BARONESS ROTHSCHILD. Very beautiful pale rose; superb form; splendid foliage. One of the handsomest popular Roses. Excellent late variety.
CAPTAIN HAYWARD. Scarlet-crimson; long, smooth petals; good form, large, sweet-scented.
CLIO. Flesh color, shaded in the center with rosy pink; large and of fine form.
DUKE OF EDINBURGF. Very bright vermilion, extra large and full.
EARL OF DUFFERIN. Rich velvety crimson, shaded with maroon; large, finely-shaped flower.
FISHER HOLMES. Magnificent scarlet, shaded with deep velvety maroon; brilliant and large.
FRAU KARL DRUSCHKI. Undoubtedly the finest pure white Rose in existence. Color a pure snow-white, very long buds, shell-shaped petals opening to vory large flowers. A continuous and exceedingly free bloomer.
GENERAL JACQUEMINOT. Too well known to require lengthy description. It still holds first place among the dark red Roses, and is one of the most satisfactory to grow.
HUGH DICKSON. A new hybrid perpetual of the highest order. Awarded gold medal by the National Rose Society. Flowers are large, full and perpetual; color brilliant crimson, shaded with scarlet.
JOHN HOPPER. A distinct variety of very easy culture. Color is a bright rose, the reverse of the petals being pale lilac. Very large and double.
LOUIS VAN HOUTTE. Deep crimson, shaded maroon, vivid and distinct; large, full-formed leaf.
MAGNA CHARTA. A general favorite, prized on account of its strong, upright growth and bright. healthy foliage, as well as for its magnificent bloom. Color bright pink.
MARGARET DICKSON. A Lagnificent Rose; white, with pale, flesh center; petals very large. shell-shaped and of very great substance; fragrant.

ROSE, FRAU KARL DRUSCHKI
MERVEILLE DE LYON. A beautiful white variety, with center slightly tinted a rosy peach. A grand full cup-shaped flower.
MME. GABRIEL LUIZET. Light silvery pink; grand flower; free-bloomer; fragrant; hardy plant. One of the best.
MME. PLANTIER. Pure white; early Summer bloomer.
MRS. JOHN LAING. Soft pink; large; fine form; a good grower; abundant bloomer late in season.
MRS. R. G. SHARMAN-CRAWFORD. Clear rosy pink, the outer petals shaded with pale flesh. Very free-flowering, and one of the best.
M. P. WILDER. Of vigorous growth with healthy foliage; flowers large, semi-globular, full, well formed; cherry carmine; very fragrant. It continues to bloom long after the other hybrids.
PAUL NEYRON. The largest-flowered in cultivation, and one of the most prolific bloomers; color deep, clear rose; very fresh and attractive.
PRINCE CAMILLE DE ROHAN. Deep velvety crimson-maroon, full and of superb form. Generally considered to be the best of the dark Roses.
SOLEIL D'OR (Golden Sun). An entirely distinct type of Rose-a cross between Persian Yellow and Antoine Ducher. It is perfectly hardy, with large, full, globular flowers, varying in color from gold and orange to reddish gold.
ULRICH BRUNNER. Cherry-crimson; large size; fine form; effective in the garden or for exhibition; a good forcing Rose; semi-double; it blooms early and continuously.
YORK and LANCASTER. The old and much sought for semi-double red Rose, striped with white. A lovely and unique Rose.

## Hardy Hybrid Tea Roses

Although of recent creation this class is now extremely popular with the general garden public. There is much to be said in its favor; above all, its tendency to bloom continuously from early until late. We find these Roses absolutely hardy in the New England climate and can recommend them with the utmost confidence. The plants we offer were grown in the northern part of England, are two years old, selected for size and form, enabling us to furnish these Roses pot grown during the Summer.

All varieties offered below in extra-strong 2-yearold plants :

Field-grown, each 40c., doz. \$4.50; potgrown, each 75 c ., doz. $\$ 8.00$, except where otherwise mentioned.

Bessie Brown. White, flushed with flesh pink.
Capt. Christy. Delicate, fleshy white, with darker center; very large and full.
CAROLINE TESTOUT. Bright satin rose with brighter center; large, full and globular; very free and sweet.
Dean Hole. Silvery carmine, shaded salmon; absolutely distinct and by far the finest in its way of color. Very free, flowers large, and fine form.

## Duchess of Westminster $\underset{\text { with }}{\substack{\text { A } \\ \text { peerless } \\ \text { beautifully }}}$

 smooth and massive petals. The bloo large, full and perfectly formed, with high pointed center; very fragrant. Color, which is very novel, is a dainty clear rose madder. Each $\$ 1.00$.Edward Mawley A beautiful rich crimson, delightful velvety gloss on the petals, which are large, forming a good sized flower with high globular center. The growth is strong and the flowers are borne in profusion. Each $\$ 2.00$.
Etoile de France. Velvety crimson, center red cerise; fine long bud; free-flowering.
Farben Konigin. Deep carmine rose, reflex and brilliant pink petals.
Franz Deegen. Pale yellow, shading to goldenyellow in the center. Medium size and fragrant.
Gruss an Teplitz. One of the very best Roses for the garden. Bright crimson, with fiery red center; cup-shaped, semi-double flowers in clusters.
J. B. Clark. Intense deep scarlet, heavily shaded blackish crimson; foliage large, bronzy green in the young stage; flowers very double.
Juliet
(Pernetiana). This beautiful Rose when better known is certain to become very popular. It is very distinct and attractive, with large perfect flowers. The outside of the petals are old gold and inside a rich rosy red changing to deep rose as the flowers expand; very fragrant. Each $\$ 1.00$.
KAISERIN AUGUSTA VICTORIA. A distinct and very beautiful variety. Cream, slightly shaded lemon, deeper in the center; very fragrant.
Killarney. A lovely variety of great merit. Flesh shaded white, suffused pale pink; long, pointed buds, opening to large flowers.
Killarney White. Equal in every way to the Rose Killarney; pure white; very productive; constant bloomer. Each 75c., (doz. \$8.00.
Konigin Carola. A sandy rose color, reverse of petals silvery white, buds long and pointed.
Lady Ashtown. Very pale rose, shading to yellow at base of petals; large, full and pointed.
La France. In this class the beautiful flowers are produced constantly and the plant is more hardy than the perpetuals; soft silvery pink.
Liberty. Brilliant velvety crimson, finely-formed flowers of excellent size and substance. Very freeflowering and one of the best for cutting.

Lieutenant Chaure Vigorous, upright branching habit, fine Iong bud, opening to flowers of great depth, fairly full and of nice cupped form. Color velvety crimson-red shaded with garnet. Each \$1.00,
Mildred Grant. Petals silvery-white, edged with rosy-pink; very large size and of good substance.
Mme. Abel Chatenay. Carmine rose, shaded deep salmon; long pointed buds.
Mrs. E. J. Holland The color is a beautiful deep salmon Rose shaded lighter toward the edges, perfect in both shape and form, with an unusually high pointed center.
Perle von Gettysburg. A light yellow; sport of Kaiserin Augusta Victoria.
Pharisaer. Petals rosy-white, shading to a deep salmon-rose in the center; fine, long buds with very large flowers.
Prince de Bulgarie. Deep rosy flesh, shaded with salmon; flowers very large and full.
Rhea Reid. Color varying from rose cerise to rich crimson red; large-flowered. Each 60c., doz. \$6.00.
Richmond. Pure red-scarlet; of free-growing and flowering habit; one of the best deep red Roses; immense flower of exquisite form.
Sunburst This magnificent giant yellow Rose stands head and shoulders above all others of its color and will rank with the American Beauty and the Killarneys in value and grandeur. The color is orange copper or golden orange and golden yellow, edge of petals lighter; all intense shades extremely brilliant in effect. Each $\$ 1.00$.
THE "LYON." A very vigorous Rose somewhat spreading in habit, with prominent thorns, excellent foliage of a rich reddish green. Flowers large and full with broad petals; coloring superb, coral-red or salmon-pink shaded with chrome-yellow in the center; very fragrant.
Viscountess Enfield Color is bright golden pink, outside petals carmine, center shaded yellow; large, full, elongated bud; very vigorous and of good form.
Viscountess Folkestone. One of the most attractive of the Hybrid Teas; creamy pink, with salmonpink center. Large, very free-flowering and early.

WHITE MAMAN COCHET

R. spinosissima (The Scotch Rose). A low shrub with upright branches covered with spines. Leaves bright green, small. Flowers very numerous along the branches, pink-white or creamy-white; fruit black. Each 50c., doz. $\$ 5.00$.

## Rugosa Roses and Hybrids

For massing or hedge planting, the Rugosas cannot be excelled. The hybrids are attractive in the garden. Rosa rugosa. An upright shrub attaining 5 to 6 feet in height; foliage shining dark green; not attacked by insects; flowers single, red, fragrant and produced freely from June to December; fruit bright crimson. Each 35c., doz. $\$ 3.50$.
R. alba. The habit and foliage are similar to the above, but the flowers are pure white; fragrant.
R. Conradi Ferdinand Meyer. It is a strong, robust grower. The flower is clear silvery rose, very large and double; delightfully fragrant. 'Each 50 c ., doz. $\$ 4.50$.
R. alba Mme. Georges Bruant. This is a very free-blooming white variety; a strong grower and blooms continuously; flowers, semi-double. Each 50 c ., doz. $\$ 4.50$.

Agnes Emily Carman Flowers in clusters: brilliant crimson, of the shade of General Jacqueminot; very free blooming and continuing in bloom nearly all Summer; a rampant grower, handsome foliage, and very hardy. Each 50c.
Lady Duncan (Trailing Rosa rugosa). the well-known Rosa Wichuraiana ind Rosa It has the foliage and blossom of the latter and the vigorous growth and habit of the former. Each $7 \overline{5} \mathrm{c}$. Roseraie de l'Hay A new hybrid Rugosa of too highly: a good grower. flowers very speak color carmine-cherry-red; it is a free bloomer and exquisitely scented. A most desirable acquisition. Each 7 c c.
New Century Cross between everblooming rose Clothilde Soupert and Rugosa alba. Very hardy and a continuous bloomer. Color a bright rosy pink with bright red center. Petals bordered with a creamy white. Each $\$ 1.00$.
Sir Thomas Lipton A new double white Rugosa. Each 50c.

## Austrian Briar Roses

Austrian Copper. Coppery red; single.
Austrian Yellow. Pure yellow; large single.
Persian Yellow. Fine golden-yellow; semi-double.
Harrisoni. Brilliant yellow; double.
Soleil d'Or. One of the finest hardy yellow Roses. Color orange-yellow, shading to old gold.
Price of the above varieties, each 35c., doz. \$3.50.

## China and Cabbage Roses

Common Bush. Pink; most popular bloomer.
Hermosa. Beautiful soft pink; one of the oldest.
Queen Mab. Soft rosy apricot, shaded orange.
The Old Cabbage Rose. Rose color; very fragrant.
Maiden's Blush (Cabbage Rose). White, shaded pale flesh.
Price of the above varieties, each 35 c ., doz. \$3.50.

## Old-Fashioned Moss Roses

These are grown mostly for their beautiful mossy buds. They require close pruning and high culture. Strong two-year plants, each 35c., doz. \$3.50. Blanche Moreau. Pure white, large, full.
Crested Moss. Deep pink, buds surrounded with mossy fringe and crest.
Henry Martin. Fine rosy-red.
Salet. Light rose, large, full. The best of the class.

## English Hybrid Sweet Briars

Like their parent, the common Sweet Briar, the foliage is deliciously scented. The flowers are single and of beautiful tints.
Strong two-year plants, each 35 c ., doz. \$3.50.
Amy Robsart. Lovely deep rose.
Anne of Geierstein. Dark crimson.
Flora McIvor. Pure white blush rose
Belle Poitevine. Deep rose color. Flowers semidouble.
Meg Merrilies. Crimson.
Rose Bradwardine. Beautiful clear rose.

## Roses in Pots for Late Planting

We have a general assortment of Hybrid Perpetual, Hybrid Tea, and Climbing Roses established in 5 and 6 inch pots for planting out during June and July. Strong Blooming plants, ea. 75c., doz. $\$ 8$.

CLIMBING ROSES

## Wichuraiana Roses

Each 35 c., doz. \$3.00.
For covering banks and rocky slopes these Roses will be found valuable. Foliage glossy green, rarely attacked by disease or insects.

Evergreen Gem. Flowers buff, changing to creamy white, very double; foliage dense, of rich, bronzy green.
Gardenia. A vigorous grower; bud bright yellow, opening cream color.
Manda's Triumph. Double white flowers, produced in clusters; sweet scented.
Pink Roamer. Single, bright pink.
Universal Favorite. Fiowers very double, of pretty rose color.
South Orange Perfection. Soft blush-pink.

## Baby Ramblers, Dwarf Bedding Roses

A type of Rose which is becoming very popular for bedding purposes. They form shapely, compact, bushy specimens about 18 inches high, producing in great profusion, from early in the season until severe frost, immense trusses of small flowers.
Baby Dorothy. Nothing can surpasss its beauty in a deep pink shade. It has all the flowering qualities of the famous Dorothy Perkins, but being dwarf, it is completely smothered in flowers throughout the Summer and Fall. Strong fieldgrown plants, each 50c.
Crimson Baby Rambler (Mme. Norbert Levavasseur). Crimson flowers similar to the popular climbing Crimson Rambler. Strong two-year plants, each 50 c .
Mrs. Wm. H. Cutbush. A beautiful cherry-pink and very free flowering. Strong two-year, each 50c. White Baby Rambler (Katherina Zeimet). Pure white flowers, showing the yellow stamens very prettily, produced in large candelabra-shaped trusses. Strong two-year plants, each 50c.

## Hardy Climbing Roses

We have selected from the newer sorts all those which have proved of superior merit and believe our selection strictly up-to-date.

All Roses offered under this section are extrastrong selected stock, and far superior to the quality as generally offered.
American Pillar A climbing Rose of recent Rambler type. Flowers are borne in clusters. which are followed in the Autumn by brilliant red seed, making it exceedingly attractive at all seasons of the year. The flowers are large, single and of a chaste shade of pink with bright yellow stamens in the center. Extra strong, each 75 c .
Baltimore Belle. Large flowers blooming in clusters. Pale blush turning to white. Each 35c.
Carmine Pillar. Single flower; bright crimson with yellow stamen; a free bloomer, the flowers produced all up the stem. Each 35c., doz. \$3.50.
Crimson Rambler Needs no descriptionBright crimson flowers borne in immense clusters during June and July. Extra-strong plants, each 35c., doz. $\$ 3.50$; extra-selected plants, each 50 c ., doz. $\$ 5.00$.
Dorothy Perkins A variety of Pink Rambler and rivaling the Crimson Ranbler in vigor of growth and freedom of bloom. Countless clusters of double pink flowers of a most beautiful shade. Strong, selected dormant plants, each 35 c. , doz. $\$ 3.50$; selected plants, extra-strong, bushy, each 50c., doz. $\$ 5.00$.
White Dorothy Perkins. This new Rose has all the characteristics of its famous parent, except that the flowers are pure white. A splendid acquisition to the Rambler family of Roses. Strong two-year plants, each 50 c ., doz. $\$ 5.00$.
Flower of Fairfield The New EverbloomOf the numerous recent introductions this stands foremost as a Crimson-flowered Rambler, and the fact that it is a perpetual bloomer makes it exceedingly popular. The flowers are of a bright crimson color, more brilliant than the common Crimson Rambler. Strong, two-year plants, each $\$ 1.00$, doz. \$9.00.
Dawson. As an open-air Rose it is especially desirable, the blossoms being of a deep pink color, quite full, moderate in size and very fragrant. A vigorous climber. Each 35c.
Lady Gay. Immense clusters of double flowers delicate cherry pink fading to white; foliage is splendid and of a glossy deep green shade. Extra-strong plants, each 50c., doz. \$5.00.
Pink Rambler. Like the crimson. This appears in light pink. Each 35 c ., doz. $\$ 3.50$.
Queen of Prairie. Bright rose color; large, compact and globular; a very profuse bloomer. Each 35c.
Seven Sisters. Large flowers in clusters of seven Roses each, of varied colors from white to crimson. Each 35c.

## Tausendschon

New Rambler Rose. It has growth as the other Ramblers, making growths in a season of over ten feet, which are almost devoid of thorns. It bears its flowers in immense clusters ; in color a soft pink when first opening, changing to a carmine rose on the reverse as they fully expand. Extra strong two-year-old plants, each 50 c ., doz. $\$ 5.00$.
Trier A new Perpetual-Flowering Pink Rambler. Without doubt the best Rose of its class and color yet introduced. A strong grower. Flowers are borne in large clusters, of a pale rose color changing to white, each showing a large cluster of yellow stamens. Strong two-year plants, each 75c., doz. \$6.00.

PAUL CRAMPEL. A new variety offered for the first time this year in quantity. We believe it to be the best scarlet Geranium ever offered. A strong grower; large truss; profuse bloomer; excellent for bedding purposes; exerything that goes to make up a real first-class Geranium is found in the Paul Crampel. Each 25c., doz. $\$ 2.50,100 \$ 20.00$.
Price of any of the following: Each 15c., doz. $\$ 1.50,100 \$ 10.00$.
Alphonse Ricard. Dwarf; very vigorous habit. Flowers semi-double, and trusses are of enormous size, on very strong stalks; a profuse bloomer; color bright vermilion-scarlet.
Beaute Poitevine. A great favorite, and conceded to be one of the best semi-double, light salmon-pink bedders in existence; enormous flowers, aurora pink, shading to bright salmon in the center.
Double Gen. Grant, or Heteranthe. Color bright vermilion-scarlet; full, round florets, borne in large trusses on long stems; well branching, exceptionally strong and very vigorous; distinct, clean, healthy foliage, with a profusion of bloom.
Jean Viaud. The finest double pink Geranium. Brilliant rose pink, with white throat, fresh and exquisite; attracts attention everywhere. Magnificent semi-double flowers; trusses of enormous size, sometimes measuring 6 inches in diameter.
La Favorite. The finest double white; pure color; flower of enormous size; a continuous bloomer, the plants being covered with flowers the entire season; has beautiful foliage and finest habit.
S. A. Nutt. The standard dark red Geranium ; double, brilliant deep scarlet, with maroon shading; stands the sun best of any.

## Variegated

Mme. Salleroi. A dwarf variety rarely over 6 inches high; foliage green, bordered white ; fine for edging. Each 15 c ., doz. $\$ 1.50,100 \$ 10.00$.

## Double Ivy-Leaved Sorts

A variety very much in demand for basket and vase work; blooms freely. We have the leading varieties. Each 25c., doz. \$2.50.

CANNAS

## Orchid Flowering Cannas

Orchid－flowering Cannas are very large－flowering and taller than the other varieties；some of the finest colors are to be found in this class of Cannas，the flowers being nearly double the size of the other varie－ ties．When planted in the lawn it is best to select a somewhat sheltered place to protect them against strong wind，for the flowers being larger they bruise more easily than the Crozy type．
Alemania．The outer petals are scarlet with a broad yellow border．Inside of blooms scarlet and dark red．Green foliage． 4 to 5 feet high．
Italia．The center of flower is brilliant red；the outer half of the circumference of each petal being a wide irregular band of clear yellow． $41 / 2$ feet high．
King Humbert．A brilliant orange－scarlet with bright red shadings．Large trusses of blooms，in－ dividual flowers being six inches in diameter．Foli－ age a rich reddish－bronze with lighter shadings； is broad and massive，giving the plant a sturdy and stately appearance． 5 ft ．
Pennsylvania．Flowers are extra large，often meas－ uring seven inches across，and on the inside are ver－ milion scarlet．Foliage rich green． 5 feet high．

Each 15c．，doz．\＄1．50， $100 \$ 10.00$.

## Common Bronze Leaf Canna

Grown extensively wherever foliage effects are de－ sired；will grow 6 feet high；large，handsome bronze leaves．

Dormant roots，doz．75．c．；started plants，each 10c．， doz．$\$ 1.00$ ．

## Cannas

As our experience has been far more satisfactory in the well started plants than with the dormant bulbs，of these varieties we can offer growing plants taken from the pots when shipped，ready for de－ livery from April to July．These can be sent by express only．

In addition to the following varieties we can supply almost any of the leading sorts，all in started plants at a uniform price of 15 c ．each；$\$ 1.50$ per doz．，$\$ 10.00$ per 100．Plants ready in April．

RED FLOWFRING，GRERN FOLIAGæ．
Alphonse Bouvier．Rich velvety crimson．Green foliage． 6 to 7 ft ．high．
Beaute Poitevine．Brilliant crimson with scarlet shadings．Compact，very free flowering．Green foliage． 3 ft ．high．
Charles Fienderson．Deep crimson yellow，flame at throat． $31 / 2 \mathrm{ft}$ ．high．
Crimson Bedder．A fine sort with large spikes of glowing crimson，dark metallic leaves． 4 ft ．
Duke of Marlborough．Of all the deep crimsons this is the finest；exceptionally free flowering． Individual blooms very large．
Pillar of Fire．Foliage green；flower almost the same as the Duke of Marlborough，but flowers borne on stalks a foot above the foliage．Height 5 to 6 ft ．

## ORANGE AND YझLIOW SHADES．

Florence Vaughan．Bright，rich golden yellow， spotted with red．Large．size，perfect form．Fol－ iage green． 4 ft ．high．
Gladiator．Enormous trusses of blooms．Flowers bright yellow，thickly spotted crimson；valuable bedding kind． 4 ft ．
President Cleveland．Large flowers of rich，bright orange－scarlet． 3 ft ．
T．Colette Rochaine．Immense well－branched trusses or large，deep orange－scarlet flowers，flne bedder． $41 / 2 \mathrm{ft}$ ．

## BRONZ』 L卫AF，R卫D FIOWæRING．

David Harum．A very fine brilliant vermilion．Has bronze foliage and is very free flowering．One of the finest bronze varieties for bedding． $31 / 2 \mathrm{ft}$ ．
Fgandale．Strong，compact flower stalks；currant flowers；bronze foliage．Finest of this varlety． 4 ft ．high．
Wm．Saunders．New．One of the finest yet intro－ duced．The flowers are of a bright，crimson－ scarlet，very large，and are produced in immense trusses． $31 / 2 \mathrm{ft}$ ．
Wyoming．Bronze foliage；flowers a rich，velvety orange，borne high above foliage，and often 6 in ． across． 5 to 8 ft ．high．

## RFD，GOTD－FDGFD CANNAS

Gladioflora．Scarlet，changing to salmon pink，with gold－edged border；the flowers look like a large Gladiolus． $31 / 2$ to 4 ft ．
Mme．Crozy．Dazzling crimson－scarlet，bordered with golden yellow；green foliage． 4 ft ．
Niagara．Great，handsome trusses；rich deep crim－ son，wide，irregular border of deep golden yellow； fine bedder；true． 3 ft ．
Souvenir de Ant．Crozy．Crimson，with broad gold band；the finest bedder，and for pot culture unsur－ passed． 4 ft ．
Queen Charlotte．Deep，rich crimson－scarlet，with a border of canary yellow．Green foliage． 3 ft ．

## PINK FIOWझRING CANNAS．

工ouise．A lovely flower，of deep，seashell pink：me－ dium－sized flower；luxuriant growth of green foliage．Height 4 ft．
Mlle．Berat．An exquisite shade of pink and very effective when massed with reds and yellows；fol－ iage is a bright green．Grows vigorously．Not over $31 / 2 \mathrm{ft}$ ．high．
West Grove．A very large shell－pink flower；foliage green and luxuriant． 5 ft ．

## WHITE AND CREAM SHADFS．

Alba Rosea．Flowers cream－white，shading to peach blossom pink at the throat；small but dainty．It has a good growth of green foliage． 4 ft ．
Alsace．A pale sulphur－yellow，changing to creamy． white．If planted with high colored sorts，it makes a fine contrast．Foliage green． $41 / 2 \mathrm{ft}$ ．
Mont Blanc．Deep cream white，with large petals and very showy．Good growth of green follage． Fine in front of strong colored Cannas． $2^{3} / 2 \mathrm{ft}$ ．

# COMPLETE LIST OF <br> THE BEST HARDY PERENNIALS

sempervirens. Rich blue. Each 20c., doz. $\$ 2.00$.
ANEMONE Japonica. The varieties of Anemone Japonica are among the most beautiful of our hardy perennials, flowering about the first of August and continuing till frost. They are at their best in September, and at that time they are the most attractive plants in the garden. They are quite hardy and will stand our New England Winters fully as well as any other perennials.
alba. Flowers pure white, with prominent yellow stamens. Flowers produced on long stems.
Lady Ardilaun. A very robust form of the above with large massive foliage.
Beaute Parfaite. Pure double white flowers and the best of its color.
Elegantissima. Large semi-double rose flowers borne on long stems.
Prinz Heinrich. Of dwarf, compact habit, with very large, semi-double dark red flowers.
Queen Charlotte. A very beautiful semi-double variety, light pink in color.
Whirlwind. A semi-double form of A. alba. Of the same habit of growth, but more free-flowering, lasting much longer than the single sorts. Each 20c., doz. $\$ 2.00,100 \$ 15.00$.
ANTHEMIS Kelwayi. Bright yellow flowers; daisy-like. July to September. 2 ft . Each 15c., doz. $\$ 1.50$.
AQUILEGIA chrysantha. Flowers are a pure golden yellow with long spurs. Very fragrant and one of the best of the Columbines. June to September. 3 ft . Each 20c., doz. $\$ 2.00$.
chrysantha alba. A white-flowering form of above. Each 20c., doz. \$2.00.
cœerulea. Large violet-blue and white flowers with long spurs. 2 to 3 ft . Each 20c., doz. $\$ 2.00$.
cœrulea alba. A pure white form of Cœrulea. Each 20 c., doz. $\$ 2.00$.
Long-spurred Varieties. A selected strain of immense flowers in all the brilliant shades. Each 20c., doz, $\$ 2.00$.

ANCHUSA ITALICA
ARABIS alpina. Charming white flowers in Spring. Dwarf, free-flowering. 6 in . Each 15 c ., doz. $\$ 1.50$.
ARMERIA maritima (Cushion Pink). Deep crimson flowers on stiff stems during the Summer, above evergreen tufts of foliage. 1 ft . Each 15 c ., doz. $\$ 1.50$.
ARTEMISIA Absinthium (True Wormwood). Spreading and shrubby. Leaves deeply cut and silky-white. 2 ft . Each 25 c., doz. $\$ 2.50$.
ASPHODELUS luteus. A very handsome perennial with dense spikes of yellow flowers. June and July. 3 to 4 ft . Each 20c., doz. \$2.00.
ASCLEPIAS tuberosa (Butterfly Weed). Flowers are a bright orange and are borne in terminal flat clusters. Will succeed best on dry soil. June to September. 2 ft . Each 15c., doz. \$1.50.
HARDY ASTERS (Michaelmas Daisies). Each 20c., doz. $\$ 2.00$.
Arturens. Bright red. Aug. to Oct. 3 ft . A profuse bloomer and one of the best yet introduced. ericoides. White with yellow center. Oct. and Nov. 3 ft . Flowers small; free flowering.
Lady Trevellyan. Large pure white flowers; quite early. 3 to 4 ft .
longifolia formosissima. Dense head of rosy purple flowers of medium size. 3 ft .
Madonna. The best late pure white. 3 ft .
Novæ-Angliæ (New England Aster). Violetpurple, large flowers, blooming late. 4 ft .
Novæ-Angliæ roseus. Rosy crimson. Late.
Tataricus. Purple. 6 ft . Sept. and Oct.

HARDY CHRYSANTHEMUMS
BOLTONIA latisquama. Very showy pink flowers, fine for cutting. Blooms very profusely during August and September. 4 to 5 ft . Each 15c., doz. $\$ 1.50$.
CAMPANULA Carpatica. A dwarf, compactgrowing variety with blue, bell-shaped flowers, borne erect to a height of 9 inches, from June to September. Each 15c., doz. \$1.50.
Carpatica alba. Similar to preceding except in color, which is a pure white. Fine for borders. Each 15c., doz. \$1.50.
glomerata acaulis. Dwarf-growing Campanula, with handsome clusters of dark blue flowers. Of great value for rockwork and borders. Each 25c., doz. $\$ 2.50$.
grandiflora. See Wahlenbergia.
persicifolia gigantea plena, "Moerheimi." A superb variety. The flowers are all very double, pure white and measure 3 to $31 / 2$ inches across. Each 15c., doz. \$1.50.
persicifolia grandiflora cœrulea. Large, purple bell-shaped flowers during June and July, and borne on a spike 3 to $31 / 2 \mathrm{ft}$. high. Each 15c., doz. $\$ 1.50$.
persicifolia grandiflora alba. A pure white form of above. Each 15c., doz. $\$ 1.50$.
rotundifolia (Scotch Blue Bell). Each 20c., doz. $\$ 2.00$.
Calycanthema (Cup and Saucer). A very popular form of Canterbury Bells, having calyx colored like the corolla. The formation of calyx and corolla is quite distinct and appropriately described by its common name, Cup and Saucer. We offer the following separate colors: Blue, White and Rose. Each 15c., doz. \$1.50.
CAMPANULA MEDIA (Canterbury Bells). Oldfashioned hardy biennials that rank among the most popular of our garden plants, growing to a height of $21 / 2$ to 3 ft . Flowers large, bell-shaped, produced in June and July. They will thrive in any good garden soil and prefer a sunny location. Single Blue, Lavender, Mauve, Rose, White, Double Assorted. Each 15c., doz. $\$ 1.50,100 \$ 10.00$.
CANDYTUFT, Perennial. See Iberis.

CARNATIONS, Hardy. See Dianthus.
CENTAUREA montana. Large bluish purple flowers in July, August and September. 2 ft . Each 15c., doz. \$1.50.
CHELONE barbatus Torreyi (Pentstemon). A stately brilliant flowering plant, with long, loose panicles of bright scarlet flowers. July. 4 to 5 ft . Each 15c., doz. \$1.50.
Chelone Lyoni. Beautiful heads of deep red flowers in September. Each 20c., doz. $\$ 2.00$.
CHRYSANTHEMUM Leucanthemum (Shasta Daisy): Very large, daisy-like flowers, often measuring 4 inches across. Three or more rows of petals of the purest white and borne on single, stiff stems. In bloom from July to frost. 2 ft . Each 15c., doz. \$1.50.
maximum. Flowers large; petals pure white, center yellow and often overlapping. Continues in bloom all Summer and is perfectly hardy. Each 15c., doz. $\$ 1.50$.
CHRYSANTHEMUM Hardy Pompon. The hardy Pompons are rapidly coming into general favor, as bedding plants. Flowers are very double and borne in great profusion from September to frost. Well established plants. Each 25c., doz. $\$ 2.50,100 \$ 18.00$.
Aberdeen. Bright maroon; semi-double; large.
Bridesmaid. A delicate blush; good double flower.
Daybreak. Pink, tinged with yellow.
Globe d'Or. Dwarf; clear yellow; large flower.
Gold Finch. Golden yellow, shaded crimson.
Golden Pheasant. Orange-yellow.
Grace Darling. Lilac, shaded with pink center.
King Henry. Double sulphur-white; large.
Rhoda. Light pink; double; very floriferous.
Ruby Queen. Handsome, dark ruby-red; desirable.
Surprise. Clear lilac shade; quite distinct.
White Queen. Pure white; large flower.
CLEMATIS Davidiana. Beautiful pale blue flowers, very fragrant. Flowers from June to August. 3 ft . Each 25c., doz. $\$ 2.50$.
COREOPSIS grandiflora. Handsome yellow flowers during Summer. Considered by many to be the best Coreopsis we have. Each 15c., doz. $\$ 1.50$.
lanceolata. A superb variety for cutting. Flowers are golden yellow and fully 3 inches in diameter. Very profuse bloomer. June to frost. 2 ft . Each 15c., doz. \$1.50.
DELPHINIUM Belladonna. Beautiful clear blue, with white eye; dwarf habit, free flowering, blooming all Summer. Each 20c., doz. \$2.00.
Chinense album. A pure white Larkspur bearing flowers in open heads. Grows about 3 feet high. Each 15c., doz. \$1.50.
Chinense azureum. A delicate clear blue form of above. Each 15c., doz. \$1.50.
elatum (Bee Larkspur). Dark blue flowers on extra long spikes. 5 to 6 ft . Each 20c., doz. $\$ 2.00$.
formosum. The most popular and considered by many the best of the Larkspurs. Flowers are a deep blue, having a white eye, and are produced on long spikes. 4 ft . Each 20 c ., doz. $\$ 2.00$.
formosum cœelestinum. Similar to Formosum but light sky-blue in color. Each 20c., doz. \$2.00.
King of Delphiniums. Dark blue. June and July. 4 to 5 ft . Sun or half shade. Each 25 c ., doz. $\$ 2.50$.
DIANTHUS plumarius, Her Majesty. Very fragrant flowers, large, double, and pure white. Excellent for cutting. Each 20c., doz. \$2.00.
plumarius, Assorted. Hardy Carnation, in colors of red, white and pink. June and July. 1 ft . Each 15c., doz. \$1.50.
Perpetual Snow. Pure white, double and very large. The flowers are delicately scented and the stems strong. It blooms constantly and freely, Each 20c., doz. $\$ 2.00$.

DICENTRA spectabilis (Bleeding Heart). Blooms in May and June, and has long, graceful racemes of rosy red flowers, with protruding white inner petals. 3 ft . Each 15c., doz. $\$ 1.50$.
DICTAMNUS Fraxinella (Gas Plant). Fragrant foliage and showy terminal racemes of light red flowers. June-July. 3 ft . Each 15c., doz. $\$ 1.50$.
Fraxinella alba. A pure white form of the above. Each 15 c ., doz. $\$ 1.50$.
DIGITALIS (Foxglove). Old-fashioned hardy biennial plants with broad foliage and showy flowers borne on spikes. June and July. Price of the following: Each 20c., doz. $\$ 2.00$.
Gloxinixflora alba. Beautiful Gloxinia-shaped flowers; pure white.
Gloxiniæfiora purpurea. Purple.
Gloxiniæflora rosea. Handsome pink.
purpurea. Purple flowers, throat spotted.
DORONICUM plantagineum excelsum. Very large orange-yellow flowers with darker center, borne during May, June and July. 2 ft . Each 20c., doz. \$2.00.
ECHINACEA purpurea (Cone Flower). Large flowers with drooping pink-colored magenta rays and purplish crimson rounded center. June to September. 4 ft . Each 20c., doz. $\$ 2.00$.
ECHINOPS Ritro (Globe Thistle). Large globular heads of blue, thistle-like flowers borne during July and August. 3 ft . Each 20 c ., doz. $\$ 2.00$.
ERIGERON speciosus. Handsome light blue, finely cut petals with yellow center. In bloom from June to October. 2 ft . Each 15 c ., doz. $\$ 1.50$.
EULALIA Japonica. Large plumes; very popular ornamental grass. 4 ft . Each 25 c ., doz. $\$ 2.50$.
var. Gracillima. Dark green leaves, silvery white midrib. 4 to 5 ft . Each 25c., doz. $\$ 2.50$.
zebrina. One of the most beautiful of ornamental grasses; white and green. Each 25c., doz. \$2.50.
EUPATORIUM purpureum. Very large showy panicles of purple flowers. Will thrive in any kind of soil. 6 to 8 ft . August and September. Each 15 c., doz. $\$ 1.50$.
FESTUCA glauca (Fescue Grass). A neat tufted grass with glaucous blue foliage. An excellent plant for edging. Each 15c., doz. $\$ 1.50$.
FUNKIA undulata media variegata. Green leaves margined and edged white. Fine for borders and edgings. Each 15c., doz. \$1.50.
subcordata grandiflora. Large white flowers borne in heads. Foliage green, pointed; sweetscented. 18 in. August and September. Each 15 c ., doz. $\$ 1.50$.
GAILLARDIA grandiflora. One of the showiest of perennials. Ray flowers ranging from red to yellow around a dark maroon center. 3 ft . June to frost. Each 15c., doz. $\$ 1.50$.
GLAUCIUM luteum (Horned Poppy). Bright yellow flowers over glaucous foliage, very ornamental. 4 ft . July and August. Each 20 c ., doz. $\$ 2.00$.
GYPSOPHILA paniculata (Baby's Breath). Minute white flowers borne in enormous quantity in open panicles during Summer months. Valuable for cutting. 3 ft . Each 15c., doz. $\$ 1.50$.
HELENIUM Bigelowii. Handsome yellow flowers with brown center, borne during Summer. Ray flowers serrated and overlapping in veral rows. 2 ft . Each 15c., doz. $\$ 1.50$.
autumnale superbum. Large, yellow flowers, with drooping rays borne in immense panicles. 6 to 7 ft . July to September. Each 15 c ., doz. $\$ 1.50$.
Hoopesii. Bright orange-yellow flowers from June to September. 5 to 6 ft . Each 15 c ., doz. $\$ 1.50$.
pumilum magnificum. Grows $21 / 2$ feet high, producing a great number of large, yellow flowers from June to Autumn. Each 15c., doz. \$1.50.
HELIANTHUS multiflorus fl. pl. (Double Sunflower). Large double, yellow flowers during Summer and Fall. 4 to 5 ft . Each 15c., doz. \$1.50.

funkia undulata media variegata

## HELIANTHUS-Continued

rigidus. A beautiful orange-yellow variety blooming from July to September. Each 15c., doz. \$1.50.
HELIOPSIS Pitcheriana. Deep orange-yellow flowers; early to late Summer; long, stiff stems. Fine for cutting. 3 ft . Each 15 c ., doz. $\$ 1.50$.
HEMEROCALLIS, Apricot (Day Lily). 2 ft . A pretty seedling variety about the size of H . fulva, of a clear bright orange. Each 25 c ., doz. $\$ 2.50$.
aurantiaca major. A splendid plant from Japan, with large trumpet-shaped flowers of a deep orange color and sweetly scented; flowering during Autumn. Each 40c., doz. \$4.00.
flava (Lemon Lily). 3 ft . May and June. Flowers clear, full, yellow; very fragrant; fine for cutting. Each 20c., doz. \$2.00.
flava major. Large yellow. 3 ft . May and June. Each 25c., doz. \$2.50.
HEPATICA (Anemone Hepatica). A beautiful early hardy flower. In sheltered spots on porous soil the foliage will remain through the Winter. The Hepatica is a deep rooter, hence it thrives so well upon made banks. Where let alone and not often pulled to pieces, it makes strong tufts. Clumps of the rich colored reds, white and blues, blooming from March to May.
alba. Pure white. Each 15 c ., doz. $\$ 1.50$.
cœrulea. Rich blue. Each 15 c ., doz. $\$ 1.50$.
rubra. Brilliant deep red. Each 15c., doz. $\$ 1.50$.
HEUCHERA sanguinea. Small, scarlet flowers in large, graceful panicles. One of the best of the scarlet perennials. 18 inches. June to October. Each 15c., doz. \$1.50.
HIBISCUS, Crimson Eye. Large showy white flowers, with a crimson-purple eye. August and September. 6 to 7 ft . Each 15c., doz. $\$ 1.50$.
militaris. Large, light pink flowers, crimson center. July to September. 5 to 6 ft . Each 15c., doz. $\$ 1.50$.
Moscheutos albus (Swamp Mallow). Beautiful large white flowers in August and September. 3 to 4 ft . Each 15 c ., doz. $\$ 1.50$.
Moscheutos roseus. A pink form of above and one of the handsomest large-flowering perennials. Each 15 c., doz. $\$ 1.50$.

HOLLYHOCKS. Perfectly hardy and grow to a height of 6 or 8 ft . The plants, when in full bloom, are ornaments to any garden. The tall stalks, covered with large brilliant flowers, stand out prominently and attract great attention. CHATER'S PRIZE DOUBLE. This strain, without doubt, is the equal of any other in range of color, perfection of form and percentage of double flowers. Flesh-color, Pure White, Red, Bright Rose, Deep Maroon, Sulphur-Yellow. Each 20c., doz. $\$ 2.00,100 \$ 12.00$.
Mammoth Allegheny Hollyhock. A grand flower seldom less than 4 inches in diameter and of very transparent texture-so delicate that it looks like crushed silk. Each 20c., doz. \$2.00.
HOLLYHOCKS, SINGLE. In separate colors. Bright Rose, Flesh-color, Maroon, Red, Sulphur-Yellow, White. Each 20c., doz. $\$ 2.00$.

PHLOX INDEPENDENCE
HYPERICUM Moserianum (Gold Flower). Large, showy, yellow flowers from June to frost. 1S in. Each 20c., doz. \$2.00.
IBERIS sempervirens (Candytuft). Pure white flowers in flat heads. Each 15 c ., doz. $\$ 1.50$.
INCARVILLEA Delavayi. Very large rose-colored flowers lasting a long time. Rich green foliage. June to August. 2 ft . Each 20c., doz. $\$ 2.00$.
LATHYRUS latifolius (Perennial Pea). Handsome red, white and pink pea-like flowers during Summer. Fine for cutting. Each 20 c ., doz. $\$ 2.00$.
LIATRIS pycnostachya. Handsome long spikes of rosy purple flower-heads borne during August and September. 4 to 5 ft . Each 15c., doz. \$1.50.
LINUM perenne. Pale blue flowers, with pretty evergreen foliage. June to November. 18 inches. Each 15c., doz. $\$ 1.50$.
LOBELIA cardinalis. Long dense spikes of handsome rich cardinal-red flowers. August and September. 3 to 4 ft . Each 15c., doz. $\$ 1.50$.
LUPINUS polyphyllus (Lupin). Deep blue peashaped flowers on long spikes. June to September. 2 to 3 ft . Each 15 c ., doz. $\$ 1.50$.
polyphyllus albus. Pure white. Each 15c., doz. $\$ 1.50$.
LYCHNIS Chalcedonica (London Pride). Brilliant scarlet flowers in close heads. June to September. 3 ft . Each 15c., doz. \$1.50.
Flos-cuculi (Cuckoo Flower). Very deep red flowers in clusters. Each 15c., doz. $\$ 1.50$.
Haageana. Showy orange-scarlet and pink flowers in large heads. Each 15c., doz. \$1.50.
viscaria splendens fl. pl. Bright rose flowers in spikes. 1 to $11 / 2 \mathrm{ft}$. Each 15 c ., doz. $\$ 1.50$.

## LYTHRUM roseum superbum. A very free-

 flowering plant of robust habit, producing long, showy spikes of rosy red flowers during the Summer months. 3 to 4 ft . Each 15 c ., doz. $\$ 1.50$.MALVA moschata (Musk Mallow). Handsome pink flowers. June to August. 2 ft . Each 15c., doz. $\$ 1.50$.
moschata alba. A white form of the above. Each 15 c ., doz. $\$ 1.50$.
MONARDA didyma. Bright scarlet, extremely showy flowers in terminal heads. July to September. 2 to 3 ft . Each 15c., doz. \$1.50.
MYOSOTIS palustris semperflorens (Forget-Me-Not). Bright blue flowers with yellow center, produced from May to September. Thrive well in shady places. Each 15 c., doz. $\$ 1.50,100 \$ 10.00$.
OENOTHERA Youngii. Bright lemon-yellow flowers; pendulous branches; shiny glaucous foliage. June to Sept. 2 ft . Each 20c., doz. \$2.00.
macrocarpa, or Missouriensis (Evening Primrose). Deep yellow. June to Aug. 10 in. Each 20c., doz. $\$ 2.00$.
PENTSTEMON Digitalis. Pure white Foxgloveshaped flowers, in spikes. July and August. 2 to 3 ft . Each 15 c ., doz. $\$ 1.50$.
See also Chelone.

## Hardy Phlox

This magnificent family of Hardy Perennials may be well termed the most widely known and deservedly popular of all the various plants we have in our gardens. There is no perennial more worthy of culture, more satisfactory in every situation, or more suited for individual planting or grouping for mass effect. They are at their best in the late Fall.

Price: Each 20c., doz. \$1.50, 100 \$12.00, unless otherwise noted.
Annie Cook. Flesh pink. Very fragrant. The best Phys yet introducnd. Each 30c., doz. \$3.00.
Aurora Boreale. Orange with purple center. Large panicles.
Boule de Feu. Cherry red, brilliart.
Bridesmaid. White with large rose center.
Coquelicot. Orange-scarlet, crimson center.
Eclaireur. Carmine, salmon center; large.
Elizabeth Campbell. New, very large spikes, light salmon changing to pink in the center. Each 30c., doz. \$3.00.
Independence. Pure white; late.
Jeanne d'Arc. Late flowering, pure white; tall.
Joseph Gerbeaux. New. Large white with cherryred center. Each 25c., doz. \$2.50.
Le Feu du Monde. Bright salmon-red; tall, late.
L'Esperance. Light lavender-pink, white center.
Le Soleil. Brilliant china-rose, rose center; medium height; early, free-flowering variety. A favorite.
Michael Buckner. Dark purple.
Miss Lingard. Almost pure white, pink eye. Large spikes; fine.
Ornament. Bright pink, very large, medium height.
Pink Beauty. Light pink.
Prof. Schliemann. Bright red, crimson eye. Late.
Richard Wallace. Pure white, violet-rose center.
R. B. Struthers. Bright pinkish salmon, crimson eye.
Rynstroom. A gold medal variety. New. Color, bright pink, each individual flower being larger than a silver dollar. Very large trusses. Offered for the first time this year. $2 \frac{1}{2}$ in. pot plants, each 50c., doz. $\$ 5.00$.
Saison Lierval. White, light pink center.
Salma. Delicate pale rose, with distinct red eye.
Tapis Blanc. Pure white and very dwarf. Panicles of enormous size. New. Each 30c., doz. \$3.00.
Vesuvius. Pure red, with purple eye; a dazzling color.

## IRIS

IRIS GERMANICA, or GERMAN IRIS
The German Iris blooms in June and is one of the most desirable Spring-flowering plants. No garden should be without a collection; we list a number of the best and free flowering varieties.
Prices, except where noted, each 15 c ., doz. $\$ 1.50$, $100 \$ 10.00$.

In the following descriptions "S" signifies the standard; "F" the falls, or drooping petals.
Aurea. Golden yellow.
Blue Bird. Rich indigo. Large and full.
Canary Bird. S. Canary-yellow. F. Crimsonpurple.
Celeste. Pure celestial blue, changing to porcelain.
Darius. S. Lemon. F. Yellow, veined and corded with purple.
Donna Maria. S. Azure. F. Purple.
Duchesse de Nemours. S. Pale lilac. F. Purpleviolet, veined white.
Flavescens. Light primrose-yellow, large flowers.
Florentina alba. S. and F. Light porcelain-blue, changing to white.
Florentina Blue. S. and F. Yale-blue. Fragrant.
Hector. Yellow and brownish red.
Honorabilis. S. Indian-yellow. F. Chestnut-red.
La Tendre. S. Lavender-blue. F. Blue, veined violet.
L'Innocence. Pure white, penciled purple and orange.
Madame Chereau. S. and F. Pure white, penciled violet.
Maori King. S. Golden-yellow. F. Chocolate, veined white.
Mrs. H. Darwin. S. French white. F. White, veined purple.
Pallida Dalmatica. 3 to 4 ft . Lavender; stately spikes; excellent. Each 25 c ., doz. $\$ 2.50$.
Pallida speciosa. S. Violet-blue. F. Purple.
Princess of Wales. Combination violet-purple, violet and yellow.
Purple Queen. S. and F. Rich violet-purple.
Queen of May. S. and F. Bright rosy-lavender.
Silver King. S. and F. Pure white, very large; fragrant.

JAPAN IRIS

## IRIS KAEMPFERI. Japanese Iris

The flowers of the Japanese Iris are often 8 to 10 inches in diameter and of remarkably varied and beautiful colors. They thrive best in a rich and somewhat moist soil. Their blooming season is from the middle of June to about August 1. We carry in stock over fifty varieties, but will describe here a number of the best obtainable, selected from direct importations from Japan.
Large Plants, each 30 c ., doz. $\$ 3.00,100 \$ 25.00$.
Mixed Colors, each 20c., doz. $\$ 2.00,100 \$ 15.00$.
No. (Order by number or name.)
4 Kumo-no-obi. Double, violet-purple, white center.
7 Sofu-no-koi. Double, light blue, with pink marking.
S Mana-dowru. Double, white, penciled blue, purple center.
10 Yomo-no-umi. Double, maltese lavender, purple center, penciled.
11 Mei-ran. Single, carmine rose.
12 Kuma-funjin. Double, dark purple, blue center.
13 Taihei-raku. Single, dark crimson.
14 Hana-aoi. Double, bright violet-blue, shaded white.
15 Uchin. Double, bluish purple, veined white.
16 Oshkun. Double, navy-blue, purple center.
19 Kimi-no-megumi. Single, light blue, penciled, red center.
20 Kumo-no-uye. Double, very dark bluish purple.
23 Oniga-shima. Double, violet-purple, sapphire center.
26 Senjo-no-hora. Double, dark red, splashed white.
28 Shira-taki. Double, white with yellow marking.
29 Shiga-no-wia-nami. Double, sapphire and blue, penciled white.
30 Kagaribi. Double, rose red, penciled white.
31 Kosui-no-iro. Double, very light blue, white center.
32 Komochi-guma. Single, very dark blush purple.
33 Kaku-jaku-ro. Single, light pink and blue, penciled white.
34 Momiji-no-taki. Double, pink ground, blue and yellow veined.
35 Shuchiu-krva. Single, white, margined with pink.
36 Yedo-kagami. Single, dark red, purple center.
39 Tsurugi-no-mai. Single, dark maroon.
40 Iso-no-nami. Double, blue, splashed white.
41 Oyodo. Single, dark purple.
44 Kyodai-san. Double, very dark blue, penciled white.
46 Koki-no-iro. Double, reddish-purple.
47 Samidare. Double, white.
49 Tsuru-no-kegoromo. Single, white.
50 Date-dogu. Single, dark red, pink center.

## Miscellaneous Irises

Cristata. Light blue, spotted with yel Each Doz.
low. Fringed. May. 8 in.............. $\$ 0.20$

La Tendresse. Full, spreading, immense flower, creamy color, changing to pure white ; extra, 2,50

## Collection of New, Rare and Beautiful Peonies

The Peonies are among the noblest and most magnificent of our herbaceous plants. With the addition of superb newer varieties.

The colors have the greatest range, embracing white, flesh color, rose, pink, salmon, yellow, scarlet and crimson in lighter and darker shades.

They require very rich soil, are perfectly hardy, and in planting care should be taken to select a rich, sunny place. The tip of the crown should be 6 inches below the surface.

Time of Delivery. All roots can be delivered from early April until the end of May, and again from September on and until freezing time in the Fall.

Directions for Shipping. Peony roots can only be shipped by express, purchaser paying transit.

Our list here only shows 59 varieties. We have 300 varieties. If you do not find the variety wanted listed here, write us.

## Paeonia Arborea (Tree Peony)

A handsome dwarf shrub, free flowering, blooming about three weeks earlier than the herbaceous varieties. It is quite hardy, but is benefited by a slight protection in Winter. Each $\$ 1.00$, doz. $\$ 10.00$.
Banksii. Rose-blush, with purple center. Very large and fragrant.
Elizabeth. Rosy-crimson. Very large and full.

## Twelve Standard Paeonia Sinensis

The following named varieties are all standard and well-tried sorts that have proved very satisfactory.
Price of any of the following: Each 35 c ., doz. $\$ 3.50$. Set of 15 varieties $\$ 4.50$.
Alexandrina. A handsome bright rose. Fine flower. Anemonæflora rubra. A rich dark carmine red.
Duc de Cazes. A dark rose, with center petals lighter.
Duchesse d'Orleans. Pale rosy lake with distinct salmon center. A very beautiful sort.
Edulis superba. An extra fine bright rose variety. One of the best and very sweet scented.
Festiva alba. Very fine pure white.
Fideline. Very dark purplish crimson.
L'Elegante. A brilliant rose color, with well formed globular flowers.
Louis Van Houtte. A deep dark red; one of the choicest of its color. Large and finely formed.
Magnifica. A beautiful white, slightly tinted flesh color.
Princess Mathilde. A fresh rose-colored self. Ex-cellently-formed flower; one of the most attractive of this collection.
Prolifera tricolor. Handsome soft flesh-colored flower.
Pulcherrima. A very delicate shade of soft rosy white, with tinge of salmon in center.
Rosea elegans. A beautiful combination of soft rose and salmon yellow.
Victoria. A rosy white, with yellowish center. Quite free flowering.

## Peonies in Colors

Double, in shades of red. Each 25c., doz. \$2.50. Double, in shades of white. Each 25 c ., doz. $\$ 2.50$.
Double, in shades of pink. Each 25c., doz. $\$ 2.50$. Officinalis rubra. The old-fashioned deep red Peony. Very double and fragrant. Each 25c., doz. $\$ 2.50$.
Tenuifolia fl. pl. Handsome divided foliage. Flowers large, full, double, deep blood red. A dwarf, compact bloomer. Each 30c., doz. \$3.00.
Tenuifolia Single Red. Similar to preceding, except in flowers, which are single and very attractive. Each 30c., doz, $\$ 3.00$.

ORIENTAL POPPY
PHYSOSTEGIA Virginiana. A very ornamental perennial, bearing showy pink flowers on spikes during August and September. 3 to 4 ft . Each 15 c ., doz. $\$ 1.50$.
Virginiana alba. A pure white form of the above. Each 15c., doz. \$1.50.
speciosa. Beautiful pink-flowering hardy perennial. Flowers borne on spikes during July. 2 ft . Each 15 c ., doz. $\$ 1.50$.
PLATYCODON. See Wahlenbergia.
POLEMONIUM cœruleum grandiflorum. Handsome border plant, with terminal spikes of skyblue flowers. June and July. 2 ft . Each 15c., doz. $\$ 1.50$.
Richardsoni. Very large deep blue flowers in panicles. July to Sept. 2 ft . Each 15c., doz. \$1.50.
POLYGONUM cuspidatum. A very strong growing perennial producing clouds of creamy white flowers; one of the most effective for massing. 5 ft . Each 20c., doz. $\$ 2.00$.

## Papaver (Hardy Poppy)

## NUDICAULE (Iceland Poppy)

A beautiful race and among the most desirable of our herbaceous plants. The plant forms tufts of fernlike foliage, from among which the slender flowerstalks rise to about a foot in height and bear fragrant, cup-shaped flowers. They will thrive on any good garden soil. June till October. Scarlet, White, Yellow. Each 15 c ., doz. $\$ 1.50,100 \$ 10.00$.

## ORIENTALE (Oriental Poppy)

Orientale. The common variety of Oriental Poppy. The flowers are a bright scarlet with a black blotch at the base of each petal, and when in bloom in the Spring they make a very brilliant display. Each 15 c ., doz. $\$ 1.50$.

## ORIENTAL HYBRIDS

The following named varieties are among the best of Oriental Poppies and give quite a wide range of colors. Each 20c., doz. $\$ 2.00$.
Blush Queen. A beautiful blush-pink.
Fire King. Dazzling scarlet. Large flower.
Parkmani. Very deep scarlet. One of the richest. Proserpine. A deep rich pink.
Royal Scarlet. Rich glowing scarlet.
Salmon Queen. Soft salmon-scarlet.
PRIMULA auricula. The sweet-scented, yellow Swiss species, with large, handsome, smooth, sil-ver-edged foliage. Needs protection in Winter. Each 15c., doz. \$1.50.
carpatica. Dense round head of deep violet-blue flowers in Spring. Each 15c., doz. $\$ 1.50$.
officinalis hybrida (Cowslip). Range in color from crimson to deep yellow and pure white. Each 15c., doz. \$1.50.
veris superba. A fine variety with large yellow flowers. Each 15c., doz. $\$ 1.50$.

PYRETHRUM uliginosum. A choice variety bearing a profusion of large white flowers with yellow centers. July to September. 4 to 5 ft . Each 20c., doz. \$2.00.
hybridum roseum uliginosum. One of our finest Fall-flowering perennials. Very robustgrowing plants, single flowers in large open panicles. August to October. 3 ft . Each 15c., doz. $\$ 1.50$.
roseum hybridum fl. pl. A double form of above variety. August and October. 3 ft . Each 25 c., doz. \$2.50.
RUDBECKIA, Golden Glow. Flowers beautiful golden yellow and very double. Marvelous continuity of bloom from June till late Fall. 6 to 8 ft . Each $15 \mathrm{c} .$, doz. $\$ 1.25$, $100 \$ 8.00$.
Newmanni. Orange-yellow flowers in large heads, with purplish brown disc. July to frost. 2 ft . Each 15c., doz. \$1.50.
SALVIA azurea grandiflora. Sky-blue flowers in great profusion. August and September. 3 to 4 ft. Each 20c., doz. $\$ 2.00$.
SCABIOSA Caucasica. Pale lilac flowers about 3 inches across, which are borne continuously throughout the Summer. 2 ft . Each 15c., doz. $\$ 1.50$.
Caucasica alba. A white-flowering form of preceding. Each 15c., doz. $\$ 1.50$.
SEDUM spectabile. Handsome rose-colored flowers in immense heads, during late Fall. One of the best Fall perennials. Each 15c., doz. $\$ 1.50$.
SHASTA DAISY. See Chrysanthemum Leucanthemum.
SOLIDAGO (Golden Rod). Each 15c., doz. \$1.50. STENANTHIUM robustum. The pure white flowers are borne on graceful compound panicles. About 3 to 5 ft . Each 35 c ., doz. $\$ 3.50$.

RUDBECKIA, GOLDEN GLOW

STOKESIA Cyanea (Cornflower Aster). V'ery large, deep blue flowers, produced profusely from August to October. Requires a well-drained soil to succeed well. Each 15 c. ., doz. $\$ 1.50$.
Cyanea alba. Same as above only pure white. Each 20c., doz. \$2.00.

## SUNFLOWER. See Helianthus.

SWEET WILLIAM, Assorted Colors. One of the finest and best known of our old garden plants. Flowers of the most brilliant colors and borne in heads quite profusely. Each 15 c. , doz. $\$ 1.50$.
nigricans. Dark red. Each 15 c ., doz. $\$ 1.50$.
alba. Pure white. Each 15 c., doz. $\$ 1.50$.
THALICTRUM glaucum. Handsome perennials with showy yellowish white flowers in panicles, and glaucous foliage. Each 20c., doz. \$2.00.
THERMOPSIS Caroliniana. Bright yellow flowers in close terminal racemes. Fine for massing or grouping. 4 to 5 ft . June and July. Each 20c., doz. $\$ 2.00$.
TRITOMA Pfitzeri. A superb variety, very freeblooming. Color a rich brilliant orange. Of medium height and will bloom from Summer till Fall. Each 20c., doz. $\$ 2.00$.
Uvaria grandiflora (Common Red-Hot Poker). Orange-red spike thrown well above the foliage. August and September. 4 to 5 ft . Each 15c., doz. $\$ 1.50$.
TROLLIUS Europæus (Globe Flower). Bright double yellow flowers in May and June and continuing at times till frost. Each 20c., doz. $\$ 2.00$. Orange Globe. Enormous globular orange flowers appearing early and continuing till frost. Fine for cutting. Each 20c., doz. $\$ 2.00$.

TRITOMA PFITZERI

STOKESIA CYANEA
EUNICA Saxifraga. A superb border perennial of dwarf, tufted habit. Bright pink flowers all Summer. Each 20c., doz. \$2.00.
VALERIANA officinalis. The old-fashioned garden Heliotrope, with pinkish or lavender flowers. with Heliotrope fragrance. June and July. 4 ft . Each 20c., doz. \$2.00.
VERONICA candida. Grayish white foliage, with spikes of blue flowers during July and August. 2 ft . Each 15c., doz. $\$ 1.50$.
spicata. Long spikes of delicate blue flowers during June, July and August. Each 15c., doz. $\$ 1.50$.
spicata alba. A white form of the preceding, though not quite so tall. One of the most graceful of perennials. Each 15 c ., doz. $\$ 1.50$.
longifolia. Pretty blue flowers in spikes during August. Each 15 c ., doz. $\$ 1.50$.
longifolia, var. subsessilis. Intense, lustrous blue flowers from July till Fall. Flowers in showy spikes. One of the handsomest blue-flowering perennials. Each 20c., doz. \$2.00.
VINCA minor, Myrtle. Largely used for covering graves. Delivery May 15 to June 1. Per basket, 25 c.
WAHLENBERGIA (Platycodon) grandiflora. Pretty blue bell-shaped flowers, blooming from July to September. Sometimes classed as a Campanula. Will thrive in any good garden soil. $21 / 2 \mathrm{ft}$. Each 20c., doz. $\$ 2.00$.
grandifiora alba. A pure white form of preceding. Each 20 c ., doz. $\$ 2.00$.
Mariesii. Dwf. Blue. Each 20c., doz. \$2.00.
YUCCA flamentosa (Adam's Needle). Fragrant cup-shaped creamy-white flowers in spikes, 5 to 6 feet long and surmounting clumps of stiff, evergreen bayonet-shaped foliage. One of our showiest and most stately perennials. Thrives best on light, sandy soil. June and July. 3 to 4 ft . Each 15 c ., doz. $\$ 1.50$; large clumps, each 25 c ., doz. $\$ 2.50$.

## Hardy Climbing Vines

Vines are very useful. They give quick results when planted on a new place before the trees and shrubs become established. Especially adapted for covering fences, rocks, walls, banks and trellises.

[^4] tiful vine. Each $\$ 2.00$.

## Clematis. Virgin's Bower

Coccinea. Brilliant scarlet, bell-shaped flowers, blooming profusely. Each 50c.

CLEMATIS JACKMANNI

Clematis Ina This Clematis was awarded a unanimous vote of the Massachusetts Horticultural Society. The flowers are 2 inches in diameter, nicely poised on long, stiff branching stems and having from 25 to 50 sweet-scented beautiful flowers on each stem. Two stems are produced at each joint and the joints are from 4 to 5 inches apart. The blossoms are white, shaded to a delicate laven-der-blue on the edges and on the tips of the petals and are produced in marvelous profusion. In its season of bloom from the first to the last of August, it is the glory of the garden, there being no other plant of any description that can rival its dainty beauty. Extra-strong plants, each $\$ 1.00$.
paniculata. This is the most common of all the Fall-blooming climbers; is best suited to sunny situation. Will stand severe pruning in Winter. Excellent foliage, luxuriant grower and profuse bloomer of medium size; flowers pure white and fragrant, perfectly hardy; the most desirable and useful of climbers. Each 35c., doz. \$3.50. Large size, each 50 c ., doz. $\$ 5.00$.
Virginiana (American White Clematis). A native of rapid growth; white flowers in August. Each 35̃.
Duchess of Edinburgh. Flowers double, white and sweet scented. Each 50c.
Henryi. Robust plant, free bloomer, creamy-white flowers. Each 50c.
Jackmanni. Velvety purple with ribbed bar down the center. Each 50c.
Madam Baron Veillard. Resembles Jackmanni, only the flowers are a more unique shade of soft pink. Each 50c.
HONEYSUCKLE, Lonicera Japonica (Chinese Evergreen Honeysuckle). Very fragrant, yellow and cream-colored flowers; dark green foliage. Each 50c.
Lonicera Brachypoda, var. Halleana (Hall's Evergreen Honeysuckle). Vigorous grower; fragrant yellow and white flowers from Midsummer until frost. Each 50c.
Lonicera flexuosa,
var. aureo-reticulata (Golden-variegated Honeysuckle). Leaves variegated gold and green. Each 35c.
Lonicera Periclymenum, var. Belgicum (Belgian, or Dutch Monthly Honeysuckle). Blooms all Summer; red and yellow, very fragrant flowers. Each 50c.
HOP VINE. Vigorous and quick-growing twiner for covering arbors, etc. Each 25 c., doz. $\$ 2.50$.
KUDZU VINE. An extremely fast-growing vine, with immense leaves and bearing small racemes of rosy-purple, pea-shaped flowers toward the close of August. Each 50c., doz. $\$ 5.00$.
PERIPLOCA (Silk Vine). A fast-growing, twining vine; dark green leaves and small purple flowers. Each 35c.
SCHIZOPHRAGMA hydrangeoides (Climbing Hydrangea). August. Bears large, flat heads of pinkish-white flowers. A rare and desirable plant where a low climber is needed. Each 50 c., 10 for $\$ 4$.
TECOMA radicans (Bignonia Trumpet Vine). A hardy, high-climbing plant with large scarlet, trum-pet-shaped flowers. Each 40c.
WISTARIA Chinensis (Chinese Wistaria). A hardy, tall-growing climber with pale green foliage and foot long clusters of purplish, pea-shaped flowers. Blooms in May. Each 75c.
alba. White-flowering variety of above. Each $\$ 1.00$.
multijuga (from Japan). Longer and looser racemes and smaller, dark blue flowers. Each 75 c.

## Hardy Ornamental Shrubs

This class of shrub should be planted more in our home grounds and our gardens, as they make a great attraction and decided homelike appearance. A selection of these shrubs will give flowers from April to Norember, and have an abundance of foliage which will add greatly to the beauty of your lawn or garden.

All our Shrubs are large,

CLETIIRA ALNIFOLIA
ARALIA pentaphylla (Five-leared Aralia). A graceful shrub, with arching, spiny branches and bright green, shining foliage. Excellent on rocky banks and slopes. Each 50c. and 75 c .
ALMOND, Double Pink. The very double rosecolored flowers are borne in great profusion, fairly covering the branches. Blooms in May. 4 feet high. Each 50c.
Double White. Similar to preceding, except that the flowers are pure white. Each 50 c.
ALTHEA (Rose of Sharon). Valuable on account of their blooming in late Summer.
Double White. Nearly pure white. Extra fine. Each 50c.
Double Red. Bright rosy red. Each 50c.
variegata. Foliage handsomely variegated. Flowers double, deep purple. Each TJ̌.
AZALEA mollis (Chinese Azalea). A handsome dwarf species of especial beauty for massing and very hardy. Flowers bloom in early Spring and are unsurpassed for brilliancy of coloring. We offer here both red and yellow. Fine bushy plants with 20 to 30 buds. Each $\$ 1.00$.
Pontica (Ghent Azalea). Unequaled for variety of color and the grandest of the early Spring flowering plants. Beautiful effects produced by massing these in beds. Large-flowering plants in or-ange-pink, red, white and yellow. Each $\$ 1.00$.
vigorous and well rooted.
BENZOIN odoriferum (Spice Bush). I.. A stronggrowing shrub, with bright green foliage; Howers yellow, appearing before the leaves; has red, oblong, spicy berries; bark is aromatic. Each 50c.
EERBERIS (Barberry). Excellent for hedging. Blooms in the Summer, and the flowers are succeeded by bright-colored fruit lasting till early Vinter. Specimen plants of the following. Each 50 c ., doz. $\$ 5.00$.
vulgaris purpurea. A choice variety with purple foliage and fine for massing.
Thunbergii. Foliage drooping and turning in Fall to orange and crimson. Berries very numerous and bright red. See, also, Hedge Plants.
BRIDAL WREATH. See Spiræa prunifolia.
CALYCANTHUS floridus (Carolina Allspice). L Fine and glossy foliage; pineapple-scented, choco-late-colored flowers all Summer; leaves dark green above and pale grayish green beneath; a favorite shrub. Each 50c.
CARYOPTERIS Mastacanthus (Blue Spiræa) D. One of the best Fall-blooming, low-growing shrubs, with flowers of rich lavender-blue. In New England the tops are cut back by the Winter; necessary to protect with some covering. Each 50c.
CHIONANTHUS Virginica (White Fringe). One of the most ornamental of shrubs, producing racemes of fringe-like flowers. June. Each 50c., doz. \$5.00.
CLETHRA alnifolia (Sweet Pepper Bush). M. Shrub with rich green foliage and spikes of fragrant yellowish white flowers throughout the season. It thrives in shady damp places. Each juc.
CORNUS alba (Siberian Dogwood). L. Shrub with erect stem, good clean foliage and bright bloodred branches; useful for shrubberies. Each 50 c .
Mas, or mascula (Cornelian Cherry). L. Handsome shrub of dense growth, with glossy foliage; very attractive in early Spring with its yellow flowers, and again in the Fall with shining scarlet fruit. Each 50c.
sanguinea var. elegantissima variegata. M. One of the finest variegated shrubs; slow-growing; leaves broadly margined with white, contrasting strongly with the deep red bark. Each Tū.
sericea (Silky Dogmood). M. This reddish stemmed sort is a late bloomer, and its corymbs of white flowers appear about the close of June. Each 50c.
CYDONIA Japonica (Japan Quince). M. A shrub with spreading spiny branches. Glossy leaves; flowers are a deep scarlet, in clusters. The Quince-shaped, fragrant, golden yellow fruit remains a long time in Summer. Each 50c.
DAPHNE cneorum. A hardy evergreen plant, forming with the closely set glossy narrow leaves a most beautiful carpet effect. Blooms from May till late Summer. Flowers are bright pink, borne in clusters and very fragrant. Each $\overline{7} \mathrm{c} c$.
DESMODIUM penduliflorum (Sweet Pea Shrub). A most magnificent shrub, being covered from first of September till frost with red pea blossoms in enormous quantities. In fact, so many flowers are on the branches that they give to the plant a drooping effect which greatly enhances its beauty. Grows to a beight of about 4 feet. Each 50c.

KALMIA LATIFOLIA (LAUREL)
DEUTZIA crenata (Single White Deutzia). Showy, white tinged pink flowers in close spikes. Vigorous growth.
candidissima plena (Double White Deutzia). I. Similar to the above, but with pure white flowers throughout. Choice.
gracilis. Slender, often arching branches. Low, dense, globular habit; flowers pure white in racemes.
var. aurea. Flowers like the D. gracilis, with golden leaves. Choice.
Lemoinei. A vigorous grower and excellent for forcing; very desirable; early bloomer; panicles of pure white flowers borne on stout branches.
Watereri. A new form of D. crenata, with very double flowers, which open flat like a Rose, and are of extraordinary size. Color a fine pink. 2 to 3 ft .50 c .
ELEAGNUS longipes (Japanese Oleaster). Growing 6 to 8 feet high. Flowers bright yellow. Stems, leaves and fruit are covered with a golden scale. Blooms in July. Each 50c.
EUONYMUS Europæus (The European Burning Bush). Large shrubs, quite hardy and valuable for their dark crimson fruits in Fall. Each 50c.
Americanus (Strawberry Bush). June. A slender-growing shrub, with shining foliage and deep scarlet berries. 3 ft . Each 50c.
alatus (Winged Burning Bush). A handsome shrub 6 to 8 ft . tall, with corky-winged branches. Native of China and Japan. Leaves oval, bright green fading in Autumn with gorgeous tones of red and crimson. A capital shrub for an isolated specimen plant, attracting attention wherever seen. 12 in .30 c ., 2 ft .75 c .
EXOCHORDA grandiflora (Pearl Bush). Flowers in May. Pure white, large, star-like and in clusters. About 9 feet high. Each 50c.
FORSYTHIA Fortunei (Golden Bell). One of our best early-flowering shrubs. Before any tree or shrub shows a leaf they burst into glorious masses of golden yellow drooping flowers. Each 50c.
suspensa (Weeping Golden Bell). Long, graceful branches drooping to the ground and covered to the tips with handsome yellow trumpet-shaped flowers in April. 8 to 10 ft . Each 50c.
GOLDEN ELDER. See Sambucus.
HAWTHORN Oxyacantha (Common Hawthorn). The celebrated English hedge plant; flowers pure white, sweet-scented, followed by scarlet fruit. Each 75c.
coccinea flore pleno (Paul's Double Scarlet Thorn). A tree of fine habit. with rich, luxuriant foliage; flowers much larger than the double red, of a deep crimson color, with scarlet shade and very double. Each $\$ 1.00$.

HAWTHORN flore pleno (Double White Thorn). A very attractive variety on account of both foliage and flowers; the flowers are small, double white. Each $\$ 1.00$.
HONEYSUCKLE, BUSH. See Lonicera.
HIBISCUS (Althea, or Rose of Sharon). The flowers appear in August and September when there is a scarcity of bloom in the garden.
Syriacus alba plena. Double white Althea. 3 ft . Each 50c.
Duchesse de Brabant. Double pink, especially fine. Each 50c.
Lady Stanley. Flowers blush white with dark center, very attractive. Each 50c.
HYDRANGEA paniculata grandiflora. The well-known Hardy Hydrangea. Flowers are borne in dense panicles, pure white when opening, but later of a purplish rose color. Excellent for massing or single specimens on lawns. Extraselected. 3 - to 5 -year-old plants. Each 50 c., doz. $\$ 5.00$.
arborescens grandiflora. New. The flower clusters are large, averaging 4 to 5 in . in diameter. Color is pure snow-white, blooming at a time when flowers are scarce. 18 to 24 in . Fach 50c., doz. \$5.00.
HYDRANGEA, Tree. A very desirable form of Hydrangea, the branches starting out 3 feet from the ground. Excellent for center plants for Hydrangea bed. Each $\$ 1.00$.
HYPERICUM aureum. Dwarf shrubs. The plant, when covered with the numerous rich yellow flowers from Midsummer to Fall, presents a most beautiful aspect. Each 50c.
JAPAN QUINCE. See Cydonia Japonica.
JAPAN SNOWBALL. See Viburnum plicatum.

## Kalmia (Laurel)

KALMIA. angustifolia (Lambkill). June. Light green, narrow leaves, with close clusters of dark red flowers. 50 c .
latifolia (Mountain Laurel). June. This lovely evergreen shrub is hardy in northern New England. The beautiful pink and white flowers are of unique shape and aspect. Borne in large clusters over broad, glossy foliage. 18 to 24 in . $\$ 1.25,2$ to $3 \mathrm{ft} . \$ 2.50$. By the carload, prices on application.

KERRIA JAPONICA-See page 139

KERRIA Japonica. One of the most satisfactory yellow-flowering shrubs we have. Blooms all Summer and in Winter its bright green branches form a marked contrast with other shrubs. Height about 4 fret. Each 50c.
Japonica fl. pl. Large double flowers, bright rellow in color. Each 50c.
Japonica variegata. Same habit as the above, with handsomely variegated leaves, making one of the best variegated plants for shrubberies and borders. Each 50c.
LILAC, Purple. One of the oldest shrubs, but still ranks among the choicest. Too well known to nend description. Each 50c.
White. A white-flowering form of the above, and just as hardy. Each 50c.

## HYBRID LILACS

We are pasing particular attention to the growing of Hybrid Lilacs. The varieties we offer this season are some of the best found in the famous collection at the Arnold Arboretum, both single and double.

## Single Named Lilacs

Alba grandiflora. Very large trusses of pure white flowers. 3 to 4 ft .50 c .
Charles X. Magnificent clusters of dark red flowers, produced in the grandest profusion. 2 to 3 ft . $50 \mathrm{c} .$, doz. $\$ 5.00$.
Frau Bertha Dammann. This produces the largest cluster of white Lilacs, of the common species known in cultivation; the flowers are of the purest white. 2 to 3 ft .50 c ., doz. $\$ 5.00$.
Louis Van Houtte. A well-known sort, with large clusters of fine, bright red flowers. 2 to 3 ft . $\overline{5} 0 \mathrm{c}$.
Ludwig Spæth. The clusters are very large and of splendid dark purple-red color, not only as buds. but eren when the blossoms are fully expanded. こ. to 3 ft . 50 c .
Marie Le Graye. A dwarf grower, and one of the finest white varieties. 2 to 3 ft .50 c .
Rubra de Marly. Purplish red, exceedingly freeflowering. 2 to 3 ft .50 c .

## Double Named Lilacs

Alphonse Lavallee. Trusses like a double Hyacinth, fine, blue, shaded to violet. 3 ft .60 c .
Belle de Nancy. Large, double pink with white center. 50 c .
La Tour d'Auvergne. Violet-purple, large, double; excellent. 50 c .
Leon Simon. Color bluish crimson; buds clear coral. 2 to 3 ft .60 c .
Mad. Casimir Perier. Large trusses of very double, creamy-white flowers. 2 to 3 ft . 75 c .
Mad. Lemoine. A grand double white variety. Vigorous habit and immense foliage. 2 to 3 ft . 75 c .
Michel Buchner. Plant dwarf, bearing at the top of all the branches. Pale lilac throughout, in halfopened blossoms, and also in the bud state. 2 to 3 ft . 75 c .
President Grevy. Petals of a cobalt-blue, with the centers more brilliant and the edges rosy. The buds are of a violet hue. 2 to 3 ft .60 c .
President Carnot. Flower, delicate tint of pale lilac, marked with white in the center. Scason of flowering very late. 2 ft . 75c.
Senator Volland. Dwarf, very brilliant; buds fuchsia-red; open flowers rose-red. 2 ft .75 c .
LONICERA Alberti, or hispida (Siberian Honeysuckle). Branches slender and drooping; foliage narrow and of a bluish color. Blooms in July, the flowers being on slender, erect peduncles, rosy pink and excredingly fragrant. Each 7.)c.
fragrantissima (Chinese Fragrant Bush Honeysuckle).

An absolutely hardy variety of strong growth, but rather straggling habit. Produces pinkish flowers in early Spring, which are very fragrant. Each 50c.

LONICERA Morrowii (Japanese Bush Honeysuckle). M. A shrub with wide-spreading branches; leaves dark green above and grayish beneath; pure white flowers in May and June, followed by bright red fruits ripening in August, lasting until Fall. Very decorative. Each $50 c$.
Tatarica (Tartarian Honcssuckle). Bears a profusion of pink flowers in June. Each 50c.
Tatarica, var. abla. Similar to the Tatarica, but with largo, pure white flowers and crimson fruit. Each 50c.
MAGNOLIA glauca (Swent Bay). Irpgular in habit; foliage thick, glossy, deep green. Flowers white and swent-scented. Wach \$2..50.
Lennei (Lenne's Magnolia). I fine variety; strong grower. Produces dark purple, cup-shaped flowers in April. Each \$2.50.
Soulangeana (Soulange's Magnolia). Small tree or large shrub. One of the hardiest and most popular of the foreign Magnolias. Blossoms in April; flowers white inside, outside petals pink. Foliage dense and glossy. Superb. Each \$2.50.
stellata; syn. Halliana (IIall's Japan Magnolia). Dwarf habit; spreading branches. Blooms earlier than other Magnolias, producing double pure white fragrant flowers, the petals of which are long and narrow. Very desirable. Each $\$ 2.50$.
MOUNTAIN LAUREL. See Kalmia.

bilus Laciniata-Sce Page 140
PHILADELPHUS coronarius (Mock Orange). Shrubs with upright branches; the pure white, fragrant fiowers are produced in clusters in June; foliage dark green. Each 50c.
coronarius, var. aureus (Golden Syringa). A graceful variety, with bright yellow foliage, which retains its color throughout the season; very effective in shrubberies. Wach 50c.
grandiflorus (Large-flowered Syringa). L. A vigorous, upright varicts, with large, showy flowers in June; it grows rapidly. Each 50c.
Lemoinei. Ilybrid; this is a choice and graceful variety; produces fragrant, pure white flowers in clusters in June. Each 50 c.
PRUNUS maritima (Beach Plum). A handsome plant because of the great profusion of its early Spring bloom; the fruits when produced are also ornamental; the flowers are white, followed by bright crimson fruit. Each 75c.
PYRUS arbutifolia (Chokeberry). A beautiful densely branched shrub, bearing clusters of white flowers in May, followed by extremely ornamental red berries. Each 50c.

RHUS (or Sumach) aromatic (Fragrant Sumach). Small yellow flowers in clusters or short spikes appear before the leaves. In Autumn the foliage turns to a dark crimson. Each 50c. copallina (Shining Sumach). Beautiful foliage of lustrous green in Summer, changing to rich crimson in Autumn. Produces heads of greenishyellow flowers in August. Each 50c.
Cotinus (Purple Fringe, or Smoke Tree). The large masses of misty, purplish flowers which this bears in June give it the name of Smoke Bush. The leaves change to varying colors in Fall. Each 50c.
grabra (Smooth Sumach). June. Excellent foliage, topped in Autumn with prominent crimson beads of seed. 4 to 5 ft . Each 50c.
var. laciniata (Cut-leaf Sumach). An ornamental variety similar to glabra, its leaves deeply cut. Each 50c.

RHODOTYPUS kerrioides (White Kerria). A bushy shrub, bearing snowy-white flowers in May; shiny black seeds. Thrives in all soils. From Japan. Each 50c.
RIBES aureum (Missouri Currant). May. Early yellow flowers in showy racemes. Glossy foliage, which gives bright Autumn tints. 3 to 4 ft . Each 40c.
RUBUS odorata (Flowering Raspberry). All Summer. A noble plant, with leaves 6 to 12 inches broad, and pink-purple blossoms 2 inches across, in clusters, which continue to bloom all Summer. Very fragrant. One of the most useful plants for partially shaded places, for rustic planting, or for groups. Each 35c.
SAMBUCUS Canadensis (Common Elder). A well-known native shrub with light green foliage. Flat heads of white flowers in June and July, followed by reddish purple berries in Autumn. Very hardy. Each 35 c .

## HARDY RHODODENDRONS

rHododendron, catawbiense alba
This well known class of Hardy Plants attract endless attention during their flowering period, with their broad, dark green foliage, and their great trusses of gorgeous tinted flowers, varying from pure white to intense crimson. It is important and profitable to the buyer to use only tested varieties and those grown upon hardy stock, even at a little higher cost. In preparing a bed for Rhododendrons, locate it, if possible, in a spot partially sheltered from intense heat in Summer and from the cutting winds in Winter. The latter can be artificially met by using evergreen boughs as a Winter covering. The best soil for Rhododendrons consists of sods, well rotted manure, sand and a large amount of leafmold, well mixed for retaining moisture to protect from Summer droughts. Heavy mulching or covering of beds in Summer is an execellent preventive, and in dry weather the beds must be thoroughly soaked. Pinch off all seed pods after flowering, in order to get good buds for next season. In the Fall, mulch the beds a foot or more with leaves, and if these can be left to decay, it is advisable to do so.
Rhododendron maximum (Great Bay). July.
This is the noblest of all our native shrubs, and is absolutely hardy from Vermont to Georgia. It has the most beautiful foliage of any kind of Rhododendron, it being about twice as large as that of other sorts, and very thick and smooth. Forms a round broad bush from 6 to 15 ft . tall. Flowers pink and white.

Abraham Lincoln. Rosy crimson.
Album elegans. Blush, changing to white.
Atrosanguineum. Intense blood-red.
Boule de Neige. Pure white; very hardy.
Caractacus. Rich purplish crimson.
Charles Bagley. Cerise pink.
Charles Dickens. Dark scarlet.
Delicatissimum. Blush-white, edged pink.
Everestianum. Rosy lilac, spotted red.
General Grant. Crimson-pink.
Giganteum. Bright rose.
Gloriosum. White; bold flowfrs and good foliage.
H. H. Hunnewell. Dark crimson.

John Spencer. Clear violet rose.
Lady Armstrong. Pale rose, beautifully spotted
Lady Clermont. Red, shaded crimson.
Mrs. Milner. Rich crimson.
Parson's gloriosum. Pale lavender.
Parson's grandiflorum. Bright carmine.
President Lincoln. Reddish purple.
Roseum elegans. Vivid rose; beautiful.

SAMBUCUS，var．aurea（Golden Elder）．Vigor－ ous spreading habit．Distinct by reason of its yel－ low foliage．Requires full sun，when it is one of the best of the yellow shrubs．Each 50c．
SMOKE TREE．See Rhus Cotinus．
SPIR无A Anthony Waterer．Flowers scarlet－ crimson，blooming profusely from June to Octo－ ber．Strong plants．Each 50c．
opulifolia aurea（Golden Spiræa）．One of the best of our yellow－leaved shrubs．Golden－yel－ low all Summer． $21 / 2$ to 3 ft ．Wach $3 \overline{\mathrm{~s}} \mathrm{c}$ ．， 10 $\$ 2.50,100 \$ 20.00$ ．
prunifolia（Bridal Wreath）．One of the best and earliest blooming shrubs．Flowers double，white and very abundant along the stem．May． 6 to 7 ft ．Each 50c．
Thunbergii．Flowers are pure white and borne along the branches in early Spring． 4 ft ． 50 c ．
Van Houttei．The finest white Spirea．Flowers borne very heavily on branches in June． 4 ft ． high．Each 50c．
STEPHANANDRA flexuosa．One of the finest Japanese shrubs；of graceful habit and spread－ ing，drooping branches；handsome，deeply cut foliage；in June pure white flowers appear in panicled racemes．Each 50c．
SYMPHORICARPUS racemosus（Snowberry）． Smooth shrub，with slender branches，usually bending under their load of white，waxy berries， which appear in Autumn；the flowers are rose－ colored，in loose racemes in July．Each 50 c．
vulgaris（Indian Currant）．Low－growing，spread－ ing，graceful habit；foliage attractive；noteworthy from the beauty of its clusters of red berries． Each 50 c．
SYRINGA．See Philadelphus，also Lilac．
VIBURNUM Opulus（High－bush Cranberry）． One of the best shrubs for general planting．It has red berries resembling cranberries，which re－ main until early Winter．Each 50c．
sterilis（Common Snowball）．A well－known shrub of large size，producing large，snowball－ like flowers in May．Each 50c．
plicatum（Japan Snowball）．A native of North China．It has handsome plicated leaves； globular heads of pure white flowers in June．It surpasses the common Snowball in many respects． Each 50c．and 75 c ．
tomentosum（Single Japan Snowball）．Fo－ liage resembles the Japan Snowball；flowers white，in flat racemes and in great profusion．It is perfectly hardy，vigorous and free－blooming． Each 50c．

SPIREA VAN HOUTTEI

WEIGELA ROSEA
WEIGELA candida．One of the best．Flowers pure white，borne in profusion at intervals throughout the Summer and Autumn．5 to 6 ft ． Each 50c．
Eva Rathke．An erect，free－flowering Weigela； flowers brilliant crimson，a beautiful，distinct clear shade．Each 50c．
rosea（Rose－colored Weigela）．From China． Erect，compact growth．One of the finest．Has rose－colored flowers in June．Each 50c．
floribunda．Profuse bloomer；flowers are dark red．A fine variety．Each 50c．
variegata．A dwarf form with variegated leaves： Flowers deep rose．Each 50c．
WHITE FRINGE TREE（Chionanthus Virginica）． A large shrub or small tree，with large heav $\vec{y}$ leaves almost hidden in Spring by a thick mist of fragrant，white，drooping flowers．One of the choicest shrubs for a lawn ornament．Each 50c．

# SMALL FRUITS 

## Blackberries

To keep a Blackberry bed in good productive condition, the old, weak and dead wood should be cut out every season to give strength to the young shoots for the next year's bearing. In Spring the weakest suckers should be removed, leaving five or six of the strongest in each hill; the ground should be spaded and a top dressing of manure given. Rows 5 feet apart and plants 4 feet apart in the rows.

## \$1 per doz., \$5 per 100

Agawam. Sweet, medium size. Early.
Eldorado. Extra fine and very hardy, large, sweet berry.
Erie. One of the best; large and productive. Early.
Kittatinny. Large; one of the best. Medium.
Iawton. Large, sweet and fine. Late.
Snyder. Medium size; very fine. Medium.
Wachuset. Fair size, good quality. Comparatively free from thorns. Medium.
Wilson, Jr. Large, excellent. Early.

## Currants

\$1.25 per doz., \$8 per 100
Black Naples. Large black for preserves.
Cherry. Large, red, popular sort.
F'ay's Prolific. Largest and finest red.
Red Cross. Excellent quality, good size and very prolific.
Versaillaise. Large, red, excellent.
White Grape. Very large, white.

## Gooseberries

Each 25c., doz. $\$ 2.50$
Industry. An English variety with large dark red fruit, free from mildew.
Red Jacket. An American variety with large rubyred fruit, fine flavor and free from mildew.
Pearl. Prolific sort; free from mildew. The fruit is large; light green and fine quality.
Downing. Whitish green; prolific.

## Grapes <br> HARDY VARIETIES

## 50 cts each, except where noted Black

Concord. Large, always reliable. Medium.
Eaton. Very large, new. Medium.
Hartford. Large and productive. Early.
Campbell's Early. Very large berry and clusters, rich flavor and very sweet.
Moore's Early. Large, fine quality. Early.
Wilder (Rogers' No. 4). Very large. Medium.
Worden. Large, excellent quality. Early.

## Red

Brighton. Large, best quality. Early.
Delaware. Small, delicious. Late.
Ionia. One of the finest table Grapes, high flavor and long keeper. Late.
Vergennes. Large, splendid. Medium.

## White

Empire State. Tender. Medium.
Green Mountain. One of the best. Early.
Moore's Diamond. Large, excellent. Early.
Niagara. Large and productive. Medium.

## FOREIGN VARIETIES

For growing under glass, strong planting canes $\$ 3$ to $\$ 4$ each; fruiting canes $\$ 5$ to $\$ 7$ each.

## Black

Alicante. Very large, fine quality.
Black Hamburg. The best for general use.
Gros Colman. Very large, sweet and juicy.
Madresfield Court. Large, rich Muscat flavor.

## White

Bowood. Large, with a sweet Muscat flavor.
Golden Chasselas. Large, excellent sort.
Golden Hamburg. Large bunches; one of the best. Muscat of Alexandria. A delicious variety.

## Raspberries

Treat and cultivate as recommended for Blackberries $\$ 1$ per doz., \$5 per 100.
Clarke. Large, red, firm; one of the best.
Cuthbert. Medium to large, red, sweet.
Marlboro. Popular red sort. Early and hardy.
Shaffer's Colossal. Large, purplish red; fine.
Loudon. Very prolific; one of the hardiest and best red sorts.
Golden Queen. Large, yellow and firm; fine quality.
Gregg. Large, black cap, great bearer.
Mammoth Cluster. Large and productive, black cap.
Souhegan. Large and early, black cap.

## Strawberries

The Strawberry will grow in any good garden soil where the ground has been thoroughly prepared. For family use we recommend planting them in double rows, 1 foot apart each way and 5 feet between the double rows, allowing a sufficient number of runners to grow into the wide passage to cover about $11 / 2$ feet on each side; all the rest should be pinched off. It is advisable to cover the plants in Winter with litter which should be removed as soon as the plants commence to grow in Spring.
Iayer plants in Spring, \$1 per 100, \$7 per 1000, except where noted. Pot-grown plants after August 1, $\$ 3$ per 100, $\$ 25$ per 1000 .

## EXTRA EARLY VARIETIES

Excelsior. One of the best extra early varieties; vigorous, healthy grower; glossy, dark red color. Success. Although this is one of the earliest, it holds out well during the strawberry season; globular form, bright scarlet, fine flavor.
Texas. A strong grower; a good shipper; fruit medium large, crimson, very productive.

## MEDIUM OR SECOND EARLY

Abington. The fruit is of large size, bright red in color, very solid and of excellent flavor.
Brandywine. Famous among commercial growers for its quality as a shipper. Color blood-red; round; yields very large crops of finest quality berries.
Clyde. A strong grower; extra large fruit of mild flavor; light crimson color.
Glen Mary. One of the best strawberries for the home garden. Extra large and productive; twelve specimens will fill a quart; color dark, glossy crimson, fairly firm and of excellent quality.
Golden Gate. A strong growing variety, bearing rich, crimson fruit without green tips, and quality equal to the best; seems to bloom early and late.
Heritage. The berries are long in shape and extremely attractive; extra large and of delicious flavor; a very heavy yielder; color crimson.
Elondyike. Color dark red; conical, having the long neck typical of the very sweet berry; deliciously sweet in flavor; extra heavy yielder; one of the best shippers.
Mark Hanna. (P.) Exceedingly large size, attractive in color, and excellent quality; very prolific.
Marshall. As an exhibition berry and for home use it is the leader; it captures the prize wherever exhibited. The color is a rich, glossy crimson that everyone admires; the quality is excellent and it is a strong grower.
New York. The berries are large, of conical form, dark red color, and of remarkably sweet flavor.
Parson's Beauty. Fruit is large and mild in flavor, of conical shape, bright red color; heavy yielder.
Sample. (P.) A variety much used for market; is a heavy vielder of large berries; excellent flavor.
Senator Dunlap. Color dark red; top-shaped; fruit large, rich flavor; yields immense crops of high quality fruit.

## IATE TO VERY LATE

Belmont. It is considered by many to be the finest late berry; an excellent keeper.
Chesapeake. Fruit extra large and very smooth, color crimson to dark and of rich aromatic flavor.
Commonwealth. This is the latest of all strawberries and should be in every home garden. An extra large berry, deep, rich color.
Gandy. Color bright crimson and very glossy; best results when grown on moist soil.
Minute Man. (P.) Is a vigorous grower, very productive, fruit of crimson color, excellent quality.

## FRUIT TREES

## APPLES

The following list of Apples embraces varieties which have been tested, and can be recommended as the very best for general cultivation. Most all Apples are furnished in standard sizes; occasionally calls are made for dwarf trees, which can be supplied.

## First-class Standard Trees, 5 to 7 ft., 75c. each, $\$ 8.00$ per doz.

Extra First-class, 7 to $8 \mathrm{ft.} \$$,1.00 each, $\$ 10$ per doz. Dwarf Trees on Paradise stock, 2 to 3 ft., 75c. each, $\$ 8.00$ per doz. These are useful for small gardens, and usually bear the third year after planting.

## SUMMER APPIES-Ripening August.

Early Farvest. Moderate growth, medium to large; yellow; tender, rather acid; very good.
Golden Sweet. Free growth; large; yellow; tender; sweet, rich; very good.
Red Astrachan. Free growth; large, roundish; deep crimson, juicy, rather acid; good; very hardy.
Sweet Bough. Moderate growth; large; pale yellow, tender, juicy, sweet; very good.
Tetofsky. Moderate growth; Russian; medium; yellow and red; juicy, sprightly acid; good.
Williams' Favorite. Moderate growth; large, oblong; red; rich and excellent.
AUTUMN APPLES-Ripening September and Oct.
Alezander. Moderate growth; Russian; very large and handsome; crimson; crisp, sub-acid; good.
Fall Pippin. Free growth; very large; yellow; tender, rich; very good or best.
Fameuse, or Snow. Vigorous growth; medium; deep crimson; tender, sub-acid, melting, delicious.
Gravenstein. Vigorous growth; very large; striped; juicy, tender, crisp, rich, sub-acid; very good.
Porter. Moderate growth; medium to large; yellow; fine grained: slightly sub-acid; very good.
Eed Bietigheimer. Free growth; one of the largest and handsomest Apples; purplish crimson.
WINTER APPLES-Ripening December to March.
Baldwin. Vigorous growth; large; bright red; crisp, juicy, sub-acid; the most popular market sort.
Ben Davis. Vigorous growth; large; striped; moderately juicy, sub-acid; good; highly esteemed.
Eubbardston. Free growth; large; striped red and yellow; tender, juicy, rich, slightly sub-acid; very good.
McIntosh Red. Vigorous growth; handsome; very good; hardy. Ripening November to February.
Northern Spy. Vigorous growth; large; striped red; tender, juicy, mild, sub-acid; very good.
Roxbury Russet. Free growth; medium; greenish; rich, sub-acid; good; late keeper.
Tolman's Sweet. Free growth; medium; yellow; firm, rich, sweet.
Tompkins King. Vigorous growth; large; redstriped; tender, juicy, vinous; very good.
Wolf River. Very large; beautiful red in the sun, on a yellow ground; strong grower.

## CRAB APPLES

Standard Trees, 5 to $7 \mathrm{ft} ., 75 \mathrm{c}$. each, $\$ 8.00$ per doz. Hyslop. Large size; dark crimson, with bloom; very showy and most beautiful of all the class.
Transcendent. Of the largest size of this class of Apples; red; showy, excellent and very handsome.
Whitney. Smooth, glossy green, splashed with carmine; flesh firm, juicy and rich; a great bearer.

## PEARS

Standard Pears, 5 to $7 \mathrm{ft.g} 75 \mathrm{c}$. each, $\$ 7.50$ per doz. SUMMER PEARS.
Bartlett. Vigorous growth; large; yellow and red; juicy with a rich, musky flavor. September.
Clapp's Favorite. Vigorous growth; very large and handsome; yellow and crimson. Ripening August.
wilder. Skin bright yellow; flesh rich creamy color and virtually coreless.

## AUTUIVEN PEARS.

Anjou. Very large; greenish yellow; melting, buttery, juicy, sprightly; valuable Winter Pear.
Bosc. Large; russety; buttery, rich, high-colored; best. Each $\$ 1.50$.
Clairgeau. Free growth; very large; handsome and showy; yellow and red; juicy, vinous.
Howell. Vigorous growth; large; handsome; sweet.

Louise Bonne of Jersey. Vigorous growth; large; yellow and red; melting, buttery, rich; very good.
Seckel. Moderate growth; medium; brown; juicy, melting and buttery; of the highest flavor.
Sheldon. Vigorous growth; large; russet and red; melting, rich, delicious; very good. October.

## WINTER PEARS.

Dana's Hovey. Small, but of fine quality.
Lawrence. Moderate growth; medium to large; golden yellow; melting, pleasant, aromatic.
Winter Nelis. Medium; russet; melting, buttery and rich; one of the best early Winter Pears.

## DWARF PEARS

3 to 4 ft ., 75c. each, $\$ 8.00$ per doz.
The following varieties are particularly recommended for cultivation:
Bartlett, Beurre d'Anjou, Clapp's Favorite, Duchesse d'Angouleme, Fowell, Lawrence, Seckel, and Wilder's Early.

## CHERRIES

Standard Trees, 2 to 3 years, 75c. each, $\$ 7.50$ per doz.
Black Eagle. Moderate growth; large; black; tender, rich, juicy; best. Ripening first of July.
Black Tartarian. Vigorous growth; very large; pur-plish-black; one of the best. Ripening June.
Coe's Transparent. Vigorous growth; medium; pale amber and red; one of the best. Ripening June.
Downer's Iate. Vigorous growth; rather large; light red; tender and juicy; good. Ripening first of July.
Governor wood. Vigorous growth; medium; clear light red; tender and delicious. Ripening June.
Windsor. Vigorous growth; large; liver-colored; very firm; very good; a very valuable variety.

## PLUMS

Trees, 5 to $7 \mathrm{ft} ., 75 \mathrm{c}$. each, $\$ 7.50$ per doz.
Bradshaw. A very large, oval, bark violet-red; juicy, sweet and good; a valuable market variety.
Coe's Golden Drop. Very large; light yellow; rather firm, rich, sweet and good; adheres to the stone.
Lombard. Medium oval; violet-red, juicy, pleasant and good; and very productive.

## JAPAN PLUMS.

Abundance. Lemon-yellow ground, overspread with bright cherry, and with a heavy bloom; large.
Burbank. Large and beautiful; clear cherry-red, with a thin lilac bloom; flesh a deep yellow, very sweet.
October Purple. Large, round fruit; dark, reddish purple-yellow; flesh of most superb quality.
Wickson. Deep maroon-red, covered with white bloom; flesh fine texture, firm, sugary and delicious.
Yellow-Japan. Lemon-yellow ground; nearly overspread with bright cherry and heavy bloom.

## PEACHES

Trees, 50c. each, $\$ 4.00$ per doz.
Champion. Handsome creamy white with red cheek. It is of large size and of very superior flavor
Crawford's Early. Very large; yellow; juicy, melting; freestone. Ripening end of September.
Crawford's Late. Very large; yellow; juicy, good; freestone. Ripening end of September.
Crosby. Considered the best variety introduced for years. Grown extensively through New England. Flberta. Large, light-colored yellow Peach; juicy, well flavored; finest yellow freestone.
Hale's Early. Medium, white; very good. Ripening middle of August.
Mountain Rose. Large; white and red; juicy; good. Ripening end of August.
Oldmixon Free. Large; greenish white and red; juicy and rich. Ripening middle of September.
stump the World. Medium to large; red and white, good. Ripening middle of September.

## QUINCES

Trees, 3 to 4 ft., 75c. each, $\$ 7.50$ per doz.
Apple, or Orange. Large, roundish; bright goldenyellow; very productive.
Bourgeat. One of the finest yet offerea. Color, rich golden, and quality extra good. Extra large.
Champion. A vigorous and productive variety. Ripening very late.
Bea, or Rea's Mammoth. A very large and fine variety of the Orange Quince. One of the best.

## FERTILIZERS

## For Lawns

Bone and Wood Ash Fertilizer for Lawns: The value of bone and wood ashes is appreciated by every one. Bone however, is not a complete fertilizer, as it lacks potash. Ashes are not a complete fertilizer, as they lack both phosphate of lime and ammonia. The two combined, however, supplement each other and make a complete, balanced fertilizer. $\$ 2.00$ per 100 lbs., $\$ 35.00$ per ton. Canada Unleached Hard Wood Ashes. They give to the grass a rich, dark shade of green, and will destroy many of the insects that are injurious to grass roots. A superior lawn dressing. $100-1 \mathrm{~b}$. bags $\$ 1.25,{ }^{2} 00-\mathrm{lb}$. barrels $\$ 2.25$, per ton in barrels $\$ 20.00$, per ton in bags $\$ 18.00$. In carload lots, minimum weight 20 tons, $\$ 16.00$ per ton, in bulk; $\$ 18.00$ per ton in $100-1 \mathrm{~b}$. bags delivered at any station in Massachusetts, Vermont, New Hampshire, Rhode Island or Connecticut, or any station in Maine, except points on the Maine Central R. R.

Lawn and Garden Dressing. For lawns, grass lots, kitchen-gardens and flower-beds. This superior dressing is made from chemicals, and is so prepared that it acts gradually throughout the season, producing a luxuriant growth of grass of a rich green color. It is far superior to lumpy strawy manure, which disfigures the lawn and gives off an offensive odor. It is nearly odorless, and is easily applied. $10-\mathrm{lb}$. bag for 1000 sq . ft. 50 c ., $25-\mathrm{lb}$. bag for 2500 sq . ft. $\$ 1.00$, $50-1 \mathrm{~b}$. bag for 5000 sq . ft. $\$ 1.75,100-\mathrm{lb}$. bag for $1 / 4$ acre $\$ 3.00$, ton $\$ 50.00$.
Pure Sheep Manure, "Fiske's Brand." This is a pure natural manure and the most nutritious food for plants. It is the best of all manures for mixing with the soil for greenhouse plants. It makes the richest, safest, and quickest house plants. It makes the richest, safest, and quickest effects. For flower and vegetable gardens, and as a top effects. For flower and vegetable gardens, and as a top
dressing for lawns, it is unequaled. We handle large quantities of sheep manure direct from the corrals in the West. It comes to us in the natural state and we have it ground here in Boston. We know that it is as pure as can be obtained. 5 lbs. 25 c ., 10 lbs .40 c ., $100 \mathrm{lbs} .$, $\$ 2.50$, ton $\$ 40.00$.
Wizard Brand" Pure Pulverized Sheep Manure. We are sole distributors for Boston and vicinity of the above brand of sheep manure. Pure sheep manure is the best and strongest in fertilizing and enriching elements of and strongest in fertilizing and enriching elemertilizers, containing, as it does, nitrogen, phosphoric acid, ammonia and potash in liberal proportions. It is three times stronger than cow manure. Sheep manure is excellent for lawns, railroad stations, golf greens, general garden, flower beds, house plants, trees, hothouses, public parks, fruits and all farm products. Lb. $10 \mathrm{c} ., 5$ lbs. 25 c ., 10 lbs. 40 c ., 25 lbs .75 c ., full large barrel $\$ 4,00$.

## Plant Food for House Plants

Bowker Plant Food. It is made expressly for flowers grown in house or garden. . It produces a healthy growth and early flowering. Pkt. 15 c . and 25 c ., by mail. 25 c . and 45 c .
Ferti-Flora. A liquid fertilizer for potted plants. No stronger solution of fertilizer elements can be maintained at Winter temperature without using unsafe mineral acids. Bottle 25c.; unmailable.
Imperial Plant Food Chemicals. Rich in phosphates, nitrogen and potash. Odorless.
Packages containing Will make
 100 lbs . 7,200 9 oz. (biscuits) Directions with each package.
Sheep Manure for Housc Plants. 1 lb . pkg. 10c., 5 lbs .25 c.

## Ground Bone, Phosphates, Etc.

Acid Phosphate. 14 to 16 per cent. soluble and availab!o phosporic acid. 100 lbs . $\$ 1.00$, ton $\$ 17.00$.
Dissolved Bone Black, containing 12 to 14 per cent. soluble and available phosphoric acid. $100 \mathrm{lbs} . \$ 1.50$, ton, ask for special price.
Flour of Bone ground very fine. An excellent lertilizer for pot plants or beds where immediate results are needed. 5 lbs .25 c ., $10 \mathrm{lbs} .40 \mathrm{c} ., 25 \mathrm{lbs} .75 \mathrm{c}$., 50 lbs. $\$ 1.25,100$ lbs. $\$ 2.00$.
Fresh Ground Bone. It is practically raw ground bone, the only thing extracted from it being the grease, which is of no value as a fertilizer. After the greasc is extracted, the bone is dried and ground in its pure is extracted, the bone is dried and ground in
state. $50 \mathrm{lbs} . ~ \$ 1.25,100 \mathrm{lbs} . \$ 2.00$, ton $\$ 35.00$.
Grape, or Inch Bone. For grape-vines, fruit trees, shrubs and trees of all kinds. Should be used in setting out, mixed with the soil to the depth of a foot or more. In bags or barrels, $21 / 2 \mathrm{c}$. per 1 b .
Plain Superphosphates. 12 to 14 per cent. soluble and available phosphoric acid. $100 \mathrm{lbs} . \$ 1.00$, ton $\$ 15.00$.

## General Crop for Farm and Garden

Blood, Bone and Potash. Ammonia 5 per cent., soluble and available phosphoric acid 7 per cent., potash 7 per cent. 100 lbs . $\$ 2.25$, ton $\$ 39.00$.
Bone and Wood Ash Fertilizer. Ammonia 2 per cent., soluble and available phosphoric acid 6 per cent., potash 2 per cent., lime 20 per cent. 100 lbs. $\$ 1.75$, ton $\$ 30.00$.
Cattle Manure, Pulverized, "Wizard Brand." One of the best fertilizers for orchards and shrubberies, at the following prices: 100 lbs. $\$ 1.50$, ton $\$ 26.00$.
Cattle Manure, Shredded, "Vizard Brand," is a good fertilizer for general use as a substitute for stable manure. 100 lbs. $\$ 1.40$, ton $\$ 23.00$.
Charcoal. Coarse and fine. Bus. 60 c., bbl. $\$ 1.25$.
CLAY'S FERTILIZER. Highly recommended by the leading horticulturists in the cultivation of fruits, flowers and vegetables for exhibition. Most productive and economical fertilizer for all horticultural purposes. Original bags 7 lbs. 75 c ., 14 lbs. $\$ 1.25,28 \mathrm{lbs} . \$ 2.25$, 56 lbs. $\$ 4.00,112 \mathrm{lbs}$. $\$ 7.00$.
Corn Phosphate. Ammonia 2 per cent, soluble and available phosphoric acid 9 per cent., potash 2 per cent. 100 lbs. $\$ 1.75$, ton $\$ 30.00$
Cotton Seed Meal. 100 lbs. $\$ 2: 50$, ton $\$ 45.00$.
Early Potato Manure. Ammonia 4 per cent., soluble and available phosphoric acid, 8 per cent., soluble 4 per cent. 100 lbs . $\$ 2.00$, ton $\$ 37.00$.
HILL AND DRILL PHOSPHATE. Ammonia 3 per cent., soluble and available phosphoric acid 9 per cent., potash 2 per cent. 100 lbs . $\$ 1.80$, ton $\$ 32.00$.
For a smail garden and general use we recommend the Hill and Drill Phosphate, for a concentrated fertilizer.
Land Plaster. Excellent for composting and fertilizing; also used for preventing bugs from destroying Cucumber, Melon and Squash vines. 5 lbs. 15 c ., 25 lbs .50 c ., 100 lbs . $\$ 1.00$, bbl. of about $350 \mathrm{lbs} . \$ 2.00$.
Market Garden Fertilizer. Ammonia 3 per cent., soluble and available phosphoric acid 6 per cent., potash 10 per cent. 100 lbs. $\$ 1.95$, ton $\$ 35.00$.
Potato and Vegetable Fertilizer. Ammonia 3 per cent., soluble and available phosphoric acid 8 per cent., potash 4 per cent. $100 \mathrm{lbs} . \$ 1.75$, ton $\$ 32.00$.
Potato and Vegetable Phosphate. Ammonia 2 per cent., soluble and available phosphoric acid 8 per cent., potash 2 per cent. 100 lbs. $\$ 1.75$, ton $\$ 30.00$.
Odorless Slag Phosphate Meal. This is a substitute for bone or acid phosphate, and is recommended very highly by Professor Brooks of the Massachusetts Agricultural College and many of our most successful farmers. Analysis 17 to 19 per cent. phosphoric acid. In original bags $\$ 1.00$ per 100 lbs., $\$ 16.00$ per ton.
SOOT, IMPORTED SCOTCH. Prevents mildew when mixed with sulphur at the rate of one-third sulphur and two-thirds soot. As a fertilizer it promotes growth and improves color of foliage and flower. Per original bag, 100 lbs. $\$ 3.00$.
Stockbridge Special Manures. The Stockbridge special complete manures were the original special fertilizers sold in this country. They are each especially adapted for the crop designated. The following are the leading brands: Corn and Grain, Grass Top Dressing, Seeding Down, Lettuce and Spinach, Celery, Asparagus, Potatoes, Onion, Roots, Pea and Bean, Vegetables, Vines, Fruit Trees and Strawberry and Small Fruits. 100 lbs. $\$ 2.00$, ton, ask for special price.
Sure Crop Phosphate. Ammonia 1 per cent., soluble and available phosphoric acid 8 per cent., potash 2 per cent. 100 lbs . $\$ 1.65$, ton $\$ 27.00$.
SWEET PEA MANURE, MACKERETH'S SPECLAL. A liberal use of this fertilizer prolongs the flowering season and saves the grower the trouble of removing the pods which do not develop when this food is regularly supplied. The plants will continue to bloom until frost destroys them. In tins, 35 c . and 75 c . each; in bulk, 5 lbs. 75 c ., $10 \mathrm{lbs} . \$ 1.25,25 \mathrm{lbs} . \$ 2.25,50 \mathrm{lbs}, \$ 4,100 \mathrm{lbs}$. $\$ 7$.
SWIFT'S LOWELL ANIMAL FERTILIZER. A Complete Manure for all Crops.. This brand is an unsurpassed all-round fertilizer, and we confidently recommend it as an unequaled crop-producer for general crops. $50-1 \mathrm{~b}$. bag $\$ 1,100-\mathrm{lb}$. bag $\$ 1.75$, ton $\$ 32$.
THOMSON'S SPECIAL CHRYSANTHEMUM MANURE. Entirely soluble and very powerful, especially suitable for top dressing for Chrysanthemums and similar plants. It is meant to be used as an additional stimulant during the growing season. A heaped dessert spoonful will be sufficient for a $10-\mathrm{in}$. pot, sprinkled over the surface of the soil and watered in with tepid water. This may be given three times during the growing season. L.b. $25 \mathrm{c} ., 7$ lbs. $\$ 1.25,14$ lbs. $\$ 2.25,28 \mathrm{lbs}$. $\$ 4.00,56$ lbs. $\$ 7.00$.
THOMSON'S VINE, PLANT AND VEGETABLE MANURE. A safo and reliable food and stimulant for every fruit bearing plant, also foliage and flower plants and vegetables. For making up a grape vine border use $1 / 2 \mathrm{cwt}$. to a ton of loam for surface dressing or 2 lbs . per yard, when applied early in the season; 1 lb . per yard after the crops are thinned. A little fine soil should be mixed with the fertilizer when roots are near the surface. 14 lbs. $\$ 1.25,28$ lbs. $\$ 2.25,56$ lbs. $\$ 4.00$, 112 lbs. $\$ 7.00$.

## FERTILIZERS-Continued

## AMMONIATES

Nitrate of Soda. 15 to 16 per cent. nitrogen. Equal to 18 to 19 per cent. ammonia, $\$ 2.75$ per $100 \mathrm{lbs} ., \$ 50.00$ per ton.
Sulphate of Ammonia. 20 per cent. nitrogen; 24 to 25 per cent. ammonia. $\$ 3.75$ per 100 lbs., $\$ 72.00$ per ton. Dried Blood. 12 to 14 per cent. ammonia. $\$ 3.50$ per 100 lbs., $\$ 65.00$ per ton.
Fine Ground IBone Tankage. 6 to 7 per cent. ammonia; 30 to 35 per cent. bone phosphate; equal to 13.75 to 16 30 to 35 per cent. bone phosphate; equal to 13.750 to 16 . per cent. phosphoric acid. $\$ 2.00$ per 100 lbs., $\$ 33.00$ ton. Fine Ground Tankage, 9 to 10 per cent. ammonia; 20 to 25 per cent. bone phosphate; equal to 11 per cent. phosphoric acid. $\$ 2.50$ per 100 lbs ., $\$ 44.00$ per ton.

## POTASH SALTS

Muriate of Potash. 46 per cent. actual potash; equal to 77.53 per cent. muriate of potash. In original bags. $\$ 2.50$ per 100 ibs., $\$ 42.00$ per ton.
Double Sulphate of Potash and Magnesia. 26 per cent. actual potash; equal to 48 per cent. sulphate of potash; 35 to 40 per cent. sulphate of magnesia, and not over $2_{21 / 2}$ per cent. chlorine. In original bags. $\$ 1.75$ per 100 lbs., $\$ 30.00$ per ton.
High Grade Sulphate of Potash. 88.75 per cent. sulphate of potash; 48 per cent. actual potash. In original bags. $\$ 2.75$ per 100 lbs., $\$ 51.00$ per ton.
Kainit. 12 per cent. actual potash; equal to 22.19 per Kainit. sulphate potash. $\$ 5 \mathrm{c}$. per 100 lbs ., $\$ 12.00$ per ton. Hard Wood Ashes. See page 146, under Lawns.

## LAND LIME

Land Lime. This lime is especially prepared for use on soil. Lime is essentially a plant food, and is a corrective for improper conditions of the soil; it also acts as neutralizer for acid soils. 2,000 to $6,000 \mathrm{lbs}$. per acre should be used on heavy soils; 1,000 to 3,000 ibs. to the acre on sandy soils, according to their need. 100 lb . bag $\$ 1.25,500 \mathrm{lbs}$. $\$ 5.00,1$ ton $\$ 14.00$. In lots of three tons or over, $\$ 12.00$ per ton. Carload lots, $\$ 7.50$ per ton, f. o. b. cars Boston.

## FARMOGERM

High-bred nitrogen-fixing bacteria. All the nitrates you need for $\$ 2.00$ per acre. Reduce your fertilizer bill 75 per cent. The use of Farmogerm on the seeds of Peas, Beans, Clovers, Alfalfa, and all other legumes, means an earlier and bigger crop and a large amount of nitrate added to the soil to beneflt future crops of other kinds. IReady to use simply by moistening the seeds before planting.
Farmogerm makes nodules on the roots of the plants. Nodules are 8 per cent. pure nitrates. Nitrates mean big crops.

Prepared for Clover, Alfalfa, garden Beans, Soy Beans, garden Peas, Canadian Field Peas, Cow Peas, Vetch, and all other legumes. In acre-sizes, $\$ 2.00$ per acre; in garden sizes, 50 c . each; Sweet Peas, 25 c . and 50 c . size. In ordering, state what legumes you wish to plant. It is impossible to explain this subject fully on a single page of our catalogue. Write for our thirty-two page book.

## POTTING MATERIALS

Cocoanut Fiber. Screened and sifted. Cuttings of tender plants can be propagated successfully and quickly-it is useful also in a mixture with potting soil. As a surface covering for flower beds in Summer, and for giving protection to the roots of somewhat tender plants during the Winter months, Cocoanut Fiber is unequaled. Qt. 10 c ., $1 / 4$ bush. 25 c ., bush. 60 c ., sack of 4 bush. $\$ 2.00$.
Leaf Mould. Is very essential for growing plants. $1 / 2 \mathrm{pk}$. 20 c ., pk. $30 \mathrm{c} .$, bush. $\$ 1.00$, bbl. $\$ 2.00$.
Orchard Peat, or Fern Root. Bbl. $\$ 2.75$, bush. $\$ 1.50$.
Potting Soil. This soil has been put to 270 degrees of heat, which absolutely destroys all insects or fungous growth in the soil, and is fertilized sufficiently for growing all kinds of plants. This soil is the same as we use in growing all our plants. $1 / 2 \mathrm{pk} .20 \mathrm{c}$., pk. 30 c ., bush. $\$ 1.00$, bbl. $\$ 2.00$.
Rotted Fibrous Peat. This has become thoroughly rotted and is invaluable for potting plants. $1 / 2 \mathrm{pk} .20 \mathrm{c}$., pk. 30 c ., bush. $\$ 1.00$, bbl. $\$ 2.00$.
Silver Sand. For mixing with potting soil and for propagating. Pk. $50 \mathrm{c} .$, bush. $\$ 1.50$.
Sphagnum Moss. We can furnish at almost any time of year, freshly gathered or dry. Bbl. $\$ 1.50$, bush. 75 c .

## REMEDIES FOR GYPSY MOTH AND SAN JOSE SCALE

Creosote Mixture. Recommended by the Massachusetts Gypsy Moth Commission. Is sure death to the eggs of the gypsy moth, tussock moth, and similar insects. Qt. 25 c ., gal. 50 c ., 5 gals. $\$ 2.00$.
Concentrated Lime-Sulphur, Bowker's. Kills San José scale, bark lice, etc., and spores lodged on the bark. Needs only to be diluted with cold water and applied while the trees are dormant before the buds show green at the tips in the Spring. One gallon makes 10 gallons of spray. 1 gal. 75 c ., 5 gals. $\$ 2.25,10$ gals. $\$ 4.00$,
 Soluble Sulphur. Used in place of lime and sulphur is a dry preparation. Will keep indefinitely in any climate; does not crystallize; does not burn; sticks like paint. Will control San José Scale in four days. Controls aphis and fungus at same time. Put up in cans. 1 lb .20 c ., $5 \mathrm{lbs} .75 \mathrm{c},, 10 \mathrm{lbs} . \$ 1.35,25 \mathrm{lbs} . \$ 2.75,50 \mathrm{lbs}$. $\$ 4.50,100$ lbs. $\$ 7.50$.

Scalecide. Sure death to the San José scale. A soluble petroleum spray for use in orchards. It is economical, effective, and acts as a fungicide. Qt. 40c., gal. \$1.00, 5 gals. $\$ 3.25,10$ gals. $\$ 6.00,30$ gals. $\$ 15.00,50-\mathrm{gal}$. bbl. $\$ 25.00$.
Tree Tanglefoot. A safeguard for trees, shrubs, etc., against the gypsy moth and canker worm. It should be applied before the foliage appears, a continuous band 2 inches in width and $1-16$ to $1 / 8$ inch in thickness being put around the trunk of the trees 3 or 4 feet from the ground. Perfectly harmless, remains sticky. $1-1 \mathrm{~b}$. cans 30 c . each, $\$ 2.75$ doz. cans; 3-lb. cans 85 c . each, $\$ 7.60$ doz. cans; $10-1 \mathrm{~b}$. cans $\$ 2.65$ each, $\$ 25.00$ doz. cans; $20-1 \mathrm{~b}$. cans $\$ 4.80$ each, $\$ 46.50 \mathrm{doz}$. cans. Write for price on larger quantities.

## Climax LawnSand DestroysWeeds

This remarkable preparation, when applied to weedy lawns, will adhere to the rough, hairy leaves of Dandelions, Plantains, etc., and, by absorbing therefrom all the sap, destroy them beyond recovery. Moreover, Climax Lawn Sand goes to the roots of smooth-bladed finer Grasses and acts as a valuable fertilizer. The most weedy and impoverished lawn will show a remarkable improvement after a single application. A booklet giving in detail all the rnerits of this wonderful weed eradicator, explicit directions for use and testimonials from every part of this country, will be gladly mailed free to any applicant

When to Apply. March, April, May, July, August, September and October are the best months, selecting a bright sunny day, with a prospect of 24 to 48 hours settled weather.

Ink, Indelible. For marking on zinc labels; small bottles 25 c . each; large bottles, 35 c .

Wood Border. $16 \times 13 / 4 \times 3 / 8$ inches $\$ 2.50$ per $100, \$ 20.00$ per 1000 .
Zinc Garden. No. 7, $23 / 4 \times 7 / 8$ in., with hole for wire 75 c . per 100. Pointed No. 4, $5 \times 1$ in., $\$ 1.00$ per 100 . No. $15,43 / 4 \times 3 / 4$ in. 75 c . per 100 . No. 2, $\$ 1.25$ per 100 .
Zinc Garden. With wire rod galvanized, 18 inches long, to which is attached a zinc label. Complete $\$ 4.50$ per 100.
Copper. Made of copper, and copper wired, indestructible and always legible. No. 1, $35 / 8 \times 3 / 4$ in., $\$ 1.00$ per 100 . No. 2, $5 \times 11 / 8$ in., $\$ 1.50$ per 100 .
A. L. U. Securely fastened on without tying; expands with the growth of plants and may be instantly moved from one branch to another. It can be written on both sides with either ink or pencil; when rubbed over with varnish the wording remains for all time. 5 in. labels, $\$ 1.00$ per 100 $\$ 8.50$ per $1000 ; 7$ in. $\$ 1.75$ per $100, \$ 9.50$ per 1000 .
Permanent Label Holder. Cast iron, $71 / 2$ in. prong to thrust into the ground, carrying an inclined, removable $3 \times 2 \mathrm{in}$. frame to hold name card; mica protected, 20 c . each, $\$ 2.00$ per doz.
Mats, Hotbed, Straw. Made by hand from the best rye straw, and in the most thorough manner. Size $6 \times 6$ feet, $\$ 1.75$ each, $\$ 18.00$ per doz. $3 \times 6$ feet, $\$ 1.25$ each, $\$ 14.00$ per doz. Special prices on large lots, and special sizes marie to order.
Mats, Hotbed, Palmer. $76 \times 76$ inches. No. 1 made of burlap, wool-filled and quilted, $\$ 1.35$ each, $\$ 15.60$ per doz. No. 2 made with burlap on one side and duck on the other, wool-filled and quilted same as No. 1, $\$ 1.60$ each, $\$ 18.00$ per doz.
Mats, Archangel. Useful in protecting from light frosts, etc. 80 c . each.
Mats, Singapore. Fiber. These are heavier than straw mats, but are said to be more durable. $\$ 2.00$ each.

## LAWN MOWERS

Victory Ball Bearing. Wihile the Victory is especlally adapted to cutting fine lawns, its long wheel base adapts it to going over lawns too rough for most mowers. Its compound triple gear permits of tize maximum strength with the minimum weight. These gears are entirely enciosed so that no dirt or cutgrass can get linto the pinlons and clog them. It has a 10 in. wheei, $5^{1 / 2} \ln$. reel, 4 blades, crucibie steei, oil tempered; lower biade is also crucibie steel, oll tempered. Of the many mowers of all makes that we repair during the year, this mower comes back with its working mechanism the cieanest. Prices; $14 \mathrm{in} .$, $\$ 8.50 ; 16 \mathrm{in} ., \$ 9.50$; $1 \mathrm{~s} \mathrm{in} ., \$ 10.50 ; 20 \mathrm{in} ., \mathrm{s} 11.50$.
Flyer. Thls gem of lawn mower construction, is so built to give a ball bearing mower at a very low price, that we can consclentiousiy sell and guarantee. It is the strongest, lightest running mower of lts ciass. Has a 9 in . wheel, $51 / 2$ in. reei, 4 blades, crucibie steel, oil tempered; lower blade is also cruclbie steel, oii tempered. Prices 14 in., $\$ 5.00 ; 16$ in., $\$ 5.25$; 18 In., $\$ 5.75$; 20 in., $\$ 6.25$.
Golf Wonder. Ball bearlng. This mower will cut putting greens, golf courses and other smooth and fine lawns better than any other mower made; it was designed especiaily for that purpose; no wheeis to tear up the sod in turning or to leave tracks. The welght of the front part of the machine is carried on a wooden rolier, $6 \frac{1 / 2}{} \mathrm{in}$. In diameter, at the rear of the cutter bar. Reel 4 in. diameter. 7 knives; lower knife, Coes laid blade, glass hard. Price 16 in., $\$ 21.00$; 18 in., $\$ 22.50$; 20 in., $\$ 24.50$.
Townsend Horse Lawn Mower. Its special features are: Triple rolis with tripie pawls in each roii, making the most powerful and instantaneous driving mechanism ever put in a lawn mower. This feature maintains the motion of the blades even in turning sharp corners. A lever beside the driver enables him to cut any height from the ground and to easily and quickly raise the biades over stones or other obstructions without stopping the horse or leaving the seat. Large rolls 15 in . in diameter insure great power and ease of movement. Prices, 30 ln . $\$ 6 S .00$; $35 \mathrm{in} . ~ \$ \$ 0.00 ; 38 \mathrm{in} . \$ 90.00$, f. o. b. factory.
Philadelplia, Style E. 4 blades, 10 in . wheel, $61 / 2 \mathrm{in}$. cylinder, train of 3 gears, double wheel. One of the lightest draft mowers manufactured; made of iron and steel. It has one special point of excellence over other mowers of this style, which consists in removing the box caps to the cylinder cutter, and removing the cutter without disturbing the frame of the mower; it therefore has a solid frame, with little trouble ln case of repairing same. $15 \mathrm{in} ., \$ 9.00 ; 17 \mathrm{in} . \$ 10.00$; $19 \mathrm{in} .$, $\$ 11.25$; 21 in., $\$ 12.50$. Philadelphia Grass Collector, (extra) 15 in., $\$ 1.70 ; 17$ in., $\$ 1.80 ; 19$ in., $\$ 1.90 ; 21$ in., $\$ 2.00$
Philadelphia, Style C. 4 blades, $81 / 2$ in. wheel, $5 \frac{1}{4}$ in. cylinder, Singie Plnion, Geared on both sides. This is a medium High Wheel Mower which is very popular, for the reason that it has $81 / 2$ in. driving wheels and is so geared that with the additional height in wheels it does good work and runs lighter. 14 in., $\$ 6.00$; 16 in., $\$ 6.75$; 18 in., $\$ 7.50$; 20 in., $\$ 8.25$. Philadelphia Grass Collector, (extra) 14 in., $\$ 1.60$; 16 in., $\$ 1.70$; 18 in., $\$ 1.80 ; 20$ in., $\$ 1.90$.
Philadelphia, Style K. 5 blades, 10 in . wheel, $61 / 2 \mathrm{in}$. cylinder, Single Pinlon, Geared on both sides. For all-round general purposes this is one of the best style mowers on the market. With lts high wheels it runs light, and with five knives it cuts smooth and even, with the principles of construction so evenly balanced that it has the greatest amount of durability. 14 in ., $\$ 7.00 ; 16$ in., $\$ 7.75 ; 18$ in., $\$ 8.50 ; 20$ in., $\$ 9.25$. Philadelphia Grass Collector, (extra) 14 in., $\$ 1.60 ; 16$ in. $\$ 1.70 ; 18$ in., \$1.80: 20 in., $\$ 1.90$.
Utica Lawn Border Trimmer. Invaluable for trimming edges of lawns, flower beds, shrubbery and places that cannot be reached with the lawn mower. Price $\$ 5.00$ each.
Coldwell Power Lawn Mower. For use on large lawns, such as are found on golf links, parks and large estates. These lawn mowers are highly recommended. Besides being great savers of tlme and expense, the beneficial and beautifying results to the lawn obtained by the constant rolling of the heavy rollers is in itself sufficient to warrant their use. Style D. $\$ 1,300$ f. o. b. factory. Style C. $\$ 850$ f. o. b. factory.
Grass Catcher. The E. Z. Catcher will fit every size of mower and conslsts of a galvanized iron bottom with canvas sides and back. The 16 in . will fit all sizes from 12 to 16 in .20 in . all sizes from 18 to 22 in . Each $\$ 1.50$
Horse Lawn Boots. For use on Golf Links, Tennis Courts and Flne Lawns. Where care is exercised in ordering by size to fit the horse's feet, perfect satisfaction will be found. Price $\$ 10.00$ per set of four.

Notice-How to Order by Size.
No. 2 boot measures inside $51 / 2$ inches, correct size for No. 2 horseshoe.
No. 4 boot measures inside $61 / 2$ inches, correct size for No. 4 horseshoe.
No. 6 boot measures inside 7 inches, correct size for No. 6 horseshoe.
Lawn Mowers. Repalring. We employ only practical men to attend to this work, those who thoroughly understand their business, and we guarantee all machinery repaired by us to do satisfactory work.
Apollo Lawn Sweeper. The greater part of the beauty of a lawn is hidden by an accumulation of dead grass, stable manure, leaves, twigs and dirt, heretofore impossible to remove. The revolving brush of the Apollo Lawn Sweeper removes all these, and promotes the growth of turl and grass. 16 in. sweep, $\$ 7.00,20 \mathrm{in}$. sweep, $\$ 8.00 ; 24 \mathrm{in}$. sweep, $\$ 9.00 ; 28 \mathrm{in}$.
sweep, $\$ 10.00$.

Oil for Lubricating. For lawn mowers, etc., in oilers, 20c.; by the quart 25 c .; by gallon 75 c .

## LAWN SPRINKLERS

Twin Comet. The body of sprinkler is made in two parts, and by means of the swiftly revolving arms and intermediate gears the upper half is made to revolve slowly, carrying the hose nozzle, from which a full stream of water is thrown far out beyond the sprinkle of the arms, thereby covering a larger space than any other stationary sprinkler. Price $\$ 5.00$.
New Comet. The two sprays can be set upright, or at any angle, and by means of a simple device inside the case they are made to revolve slowly, throwing a fine spray over a space from 5 to 25 feet in diameter as desired. By removing one of the sprays, a large stream is thrown, covering a space from 60 to 75 feet in diameter, according to the water pressure. It can be moved about by the hose or cord without shutting off the water with no possibility of tipping over. Price $\$ 3.50$.
Enterprise. An attractive sprinkler, tinned and nickel-plated. Twelve inches high with four curved arms, and so constructed that it cannot become clogged. Price $\$ 3.50$ each.
The New Century will cover with a beautiful revolving spray an area of from three to fifty feet in diameter with an equal distribution of water. Is mounted with wheels. Each \$2.50.
Jones' Combination. A greater variety of combinations of water display can be made with this lawn sprinkler than any other. Price $\$ 5.00$.
Export. These are the showiest sprinklers on the market. Wire baskets can be attached to same for catching the ball. Height 44 in., fitted with four nickel arms. Price $\$ 5.00,6$ arms $\$ 6.00$. Aetna. Is a most attractive sprinkler for the lawn. Stands 20 in. high, has four arms. Price $\$ 1.50$.
California. Stands 12 in . high on a 10 in . square base; has four arms. Price $\$ 1.25$.
Mayflower. 3 arm sprinkler, 9 in. high. $\$ 1.00$.
Midget. One of the smallest three arm sprinklers. Stands only 4 in . high. Price 75 c .
Deluge. Made of cast iron, easily moved without turning off water. 50c. each.
Little Wonder. Is the best cheap sprinkler on the market. 25 c .
Fountain or Ring Sprinkler. Made of heavy brass. Each 75 c .
Baby Fountain or Ring Sprinkler. About one-half the size of the regular Fountain sprinkler, 50 c .
Lawn Shower Sprayer. Will throw an even spray over 25 feet in diameter at a water pressure of 40 lbs . Price $\$ 2.00$.
NOZZLES.
Gem. Graduating spray and stream, by mail 60c.; 50c.
New Boston. Will throw a coarse or fine spray, or a large or small stream, as may be desired. Small 50c. each; by mail 60 c. ; large 75 c ., by mail 90 c .
Boston Rose Spray for Greenhouse. For the greenhouse, flower bed, hotbed, lawn etc. Made of brass. 65 c . eacn; by mail 75 c .
Stott's Spraying Nozzle. Fitted for $3 / 4$ in. hose connections. Single $\$ 1.00$ each; double $\$ 1.25$ each. Mail 10 c . additional.
Dakland. Will throw a solid stream or spray. 50 c . each.
Bordeaux. Throws a fine, medium or coarse spray, or can be shut off altogether. Easily disgorged; best all-round syrayer made. Price $\$ 1.00$.
Fairy. A straight stream or spray, by mail 60c.; 50c.
Garden and Lawn. A new sprayer; can be used as a straight stream, immediately changed to a spray, and can be used to spray under side of leaves of vines. $\$ 1.00$ each.
Greenhouse Hose Nozzle. 3 in. face, by mail 65 c .; 50 c . ea.; 4 in. face for $3 / 4 \mathrm{in}$. hose, $\$ 1.00 \mathrm{ea}$. ; 4 in . face for 1 in . hose, $\$ 1.50 \mathrm{ea}$. Shutoff Connection. 50 c . each.
Nozzle Holder. The hose is held firm, and can be adapted to any elevation. Wire, 25 c . : iron painted black, 50 c .
Kinney Pump Atomizer. For mixing liquid manure with clear water without interfering with the flow of the water in garden hose. It will apply from 5 to 15 gallons of liquid fertilizer per minute. $\$ 1.50$ each.
HOSE MENIDERS.

## POTS AND SAUCERS, CLAY AND EHBER.

Jiardiniere Flower Pots, Oasis. 8 days self-watering. When potting the plant first fill the pot with water and allow it to stand for 15 minutes, then turn out water and place plant in pot, packing the soil firmly to within $1 / 8$ in. of top edge of the pot. Place the pot in the reservoir and pour water into the reservoir through the lip around the top edge of reservoir, until water stands $1 / 8$ in. deep in the lip. The water supply of reservoir will last for 8 to 10 days, but it will be found more satisfactory to have an appointed day in the week for refilling the reservoir, since in that case the duty is less likely to be the reservoir, since in that case the duty is less likely to be worgotten and neglected until the plants suffer for want of with ordinary attention, will grow more rapidly, more vigorously and bloom more freely with less care than if in the usual style pot.

Raffia. The best material for tying, being very soft, pliable and strong. 20c. per 1 b .
Slanting Top Sash makes early gardening possible; made with Double Glass is the secret of success; it lets the light and heat in; it keeps the cold out. The air between the two layers of glass spaced apart protects from extreme heat and cold. Smallest size fits over an ordinary bushel box. No. 1, $19 \times 21$ in., $\$ 2.00$; No. 2, $19 \times 42$ in., $\$ 3.75$; No. 3 , $19 \times 63 \mathrm{in} ., \$ 5.00$.,
Sash for Hotbeds. These are well made from thoroughly seasoned lumber. Glazed with double tlick glass, painted 2 coats, size $6 \times 8$ in. glass, $\$ 3.50$ each. Glazed double thick, painted two coats, size $8 \times 10$ in. glass, $\$ 3.50$.
Sash for Hotbeds. Without glass; $13 / 1 /$ in., $3 \times 6 \mathrm{ft}$., $\$ 1.50$ each.
Scythe, English Lawn. Broad blade, $\$ 1.40$ each.
Scythe, American. 32 to 38 in. $\$ 1.00$ each.
Scythe Snaths. Patent swing socket, $\$ 1.00$ each
Sunlight. Two layers of glass with the dead air space enclosed between, without boards or any covering, are warmer by night than the single layer sash with boards or mats; the warmth stored in the beds from the sun is held so effectively through the night, by the air space between the two layers of glass, that even in zero no covering or uncovering of the double glass sash is necessary. All plants in hotbeds and coldframes are improved by the constant light, night and day, that reaches them through the two layers of glass in the Sunlight sash. The Sunlight sash are made of the best Louisiana red cypress and are thick and strong. They are equipped free with rustless springs that hold the glass securely. in place without putty and also permit panes to be replaced by anyone in a few minutes. These sash are all painted two coats and glazed. Price $\$ 5.00$ each at store; we deliver to any railroad station in New England in lots of 5 sash for $\$ 24.00$; 10 sash for $\$ 47.00$ Larger quantities and carload lots on application.
Bell Glasses. For growing all kinds of early vegetables or flowers out of doors and under individual miniature greenhouse. The plants are started early and transplanted out of doors. One of these Bell Glasses placed over them in the daytime amounting to a miniature greenhouse, will protect them at night from the frost. Each $\$ 1.25$; per doz. $\$ 12.00$.

## SPRAYING IMPLEMENTS

The "Auto Spray" works automatically for six to fifteen minutes, according to the nozzle opening. Has a capacity of four gallons. Eight to twelve strokes of the plunger will compress the air, and two pumpings will discharge the entire contents. Three gallons of solution or one charge, will easily cover onehalf acre of potatoes or other similar crop. Galvanized iron tank, $\$ 5.00$; brass tank, $\$ 7.25$. Fitted with Auto-Pop Nozzle. If fitted with stop cock nozzle, 90 c . less.
Auto-Pop Spray Nozzle. Simply closing the hand operates the lever, opens the valve. The lever closes automatically, the spray is in perfect control. Each, $\$ 1.25$.
Strainer for Auto Spray. The funnel part is made of copper; the strainer is of brass wire-cloth. Each, 90c
Extension Pipe. Solid brass, two feet long, 45 c .
Elbow Extension. Made of heavy brass, used in connection with extension pipe for spraying cucumbers and low growing vines. 30 c .
Auto Spray No. 3-B is designed especially for a whitewash and painting machine; it is also perfectly adapted to spraying all kinds of trees, plants, shrubs, vines, etc., and will be of the greatest value for Stock and Poultry Farms, Nurserymen and Florists, Fruit Growers, Cold Storage Plants, Factories, Packing Houses, Warehouses, etc., in fact, any and every place that requires the application of disinfectants, insecticides, fungicides, whitewash or cold water paint. The Auto Spray No. $3-\mathrm{B}$ produces the greatest power, and with the use of the extension pipe the tallest fruit trees can be sprayed. $\$ 12.00$.
Pomona. Will supply four leads of hose and eight nozzles. Its working parts are of solid bronze; has steel air chambers extending from top of sprayer to tne valve sprayer. Pump may be placed in any siae barrel. Agitator is operated by same be placed in any slae barrel. Agitator is operated by same easily removed and cleaned without disturbing any other poreasily removed and cleaned without disturbing any other por
tion of the pump. No leather packings, adjustable stroke.
Pomona Pump with Agitator and Hose Coupling. Plunger diameter $21 / 2$ in.; stroke, adjustable, 3,4 or 5 in.; double discharge, $1 / 2$ in. hose, $3 / 4$ in. pipe, without hose. Price $\$ 14.00$. This may be had in any length hose or any nozzle desired.
Fruitall Spray Pump. All working parts, including plunger, gland, valves, valve seats and strainer, are of bronze, regularly fitted with wing agitator which has proven to be the best type. Pump is held in barrel by anchor at bottom and adjustable clamp at top, fitting over end of slave.
Pump with agitator and $1 / 2$ in. hose coupling Pump with agitator and one lead of 15 ft ., $1 / 2 \mathrm{in}$. discharge hose with spray nozzle.................................
Pump with agitator and two leads of 15 ft . each, $1 / 2 \mathrm{in}$. discharge hose with spray nozzles.......................... 15.00 We supply barrel and mount spray for $\$ 3.50$ extra, list, but barrel is not furnished unless specially ordered. If Agitator is not wanted deduct $\$ 1.00$ from list. This applies to Pomona or Fruitall Pumps.
Extension Rod, Iron. 8 ft . long, made of $1 / 4-\mathrm{in}$. pipe fitted with brass stop cock on one end and threaded on other end to fit nozzle; has hand shield to protect operator. \$2.25.
Monarch. High grade sprayer for orchard work, made with two vertical cylinders and two bronze trunk plungers operated by single lever. The construction permits all gritty substances to pass through the valves without cutting the cylinders. All working parts are bronze. There is a discharge opening on each side and the pump is powerful enough to supply four leads of hose, which can be connected to these openings with a brass Y. Pump with Strainer and Hose Coupling. Diameter cylinder 2 in., suction $3 / 4$ in. hose, double discharge $1 / 2 \mathrm{in}$. hose, price $\$ 22.50$. Diameter cylinder $21 / 2$ in., suction 1 in. hose, double discharge $1 / 2$ in. hose, price $\$ 29.25$.
Gardener's Choice Sprayer. This is one of the most convenient spraying outfits for general use. As an all-round utility sprayer it cannot be beaten. It is particularly adapted for both the garden and greenhouses, also for orchard use, as well as for spraying live stock in the barn and livery stable. Purnp: Has $13 / 4$ in. brass cylinder, brass ball valves, brass seat and cage, brass plunger and our special plunger packing. The leverage is six to one; can be worked against pressure of 125 lbs. Agitator: Twin paddle type, simple and effective; stirs the liquid thoroughly. Tank and Cart: Wood tank with steel hoops and hinged wood top. Leg, tongue and handle of wrought pipe. Metal wheels, diameter 24 in., with staggered spokes and ${ }_{2}$ inch tires. Strong iron axles. Hub-to-hub measurements, 33 inches. Height to top of tank, 30 inches. Height to top of pump, 42 inches. Six feet of $1 / 2$ inch discharge hose and our incomparable Bordeaux nozzle are furnished. Price $\$ 15.00$.
Spraying Outfit, Barrel, Cart and Pump. Complete, including cart, barrel and double acting perfect barrel spray pump, with 1 in. suction pipe. Strainer, two pieces, $1 / 2$ inch discharge hose, each 5 feet long; two Vermorel nozzles and jet agitator, $\$ 23.50$.
Paragon. A portable, durably constructed greenhouse sprayer which can be operated by one man. It can be brought in close proximity to the work, thus obviating the use of hose. A patent, self cleaning strainer, makes the use of another strainer unnecessary. The nozzle has a 1-32 inch outlet, thus spreading the liquid well, covering a large surface. By adding extra lengths of pipe, spraying can be done at almost any height desired. All parts are made of the best material obtainable, all essential fittings and valves being of brass. $\$ 15.00$ each.

## SPRAYING IMPLEMENTS-Continued

Lowell Sprayer. It is both automatic and positive in its action. One charge is sufficient to expel its entlre contents. Each sprayer is thoroughly tested with both air and water pressure before leaving our factory. Having convex heads, entire contents can be drained from machine, leaving it perfectiy dry when not in use. Heads after being seamed and riveted are dipped into molten solder, making it absolutely air tight and the strongest Air Pressure Sprayer made, standing five times the air pressure necessary to operate. Tree attachment, consisting of three feet of $3 / 8$-inch $3-\mathrm{ply}$. C. I. Rubber Tubing with spray nozzle one foot long, for smali tree and shrub spraying; funnel with brass wire stralner cloth for filling, and shoulder strap for carrying furnished with each machine, also attachment to spray the underside of leaves. Capacity of tank, three gallons. Galvanized steel, $\$ 5.00$ each, brass $\$ 7.50$ each.
Simplex Sprayer is a most practical sprayer. Every machine is guaranteed to give perfect satisfaction when properiy used, and any one failing to do so within ten days wlll be taken back, and a new one replaced or money refunded. The tank is made of elther brass or galvanized iron; the brass tank is recommended because it will not rust or corrode. Capacity of tank is $31 / 2$ galions. Where the air enters the tank there is a tongue stamped from the metal which the air strikes against for every stroke with the pump. This gives the air and liquid a rotary motlon around the bottom of the tank which agitates any liquid thoroughly.
Simplex Sprayer, No. 1, (Brass Tank)...
Simplex Sprayer, No. 2, (Galvanized Tank) .. $\$ 6.75$
Simplex Double Nozzle for two rows. 5.00

Perfect Sucess Spray Pump. Brass working .............................. ber with indestructibie bronze valves; is double acting, throwing a continuous stream. Malleable iron foot rest. The Bordeaux nozzle, the best combination nozzle on earth, is furnished with Perfect Success Pump. Price $\$ 4.50$.
Johnson's Champion Force Pump. Made in a most durable manner; has a sprinkler and straight stream nozzle and rubber hose attached; throws six gallons of water per minute. \$4.50.
Standard Spray Pump. We believe this pump is the best for the party having a few large trees; it will usually spray 25 to 30 ft . high and work equally as well for small shrubs. Is used with bucket, knapsack, tank or barrel for spraying orchards, gardens, vineyards, whitewashing, disinfecting chicken houses and killing vermin on stock. Made entirely of brass, with two solid brass ball valves. No leathers, washers or suckers, no castings to rust, no leaking joints, nothing to get out of order. Warranted to purchaser for five years. Two nozzles "regular" interchangeable. No. 1 attached to No. 2 throws a spray 28 ft . No. 2 throws a solid stream 50 to 60 feet; No. 1 attached direct to pump throws a coarser spray $35 \mathrm{ft} . \$ 4.50$ each.
Little Giant Brass Spray Pump. With agitator, complete with hose and combination fine, coarse spray and solid stream nozzle, with malleable foot rest. $\$ 3.50$.
Syringes. All our syringes are brass, highly polished and lacquered, and made with the best workmanship possible.
Brass Syringes. A. Barrel 12 in. long, 1 spray and 1 stream jet . Barrel $131 /$ in. long, 1 coarse and 1 fine spray. $\$ 2.50$ 10. Barrel 18 in . long, 1 coarse and 1 fine spray, rose and stream jet with patent valves, elbow joint G. Barrel 16 in . long, 1 spray rose and $i$ stream jet and H. Barrel 18 in. long, shept brass, i........................................ 5.50 H. Barrel 18 in. long, sheet brass, 1 spray rose ........... 3.00 Cyclone. As it throws a finer spray and uses about one-tenth as much liquid as others, it is specially adapted for shrubs, potatoes, rose bushes and flowers, as the funnel on the end insures direct delivery of the spray. All brass 75c.; heavy tin 50 c .
Climax. It will spray upward or downward, which is convenient in a great many cases. It is made of heavy thn, with double brass tubes, and produces a fine mist spray. Heavy tin 50 c .
Continuous Sprayer. As the name implies, it is so constructed that it not only sprays on the downward stroke of the plunger but also when it is drawn back, thus causing a continuous mist-like spray. Tin 75 c .; brass $\$ 1.50$.
Tennant Atomizer. The receptacle is a new special design of extra heavy glass, well protected with a spring steel lantern wire guard. Holds about a quart of liquid; easily filled and washed out; contents always in sight. Two tubes are so arranged that no matter how the sprayer is held, one tube at least is always in the liquid. Will spray overhead, ceilings,
Littlubery, etc. Large size roc., small size, for house use, 50 . applying germicides and disinfectants, as its size makes it handy, and the drip catch prevents any possible chance of handy, and the drip catch prevents any possible chan
Rubber Plant Sprinkler. Made of rubber, with flat bottom and a finely perforated, detachable brass top. Very useful in bouquet making and window gardening for sprinkling; and for all purposes where a fine spray is desired. Three sizes; straight neck, $60 \mathrm{c} ., 75 \mathrm{c}$., $\$ 1.00$ each; angle neck, $90 \mathrm{c} ., \$ 1.10$ each; by mail 10 c . each additional.
Nozzle, Vermorel. Cut for $1 / 4$ in. pipe, two sprays, $\$ 2.00$. Including hose connection $\$ 2.25$. Cut for $1 / 4$ in. pipe, three sprays, \$2.75; including hose connection, $\$ 3.00$.
Nozzle, "Mistry." Superior in every way; made entirely of bronze. Price for $1 / 4$ in. pipe, $\$ 2.00$. For hose, $\$ 2.25$. A smaller size Mistry without swivel adjustment, price for $1 / 4$ in. pipe, $\$ 1.00$. Price for hose, $\$ 1.25$. Two Mistry nozzles on brass $\bar{Y}$, that can be adjusted to spray in any direction, price,
including brass $Y, \$ 4.50$.

## SUNDRIES-Continued

SEED DRILL.
The Arlington. The famous seed drill used so extensively by market gardeners in the vicinity of Boston. It has a large wheel, 28 in. in diameter, with a broad rim $21 / 2$ in. wide. Runs so easily that it can be run all day without fatigue to the operator. It sows fine seed with perfect regularity as well as the larger seeds. It is made in a strong and thorough manner, and for the market gardener is far superior to any other make. Price each, complete, $\$ 17.00$.
Greenhouse. A new seeder for sowing Radish and Beets in beds in greenhouse. Will sow both ways, by drawing towards or pushing from you. Will save price in season. Each $\$ 6.00$.
The No. 6 "Iron Age" Combined Double and Single Wheel Hoe, Hill and Drill Seeder. Whether you garden for pleasure or profit you need an Iron Age Garden Tool, and for either purpose we recommend the No. 6 Iron Age. Combined in this tool are three distinct and thoroughly practical implements, a Hill and Drill Seeder, a Double Wheel Hoe and a Single Wheel Hoe. As a Hill and Drill Seeder it opens the furrow, deposits the seed, covers it and rolls it all at one operation, either in drills or hills. The Drill is operated with great ease, is most accurate, durable and satisfactory. The seed sowing device is simple, yet very effective. The agitator is simply a revolving brush of selected bristles, which separates the seeds which may cling together, and acts as a gentle the seeds which may cling together, and acts as a
The No. 1 "Iron Age" Double and Single Wheel Hoe. The change from a Seed Drill to a Double or Single Wheel Hoe is quickly made. It stirs the soil very close to the plants without disturbing them in the least. Just think of the labor saving possibilities of an implement that enables thorough cultivation of the garden at an easy walking gait. After the plants have outgrown the use of the rakes and side hoes, or where it is desired to practice deeper cultivation, the cultivator teeth are applied. Plows may also be applied for working astride rows to turn the soil to the plants and to open furrows for manure or deep planting of seeds. Price $\$ 7.00$.
The New Model Seed Drill. The record of the "New Model" has been so entirely satisfactory, and its place as one of the leading drills has become so firmly established that we are almost tempted to discard the term "New." It is still regarded by many of the oldest and best market gardeners as "the old standby," and we heartily recommend it to those desiring a drill seeder without the combination of cultivating tools. Packed weight, 40 pounds. Price $\$ 8.00$.
No. 12 "Iron Age" Wheel Plow and Cultivator. This tool is designed to perform all work needed to be done in a small kitchen garden; plowing, furrowing, covering, hoeing, raking and cultivating. The average weight of this implement, fitted with one working tool, is but eight pounds, and therefore can be carried about the garden and used as readily as a common hoe. Packed weight, 20 lbs. Price $\$ 3.50$.
No. 19 "Iron Age" Wheel Plow and Cultivator. To meet the demand coming from some sections for a Wheel Plow and Cultivator equipped with a higher wheel than anything we have previously offered, we designed our No. 19 "Iron Age" Wheel Plow and Cultivator. In doing so it will be noticed we have kept in mind those excellent features which have made our whole line of Iron Age Garden Implements so popular, viz., lightness combined with strength. Packed weight, 22 pounds. Price $\$ 3.25$.
Cahoon's Broadcast Seed Sower. The acknowledged superiority of these machines over all others has already placed them in the front rank of labor-saving agricultural implements. A saving of four-fifths of the labor and one-third of the seed is effected by their use, and a person entirely unused to sowing by hand can use this machine with perfect success. They are warranted to give perfect satisfaction and to save their cost in less time than any other farm implement yet introduced. They are substantially built, and with ordinary care, will last many years. Price $\$ 4.50$
Seed Drill, Eureka. \$1.00 each.
Tomato Trellis Model Extension. Made of heavy galvanized wire. 20c. each, $\$ 1.75$ per doz.
Tomato Trellis. Made square of seasoned hard wood, with four smooth, planed posts and turned rods, 20 c . each, $\$ 1.75$ per dozen.
Tomato Trellis. Handy vine, round, made of wood and wire. 20c. each, $\$ 2.00$ doz.
Tomato Trellis, Wood. Round with two hoops. 12 c . each, $\$ 1.25 \mathrm{doz}$.
Tree Guards. Made of steel galvanized wire. Upright wires fastened to horizontal wires securely by clamps. 8 in. diameter, 6 ft. high, $\$ 1.00$ each.
Tree Scraper. 35 c . and 50 c . each.
Twine. Soft, for tying, very strong. 25c. per ball; $\$ 2.50$ per doz.
Twine, Jute. 6 ply., 20c. per ball, $\$ 2.25$ per doz.
Twine, Green. For smilax. 20c. per ball, $\$ 2.25$ per doz.
Twine, White. For tying. 15c. per ball, $\$ 1.60$ per doz.
Twine, Tarred Marline. Twisted. In 5 and 10 lb . balls 23c. per 1 b .
Twine. Strong, per ball. 20c.
Soft for tying vines, etc., very strong, 25 c .
Tarred Lathyarn. For making mats or tying shrubs, 17c. per lb., by the coil of 25 lbs ., 16 c .
Verbena Baskets. See Baskets, page 149.

Trellis, Wheelock's "Rust Proof." For vines of every variety. Used singly or if desired, severai lengths can be laced together side by side, making any width-elther up or down or across the veranda or house. These attain better resuits than having them made to order. Various designs of vine enclosures can be produced. It can be used for arches as weil as treliises. Two widths, 13 in . wide $12 \mathrm{c} . ; 19 \mathrm{in}$. wide 14 c . per ilneal foot.
Trellis Wire for Peas, Tomato Vines, Etc. This trellis is to take the place of ordinary brush that is used in gardens; it is almost indispensable in any weil kept garden. Practicaily indestructible and easily put up; at the end of the season it can be rolied up and stored away ready to use another year. Peas, either garden or flower, are more easily picked, and tomatoes grown on these trellises are more uniform and less liable to rot. It is equally as good for Cucumbers, Melons and other vines. Made of the best galvanized net, 4 ft . wide, ${ }_{2}^{2} \mathrm{in}$. mesh, furnished in 10 ft . lengths, with a $51 / 2 \mathrm{ft}$. long, 2 in . diameter stake at each end and one in the center; price per 10 ft .75 c .; per dozen lengths, $\$ 8.50$; per 100 lengths $\$ 70.00$.

Barrel, Hand Cart Box, Leaf Rack, all easily attached.
 Barrels ........ (All . ......................... 3.50
 Sprinkling Attachment for barrel, \$3.50.
Wheelbarrow and Leaf Rack Combined. The new device for collecting weeds and litter; it fits on any wheelbarrow, by fastening to the sides. It is made of galvanized wire, bolted to wooden posts. Capacity 10 bushels, $\$ 4.50$.

## Books on Poultry, Pigeons and Swine

Making Poultry Pay. E. C. Powell. A manual of practical information on poultry keeping. It tells what to do, why to do it, and how to do it. Illustrated. 324 pages. $5 \times 61 / 2$ inches.................... Profits in Poultry. Useful and ornamental breeds and their profitable management. This excellent work contains the combined experience of a number of practical men in all departments of poultry raising. Cloth.
The New Egg Farm. H. H. Stoddard. A practical reliable manual upon producing eggs and poultry for market as a profitable business enterprise either by itself or connected with other branches of agriculture. Cloth. .................................... Turkeys and How to Grow Them. Herbert Myrick. A treatise on the natural history of turkeys, the A treatise on the natural history of turkeys, the
various breeds, and the best methods to insure sucvarious breeds, and the best methods to insure suc
cess in the business of turlkey growing. Cloth..
quabs for Profit. W. E. Rice and W. E. Cox. This is the most complete and exhaustive work of the kind ever published on squab raising. Cloth......
Poultry Feeding and Fattening. Compiled by $G$. B. Fiske. A handbook on the standard and improved method of feeding and marketing all kinds of poultry, covering all branches, including chickens, broilers, capons, turkeys, water fowl. Cloth.
Quimby's New Bee-keeping. L . C. Root. The mysteries of bee-keeping explained. Combining the result of 50 years' experience with the latest discoveries and inventions and presenting the most approved methods. Cloth.
Harris on the Pig. J. Harris. The points of the various English and American breeds are thoroughly discussed, and the great advantage of using thoroughbred males clearly shown. Cloth.... 1.0

## Mandy Lee Incubators

Some of the advantages of the Mandy Lee Incubators. Heat adjustment from end to end, so that both ends of a large incubator may be kept the same at all times, no matter what the climate, season, weather or altitude.

Heat adjustment from center to back and front. This enables the operator to keep the temperature in the middle the same as in the front or back

Moisture measurement and automatic regulation of moisture are exclusive features for the Mandy Lee for 1912.

Automatic regulation of ventilation. This gives more regulation when heat runs high, and cuts off ventilation when heat runs low.

With our new complete automatic regulator we handle the whole thing at once. We set the regulator with certainty that it will take care of the extra heat in the day and low heat in the night. If heat runs high then heat is cut off, moisture is reduced automatically and ventilation increased automatically.

The Mandy Lee Hygrometer is the first successful instrument for measuring moisture in incubators and the only direct reading instrument, even now, as we have each detail protected with patents.

A new improvement for 1912 is the new moisture pan, with three compartments which pull out at the end of the incubator and can be removed and cleaned or refilled without opening the incubator.

In all our large incubators we now furnish small trays holding about 60 or 70 eggs each, instead of large trays holding from 140 to 200 eggs each. We supply extra, one small tray for turning the eggs.

All of thel theating pipes can be instantly removed by simply pulling them out at the end of the incubator. These should be cleaned after each hatch.

The Mandy Lee is constructed of air-dried California Redwood. We have found this wood is the best for incubator use as it does not readily crack, warp or shrink. We have also found that it is better when slowly and thoroughly dried in the open air of sunny California than when dried rapidly in the drying kiln hy steam or other artificial heat. The Heater of the Mandy Lee has many points of superiority:

A special burner with high Wick-Tube and Wide Flame Slot.

A lamp bowl all in one piece.

- A self-seating Chimney of our own invention.

A Drip Pan under the Lamp to collect any possible leakage.

A special Vent for any gas forming in the lamp.
Impossibility of filling the Lamp without first removing it from the Heater.

A perforated Sheet Metal Cylinder in the top of the Heater which puts out the lamp in case of accident.

The protecting, circular Shield guarding the body of the incubator. Full protection to every part exposed to heat by means of sheet metal and asbestos.

Our Special Incubator Catalogue gives every detail of the MANDY LEE construction and advantages. Sent Free.
Mandy Lee Indoor Brooder. The correct brooding principle is direct contact heat as provided by the long narrow hover of the Mandy Lee Brooder. This has long been recognized as the ideal hover, but the problem of heating the hover evenly from end to cnd has been the sticking point until we invented our triple pipe heating system which has proved a perfect solution. The idea of applying a soft, contact heat direct to the backs of the chicks was never incorporated into anything practical until the manufacture of the Mandy Lee. The Mandy Lee Brooder is, of outside dimensions, $3 \times 4$ feet in size. It is as large as any 200 -chick brooder on the market, but we call it only 100 -chick size; 50 chicks on each side of the hover. It will hold more. but it doesn't pay to crowd. Price $\$ 13.00$.

Secondary Brooder

## Poultry Supplies, Incubators and Brooders

The Secondary Brooder. This is a larger, more roomy and less expensive brooder for older chicks, or those from three to eight weeks of age. It is all hover and, while occupying no more floor space than the other brooder, gives fully twice the actual brooding capacity. It is simply a mother for the chicks that are too large for

Mandy Lee Fireless-(Showing Inside)

H. \& D. Brooder

Mandy Lee Fireless

the ordinary brooder but not old enough to hustle for themselves during the damp weather or cool nights. It can be used anywhere-in a poultry house, barn, shed, piano box-just so it is protected from wind and storm. Price $\$ 8.00$.
The Mandy Lee Outdoor Heated and Regulated Brooder. The new Brooder is both Brooder and Brooder-House. It not only heats, but regulates the heat. It keeps the chick comfortable at all times in roomy quarters night and day. We make the Mandy Lee Outdoor Heated and Regulated Brooder in one size only, $3 \times 4$ feet. It has a hover $16 \times 36$ inches and other floor space of 2,444 square inches-ample scratching room for even a crowded hover. Price $\$ 18.00$.
Mandy Lee Fireless Brooder. The Mandy Lee Fireless Brooders are made in two sizes, 100 -chick and 200 -chick sizes. This capacity rating means that the brooder will hold that number of newly hatched chicks, but it must always be remembered when using fireless brooders that the number of chicks that can be put in the brooder depends on the size of the chicks and the outside temperature. The Adjustable Hover on the Mandy Lee Fireless Brooder enables the handling of this temperature adjustment conveniently. Price, 100 -chick size $\$ 5.00$, 200-chick size $\$ 8.00$.

Sixty-Chick Heated Brooder. Accommodates nicely more than 60 chicks. Lamp, heater, hover construction, cloth and metal parts, and width exactly the same as our "Regular" brooder. Length of hover 30 inches; openings in swinging door covered with 60 -mesh brasswire cloth, and, when lowered, either folds directly against hover opening or rests on flanged front of runway, making a rat and cat-proof exercising space for the chicks. This Brooder is just the thing to go with a $60-\mathrm{egg}$ or 75 -egg Incubator. For larger machines we recommend the "Regular" Mandy Lee and the Secondary Brooder. The Secondary is intended, as its name indicates, for chicks two or three weeks old, or after they have been through the Regular Brooder. In a warm situation the Secondary Brooder can be used for newly hatched chicks. It has a very large capacity. Will hold 200 newly hatched chicks.
Incubators and Brooders. We cannot begin to do justice to the Mandy Lee Incubators and Brooders in so small a space but we have a catalogue especially on these machines, telling of their work more in detail. We should be pleased to mail one of them on application.
The H. \& D. Brooder. Of waterproofed fiber board. The hover is suspended from the roof of the brooder, allowing an air space of ample capacity between the top of the brooder and the top of the hover. This hover is also an inch and a half from all sides of the brooder walls, so as to allow the free circulation of air around the hover chamber, then out through the ventilation holes in the top of the brooder. The ventilation of the brooder can be varied at will by sliding the inner member backward or forward, closing the ventilating holes in the top of the brooder. You will note from the cuts that the H. \& D. Brooder has two yards, one on either side, and for the first five or six days but one yard is used, the openings to yard No. 2 being closed by pieces of board which are supplied with the brooder. After the second or third day, yard No. 1 can be extended a trifle more to teach the chickens to go in and out of the brooder. Price $\$ 2.00$ each.
The International Hover possesses many advantages not found $n$ any other Brooding Device. Send for Special Circulars. Price $\$ 8.50$ each.
Buckeye 50-Egg Incubator "Style A." Complete with Nursery. This Incubator is constructed with double walls throughout, is finisheed in cherry with two coats of varnish, and presents the appearance of a piece of high-class furniture. It is complete, all ready to use. Price $\$ 8.00$.

## Poultry

Eggs, for Hatching. We contract each year with reliable breeders who have pens that are mated with careful attention to fertility of eggs. We carry eggs in our store during the month of April; other months we sell direct from the pens after receiving the order. Shipments are carefully inspected, packed and forwarded by express. While we take the greatest care and look to the purity of the stock, fresh eggs, careful packing, etc., there are so many risks involved, we cannot, at this price, give any guarantee whatever regarding results.

If you would have healthy fowls use freely the following remedies.

| Lee's Lice Killer | The original liquid liee killer with many imitators but no equal. Guaranteed BETTER than any other. Strongest and best. Kills both by vapor and contact ALL vermin whether on the walls of the poultry-house or on the body of the fowls. Also a powerful disinfeetant. Disease germs can not live whcre Lee's Lice Killer is used regularly. Sizes: gallons, half-gallons and quarts, at $\$ 1.00,60 \mathrm{c}$. and. |
| :---: | :---: |
| Lee's <br> Egg Maker | The perfect substitute for ALL other forms of mcat food. Contains more DIGESTIBLE protein, costs less, and goes further, than beef scraps, bone, or any other meat food. Used by BIG breeders everywhere. Equally valuable as a Winter food for hens, for all penned-up poultry, and as a growing food for chicks. Four sizes: $100-\mathrm{lb}$, , $25-\mathrm{Ib} ., 51 / 2-$ Ib., and $21 / 2-$ Ib., that sell for $\$ 6.50, \$ 2.00,50 \mathrm{c}$. and. |
| Lee's <br> Germozone | A tonic; a bowel regulator; a system builder. The BEST preventive and cure for Roup, Cholera, Bowel Complaint, and most othcr poultry diseases. In more general use today than any othcr poultry medicine ever manufactured. Given TWICE A WEEK in the drinking water to ALL fowls, it kceps them in prime condition. No poultryman should ever be without Gcrmozone. One size only. . |
| Lee's Insect Powder | Is thoroughly efficient for any purpose for which an inseet powder is desired. Especially recommended for use on setting hens, or by those who have only a few fowls and prcfer to treat them in this way. Also good for pct animals. Prepared in $21 / 4-\mathrm{Ib}$. siftertop box that sells for.. |
| Lee'sWhite Diarrhoea Remedy | Is the BEST remedy for this dread germ disease which has killed so many chicks in reeent years. We believe it is the best cure and preventive of White Diarrhoea ever discovered, and don't know of a single instance where it has not proved satisfactory. The dose required is smaII, insignificant. One size only.... 0 C treatment simple, and cost |

## Supplies

We wish to call your especial attention to our Quality Poultry Foods, the quality of which is of the same high standard maintained for years in our Seeds, Bulbs and Plants.

All Quality Poultry Food Bags returned to us in good condition, prepaid, we will allow ten cents in trade, in anything we sell.

Prices on grains fluctuate with market.

Quality Mash Feed. Protein, not less than 20 per cent.; fat, not less than 4 per cent.; fiber, not more than 10 per cent. Ingredients: Corn meal, wheat bran, ground oats, wheat middlings, alfalfa meal, beef scraps, gluten, charcoal, oil meal. This mixture has stood the test for over six years without a change of formula. It is blended from only the best of grains, and insures the best of health and more eggs. 5 lbs. 15 c ., 10 lbs .25 c ., 25 lbs. 60c., $50 \mathrm{lbs} . \$ 1.00,100 \mathrm{lbs} . \$ 1.90$. 5 bags, f. o. h. Boston, $\$ 9.00$.
Quality Scratch Feed. Conta'ns various cracked grains so blended as to give the fowl the right proportion of each grain to produce the condition that will give the user the eggs. This mixture contains but a small amount of corn. 5 lbs. 15 c ., 10 lbs . 25 c ., $25 \mathrm{lbs} .60 \mathrm{c} ., 50 \mathrm{lbs} . \$ 1.00,100 \mathrm{lbs}$. \$1.90. 5-bag lots, f. o. b. Boston, $\$ 9.00$.

Quality Chick Feed. Composed largely of cracked wheat and oats. A very snall proportion of corn is used, as we believe too much corn a detriment to a young chicken's development. It contains not an ounce of anything but pure grains. 5 lbs. 20 c ., 10 lbs .30 c ., 25 lbs .70 c ., 50 lbs. $\$ 1.30$, 100 lbs. $\$ 2.50$. 5 -bag lots, f. o. b. Boston, $\$ 12.00$.

Quality Growing Feed. Blended from the developing grains and ground into a mash. Protein, 12 to 14.50 per cent.; fat, 3.50 to 4.50 per cent.; fiber, not over 9 per cent. Ingredients: Ground corn, ground barley, cotton seed, wheat mixed feed, rye shorts. We know from experience that it will start your pullets laying from 4 to 6 weeks earlier than other so-called forcing foods. 5 lbs.
 15 c ., 10 lbs .25 c ., 25 lbs .60 c ., $50 \mathrm{lbs} . \$ 1.15,100 \mathrm{lbs} . \$ 2.15$, 5 -bag lots, f. o. b. Boston, $\$ 10.00$.
Quality Intermediate Chick Feed. Same as the chick feed only not ground quite as fine. 5 lbs .15 c ., 10 lbs . 30 c ., 25 lbs. 65 c ., 50 lbs. $\$ 1.20$, 100 lbs. $\$ 2.15$. 5 bags, f. o. b. Boston, $\$ 10.00$.

Quality Pigeon Feed. Our peas in this mixture are grown especially for us and are small and plump. As are our other mixtures, it is blended for development and growth. 5 lbs .20 c ., 10 lbs .35 c ., 25 lbs. 75 c ., 50 lbs . $\$ 1.35,100 \mathrm{lbs} . \$ 2.35$. 5 -bag lots f. o. b. Boston.
Beef Scraps. We consider ground beef scraps almost indispensable for making hens lay during the Winter. Feed at least three times per week one ounce for each fowl, mixed with the daily mash. 5 lbs. 20c., 10 lbs. $35 \mathrm{c} ., 25 \mathrm{lbs} .75 \mathrm{c}$., $50 \mathrm{lbs} . \$ 1.55,100 \mathrm{lbs} . \$ 2.75$.
Edible Bone Meal. Made of steamed sweet bone pulverized. A fine article for growing or laying birds. 5 lbs .20 c ., 10 lbs .35 c ., 25 lbs .75 c ., $50 \mathrm{lbs} . \$ 1.30,100$ lbs. $\$ 2.50$.
Alfalfa Clover Meal. The Clover stock, leaf and blossom are all ground together so that the fowl gets all the substance of the matter entering into this carefully balanced food pmoduct. It comes nearest to nature of any grain and vegetable mixture. 5 lbs .20 c ., 10 lbs. 35 c ., 25 lbs .75 c ., $50 \mathrm{lbs} . \$ 1.25$, 100 lbs . $\$ 2.25$.

## POULTRY SUPPLIES-Continued

Hulled Oats. Hulled Oats are excellent for young poultry, especially ducks and turkeys; they are far superior to wheat, corn, rye or other grains, being easily assimilated and contain more bone and muscle making properties than other grains. 5 lbs .25 c ., 10 lbs .45 c ., 25 lbs. 80 c., 50 lbs. $\$ 1.65$, 100 lbs. $\$ 3.25$.
Parrot and Canary Feed. We make a specialty of Parrot and Canary feeds, which are mixed by us from direct imported seeds. Parrot seed: Qt. $10 \mathrm{c} ., 3 \mathrm{qts} .25 \mathrm{c}$., pk. $65 \mathrm{c} ., 1 / 2$ bus. $\$ 1.25$. Canary seed: 1 lb .10 c ., 3 .lbs. 25 c . 10 lbs .65 c ., $25 \mathrm{lbs} . \$ 1.50,50 \mathrm{lbs} . \$ 2.75,100 \mathrm{lbs} . \$ 5.25$
Oyster Shells. We handle the Baltimore shells recleaned. They contain no dust. 5 lbs. 8c., 10 lbs .15 c ., $25 \mathrm{lbs} .25 \mathrm{c} ., 50 \mathrm{lbs} .40 \mathrm{c}$., 100 lbs .75 c.
Mica Spar Grit. Has a sharp retained edge, thereby insuring perfect cutting and grinding qualities. Price 75 c . per 100 lbs.
Poultry Charcoal. Poultry keepers cannot afford to be without charcoal. It absorbs dangerous elements from the fowl's system and prevents many sicknesses. It comes in three sizes, coarse, medium and very fine. Price, 2 -lb. carton 10 c ., 50 lbs . $\$ 1.00$.
Dried Blood Meal. This is a highly concentrated form of animal food, rich in albumin and egg-forming material. It is odorless and contains only pure blood which makes it the cheapest animal egg food on the market today. Per 100 lbs. $\$ 3.50$.
Hen-e-ta. The only and absolutely sterile and germfree "phosphatic-poultry-food" on the market. If judiciously used, as per formulas herewith, will save its weight and cost in grains. In other words, 500 lbs . grain plus 150 lbs . Hen-e-ta will make just as many pounds of protein assimilable as would 650 lbs . of grains fed the " old " way, with oyster shells, grits, etc. Hen-e-ta thus costs little or nothing. A whole army of poulterers, who keep records of their feeds, will tell you so. Price $100 \mathrm{lbs} . \$ 2.25,500 \mathrm{lbs} . \$ 9.00$.

When using Spratt's Patent Pheasant Food and Spratt's Patent Pheasant Meal the birds grow to be strong, healthy and vigorous; they produce more eggsand eggs , that are fertile-and mortality among their " poults" is reduced to a minimum.
Spratt's Patent Pheasant Meal No. 5. For young pheasants.
Spratt's Patent Pheasant Food No. 3. For adult birds. Price, 5 lbs. 40 c ., 10 lbs. 75 c ., 25 lbs. $\$ 1.50,50 \mathrm{lbs} . \$ 2.85$, 100 lbs. $\$ 5.50$.
Spratt's Poultry Food No. 3. A cooked food. The best and cheapest on the market. Is prepared strictly according to modern scientific methods and is the result of exhaustive experiments. It is neither a medicine nor a condiment, but a well balanced ration, specially prepared to produce eggs. It doubles the egg production, improves the quality and flavor of the egg, enriches the color of the yolk, increases the number of fertile eggs, and strengthens the germ. 5 lbs. $40 \mathrm{c} ., 10$ lbs. 75 c ., $25 \mathrm{lbs} . \$ 1.50$, $50 \mathrm{lbs} . ~ \$ 2.85,100 \mathrm{lbs} . \$ 5.50$.
Spratt's Chicgrain. Is a perfectly balanced insect and vegetable ration; easily digested and highly nutritious. It is a compound of grains, meat, milk, etc.; the original formula has been used and improved upon for more than twenty years. Price, 5 lbs. 30 c ., 10 lbs. $50 \mathrm{c} ., 25$ lbs. $90 \mathrm{c} ., 50 \mathrm{lbs}$. $\$ 1.60,100$ lbs. $\$ 3.00$.
Spratt's Patent Chick Meal No. 5 and Chick Meal No. 12. This is a substitution for insect life in addition to its other advantages and thereby reduces mortality to a minimum, saving ten times its cost and frequently the cream of the flock. Price, 5 lbs .40 c ., 10 lbs. 75 c ., 25 lbs . $\$ 1.50$, 50 lbs . $\$ 2.75$, 100 lbs . $\$ 5.25$.
Spratt's Dog Cakes. Price, lb. 10c., 25 lbs. $\$ 1.75,50$ lbs. $\$ 3.25,100$ lbs. $\$ 6.50$.
Spratt's Puppy Cakes. Price, lb. 10c., 25 lbs. \$1.90, 50 lbs. $\$ 3.60$, 100 lbs. $\$ 7.00$.
Diarrhoea Remedy. 50c.
Rat Killer. 25c.
Sulphur Candles. 10c.
Song Restorer. 10c.
Loose Catnip. 10c.
Lambert's Death to Lice. Sizes: 5 oz. 10c., 15 oz . 25 c ., 48 oz. $50 \mathrm{c} ., 100 \mathrm{oz} . \$ 1.00$.
Head Lice Ointment. 3-oz. tins 25c.

5 -bag lots of mixed grains put f. o. b. Boston. Prices subject to market fluctuations. Quotations gladly given on application.
Clover Cutters. Cut any quantity of Hay or Clover, either dry or green. Every revolution of the balance wheel produces twelve cuts. Price, with balance wheel, $\$ 8.00$; with balance wheel on iron stand, $\$ 10.00$.
Clover Cutter, Stearns. Designed for small poultry growers, $141 / 2 \mathrm{in}$. long, 5 in . wide. Works perfectly $\$ 3.50$
Bone Cutters, Mann's. The feed is both automatic and self-governing. Drop the bone into the open cylinder; there is no packing, no fussing, no bother, no arrangement; you simply toss in the bone on one side or both sides of partition as you like, drop the follower in place, clasp on the feed handle and you are ready, with both hands free to help each other if you so desire. No. 5 C with crank handle. Price $\$ 6.00$.
No. 5 B with balance wheel. Price $\$ 8.00$.
No. 5 BM with balance wheel mounted on iron stand. Price, $\$ 10.40$.
The above are all the same size hopper intended for flocks of from 15 to 25 hens; simply different in the mount.

No. 7. Mounted on stand, intended for flocks of from 40 to 100 hens. Price $\$ 12.00$.
Larger sizes if you wish, for power machines.
Waterproof Sheeting for Poultry House. Better than windows and far healthier for your fowls. Per yd. 10c.
Sanitary Stone Drinking Founts. Easily kept clean; chicks cannot tip them over. 1 qt. 25 c ., 2 qts. 30 c., 4 qt .40 c .
The "Over-All" Water Holder. There is no material equal to stoneware as a receptacle for drinking water. 6 qt. $30 \mathrm{c} ., 8$ qt. 40 c .
Easy Access Fountain. Made in two sections, thereby making it easy to clean. The hood prevents the water from becoming fouled. It can be hung against walls or from beams. Price, $2 \mathrm{qt}$.50 c ., 4 qt . 60 c ., 8 qt . 85 c .
Sexton Sanitary Drinking Fountain. A fountain with all the good features. Easily cleansed and nothing to get out of order. One size only. 4 qts .60 c . each.
Dome Top Chicken Fount. Especially adapted for young chicks. Made of heavy galvanized iron in two parts. The round top prevents their roosting on top. Price, 1 qt. 20c., 2 qt. 25 c ., 4 qt. 35 c .
3-Cylinder Hopper, for Sheel, Grit and Charcoal. Is made of heavy iron and galvanized after it is made. Will not clog and we believe it to be the best self-feeding hopper made. Price, 75 c . each.
Knox Medicated Nest Eggs. A combination of nest egg and lice killer-retains its power until fully evaporated. They keep the nest clean and sweet. Price, 5c. each, 50 c . per dozen.
Porcelain Eggs. These eggs are of best flint glass. White. Each 3c., doz. 25c.
Philadelphia Poultry Marker. Made in two sizes. One for chicks, one for fowl. Price, each 25 c .
Lever Poultry Puncher. One of the most satisfactory punchers used. Price, 25c. each.
Philadelphia Caponizing Sets. Increase your profits by caponizing the surplus birds. Prices from $\$ 2.50$ to $\$ 7.50$ per set.
The Boston Hopper. Made of galvanized iron. Hopper holds $1 / 2$ bus.; enough for 20 hens one week. Price, $\$ 1.00$ each. Boston Beef Scrap Hopper, ${ }^{90 \mathrm{c} .}$ each. Small Chick Hopper, $\$ 1.00$ each. Large Chick Hopper, $\$ 2.25$ each.

## POULTRY SUPPLIES-Continued

The "Over-All" Feeder. A very popular stone feeder. Inexpensive, easily accessible; feed cannot clog nor can birds waste it. 4 qt. 30c., 6 qt. $40 \mathrm{c} ., 8$ qt. 50 c.
Peerless Dry Food Hopper. Takes up no floor space, is not in the way of fowls, is inaccessible to rats. Eacl size furnished with cord and pulley. 8 qt. size $\$ 1.00$, 16 qt. size $\$ 1.50,32$ qt. size $\$ 2.00$
French Killing Knives. Made of finely tempered steel, with nickeled handle. Price, 50c.
Leg Band. Made of aluminum in sizes to fit any breed of birds. Quite a necessary article if the birds are to be kept from mixing up. Price, 15 c . per doz., 75 c. per 100.
Sexton Dry Feeder. Made of galvanized iron with swinging grid automatically holding in place until all is consumed; easily filled and rat proof. Hen size, $\$ 1.00$; chick size, 90 .
Egg Tester. The Mandy Lee is made so as to get the greatest possible value of the light. Price, each 25 c.
Pigeon Nests. Made of carthenware. Price, each 15c.
Tobacco Dust. For dusting nests. Price, 100 lbs. $\$ 3.00$.
Tobacco Stems. Price per bale of about $100 \mathrm{lbs} . \$ 1.50$, 50 lbs. S0c.
Thermometers for Brooders. Price 50c.
Thermometers for Incubators. Price, 50c. and 75c.
Sprayers for Using Liquid Lice Killer. Price, 50c.
Wire Hens' Nests. Price, each 15c., doz. \$1.50.
Feed Pan. It is so constructed that the food cannot be wasted; the saving thus effected will alone pay the price of the pan in a short time.

Chick size, 10 .in. long, $11 / 2$ in. deep, 4 in. wide. Price, 25 c .
Half grown Chicks or Pigeons, 18 in. long, 2 in. deep, $41 / 2$ in. wide. Price, 40c.
Full grown Fowl, 24. in. long, 3 in. deep, 6 in. wide. Price, 70 c .
Stone Chick Feeder. One size, each 15 c .
Egg Box, Anderson. Made of corrugated paper with double faced corrugated paper partitions protecting each individual egg; folded flat in shipment. Price, No. 3, 1 sitting, $\$ 1.15$ per doz.; No. 4,2 sitting, $\$ 1.90$ per doz.; No. 5, 50 egg, $\$ 2.75$ per doz.; No. 6, $100 \mathrm{egg}, \$ 4.50$ per doz.
Live Chick Box. Made of corrugated paper throughout. It is lighter and much more convenient than the wooden boxes, and in some instances the amount saved on the express charges alone will pay for the box. It is shipped to you folded flat, very easily set up. Price, 25 chick size, 12 in. x 6 in. x 5 in., $\$ 1.25$ per doz.; 50 chick size, 12 in. $x 12$ in. $\times 5$ in., $\$ 1.50$ per doz.; 100 chick size, 24 in. x 12 in. x 5 in., $\$ 2.50$ per doz.
Poultry Shipping Coops. 1 bird, 40 c . each; 2 bird, 45 c . each; 4 bird, 60c. each.
Perfection Shipping Crate. Holds 12 to 15 fowls. $\$ 1.00$ each.
The Fletcher Egg Shipping Case. 15 doz. size, $\$ 1.00$; 30 doz.. \$1.25.
Wire Fence. Our Hexagon Wire Fences are dipped in galvanized fluid after weaving, so do not rust easily. At prices quoted here we can deliver at your freight station if shipped from the factory; otherwise, if shipped from Boston, prices are f. o. b. Boston in lots of less than 200 lbs . 200 lbs . or over we deliver at your freight station.

## ROYAL POULTRY AND RABBIT FENCE Designs, 2158, 2053, 1948

Stays, 6 inches apart. Rolls, 10 rods each. Designed especially to meet the urgent and growing demand from
all sections for a thoroughly good and efficient poultry fence. Strong, substantia! and adequate for gardens, orchards, yards and all places where it is desirable to confine or kerp out poultry or other small animals. This fabric is not a light netting but is a substantial fence which, if properly erected, will not fail to bear out all and more than is claimed for it.

## The Barrie Forcing Frame

The Barrie Forcing Frame is the result of visiting one of our leading gardeners and seeing home-made frames in use on the estate; the idea seemed good; the results are surprising. It was easily seen how he could prodnce regetables in the operil in adsance of his meighbors.

Vnder these frames, corn, cabbage, cauliflower, lettuce. curumbers, tomatoes, melons, eqg plant, pte.. as well as all tender flowers, can be started and grown in the open groumd and brought to maturity much carlier than usial.

The frames placed over rlmbarb or other permanent plants, either regetable or flowers, greatly hasten their maturity in the Spring.

Lettuce, ete., can be grown under or protected bs the frames through the late Fall.

Excellent for the starting of tender flower and regetable seeds for transplanting into the open gromed.

The frames also protect their contents from the ravages of the entworm.
Placed over bulbs in the Spring, in the small garden. blooms of greater perfection may be had much earier than usual.

The evidence of Mr. Barrie's successful cultivatio

Small plants nearly ready for transplanting, having grown in the Barrie Forcing Frame in the open ground in March and April

Barrie Forcing Frames put on the market for the

Lettuce growing and heading under a Barrie Forcing Frame

## French Bell Glasses

For growing all kinds of early vegetables or flowers out of doors and under individual miniature greenhouse. The plants are started early and transplanted out of doors. One of these Bell glasses placed over them in the daytime amounting to a miniature greenhouse will protect them at night from the frost. It is a common sight in France among the private estates to see 20 to 100 of the Bell glasses scattered over the gardens protecting plants in different stages. Heretofore we have always imported these from France. The transportation breakage has always been a drawback. This year we have made arrangements with a large glass manufacturer to have these made here and we are prepared to fill all orders promptly and ship from Boston or factory, thus insuring practically no breakage.

Each \$1.25, per doz. \$12.00.
